# EDW. G. ALLEN'S London Agency for American Libraries

28 HENRIETTA ST., COVENT GARDEN, LONDON.

## Special Notice to Librarians.

Mr. E. G. ALLEN desires to lay before you the advantages of using this Agency for procuring English and Foreign Books, Magazines, Periodicals, etc., and for General Library Work in Great Britain.

Long existing relations with the Booksellers and Publishers of the United Kingdom enable him to execute orders of any magnitude promptly and economically. All important books collated before delivery.

Specialty is made of the finding of Out of Print Books. His success in this department is unrivalled, possessing unique means of search, by which he is able to supply scarce books expeditiously and at moderate prices.

A good selection of Second-hand Dealers' Catalogues is sent to clients by every mail, and no commission charged on orders from them.

New Books supplied on the most advantageous terms, and the Full Trade Discount allowed off the published price.

Auction Catalogues Mailed, Sales Attended, and Commissions Executed with Care and Judgment.

Defects of Rare Books Reproduced in Facsimile.

Long Sets of Scientific and Other Periodicals Supplied. Imperfect Sets Completed.

Large consignments sent by fast steamers at through rates. Small orders can be sent by mail or by express system at low charges.

Special note is kept of all continuations of serials, which are forwarded immediately on publication.

Bookbinding in every style, Cheap and durable for library use. Dilapidated old binding skilfully repaired. Pamphlet binding at specially cheap rates.

Should you at present be without the services of a London Agency, MR. ALLEN would be pleased to answer any inquiries. All orders receive his personal attention, and with an experience of forty years in library business, and the thorough equipment of his agency, he believes himself capable of meeting every library requirement in a satisfactory manner.

**References permitted to first-class Libraries.**

**Special terms for large orders.**

**FOUNDED IN 1856.**

# THE LIBRARY JOURNAL

VOL. 26.

JANUARY, 1901.

No. 1

THE closing year of the 19th century, notable incidentally for the excavation of the great library at Nippur, antedating all previously known collections, has been characterized chiefly by the culmination of national and international conferences. All the world was asked to meet at Paris, and with the exception of England most library countries sent delegates to the Library Congress in connection with the Paris Exposition, at which also the American Library Association exhibit of American library methods and the Belgian exhibit of the Brussels card catalog and repertory were important features. At Mayence, Germany celebrated the five hundredth anniversary of Gutenberg, who made librarianship possible, including an interesting bibliographical exhibit. At the other end of the world Australasia held its second library conference, and decided that the time had come for an annual instead of a biennial convention. The Library Association of the United Kingdom met at Bristol, but the chief English event of the year was the final decision upon the "International catalogue of scientific literature," originated by the Royal Society and now developed on a plan of international co-operation, the first fruits of which will be the annual catalogs for 1901 in 17 distinctive fields of scientific literature.

FOR the first time in its history the American Library Association met outside the limits of the United States, and an important result of the conference at Montreal, which brought over four hundred librarians from both sides of the border, was the organization of a Canadian library association for the province of Ontario, which will hold its first meeting this year at Eastertide. The meeting of the National Association of State Librarians at Harrisburg, though small in number, was important in outcome, and the conference of the American Library Association at Waukesha, Wis., in July of 1901, should bring together a larger number of state librarians at their simultaneous meeting, as well as many teachers who will concentrate in the West for the

annual meeting of the National Educational Association at Detroit, immediately succeeding the A. L. A. conference. New state associations have been formed in Missouri and Kansas, making now 21 in all, and the New York Library Association has taken an interesting step in setting apart a "library week" for a meeting at Lake Placid as permanent vacation headquarters. To the Massachusetts Library Club has been added a third auxiliary in the Cape Cod Library Association, and a Long Island Library Club has been organized in Brooklyn. Iowa and New Jersey have established state library commissions, so that 17 states are now on the roll of honor, and the travelling library system is understood to have outreached into 42 states.

ANOTHER feature of the year has been the reorganization and consolidation of library systems, made possible in part by the provision of new buildings. The appointment of Mr. Putnam as Librarian of Congress has already borne abundant fruit in the national library, and the ready appreciation of Congress has been shown by the appropriation of \$513,000 for that library for the current year. The New York Public Library made preliminary arrangements for including besides the Astor and Lenox libraries on the Tilden foundation the many branches, with their independent buildings, of the Free Circulating Library. In the Brooklyn borough of New York most of the smaller outlying libraries have been brought within the fold of the Brooklyn Public Library, although unfortunately the method of organization of that library precluded there the utilization of the greater collections which in New York proper made the foundation of the new system. Mr. Foster has crowned his splendid work at Providence by the great enlargement of the functions of its library made possible by its magnificent new building; and the new home of the Wisconsin State Historical Society is the first worthy monument of that great appreciation of historical literature which has been so notable a feature in the later develop-

ment of our western states. The gifts and bequests of the year provide many new buildings in the future, although the year does not compare for phenomenal generosity with 1899. Mr. Carnegie's gifts during the year exceed, nevertheless, an aggregate of \$800,000,

---

UNDER the new constitution of the A. L. A., operative at the Montreal conference, the Publishing Board, as it is now called, took a new lease of life, and the most important line of progress in the field of publications has been in the completion of the plans for printed catalog cards, by help of the co-operation of the Librarian of Congress, which it is hoped will be the bibliographical feature of 1901. A great impetus was given to this feature of co-operative cataloging by the interest manifested at the Montreal meeting, and by the work of the Brussels Institute in a similar direction. The British Museum has entered upon its great undertaking of supplementing its printed catalog by the record of the accessions since the publication of the original work, and the Bibliothèque Nationale has made further progress in the printing of its enormous catalog. There is a fair number of individual bibliographies, among which Campbell's "Index-catalogue of Indian documents in the British Museum" and the catalog of the Dante collection of Cornell University are especially entitled to mention. These, and the plans for the "International catalog of scientific literature," above referred to, make the chief bibliographical record of the year.

---

WITH the first year of the new century comes naturally a review of the century closed, and more or less attempt to prophesy for the century to come. The brief review given in this number of the general library situation as the new century dawns will be supplemented during the year by papers from librarians especially competent to treat of the several features of the library movement. It will be peculiarly of interest to learn what those librarians who have done the best work in the 19th century look forward to as the work before themselves and their successors in the 20th, and we hope to give in a later number a symposium covering this interesting field.

A PRINTING bill has been introduced into the House of Representatives as a substitute for the Senate bill, on much the same lines as the latter, but in shorter form and with some improvements; and if action is to be had during the present short session of Congress, librarians should at once bestir themselves to endeavor to stimulate interest in these measures. Either of them is worthy of support, and the passage of either would result in better service for the depositories, and therefore of the public, and in a better system of the manufacture and utilization of public documents. Superintendent Ferrell's work in the Document Office, like that of his predecessor, has been fruitful of good and the passage of the printing bill would strengthen his hands and put at his disposal the facilities much needed to complete the organization of the system. Librarians should write at once to their Representative in the House and the two Senators from their state, asking their attention to the printing bill, as even should there be no prospect of the passage of the measure during the short and crowded session it will do no harm to show to Congressmen that there is continuing interest in the subject. The library of documents, connected with Supt. Ferrell's establishment, which library is under the special charge of ex-Supt. Crandall, has continued to develop, and it is to be hoped that some day it may find its proper place in the building of the national library, which would in turn be strengthened by the addition of what is really a remarkable collection of public documents considering the difficulties in the way of bringing together important sets and series which had been so ruthlessly despised and neglected previous to the foundation of this special library.

---

### Communications.

#### NEW YORK LIBRARY CLUB HANDBOOK.

THE Committee on Handbook of the New York Library Club has issued a circular letter to the libraries of New York City, requesting full information for the new edition of the handbook, now in preparation. Any libraries that should be included in the handbook, and that have failed to receive this circular, are requested to communicate promptly with the undersigned, chairman of the committee.

## LIBRARIES AND THE CENTURY IN AMERICA: RETROSPECT AND PROSPECT.

BY R. R. BOWKER.

RETROSPECT and prospect are the order of the day in this opening year of the twentieth century. In no relation of public activity, outside the advance resulting from scientific discoveries and mechanical inventions, has there been more remarkable progress during the nineteenth century than in the library field. While the nation has grown from 5,300,000 to 76,300,000 population, library development has outstripped even those extraordinary proportions. The library history of the century divides itself into three periods, the Dark Ages of the first half century, the Middle Age of the third quarter, and the modern period, 1876-1900. The transition from the first period to the second is to be noted in Prof. Jewett's work about 1850 and the library conference of 1853; that from the second to the third in the organization of the American Library Association in 1876, and the Government report and the beginning of library journalism in the same year. In 1800 the 29 "social" or general libraries known to have existed in 1776 had become 49, with approximately 80,000 volumes; and, including special and unrecorded libraries, it is safe to say that outside of private or school collections less than 100 libraries existed in the United States a century ago. In 1850 Jewett recorded, outside of the district schools, 644 libraries aggregating 2,144,069 volumes. In that first half century libraries were chiefly of private origin and organization, and the only library legislation of real significance was that based upon the New York school library laws of 1835, permitting each school district to spend \$20 for establishing and \$10 yearly for maintaining a free public library, and of 1838, appropriating \$55,000 a year for purchases for such libraries. Jewett's report recorded 9505 such libraries with 1,552,332 volumes, which seems an enormous overestimate; certainly, these libraries soon after rapidly disappeared, unused, into attics and remote corners. Peterborough in New Hampshire in 1833, the pioneer, and Orange and Wayland in Massachusetts in 1846 and 1848,

had established free public town libraries without warrant of law, before the New Hampshire act of 1849 (followed by the English act of 1850) and that of 1851 in Massachusetts authorized local taxation for free public library purposes, and in 1852 the Boston Public Library was definitely established after eleven years of discussion. From that dawn progress was made steadily until the definite beginning of the new movement in 1876. The Government report of 1876 recorded 3682 libraries of 300 volumes or more, numbering 12,276,964 volumes, besides over 1,500,000 pamphlets; and the latest Government registration scheduled for 1896 7191 such libraries, with 34,596,258 volumes.

It is safe to place the number at the close of 1900 at 8000 libraries, of 300 volumes or more (possibly 10,000 including minor ones), with 40,000,000 volumes, with realty and endowments known to exceed \$60,000,000 and probably reaching well towards \$100,000,000. At least six library buildings exceed \$1,000,000 cost. Our national library is housed at a cost for building and ground, of \$6,950,000, has just passed the 1,000,000 volume mark (including pamphlets), and has for the year 1901 an appropriation of \$513,553. The Boston Public Library, foremost of municipal libraries the world over, has cost for building and ground above \$2,500,000, has over 750,000 volumes, receives \$255,000 or more from the city and the income from \$273,000 of endowment, and circulated in 1899-1900 1,251,451 volumes on 63,695 "live" cards of borrowers. The Philadelphia Free Library, but seven years old, recorded in its last report the banner circulation of 1,758,851 volumes. These figures are significant indeed.

But the figures showing quantity, are far outdone by the facts showing quality, of development. The library and the librarian both have been among the best illustrations in the century of Herbert Spencer's definition of development by differentiation, from the homogeneous to the heterogeneous in func-

tion. A generation ago the chief library type was the "mercantile," or subscription, library, often with its associated lectures and classes, of which a surviving example is the Brooklyn Library, with its alcoved hall, its printed catalog which is the monument of the personal handiwork of its former librarian, its guiding principle of purchasing enough copies of a popular and proper book to meet its subscribers' immediate demands, its few undifferentiated assistants, and its general policy of *laissez faire*. The type of to-day is found in the free public library of scores of cities—the largest in Boston, the newest in Providence—in whose huge and highly organized building the great stack room allowing for indefinite future development, and the adjoining delivery room, are but one among the numerous features: for interior administration the executive offices of the chief librarian, the order, catalog, and shelf departments, and perhaps a printing office and a bindery; in external relations reference and special libraries and reading rooms for periodicals, newspapers, patents, documents, manuscripts, prints, music, etc., etc., for children, perhaps for the blind, perhaps for artisans, with librarians specially equipped for each division of books and for each kind of readers and the all-knowing "information clerk;" and finally dynamo room, ventilating apparatus, complicated delivery machinery, photographic dark rooms, lecture auditoriums, perhaps kitchen, lunch and rest rooms for the staff, public wash rooms, and even bicycle depositories—all this but the central ganglion of an outreaching system, including in Boston 31 branch libraries, delivery or deposit stations, and numerous relations with engine houses, public schools, city institutions, in connection with the "travelling library" system. For this highly organized work all sorts of mechanical helps are now provided; architects make a specialty of library buildings, constructing from within outward to meet the librarian's requirements; an enormous business has been developed by the Library Bureau and competing agencies in supplying shelves, cases, cards, etc., and even specially designed library furniture can be had.

The librarian, no longer the skipper of a dory in which he pulls an oar himself, but the commander of a huge steamer or the commo-

dore of a great fleet, must in the larger libraries be an executive of the first rank, truly a member of the executive profession, with little time to handle or read a book himself, but with ability to organize, administer, and direct a physical plant, a collection of books, a distributing system, and a regimental staff. Under him are officers, librarians, catalogers, and attendants of various ranks, abilities, and functions, some dealing with the book, others with the reader. The trained librarians, members of such a staff, recognize themselves as belonging to the library profession, alongside the profession of the teacher and the older professions of law, medicine, and theology; and for their training there are now four library schools—the first organized at Columbia in 1887—having already over 500 graduates, and numerous library classes.

The development of librarianship as a profession has led to, and has in turn been promoted by, the association and organization of librarians into national and state associations and local clubs, which have taken rank with the kindred educational and other professional organizations. The American Library Association, organized at Philadelphia in 1876, had an attendance at its latest conference, held significantly in Canada, of 450, and its membership has reached 800. There are 30 other library associations, state or local, and the New York State Association has now established a "library week" at a summer headquarters. The state librarians have their own national association. The missionary spirit has led to the establishment of state library commissions now in 17 states; and many states have library legislation, providing in some cases for donations from the state, perhaps to the extent of \$100 worth of books for the establishment of new libraries or the increase of others. The travelling library system, though but eight years old, has extended into 42 states, reaching out to the smallest communities the benefits of culture.

The librarian is no longer a book-keeper, but a book-missionary. It is his duty to compel readers to come in. He stimulates demand by supply of books and facilities; his question is no longer how many books his library has on its shelves, but how many it circulates from its shelves. Out of the half million dollar appropriations for the national

library \$61,000 only is for purchases, and out of the quarter million of the Boston Public Library from \$25,000 to \$35,000 goes for purchases—the chief expenditure being for the care and circulation of books. The librarian looks upon himself as the fellow worker with the teacher; he begins with the child, for the age limit in libraries has almost disappeared, and he continues educational work after the school period has closed. For the child he has sympathy as well as books; he is eyes to the blind; he shows the artisan that books are his best tools, and puts the drawing-board alongside the books. He will not only find the book for the reader but tell him in what book to find the information he seeks, or find for him any information contained in books. His modern card-catalog gives the clue to a book by author, title, class, or subject, analyzes the contents of books and even indexes articles in periodicals; a "repertory" on the Brussels plan is beginning to complement the card-catalog, showing what books are to be found in other libraries; he has at his service bibliographies and printed cards furnished by the Publishing Board of his association, as well as bulletins and special lists printed by his own and other libraries from time to time. If a book is not in his own library he will endeavor to borrow it from other libraries, far or near, for his reader. He goes out into the schools to make friends for his books among teacher and scholars; he fills with books the waste hours of men in engine houses and lighthouses; he sends travelling home libraries to give light in the dark places of tenement houses in the great cities. He is indeed the typical home missionary of the time, and the motto "The best reading for the largest number at the least cost" sums up excellently the moral, popular and economic relations of his work. To add the final word, librarianship has given a new profession for women; of the 53 members of the Columbia University Library staff, 48 are women, and where the librarian is spoken of as "he" it is to be read "she" nine times out of ten. Thus library progress, in answering the needs of the century, has contributed above all to the advancement of women.

The public in turn has appreciated keenly and amply the new relations of libraries. Massachusetts, the banner state, has public li-

braries in 343 of its 346 townships, for free use by the people, supported by public funds. In almost all the states, liberal appropriations are made by state, cities, or townships for library purposes. The library has also become *the* means by which men of riches recognize through public benefactions their indebtedness to the public. It is estimated that approximately \$25,000,000 have been given to public library purposes in the new period of library development. Mr. Carnegie gave in one year over \$3,000,000 to library purposes, and his total gifts bid fair to reach \$10,000,000. Throughout the country library buildings stand as the memorials of public-spirited citizens or as the monument of those who have passed. The library, almost more than the church, has become the people's temple, in which the rich and the poor meet together, as they meet in few other relations of modern life.

This is the record of libraries, in America, as the hand of the clock of time passes the century mark. What the twentieth century will bring forth, no prophet can foretell. It is difficult to imagine that the next hundred years can do more, if so much, in invention within the library field as has been done in the past twenty-five years. These past years have been those of pioneering; the years to come should be those of fruition. There is abroad a vast expectancy that the material development of the nineteenth century will be succeeded in the twentieth by a civic, social, and spiritual development, necessary indeed to correct and supplement the work of a material age. The triumph of machinery is to be followed by a triumph of man over machinery. To this possibility, and in this hope, no one is more alive than the librarian of to-day. He has developed a vast social machinery for the service of his fellow citizens; it will be his future mission to make sure that the machinery of the profession is subordinated to the large uses for which only it is of worth. Let us hope that one hundred years hence the recorder of progress will be able to say that in the progress of man during the twentieth century, the book, as brought by the librarian into the lives of the people, has accomplished the great work for which the librarian of the nineteenth century was the pioneer.

"HOW MAY GOVERNMENT DOCUMENTS BE MADE MORE USEFUL  
TO THE PUBLIC?\*"

BY ADELAIDE R. HASSE, *Chief of Documents Division, New York Public Library.*

ORDINARILY, when we speak of government documents, we think only of the documents of the federal government. We are not yet generally accustomed to the fact that, while the study of federal documents is by far the most extensive branch, it is only one of three branches of the study of government documents. This study, then, of government documents is nothing more or less than the study of modern government as expressed in its publications, and modern, *i. e.*, organized government, classified organically, is either federal, state or municipal.

So when we speak of government documents we should mentally extend the term to include city and state documents with those of the federal government.

How to make all of these publications more useful to the public is a large question, but one which I should be glad to have thoroughly discussed and generally understood, for a proper use of this material will have an important bearing upon the future of our written history. It is not necessary that I should point out to you the significance of this material to written history; that is evident, and has been concisely stated by the British historian who said: "The history of every corporation is bound up in its documents." What, then, prevents their usefulness? We have been most lavish in their circulation, and for years we have made unwelcome gifts of them, until federal documents are as cheap as firewood in popular estimation. And we can hardly do more than is now being done to popularize them, if that is what is meant by the phrase "useful to the public." And yet they could be made infinitely more useful, if we consider them from a larger standpoint than that of their mere present promiscuous distribution. They could be made more useful if we made them less popular, if we did not force them upon librarians who see in them only subjects for classification and shelving, and if, instead, we displayed their contents to the investigator by means of mono-

graphic aids, etc., as I will endeavor to illustrate for you, beginning with the federal documents.

There are at the present time, and beginning with the first session of the fifteenth Congress, *i. e.*, 1817, nearly 5000 volumes in the Congressional series. Preceding this date no one knows what is required to complete a set. There are traditions that this or that library has a good set of these early imprints, but no tangible evidence has yet been brought forward of the existence in any one place of even a fairly good set. The most complete collection which we have of the time is the reprint collection in the American State Papers. The editors confess in the preface, however, that theirs is only a selection of the documents then existing, intimating that even at that time they had knowledge of interruptions in the series.

It may be urged upon casual observation, that these early federal prints have very little value. I should be inclined to argue upon that point; in the first place, that is a distinctively American statement. We do not seem, as yet, to have the same archivist's appreciation that is so carefully fostered in continental countries. Before we assert the valuelessness of these prints we should pause a moment to reflect that all we have of original printed diplomatic, military and naval history from the beginning of the constitutional government is contained in these early documents; that from the time of the adoption of the federal constitution on through that interesting era of state development, all that we have of original printed history of the commonwealths in their relation to the federal government is to be found in these documents. Remembering these things, can we say the documents are of no value? They may seem to be of no value only when we have not fully comprehended their inherent significance. The new historical school which is growing up at the leading American universities is doing much to introduce a sense of this significance. It realizes that as a basis for its researches it must have copies of these early

\* Read at meeting of National Association of State Librarians, Harrisburg, Pa., Nov. 21, 1900.

documents, and it prints for itself such copies which should be comparatively accessible to the specialist. I would refer you to the work of Professors Hart of Harvard, MacDonald of Bowdoin, Ames of Pennsylvania, to the work of the Iowa Historical Department, etc.

At present the specialist, not to speak of the public, can make ready reference to these documents only as they have been reprinted in the American State Papers. From the time when this series ends and the regularly issued series of reports begins there is a long period of ill-arranged poorly-indexed material. Take, for instance, the records of our diplomatic history, than which there will be nothing more important to this country in the years to come. These records exist to-day in the most complete printed form in the six folio volumes of the American State Papers, covering the period from 1789 to 1828, and from this time up to the present in the Congressional series. From 1861 they have been collected in the annual volumes formerly called Diplomatic Correspondence, now Foreign Relations. From 1828 to 1861 they have never been collected for public use. During this interval, correspondence relating to our foreign affairs is issued in the form of documents accompanying Presidents' special messages. This means that either house of Congress wants enlightenment on some subject bearing upon foreign affairs, and requests the President to transmit such correspondence as has passed between the governments involved. In complying, the President transmits diplomatic correspondence which frequently covers as much as three years preceding the actual date of his message. The only clue to the contents of the correspondence is the brief calendar which goes with it. In the series index the document is entered as "Message of the President relating to," etc., although the message may be one of transmittal only. The really vital portion of the document is not indexed at all.

I had occasion recently to use some of this material relating to the northeastern boundary question. A certain letter written by Lord Aberdeen to the American plenipotentiary on August 14, 1828, has an important bearing on a phase of this question. This letter is one of a number of others transmitted

by the President in January, 1829. It is not indexed anywhere, and would hardly be found without a great deal of research by the historian of this prolonged controversy.

This sort of thing exists for nearly forty years, after which this material is collected in the already-mentioned series of volumes called Diplomatic Correspondence. Here, however, is included only that material properly considered as diplomatic, being those state papers which are the expression of negotiations of the State Department. Other documents, such as reports of the committees of the two houses of Congress on foreign affairs, are not included; therefore, even this collected series cannot be considered an entirely complete repository of material bearing on our foreign relations.

Of official compilations bearing on this subject we have in print the various editions of the collected treaties, Wharton's "International law," in 3 vols., his "Diplomatic correspondence of the American Revolution," which, however, antedates the period I am discussing, and the recent compilation on "International arbitration," by John Bassett Moore of Columbia. These latter are, however, commentaries, and it will be seen that we have as yet no publication corresponding to the British and Foreign State Papers, or the Archives Parlementaires.

This is not the place to speak of the rich collection of manuscript material in the State Department, to which manifestly general access could not be given, and which is now being published in the Bulletins of the Archives Bureau of that department.

The condition of our early printed documents relating to military and naval affairs, and to finances, is unqualifiedly similar to that detailed to you concerning our diplomatic documents. Each of these departments was established by the laws of 1789, and it is reasonable to suppose that a printed record of their official proceedings exists somewhere, and yet how difficult it is to trace back this record year after year, only those who have tried it know.

The first suggestion that presents itself as a solution is, that we must have a catalog. We have Poore's catalog. That was years in making, and it cost thousands of dollars. It would be next to impossible to get an ap-

appropriation for such a purpose at this time, and it would be quite impossible for the Library of Congress or the Superintendent of Documents to undertake any such work now. Besides, a catalog would not give us the books. What we need is, first, a combined record of the collections of the early federal documents now existing. Next we need a well-edited reprint of some of these early out-of-print documents, particularly of such as would complete series now current. And after we have a record of the documents and the documents, then let us have indexes to the documents.

This is one suggestion, then, how the early federal documents might be made more useful to the public.

The protest of inaccessibility cannot be made against the later federal documents. They have for years been dispensed with a generosity not met with in any other country. Had some of the money that in years gone by has been expended in printing and distributing enormous editions of Congressional quota, etc., been used for the preparation of guides, indexes and catalogs, it would not then be necessary for us to discuss how to make government documents more useful to the public.

What is needed now to counteract the ill-advised prodigality of the past is, first and foremost, an annotated checklist of serials, which shall show when the various issues began and in how many different places they may be found. A compilation of this sort should include all annual reports, all numbered series, such as bulletins, circulars, orders, notes, etc., even though, like the Ordnance Notes, they may not be printed for general distribution, of all government periodicals, like the Weather Review, or Experiment Station Record, even though they may have been discontinued before the publication of the checklist. There should be copious bibliographic notes showing all changes of form, etc. Such a checklist, in fact, one much more comprehensive, is in preparation in the Office of the Superintendent of Documents, as we have been assured in the last annual report of the superintendent.

Secondly, we need a catalog to fill the gap between the year when Poore ends his record, *viz.*, 1881, and that when Dr. Ames begins his, *viz.*, 1889. An appropriation for such a

purpose was made several years ago, and Dr. Ames is now at work on such a catalog, which will follow the plan of his "Comprehensive index."

Thirdly, we need people with the eye to see the wealth of material which is packed away in these volumes, and with the ability to so rearrange it that the historical worker may use it, unencumbered by the confusing habiliments of administrative routine. A rare faculty is required for such work. It demands a combined appreciation of the romance of history and of the uncompromising rigidity of the statistician. It requires a judgment that will subordinate the House ex. and House misc. business to bring into relief such tales, for instance, as that of Sieur Dubuque, the mineralogist, who sailed from France in 1774, and emigrated to the province of Louisiana, where he settled among the Indians near the site of the present town of Dubuque. To him these Indians "sold and abandoned all the coast and contents of the mine discovered by the wife of Peosta." This was the grant of the famed Spanish mines which was afterward confirmed by the Baron de Carondelet. Associated with Dubuque was Auguste Chouteau, and so was formed a group of names intimately connected with the beginnings of the history of the middle west. This and many, many similar tales are enclosed between the covers of an "ex." or "misc. doc."

The questions of classification, whether Dewey or Cutter or some other system, shall be used, or of shelving, whether by subject and embodied with the general collection, or kept intact as a series, are such as every practical librarian decides for himself. They are, after all, only side issues when the real usefulness of these books to the public is considered. The public would not be benefited, materially, either way.

What the public does need is people who understand the relation of this literature to the government. Not the finest cataloger ever turned out of school will be able to handle a document intelligently until he understands that public documents are, what in the beginning I tried to point them out to be, but an expression of the mechanism of government. A document clerk should therefore have a knowledge of this mechanism. He should know how the legislative body is

organized and be familiar with its routine; how the committees are organized and what are their functions; how the departments are organized and what the duties of their officers are. He must know these things before he can catalog documents intelligently, and he certainly must know them before he can use them himself or help the public to use them. I have seen document cards made by graduated catalogers, which were beautifully engraved with brackets and dashes and numbers and series notes, but which gave no hint of the character of the document which it was intended to catalog. This was caused solely by an improper understanding of government documents.

And not only is there this great wealth of historical material stored away in the Congressional documents, but there are special publications of the departments, equally valuable and equally disregarded because we do not yet associate the relation of the document with its government. Take for instance the orders of the military departments into which the United States are divided. In time of controversy the commanding general of a military department is vested by virtue of acts of Congress with plenary powers within the jurisdiction of his department. So the report of General Meade, commanding the Department of the South in 1868, when the reconstruction conventions were being held in Georgia, Florida and Alabama, contains much of interest relating to these bodies. So, too, the reports and orders of the commanding officers of the departments embraced within our new possessions contain practically all that we have of the beginnings of the American civil system in those provinces.

I am giving you these illustrations only to show you how far from the ordinary conception of public documents, is that one, the possession of which would really make them more useful to the public. Indeed, I am told of one librarian, high in authority, who said that if he were making a library to suit himself, he would have in it only documents and periodicals.

Enough has probably been said to demonstrate how much could be done to make federal documents more useful to the public.

Of state documents Bryce says: "American publicists have been too much absorbed

in the study of the federal system to bestow much time on the thought of the state governments. Yet they are full of interest; and he who would understand the changes that have passed on American democracy will find far more instruction in a study of the state governments than of the federal constitution. The materials for this study are, unfortunately, at least to a European, either inaccessible or unmanageable. They consist of constitutions, statutes, the records of the debates and proceedings of constitutional conventions and legislatures, the reports of officials and commissioners, etc. Of these sources only one, the constitutions, is practically available to a person writing on this side of the Atlantic. To be able to use the rest one must go to the state and devote oneself there to these original authorities. . . . It might have been expected that in most of the states, or at least of the older states, persons would have been found to write political, and not merely antiquarian or genealogical state histories. . . . But this has been done in comparatively few instances, so that the European inquirer finds a scanty measure of the assistance which he would naturally have expected from previous laborers in the field. I call it a field; it is rather a primeval forest, where the vegetation is rank, and through which scarcely a trail has yet been cut."

I am not able to speak with authority upon the comparative merits of the different state collections. I have not examined many personally, and few have printed catalogs. How far Mr. Bryce's criticism applies to individual states I am, therefore, unable to say. That, however, it was true of the time in which he wrote, that the materials for the study of state governments were inaccessible in that they were not collected together in any one place, I have no doubt. Few libraries ever will be able to afford large general collections of this kind. Not even the states themselves have always been keen enough to perfect their own files. Basing the estimate upon the present extent of the collection of state documents in the New York Public Library, it is probable that 50,000 volumes would be a fair figure for a full file of printed journals, documents, constitutions and statutes of the different states at the present time.

It is not necessary to point out to you the

difficulties that would beset the investigator in this library of 50,000 volumes were he left to make his researches unaided. The make-up of the volumes themselves is usually primitive, and the indexes to the journals and documents, whenever there are any, are unutterably bad. The statutes are, as a rule, in better shape; in fact, I seem to have observed that that state in which the legal element predominates in the legislative proceedings has a more satisfactory set of documents than the one in which representation is more general. However, here we have this library of 50,000 volumes, segments of which are scattered over the country, and all of it practically unworked material, confronting us with the question, what can we do to make it more useful to the public?

State documents naturally divide themselves into two groups, *viz.*, those issued by the older states before the establishment of statehood and known as colonial records, and those issued after that event. Of the newer states I should include the territorial documents with those issued after the period of statehood.

The study of colonial documents is a most extensive one in itself, and one whose importance cannot be overestimated. At present our printed records of this material consist of the files, more or less complete, of the original prints in public and private libraries, of the catalogs of collectors, of the reprints issued by some states, and of the several checklists which exist. Some of this material still exists only in ms. in the British archives. Georgia, only during the last session of her legislature, made provision to secure copies of Georgia records existing in London. During the last session of Congress Mr. Stokes of South Carolina introduced a bill in the House which provided for a report upon the condition of state archives, to be made under the auspices of the Manuscript Commission of the American Historical Association. The bill failed of passage, but at the same time it attracted a good deal of attention to the subject and much favorable comment was made upon the proposition. This same commission has undertaken to collect a record of colonial laws, and has printed a checklist in the annual report of the American Historical Association for 1897 of the co-

lonial laws of Nova Scotia, New Brunswick, Lower Canada, Upper Canada, Massachusetts, New Jersey, Virginia, North Carolina, South Carolina, Georgia and Tennessee.

Work in this field must necessarily be done with the co-operation of the collector, for the few copies of a law that may be extant are often in private hands, and unless access may be had to these copies for bibliographic purposes the public archives must go without so much as a record.

You observe that I lay great stress upon the fact that the curator of a set of government documents, be they federal or colonial or state, possess himself of a record of every known document belonging to that set; in other words, that he should be thoroughly familiar, above all things, with the bibliography of his subject. Knowing that, then he is prepared to proceed with the compilation of tools for the student and the investigator. The first of these, and upon which all the others depend, is a tabulation of legislative sessions, with dates of opening and closing; next a tabulation of journals and statutes and documents, and lastly a checklist of documents giving contents of the different volumes. These we need as a foundation in the work of making the documents of every state and territory in the Union more useful to the public. Much has already been done, but the work is scattered, being usually printed in out-of-the-way places, or in such small quantities that it is practically unavailable. This work needs to be brought together, to be made uniform and completed. The more accessible lists, disregarding such tools as Tower and Sabin and the sales catalogs of private collections, are as follows: For laws and constitutional material the printed catalogs of such general collections as the New York State,<sup>1</sup> the Bar Association of New York City,<sup>2</sup> and the Pennsylvania State Library<sup>3</sup> catalog recently issued, and the catalog of documents issued by the Michigan State Library.<sup>4</sup> For special lists of state constitutions and laws there are Baker's bibliographical account of the Wisconsin constitutional conventions,<sup>4\*</sup> Kansas constitution in Kansas Historical Society collections, 1899; in Owen's<sup>5</sup> and Cole's<sup>6</sup> Alabama; in Raines' Texas;<sup>7</sup> Weeks' North Carolina;<sup>8</sup> in Coles' Iowa,<sup>9</sup> Florida,<sup>10</sup> Mississippi<sup>11</sup> and Arkansas;<sup>12</sup> in Williamson's Maine; Gil-

man's Vermont; Bartlett's Rhode Island; Reports of the State Librarian of Pennsylvania for 1889 and 1899; First Report of the Public Record Commission of New Jersey;<sup>13</sup> Bongartz's checklist of Rhode Island laws; Checklist of Maryland laws;<sup>14</sup> Whitmore's Bibliog. sketch of laws of Mass. colony;<sup>15</sup> Bates' Colonial Laws of Conn.<sup>16</sup> Of checklists of general state publications we have California;<sup>17</sup> Howe's descriptive list of Indiana;<sup>17</sup> Kansas territorial publications, followed by state publications;<sup>18</sup> Maine;<sup>19</sup> New Hampshire;<sup>20</sup> Iowa;<sup>21</sup> Ohio;<sup>22</sup> Pennsylvania,<sup>23</sup> etc. In this connection such compilations as Bryan's "Local government in the District of Columbia"<sup>24</sup> and Kincaid's "Oregon"<sup>25</sup> are very useful, as are also the tables of state and territorial sessions and lists of departments that may be found in many of the legislative manuals and directories. I have no doubt there is a great deal of similar material that I have not mentioned, and in this connection I would offer the suggestion that this association co-operate in the compilation of such a list of aids to state publications.

The second charge of Mr. Bryce, that we have no political, *i. e.*, legislative state histories, we must admit to be true. We have none. Judge Brevard outlined such a history for South Carolina in his "Observations on the legislative history of South Carolina" in the first volume of the Statutes at Large of South Carolina. When my attention was first attracted to Mr. Bryce's remark I examined such of our state histories as were not wholly a mass of anecdotes and reminiscences, and I concluded that he was right, quite right. Even in the most modern histories there is little space given to the legislative history of state governments, the very framework of the state. We are not told whose was the voice that commanded organization, who dissented, how out of this grew factions and parties which influenced legislation, affected emigration, etc., until out of it all the modern state was finally produced. Instead our state histories are a disconnected narrative of topographical, commercial, biographical and antiquarian lore. And yet we know that the very elements out of which an adequate state history must be composed are to be found only in the legislative proceedings of that state. Then, my friends, a great work needs to be done, and it is to make, repeating the

words of Mr. Bryce, our state records more manageable and accessible. It may be, if this is done by the curators of state documents, that they will be instrumental in introducing a new element into our historical literature.

It would seem to me wiser to proceed at once with consultation as to the best means by which to bring about such a result, than to waste time in lobbying for reform legislation as to methods of printing, of binding, etc. I believe that improvements of this kind will come about naturally as soon as the material is being worked. At least that was the case with the federal documents. The secrets of this jungle of literature will be unfolded whenever we, the foresters, will open up paths and byways where the student may wander with his lens and note book.

Of the last branch of government documents, *viz.*, municipal documents, least can be said, because least has been done. I suppose it is within the province of a state library to collect the documents of cities within the state. I do not know whether it is generally being done. If it is without the province of a state library to do so, then the state library can at least urge the public libraries within the state to make and keep a file of city documents. The basis of such a collection are the various charters, the ordinances, and the annual reports.

As I close I feel that perhaps I have not been sufficiently practical, not definite enough about detail, etc. On the other hand, I must confess that it has been my experience that all troublesome questions of cataloging and of detail adjust themselves very readily as soon as I acquaint myself with the nature of the documents, and also that this acquaintance is only born of constant study, and of hard plain work.

## THE PROBLEM OF THE DEPARTMENTAL SYSTEM IN UNIVERSITY LIBRARIES.

BY WILLIAM WARNER BISHOP, *Librarian Polytechnic Institute, Academic Department, Brooklyn, N. Y.*

THERE has recently taken place in Chicago a discussion which so well illustrates the complexity and difficulty of the problems confronting a university library in relation to its departmental collections that a full report of it should be given to the library profession. Few who read what follows will deny that the conditions which govern university and college libraries are essentially different from those under which public and reference libraries are conducted. And to most librarians it will be clear that the latter meet less difficulty in the way of satisfying their constituency than do the former. This discussion of departmental libraries and their relation to the general library and to each other has been reported in the *University Record*, published weekly by the University of Chicago, for Nov. 9 and 16, 1900.

It may not be amiss to recall a few well-known facts concerning this university and its library system. The University of Chicago was formally opened to students in 1892. At this time, or soon after, the libraries of the Baptist Union Theological Seminary at Morgan Park and of the old University of Chicago were transferred to the university and became the nucleus of its present library. A large collection, some 175,000 volumes, was bought in Berlin, while the purchase of new books was at once begun. Temporary quarters for the general library were erected in the shape of the one-story brick structure, which continues to be its home. In these eight years the university has grown steadily in numbers of students and instructors. A system of departmental libraries shelved in different buildings sprang up almost simultaneously with the foundation of the general collection.\* The general library contained, in January, 1900, 225,000 volumes, the departmental libraries, 26 in number, 73,720

volumes. Considering the character of the Berlin collection it is not too much to say that the strength of the library for working use lies in its departmental collections.

This situation is unique. The other universities of the county, with a few possible exceptions, had libraries before departments, in the modern sense, and highly organized laboratory work in books were known. The departmental library system where it exists in such institutions has been an offshoot of the general library. In the University of Chicago, whatever their theoretical relation, the two have grown up side by side, and we might almost say, independently. The results, as might have been expected, appear under entirely different aspects when regarded from the point of view of the teaching specialist, the student from outside the university, and the administrator. The regulations governing the use and administration of the departmental libraries as they appear on pp. 97-101 of the "Annual register" for 1899-1900 are well worth the study of every student of library economy. The main point for us to notice here is that the university library includes, and its officers control, all the books in the general and departmental libraries, despite their separation and the various regulations governing loans, credits, etc.

The present state of matters is apparently not regarded as ideal, and the University Congregation, an advisory body composed of the faculties, certain doctors and other alumni of the university, has had the whole question of the relation of the departmental and general libraries under discussion. The planning for a building for the general library has apparently influenced and perhaps started the consideration of the subject. At a meeting of the Congregation held about three months since, the subject, which had been limited by a previous decision to continue the departmental library system, but to consider its details more fully, was again taken up. The reports presented are fully given in the is-

\* An article describing "The departmental libraries of the University of Chicago," by Mrs. Zella Allen Dixson, librarian, appeared in the *LIBRARY JOURNAL* for Nov., 1895 (*L. J.*, 20:375).

sues of the *University Record* for Nov. 9 and Nov. 16. These reports were made by committees appointed from the groups of libraries to make recommendations concerning the relations of these libraries to the general library. The reports submitted were in substance as follows:

The Classical group recommended:

1. A departmental system essentially the same as the present one, with the exception that a special reading and study room be provided for junior college students.

2. That the advantage of all library users would be best met by a general library, which should be supplemented for the chemical group by a departmental library of moderate size, consisting of a complete series of texts and important reference books. The needs of current advanced courses would be met by withdrawing from the general library, for the period of a given course, such books as the instructor might select, as, for example, works on Latin epigraphy, etc., etc. The current numbers of all journals in all departments should be accessible in a central reading room (as at Columbia, Harvard, and Johns Hopkins).

The Modern Language group made the following report:

1. The close relationship of the modern languages with the subject-matter of several other departments renders desirable the highest degree of centralization in the arrangement of the University Library, consistent with the best interests of the individual departments. In the absence, however, of an adequate central library building, and of a building for the use of the modern language group, it seems to the committee unwise to attempt the transfer of books from the libraries of these departments to the present General Library.

2. In case funds for the erection of a suitable central building were forthcoming, the committee would recommend the removal to such building of all books now in departmental libraries, except those whose only suitable place of deposit is the laboratory. The integrity of the departmental libraries should be maintained as far as possible, in the transfer, and the needs of undergraduate and graduate work should be met by the construction of a sufficiently large and suitably equipped reading room and of seminary rooms for the several departments, with free access from the latter to the stacks containing the books.

3. The committee recognizes the possibility of important considerations, like the conditions attendant upon the raising of funds, that might make this sweeping centralization impolitic or impossible. It seems, however, that even so, the library policy of the University should be one of centralization. The largest convenient groups of related depart-

ments should be housed either under a single roof or in adjacent buildings, and the needs of instructors, graduates, and undergraduates should be met as effectively as possible by the library arrangement adopted.

The committee representing the libraries of the Divinity School, Semitic languages, and Comparative religion, recommended:

1. That a suite of rooms be set apart in the General Library building, for the departments above named, such suite to include a reading room to afford accommodations for at least 100 readers, shelf room in this reading room or in adjoining stacks accessible to students sufficient for 50,000 books, three or more seminar rooms for the use of the six departments concerned, which may also be used by persons carrying on special investigations.

2. That there be maintained in the Lecture Hall building of these departments a limited library of the books likely to be in most constant use by students in connection with ordinary class work.

3. That the library referred to in 1, above, be organized as the departmental library of the group of departments in question, and that referred to in 2, as a branch of it.

4. That the branch library be subject to the following regulations:

(a) No book shall be permanently assigned to the branch library of which there is not a duplicate in the General Library building.

(b) Books needed for use in connection with particular courses may be, on request of a professor, transferred from the departmental library to the branch library for a period not exceeding three months, or from the General Library of the University in accordance with existing regulations.

5. That until a General Library Building capable of providing substantially the facilities above referred to is provided, the departmental libraries in question remain in the departmental building, and that they shall in no case be merged in the General Library.

In the recommendation of this plan the committee beg leave to suggest:

1. That it is a return in principle to the plan originally announced for libraries in departmental buildings, making them consist wholly of books of which there are duplicates in the General Library building, thus securing the advantage of libraries in immediate connection with class rooms, without sacrificing the great advantage of having all the library resources of the University in one central building.

2. That the placing of the main departmental libraries in the central building, or the organization of such portion of the books of the departments as are in the general library into a departmental library, is a modification of the original plan which the experience of the advantages of the departmental system has shown to be desirable.

3. That this plan meets the needs and recognizes the interests alike of students doing chiefly ordinary class-room work, of those pursuing advanced investigations, of the general university body, and of investigators from abroad.

From the Historical group it was recommended:

1. That the departmental library system should be retained.

2. Somewhat less general emphasis is placed upon departmental *control* of the libraries. It is thought, however, to be a needed guarantee not only of availability for instructors, but also of the largest practicable liberty of access to books for students.

3. So far as compatible with 1 and 2 there is desire for a maximum of concentration of libraries and uniformity of administration. If the financial and architectural problems could be so solved as to provide for the libraries of this group contiguous space in a general library building, with adequate seminar rooms and space for readers, the members of the group would apparently agree that the advantages of such an arrangement would probably offset the inconveniences of having the lecture rooms in another building.

4. Whether the location of the libraries remains as at present, or is removed to a central building, their most obvious and pressing need is expert supervision. The books are so miscellaneous and yet so variously related that all the students in this group need to learn the contents of each of the libraries. The classifications are not, and probably never will be made uniform, for reasons that are primarily pedagogical. Without the superintendence of a person who adds to knowledge of library methods somewhat extensive acquaintance with the bibliography and methodology of all the departments in the group, the books must lose a very large percentage of their possible value.

The Philosophical group:

The departments recognize the great advantage of bringing all the separate libraries into a single library. Close proximity to the libraries of the Social and Historical group is of especial importance. On the other hand complete departmental control over their libraries is felt to be the consideration of the highest importance. The experience of the past has demonstrated an educational value that is hardly to be over-estimated in the access of all students to the libraries. And the freedom in the use of the books under these conditions compared with the restraints which any large library must employ has multiplied many times the value that the libraries would have had under a non-departmental system. It is felt furthermore that there is a danger of losing these advantages through the centralizing tendencies of administrative and library control, if a single library building only is provided.

If the departments can be assured of the maintenance of their present control over their own libraries and the free access of their students to the libraries of allied departments they will advocate a single library building which should include two seminary rooms for the use of these two departments.

The Mathematical group:

Ideally we should have an astronomical campus observatory provided with a large central library and mathematical model room from which should open at least two smaller working seminar rooms and with office and working rooms for members of the staffs of astronomy and mathematics.

As to the relation to the general library it is hardly necessary to state that the libraries of the two departments are practically used exclusively by the students of the two departments.

The Biological group recommended:

1. That upon the erection of a suitable General Library building, a separate room be assigned to the Biological Library in which shall be kept books and journals of a general character.

2. That suitable arrangements be made for telephonic communication between the General Library and the biological departments, and that a speedy transfer of books from library to laboratory be made practicable.

3. That such special books and periodicals and sets of periodicals as are needed by a department for constant use, and are deemed essential by the department immediately concerned, be kept in each laboratory building as a branch of the departmental library.

4. That the books in such branch libraries be rendered easily accessible at all hours, and that provision for the adequate supervision of these branch libraries be considered an indispensable preliminary to their establishment.

From the other groups came recommendations of a like tenor. The Chemistry group finds that the independent maintenance of the chemical library "is absolutely indispensable for advanced work and for research in chemistry," though it is willing that "full sets of the proceedings and journals of general scientific interest be kept in the general library; that a reference shelf containing books of interest to those who are taking undergraduate work in chemistry, be maintained in the general reading-room of the general library;" and "desires that the plan of having in the laboratory a shelf for special books needed for consultation in connection with undergraduate laboratory work be continued." The Physics group also considers a departmental library "indispensable in the department of Physics," and favors "a library system which shall leave in the department libraries whatever books are considered by the department

concerned as necessary;" while the Geology group reports "most unqualifiedly in favor of a departmental or group library that shall embrace essentially all the literature pertaining to the group, so far as practical considerations will permit. The committee are convinced that in this way alone can the highest value of the library be secured. In their judgment, not even an approximation to its real value can be obtained by associating it with the general library in a building more or less distant from the libraries, museums, relief maps, and other material appliances of the department with which the most advantageous use of the library is inseparably connected."

After the presentation and discussion of the various reports a resolution was offered, providing "that the Congregation having approved the maintenance of the departmental library system further expresses its judgment:

1. "That the departmental libraries of all groups, except those named in 3, below be placed in the General Library building, maintaining their independent existence as departmental libraries.

2. "That for all departments for whose departmental libraries are placed in the General Library building, there be maintained branch libraries in the Lecture Hall buildings of these departments.

3. "That certain science departments to be hereafter named continue to maintain their main departmental libraries in their departmental buildings."

The resolution was not adopted, but was referred, with the reports of the various committees, for consideration and recommendation to the Board of Libraries, Laboratories and Museums.

Probably the librarian who reads the foregoing recommendations will note before all other matters one against which his professional pride and business convictions cause him to rebel instinctively. The sense of possession, of ownership, of control, so strongly manifested by these several "groups" will strike him at once as a new factor in his problem, and by no means an agreeable one. He is tempted to think at once that whatever advantages accrue to the department from such a state of things must be won at a distinct loss of efficient and economical supervision and direction. No librarian, probably, would consent to responsibility minus power in such cases were the conditions definitely foreseen and set forth at the moment of his assuming control. The fact that these discussions have taken place in Chicago as a re-

sult of such conditions shows the inherent weakness of the system.

The most noticeable feature of the suggested plans is an entire absence of any consideration of the cost of administration. It does not seem to have entered into the discussion at all. Not a single department states this factor as one of the considerations underlying its recommendations. Perhaps they have given an idea of what they want and think proper, leaving the cost to be considered later.

There is indeed some reference to the possible difficulties of an architectural nature. But there seems to have been no realization of the very great demands which were being made on the architect. Librarians and architects have not always been bosom friends, but when one tries to sum up these requests our heartfelt sympathy goes out to our architectural brethren. To carry out on any adequate scale the arrangements proposed for separate suites of rooms—remember that ten groups are represented—to provide stack rooms and sufficient reading room space (one group alone wants a private reading room for 100 readers), to build so as to secure the large measure of freedom of access to the shelves here most properly set down as necessary, and withal to make provision for a reasonably rapid growth in all departments; this presents to the architect a problem indeed alarming in its exactions. Still, notwithstanding all this, the suggestions are of very great value to the student of library architecture. No university library in this country is ideal, and few of them are even moderately successful. It is a good thing to have the legitimate demands of faculties for a central reading room, a general stack, special collections, reasonable access to books, and numerous semi-private study rooms set forth distinctly and forcibly. However ironically the man with a practical knowledge of the difficult and intricate problems involved may smile at the complacent way in which the seemingly impossible is demanded, we may be sure that we shall never move far in the right direction until we endeavor to satisfy these requirements.

The advantages of the system of shelving departmental libraries in separate buildings are extremely evident from a study of these plans. The problem of satisfactorily cataloging, classifying, making and taking inventor-

ies, repairing, binding, and effectually supervising collections so scattered in different buildings, to say nothing of the expense made necessary by this arrangement, of the inconvenience of necessarily varying regulations, and of the difficulties of classification, calls for an expenditure of executive ability and vital power entirely in excess of the benefits received from the system. That these benefits are indeed great is shown by the testimony of the Philosophical group in particular and by the strongly expressed determination from several groups to part with none of the rights now enjoyed.

It should be obvious to any student of the problem that the books in a university library should be purchased on the recommendation of the faculties, with a provision in addition for some sort of a general fund; that all the processes of preparing a book for the shelves should be in the hands of the library staff, together with all repairs, rebinding, and binding of periodicals; that access to the shelves should be as free as possible, and should certainly extend to the departments in which a graduate student is working and to allied departments (personally, I should go much farther than this even in a very large library); that supervision by persons expert in library economy and having a good knowledge of the contents of the books of at least one department should be provided for all special collections; and finally that some provision should be made for the continued return of volumes as they become antiquated to the general collection in order to keep departmental collections within reasonable limits.

It may not be superfluous to add that the fears expressed regarding "centralization" seem utterly unreasonable. If centralization meant any less efficient service, any increase of expense, any considerable loss to faculty and students, it should be opposed most vigorously. But it should and of right ought to mean the exact opposite of all this. Centralization in management, and even the physical concentration of books in one building must produce economy of time, of money, and—always providing a sane architectural plan is secured—greater convenience to the largest number. A distrust of the central administration on the part of the faculties of a university is perhaps not unnatural. But it is by no means inevitable or logical.

The final decision of the questions raised by these recommendations should be of no little interest to librarians of educational institutions. It is by no means probable that the decision when it is made known will commend itself to all of them. And yet it will be of great service to have on record these views of the various faculties, faulty and crude as some of them are. The librarian is essentially a server. When he serves a small and highly organized community, it is of the very highest importance to him to know what is expected of him by those for whose interest he works. Most librarians will have no difficulty in pointing out the weak places in the foregoing recommendations. But these very defects should prove a warning to the directors of university collections. On the other hand, useful hints abound in these reports. When the limit of cost and size of the central library building are once determined, the architect should be able to embody many of these suggestions in his plans.

Discussions such as the foregoing show the complicated nature of the task of the librarian of a university, and indicate many of his difficulties. If for no other reason they form a decided contribution to the literature of library problems.

---

#### REPORT OF THE LIBRARIAN OF CONGRESS.

THE report of the Librarian of Congress, just issued, for the fiscal year ended June 30, 1900, is a record of development and of broad planning for the future. The accessions for the year are recorded as 38,110 books and pamphlets, 778 manuscripts, and 3536 maps and charts. To the music department there were 16,605 additions, and 14,048 are registered for the print department. There were 5300 serials currently received. The total contents of the library are given as 995,166 v. and pamphlets, 27,278 manuscripts, 55,717 maps and charts, 294,070 pieces of music, and 84,871 prints.

The administrative force of the library was practically reorganized on the basis of the estimates submitted by Mr. Putnam in his last annual report. Appointments to the 96 new positions created were practically completed before the close of the fiscal year 1900, and the general routine of the library was established on a broader and more effective basis. Regarding these appointments, Mr. Putnam says: "On April 17, 1900, there were on file 805 applications for employment in the library received since April 5, 1899, the be-

gining of the present administration. From among these the requisite number were selected whose qualifications seemed appropriate for the particular positions to be filled. These were appointed on probation and given opportunity to demonstrate their capacity in actual work. Their employment was to be temporary and was to cease at the close of the probationary period unless then continued by their retention and confirmation in the regular service. The probationary period was therefore itself to be an examination. It was not an open and general examination, for the opportunity to undergo it was limited to the selected few. But the selection itself was upon a presumption of fitness raised by the previous education, experience and character of the applicant as set forth in his application and credentials. And in general this presumption has been sustained by the actual test." For the coming year, the librarian's estimates provide for 26 additional catalogers, "bringing the catalog force on July 1, 1901, up to a total of 72 employees. (It is proposed to reach a maximum of 84 by July, 1902.) They provide also for an increase of salary in 18 positions. In 10 of these the purpose is simply a readjustment which will equalize the compensation with that already paid in other positions similar in responsibility."

Special effort was made to extend on systematic lines the purchase of books, as a result of the increased appropriations for this purpose. To this end Mr. Putnam's European trip was arranged, with a view to improving facilities for exchange, and the establishment of additional sources of supply. Of importance in the year's record was the establishment in the library building of a fully equipped bindery, conducted as a branch of the Government Printing Office, with which is connected a small printing plant for the printing of catalog cards, forms, and minor library publications; these two departments, though installed too late for results to be evident, are regarded as of much importance in developing efficient service.

The work of the various departments is reviewed. In the catalog department, "with more liberal provision for works of reference, with the foundations laid for three main catalogs, with the principles and rules largely decided on and systematized, the new force installed and gradually becoming familiar with the work and attendant conditions, prospects for healthy and rapid progress during the coming year have materially improved." From the Division of Bibliography there have been issued three special lists, dealing respectively with colonization, trusts, and inter-oceanic canal routes; and various lists on other topics were prepared in typewritten form; while the map department was responsible for a printed "List of maps and views of Washington and District of Columbia in the Library of Congress."

The use of the library, through the main

reading room, has shown a considerable increase. The number of readers recorded was 123,844, as against 121,270 for the year preceding; and 364,396 books and periodicals were supplied for reference use, as against 297,662 in 1898-1899, this increase of 22 per cent. being in spite of the fact "that from Jan. 22, 1900, the opening of the periodical-newspaper room attracted hundreds of readers by its proffer of use without formality." Mr. Putnam adds, "The service of a library such as this is not to be measured by the number of readers nor by the number of books issued. An ample answer to a single inquiry may be of more importance to Congress and to the community than a hundred ordinary books issued to a hundred ordinary readers. In service to scholarship the unrecorded use may far exceed in value that which may be made matter of statistic." In the reading room for the blind 173 readings and 38 musicales were held, all conducted by volunteers. "The interest in this work is widespread, and its influence, by example, extends far beyond the limits of Washington."

The report of the Register of Copyrights, which forms appendix 4, gives the following statistics: The total number of entries of title was 94,798, of which 86,438 were titles of productions by residents of the United States, and 8360 productions of other persons; the total fees for these entries were \$51,579. "The various articles deposited in compliance with the copyright law, which have been receipted for, stamped, credited, indexed, and cataloged during the fiscal year amount to 141,444 (a gain of 21,301 over the previous fiscal year);" of these, 6550 are classified as "books proper," 5073 as miscellaneous articles entered under the term "book," 8851 as newspaper and magazine contributions, and 14,147 as periodicals. "The titles filed for record are carefully indexed, each entry having a card under the name of the proprietor; and books, periodicals, dramatic compositions and maps have, in addition, title or author cards. These index cards, numbering 122,148, become part of the permanent indexes of the copyright office, and are also used in the copy for the 'Catalogue of title entries' required to be printed weekly." The growth in the volume of copyright business continues steadily from year to year, and has been exceptional for the period recorded. Mr. Solberg says: "The total entries as compared with the total entries of the last fiscal year show a gain of 13,830 entries, or a little more than 17 per cent. This growth in the entries is a nearly exact index of the increase in the whole work of the copyright office. While there is an increase in the total copyright business from year to year, it fluctuates greatly from month to month and from day to day, and this great variance from one day to another is one of the difficulties to be met in the administration of the office. The least number of entries made in any one day was 99, while the great-

est number of entries made on any one day reached the sum of 3788." The general status of the work of the office is concisely reviewed, and it is gratifying to note that with the aid of the special force provided by the appropriation act of April 18, 1900, it has been possible for the office "to eliminate the principal arrears in current work, and also to make a good beginning in the work of properly arranging the material prior to July 1, 1897."

In connection with the report, it is interesting to note that an amendment has been introduced into the Appropriations bill, in accordance with recommendations from Mr. Putnam, which provides for the appropriation of \$12,000, "or so much thereof as may be necessary," for extra service to enable the Library of Congress to be open on Sundays for reference use, from 2 until 10 p.m. The Appropriations bill, as reported in the House on Dec. 4, makes provision for the following additional force for the library: Additional assistants in the catalog and shelf division, one at \$1000, two at \$800 each, six at \$720 each, two at \$600 each, and four at \$480 each. In the Copyright Office, two additional clerks at \$1400 each and two at \$800 each. For the custody, care and maintenance of the building and grounds, five additional charwomen at \$180 each. For expenses of exchanging public documents the appropriation is increased from \$1680 to \$1800. For miscellaneous and contingent expenses the appropriation is reduced from \$8500 to \$7300. For furniture the appropriation is increased from \$45,000 to \$55,000.

#### REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

THE report of the Superintendent of Documents, recently presented, states that during the fiscal year ended June 30, 1900, a total of 674,714 documents were received from the various government departments, libraries and exchanges, while 706,595 documents were distributed, of which 217,562 were assigned to designated depository libraries, and 92,717 to miscellaneous libraries. There were left on hand a total of 364,818 documents.

The general demand for public documents has been greatly stimulated by the distribution of price lists, the monthly catalogs and other means, and the consequence has been that in many cases editions have been exhausted by the orders received in two or three days. Mr. Ferrell is therefore of opinion that "there should be authority lodged somewhere to order the reprint of documents when the public demand is large enough to justify it, if the plates have not been destroyed." A clause to this effect has for this reason been introduced in the pending bill for amendment of the printing act, where provision is also made for the removal of the re-

striction by which only one copy of any document may be sold to any one person—a restriction which "is the cause of much annoyance and vexatious delays to business men throughout the country, while it really affords no protection to the government against any one who may choose to take the trouble to evade it."

The redistribution of duplicate or undesired documents returned from libraries has been an important factor in rounding out document distribution, and it is estimated that in the five years since the establishment of the Office of Documents "nearly half a million volumes of documents have been rescued from ultimate destruction and placed in the files of libraries that can use them to advantage." It is pointed out that the bulk of this redistribution now goes to libraries that are not regular depositories as most of the depositories have completed their files, so far as practicable, in this way; and that the growing increase of applications for documents is now mainly from public institutions, and school and college libraries.

In addition to the work of distributing documents, the activities of the office have included the publication of the "Consolidated index" for the third session of the 55th Congress, and of the regular issues of the monthly catalog, which has been improved by the introduction of the cumulative feature into its index. Cumulation covered a period of six months only, and consolidation of the index of the whole year is made in the December number.

Mr. Ferrell makes suggestions for the improvement of the service rendered by the office, several of which are embodied in the amendatory printing bill, noted elsewhere. He recommends that the mass of surplus documents reserved for binding upon orders from the Vice-president, senators and representatives, and stored away unused, should be bound by the Public Printer in good cloth binding, and made available for distribution to school, college and public libraries; that an exact record of the list of depository libraries be presented to the Public Printer at the beginning of each Congress, and that the number of documents intended for their use conform to this record, the present printing order of such documents being limited to 500 copies, though the depositories now number 510 and the list is subject to farther expansion; that libraries once established as depositories should have the permanency of that designation assured; and that, to meet a large public demand, the publication of a subscription edition of the monthly catalog be authorized, to be sold at 60 cents a year. The importance of the bill now pending, for the amendment of the existing public documents law, is emphasized, and its prompt consideration and adoption are urged.

To the document library maintained in the

Document Office there were during the year accessions of 5458 volumes, giving a total of 37,168. Mr. Ferrell refers to the "growing need for a national library of official public documents," and suggests that such a library should be developed from the collection of his office. He thinks that sufficient space for its development on national lines could be arranged for, "either at the new Printing Office building or in the proposed Hall of Records."

ANDREW CARNEGIE'S GIFTS TO AMERICAN LIBRARIES IN 1900.

THE main source of library extension in the United States in 1900, as in 1899, was the public beneficence of Andrew Carnegie. Mr. Carnegie's gifts to American libraries during the year, as recorded in the columns of the LIBRARY JOURNAL, reached a total of \$815,100, distributed among 27 different cities and 13 states. This record does not include the generous gift (of a sum not made public) which permitted the attendance of representative American librarians in charge of the American Library Association exhibit at the Paris Exposition; nor does it note three gifts to Scottish libraries—£2000 to Lockerby, £5000 to Greenock, and £10,000 to Hawick; while it is probable that the list, even for the United States, is not entirely comprehensive of gifts that have not had public record. In several of the gifts here enumerated the cities in question have not yet formally accepted the conditions, which are the usual ones that a site be furnished and that the city guarantee a maintenance fund amounting in most cases to 10 per cent. of the sum given; and in the case of York, Pa., Mr. Carnegie's offer was refused, as adding an undue burden of taxation. The list is as follows:

Davenport, Ia.....	\$50,000
Emporia College, Kan.....	50,000
Pittsburgh (Pa.) Carnegie Library.....	10,000
Chillicothe, Mo.....	25,000
Coal Center, Pa.....	50,000
Covington, Ky.....	40,000
East Orange, N. J.....	50,000
Houston, Tex.....	50,000
Leavenworth, Kan.....	25,000
Ottumwa, Ia.....	50,000
San Antonio, Tex.....	50,000
York, Pa.....	50,000
Blairsville, Pa.....	15,000
Boston Public Library.....	100*
Bradford, Pa.....	25,000
Grove City, Pa.....	30,000
Muncie (Ind.) Workingmen's Library...	500
Chartiers Township, Pa.....	1,500
Huntington, Pa.....	20,000
Ironwood, Mich.....	12,000
Wilkinsburg, Pa.....	50,000
Waco, Tex.....	1,000
Dubuque, Ia.....	50,000
Fort Dodge, Ia.....	30,000
Tuskegee (Ala.) Institute Library.....	20,000
Chattanooga, Tenn.....	50,000
Pekin, Ill.....	10,000
Total.....	\$815,100

\* Annually, for the Galatea collection of books relating to women.

THE AMENDED PUBLIC DOCUMENTS BILL.

THE pending bill for the amendment of the Government Printing Act of Jan. 12, 1895, was introduced into the House of Representatives on Dec. 20 by Representative J. P. Heatwole. The bill has been considerably amended from the form in which it was presented to the Senate in February, 1900, though the alterations are chiefly in the line of condensation, and the rearrangement of sections.

Among the new features of the bill are the provision of 600 copies of bound documents and reports for distribution to depositories, as against 516 copies in the Senate bill; the removal of the limitation that no more than one copy of any document shall be sold to the same person; and the permission to sell to applicants electrotypes of relief-plate illustrations appearing in government publications, at cost of metal and making and 10 per cent. added. The provisions given in the Senate bill for systematic numbering, and distinctive binding, etc., of documents are included in revised and more specific form; it is provided that the "Consolidated index" shall be printed "for each session;" the edition of public laws in slip form is raised from 150 to 725; and the section providing that the libraries of the agricultural and mechanic colleges shall be depositories is altered and improved in form.

CONSOLIDATION OF NEW YORK LIBRARIES.

ARTICLES of agreement merging the New York Free Circulating Library into the New York Public Library—Astor, Lenox and Tilden foundations, were approved by the directors of the Free Circulating Library on Jan. 8, 1901, and were agreed to by the trustees of the Public Library, on Jan. 9. The articles are still to be submitted to a meeting of the members of the Free Circulating Library, after 30 days' notice, but after ratification by a two-thirds vote at such meeting, a call for which has already been issued, it is understood that the legal formalities will be quickly completed and the Public Library will promptly take charge of the Free Circulating system. The agreement has been drawn under the same law by which the Astor, Lenox and Tilden foundations were merged into the Public Library. It seeks to secure the continual maintenance of the libraries which are trusts, and to prevent the failure of any bequest by will to any one of them. By it the Free Circulating Library will become an integral part of the Public Library, under the general direction of Dr. Billings. The agreement is so framed that other libraries can come in under its provisions, and it is believed that this will be done by several of the other institutions carrying on free circulating library work. Among those regarded as likely to enter into the consolidation are the St.

Agnes Free Library, the Aguilar Library, the Harlem Library, and the Washington Heights Free Library. Full details of the equipment and activities of these libraries and the Free Circulating Library were given in the statistical table prepared for the New York Public Library, and reprinted in the LIBRARY JOURNAL, October, 1900, p. 637, 638.

#### SIZE MARKS FOR CLASS NUMBERS

IN using the card catalog as a pathfinder to the shelves, it is both natural and logical to reason and act as follows: This reader wants Mrs. Frackleton's "Tried by fire," a title new to me; possibly a religious book; probably, however, a novel. I must consult the catalog. Here is Frackleton and here is "Tried by fire." Both guesses wrong; china-painting is the subject. I see the class number is 738. All books in that class are arranged by their book numbers, and as book numbers are simply library short-hand for authors' names, I can find this book just as quickly from Frackleton as if I were to take time to look at the book number and jot it down. Several readers are waiting for me. I'll go straight up to the 738 shelf in the northwest corner of the third gallery and get it. But my trip to the shelves does not give me the book, and I see that there is no vacant place from which it could have been taken. "Did I make a mistake in the class number?" I go back to the catalog and take a second look at the card. "No, I was not mistaken. It is 738. What, then, is the matter? Oh, I see; the *book number* is not F42, but qF42, which means that the book is in the southwest room in the attic." I climb up to the attic, mentally consigning all over-size nuisances to the flames.

Now, if the class were written q738, the first thing to meet the eye would be the warning over-size mark, "*This book is not on the regular shelves!*" The time and strength of attendants and the time and patience of readers would be spared. Is there any good reason why the size mark should not be thus written? We are addicted to the practice of prefixing to the class number a j for juveniles and other letters for special collections not shelved with the regular books. Our custom of prefixing the q or the f to the book number is unscientific, illogical, misleading, unnecessary; it tends to thwart and defeat the main purpose of notation. If classification is a means of bringing together into one place all books on the same subject, and if notation is a means to insure the speedy finding and the sure return of books to their places, it is clearly illogical to separate from the class numbers the marks which indicate that the class has been split into halves or thirds, according to height of the books, and shelved in different parts of the building. Call numbers are simply the home addresses of the books; the class number corresponds to the

state; the book number to the village or town. To prefix q or f to the book number is exactly like writing West Bedford, Virginia, when we mean Bedford, West Virginia.

This is a small point, but when we remember that even the smallest libraries have over-size books, that the present method is explicitly taught in the most widely-used library text-book in existence (A. L. A. catalog, p. xviii), and that every q or f so placed is more than likely to make wasted steps, the little point becomes worth consideration.

It is easy to say, "You should always look at the full card number, every figure and every letter of it." Certainly, that is true as things now are, and after countless stumbles over the inconsistency of present practice, doubtless every one will at last learn to do it. But a scheme of marking books which requires one to look through two lines of characters before he can tell in what room in the building the book is placed, is not an ideal scheme. The class number tells that much in the great majority of cases. Why not in every case? The runner is justified in assuming it always does tell it.

Since it is logical to prefix the q or f to the class number, unscientific to put it anywhere else; since it will be far more convenient and no more expensive of time, space or money, to put it there, why not put it there, and thus in a great measure mitigate the over-size nuisance?

FREDERICK W. ASHLEY.

#### American Library Association.

*President:* Henry J. Carr, Public Library, Scranton, Pa.

*Secretary:* F. W. Faxon, 108 Glenway street, Dorchester, Mass.

*Treasurer:* Gardner M. Jones, Public Library, Salem, Mass.

*23d General Meeting:* Waukesha, Wis., July 3, 1901.

#### A. L. A. PUBLISHING BOARD.

The A. L. A. Publishing Board has issued the following circular regarding its plans for the issue of printed catalog cards for current books:

The Publishing Board of the American Library Association, encouraged by the interest manifested and the support promised at the Montreal conference, has carefully considered, with the aid of the Advisory Committee chosen to co-operate with it in this matter, the possibilities of securing and issuing to libraries printed catalog cards for new books and for some classes of older ones. The Publishing Board now announces that arrangements with the Library of Congress, under the provisions of the Government printing act, will enable it, unless unforeseen obstacles prevent, to provide for the selection and distribution of catalog cards for American copyright books, as prepared by the copyright and

catalog divisions of the National Library, after consultation with the A. L. A. committee on cataloging methods.

In carrying out these arrangements, it is not the intention of the Publishing Board to accumulate profit, but only to provide a safe margin for the cost of selection and handling for a system of distribution which cannot conveniently be undertaken by the Library of Congress or the Government Printing Office.

It is hoped that it may prove practicable for the Librarian of Congress to furnish hereafter complete sets of cards for all "books proper" (approximately 7000 in 1900) — which term includes pamphlets but excludes trade catalogs and such publications and newspaper articles — at a subscription price based on the cost of duplication and the margin of 10 per cent. acquired by the printing act; but it is evident that, while the opportunity to obtain these complete sets will be welcomed by some libraries, it will not meet the requirements of many others because it does not permit selection of titles on the part of the library.

The Publishing Board proposes to buy from the Library of Congress a number of copies of each card printed, varying within certain limits according to the expected demand for the title. In selling these again to libraries and permitting the libraries to select the titles which will be useful to them, a large margin of unused cards must be provided for, and since this margin of waste diminishes in proportion to the number of titles ordered by each library, the price per title should diminish with the number of titles per year taken by the subscriber. It is not practicable to receive subscriptions for less than 500 cards, since the waste would make the cost prohibitive, or to rebate in case all the titles are not taken within the year.

The Publishing Board will receive subscriptions for the year 1901, *payable in advance*, covering one card for each title, at the following rates, each library receiving cards only for such titles as it shall designate:

For 500 titles at 5 cents per title... \$25.00  
 For 1000 titles at 4 cents per title... 40.00  
 For 2000 titles at 3 cents per title... 60.00

Duplicate cards for any title, ordered with the original order for that title, will be supplied at the price of  $\frac{1}{2}$  cent per card. A later order for additional cards will be charged as a new order, *i. e.*, at 5, 4, or 3 cents for the first (additional) card, and  $\frac{1}{2}$  cent for other copies.

It will facilitate the arrangements if the advance payment includes a deposit for duplicate cards the library expects to order. Bills for the additional cards will be rendered monthly or quarterly.

Orders for titles desired by any library may be designated,

(1) By the copyright entry number used in the weekly copyright bulletin, which can

be ordered from the Government at \$5 for the year; or,

(2) By author and short-title memoranda of current American copyright books;

Or, the subscription may be for a selection of a stated number of titles (500 to 3000), the selection to be made by the agent of the Publishing Board.

Besides the use of these cards for cataloging proper, they will be useful for purchasing memoranda, for charging use, and for many other purposes, and each subscriber may order as many duplicate cards for each title as his system of cataloging and other uses demand. The subscriber has the option of designating the number he needs with each title as he orders it, or ordering a stated number of cards for all titles, or of receiving the number of cards usually required for the complete cataloging of each book, as determined by the agent of the Publishing Board.

It is hoped to supply the cards in both the standard sizes (Postal and Index), and libraries should state which size is required. It is expected to supply all books bearing the copyright date of 1901, but none preceding that date. As soon as the new system is assured, the present issue of cards for books will be discontinued.

It is estimated that the total cost of procuring and handling these copyright cards should not exceed \$5000 a year, and the Publishing Board is prepared to enter upon the undertaking, probably beginning with the copyright entries of 1901, provided subscriptions to the amount of \$4000 are received.

Please assure the Board of your intended co-operation by filling out and returning *at once* the postal card herewith. If the responses justify the Board in completing the proposed arrangements, definite word as to payments, etc., will be forwarded promptly to each proposed subscriber.

Later announcements will be made of the plans of the Publishing Board for furnishing printed catalog cards for current imported books and other lines of cards. Address,

A. L. A. PUBLISHING BOARD,  
 10 $\frac{1}{2}$  Beacon Street, Boston, Mass.

This circular has been sent to a selected list of libraries that it was thought might become subscribers. Any library that has not received the circular and desires to consider the plan, should address the A. L. A. Publishing Board. The request of the Board for prompt reply should be regarded, as delay in the final decision, arising from lack of response from dilatory libraries, might make it impossible to include all the copyright books of 1900, or might even lead to the abandonment of the plan because of lack of proved support.

Meantime, a special committee on cataloging form, with Mr. Hanson, of the Library of Congress, at its head, has been at work upon the style of entry.

## State Library Commissions.

**NEW HAMPSHIRE STATE LIBRARY COMMISSION:** A. H. Chase, secretary, State Library, Concord.

The New Hampshire Library Commission devotes the December number of its attractive bulletin mainly to an excellent paper by Charles Stuart Pratt, on "Public libraries and children," originally presented at the September meeting of the New Hampshire Library Association.

**NEW JERSEY PUBLIC LIBRARY COMMISSION:** H. C. Buchanan, secretary, State Library, Trenton.

In the 2d annual message of Gov. Voorhees to the state legislature, reference is made to the state library commission established by the last legislature. It is pointed out that "the legislature failed to provide funds to meet even the incidental expenses for stationery and printing, and the commission are 'unable to make such a report of results accomplished as should be possible, in view of the field that is before them and condition of public library affairs in New Jersey.' In the cities of the state great interest has recently been shown in the subject of public libraries. The work projected by the commission lies within the smaller towns, of which New Jersey has 129, with a population exceeding 750, that are without a public library of any kind. A small appropriation is recommended for incidental expenses to enable it to begin work during the present fiscal year, and consideration should be given to its further needs."

**WISCONSIN FREE LIBRARY COMMISSION:** F. A. Hutchins, secretary, Madison; Miss L. E. Stearns, librarian, Milwaukee.

The Wisconsin Free Library Commission has issued its third biennial report, for the two years ending September, 1900. The record of new libraries established, supported by municipal taxation, includes 25 towns; in five more towns libraries have been accepted from local associations, and conducted as free public institutions; and free libraries owned and maintained by institutions have been established in eight places. "The total number of free public libraries supported by municipal taxation and controlled by municipal boards has increased from 47 to 76, or 60 per cent." There has been an increase in attractive library buildings, notably those of Kenosha, Oshkosh, Marinette, Lake Mills, and Stanley.

During the period recorded the officers of the commission have mainly directed their activities to the strengthening and improvement of existing libraries. Their work has been aided by the additional appropriation of \$3500 yearly, and by the resulting addition of another active officer, in Miss Cornelia Marvin, as library instructor and director of the summer school. The report is marked by a

spirit of thoroughness and sympathy, and it indicates that the machinery of the commission is well organized and effective. The work of travelling libraries for counties and districts has been encouraged, the total number of such libraries in operation in August, 1900, being 238, of which 54 were wholly in the charge of the commission. The magazine clearing house conducted by the commission has developed beyond expectations, and has been now carefully systematized. "It is safe to say that during the past six months the commission has aided the public libraries to complete for their shelves 510 volumes of such periodicals as *Harpers'*, *Century*, and *Forum*." Reports are submitted from the various library associations of the state, and for the summer school of library training, and there is a selection of brief interesting items of "news from some of the libraries." Appended are the usual tabulated statistics of Wisconsin libraries.

## State Library Associations.

**ILLINOIS STATE LIBRARY ASSOCIATION.**

*President:* E. S. Willcox, Public Library, Peoria.

*Secretary:* Miss M. E. Ahern, *Public Libraries*, 215 Madison St., Chicago.

*Treasurer:* Miss Mary B. Lindsay, Public Library, Evanston.

The Illinois State Library Association will hold its annual meeting at Lincoln, Feb. 20-22. The legislative committee will report in regard to a library commission which is to be brought before the present legislature, and in this connection there will be a report on the condition of libraries in Illinois and the present means employed through travelling libraries of spreading books throughout the state. The afternoon of the 21st will be devoted to library administration.

During the meeting at Champaign (1899) so much benefit seemed to be derived from Dr. Wire's personally-conducted tour through the library accompanied by his explanations of the methods in use that this year a library institute on a very small scale will be held in connection with the meeting.

Explanations of the most approved methods in library economy, accompanied by samples, it is hoped will bring forth discussion of comparative methods used in other libraries.

ELEANOR ROPER, *Acting Secretary.*

**KANSAS STATE LIBRARY ASSOCIATION.**

*President:* J. L. King, Topeka.

*Secretary:* Miss L. T. Dougherty, Washburn College, Topeka.

*Treasurer:* Miss Marion Steck, Salina.

A meeting of librarians and library workers in Kansas was held at Topeka, Dec. 28, and a state library association was formed upon a plan similar to that adopted in other states. The meeting was held in the new rooms in the state capitol provided for the

state library, and was attended by 23 librarians and assistants, representing the principal libraries of the state. Secretary George W. Martin, of the State Historical Society, served as chairman, and the object and purpose of the meeting was explained in detail by Mrs. Annie L. Diggs, state librarian. A committee on organization was appointed, and a constitution and by-laws reported embodying the main features of the Iowa plan. The report of the committee was adopted and the organization of the Kansas State Library Association was completed by the election of the following officers: President, James L. King, of Topeka; vice-presidents, Miss Carrie M. Watson, of Lawrence; Emory M. Wood, of Baldwin; and Joseph H. Hill, of Emporia, representing respectively the libraries of the State University, Baker University and the State Normal School; secretary, Miss L. T. Dougherty, of Topeka; treasurer, Miss Marion Steck, of Salina. These officers, with the addition of Mrs. Lucy B. Johnston, of Topeka, are to constitute the executive board of the association for the first year.

In preparing for the meeting invitations had been extended to prominent librarians and educators throughout the state to be present and participate in the proceedings, and a program of addresses and papers relating to library work had been arranged. The program was as follows:

"How we started our library," Mrs. W. B. Slagle, of Smith Center; "The relation of the public school to the public library," Prof. W. C. Lansdon, of Fort Scott; "Classification of small libraries," Miss Carrie M. Watson, of Lawrence; "Libraries in higher institutions of learning," Prof. Joseph H. Hill, of Emporia; "The open shelf system," Miss Mary L. Barlow, of Fort Scott; "Co-operation between libraries," Prof. Emory M. Wood, of Baldwin; "The choice of books," Mr. Eugene F. Ware, of Topeka. The first session on the evening of Dec. 27 was preceded by an informal reception and included an address of welcome by Mrs. Margaret Hill McCarter, of Topeka. In all, three sessions were held.

The next meeting of the association is to be held in Topeka, in October, 1901, the precise date to be determined by the executive board. A vigorous effort is to be made to increase the membership of the association and to enlist the help of all the librarians in Kansas in promoting the library interests of the state. At present the charter membership of the association is 19 active and 8 associate members.

#### MASSACHUSETTS LIBRARY CLUB.

*President:* H. L. Koopman, Brown University, Providence, R. I.

*Secretary:* F. O. Poole, Boston Athenæum.

*Treasurer:* Miss Theodosia Macurdy, Public Library, Boston.

The winter meeting of the Massachusetts

Library Club was held in Somerville on Wednesday, Jan. 9, 1901.

The morning session began with the reading of a paper by Mr. H. L. Koopman on "Collecting for the future."

Libraries, Mr. Koopman said, must come to the assistance of printing and actually deliver into the hands of posterity the records which the press entrusts to them in the present, if printing is to maintain its claim to be the "art preservative of all arts." The library, like the zoological museum, may be well equipped for the present lines of study but supplied but meagerly with material for the new. It is difficult to provide in advance for the wants of a succeeding generation, but it can be done in three ways:

1. By collecting everything, *i. e.*, by inclusiveness.

2. By collecting something of everything, *i. e.*, by selection.

3. By collecting everything of something, *i. e.*, by specialization.

The first he considers impossible to take absolutely, nor did he consider it desirable, for the future will have some original interests of its own, and we should not saddle on it the totality of our existence.

Owing to the impracticability of including everything all libraries have been and are selective, but usually involuntarily so. The difficulty in selection lies in the failure to judge aright contemporary authors. To learn aright the lesson of the past, he would have the collector distrust the writers whose thought and methods run in accepted moulds and have him keep his eye open for their opposites, the writers that offend us by disagreeable novelties in matter or manner. Above all, he must learn to avoid copyists and to discern authors that are themselves.

As to the third method of collecting, a library may become a special library itself, as is the case of the historical society libraries, or may take on a specialty, as Cornell University has done in its Dante collection.

It is in the last form that libraries can gain the gratitude of posterity. Each little library can collect its local material, and without bothering to catalog it, simply box it up and label it "miscellany for 1901." etc. In this way the future generations will forgive it the sins of commission.

The special collections in our libraries have usually had their origin in individual hands, and have come to the libraries possessing them by gift or bequest.

Individuals need not be urged so much to make collections as to make wise disposal of them with reference to the future, *i. e.*, to bestow private collections upon permanent institutions, and persons of wealth may well aid collectors to make such bestowal and insure maintenance of such collections.

Mr. C. A. Cutter took the ground that books should be used, and those used up were the surest to be of use. Two classes were expected: 1. Those books which cannot be

replaced, such as manuscripts, unique books, etc. 2. Local material.

It was suggested that the local papers be carefully examined and the articles pertaining to local history be indexed or cut out and pasted in scrap books.

Mr. W. I. Fletcher closed the morning session by explaining the new scheme of the A. L. A. Publishing Board for furnishing printed catalog cards for current books and the progress on the "A. L. A. index" and the abridged Poole.

The afternoon session was devoted to the fiction of the season.

Mrs. W. L. Parker, of the Boston Public Library fiction committee, spoke of this year's fiction from the standpoint of a large library, and Miss Caroline H. Garland, librarian of the Dover (N. H.) Public Library, from that of the smaller library. Both papers consisted of running commentaries on both the bad and the good books.

Mr. Lindsay Swift, of the Boston Public Library, treated the subject from a broader standpoint. Rigid selection in fiction he considered a practical necessity, and careful criticisms go far to determine our choice of books. To Mr. Swift it had at times seemed possible to maintain a library magazine devoted entirely to the review of fiction from the standpoint of the librarians. It would then be possible to get a sympathetic insight into practically all the novels of the day. Direct, unprejudiced estimates would be of great value to the librarians and perhaps to the outside world. It might be easy, he thought, to issue such a periodical six times a year, or perhaps as a supplement to the LIBRARY JOURNAL. Several reviews of one book might be given, particularly of a dubious one. But of more importance is the conservation of literary material. Present use of books is the consuming ideal, while the getting of a popular book of 20 years ago may be difficult. Fiction should be preserved for the sake of literary material. For exhausted tastes in collection Mr. Swift proposes as a hobby the collection of new novels, one copy of each regardless of value or popularity. These he would have put in cold storage for 25 years, and then presented to the nearest large public library. In this way may the scholar of years to come find the books which interested us.

#### MISSOURI LIBRARY ASSOCIATION.

*President:* F. M. Crunden, St. Louis Public Library.

*Secretary-Treasurer:* J. T. Gerould, University of Missouri, Columbia.

The movement for the organization of a library association in the state of Missouri grew out of a suggestion made early in the fall by Senator C. E. Yeater, one of the trustees of the Carnegie Library at Sedalia. A committee, of which mention was made in the last number of the JOURNAL, was ap-

pointed and a meeting was held at the state university at Columbia on Dec. 18. About 25 delegates were present.

After a brief address of welcome by the librarian of the university, Mr. James Thayer Gerould, an hour or more was spent in the discussion of the library conditions now existing in the state. A paper on the school libraries, by Supt. J. A. Whiteford, of Moberly, was read by the librarian of the library there, Miss Nice. After some discussion of this topic, Mrs. Carrie Westlake Whitney, of Kansas City, gave a paper on the free public libraries of the state, and a letter from Miss Mary E. Perry, of St. Louis, was read, giving some account of the system of travelling libraries conducted by the Federation of Women's Clubs. It was the opinion of nearly all the delegates present that this work ought no longer to be left to private enterprise, but should be undertaken by the state. No definite action was taken toward this end, as it was thought best to await the appointment of a state library commission.

Miss Faith E. Smith, of the library of Sedalia, then spoke of the best catalog for the small library, and Mr. Crunden read a paper by Miss Helen Tutt, of the St. Louis Public Library, on the need for a state library commission. Acting on the suggestion contained in the paper, the chairman, Mr. Crunden, appointed a committee, consisting of Hon. Gardiner Lathrop, of Kansas City, Senator C. E. Yeater, of Sedalia, and Purd B. Wright, of St. Joseph, to prepare and present to the General Assembly a bill calling for the appointment of a state library commission. The afternoon session closed with a paper by Miss Mary E. Ahern, of Chicago, in which she spoke of the results obtained by the library associations in other states and of certain lines along which the Missouri association could work to advantage.

Perhaps the most interesting paper that was read at the meeting was the one by Mr. Wright on "How to start a library in Missouri." He treated at some length the library law as it now exists in the state, discussed the methods to be used under the law to obtain the necessary funds, and went on to give a series of very valuable suggestions as to the way in which the library might be brought before the people and their interest aroused.

Owing to the fact that the delegates were invited to a reception given by the president of the university, Mr. Crunden did not read his paper, and the meeting closed with a question box conducted by Miss Ahern, the adoption of a constitution and the election of the following officers for the coming year: President, F. M. Crunden, of St. Louis; 1st vice-president, Purd B. Wright, of St. Joseph; 2d vice-president, Mrs. C. W. Whitney, of Kansas City; secretary and treasurer, J. T. Gerould, of the State University Library. J. T. GEROULD, *Secretary*.

## NEBRASKA LIBRARY ASSOCIATION.

*President:* J. I. Wyer, State University Library, Lincoln.

*Secretary:* Miss Bertha Baumer, Public Library, Omaha.

*Treasurer:* Miss M. A. O'Brien, Public Library, Omaha.

Unprecedented in the history of the Nebraska Library Association was the attendance at the annual meeting held in Lincoln on Dec. 27, 1900. The program was devoted mainly to the library outlook in Nebraska, and it is hoped that a state library commission may be a result of the meeting. After a pleasant dinner, at the Lincoln Hotel, tendered by the Lincoln librarians to their co-workers, Mr. Wyer, president of the association, called the meeting to order.

The reports of the secretary and treasurer being read, Prof. Jillson, president of Doane College, opened the program by a paper on "Nebraska's college libraries." It was most carefully prepared and will serve for historical reference in library statistics in the years to come. "Nebraska has at present ten college libraries, those of the University of Omaha, Cotner University, Union College, Doane College, Grand Island, Hastings, University of Nebraska, Creighton University, Nebraska Wesleyan University and York College." To these libraries 26 questions had been sent and the answers gave the valuable statistics so often wanted and so hard to get. "By the commissioner's report of 1896 and 1897 I find that Nebraska has an average book per college of 5629, Kansas 5502, and Iowa 6425. Nebraska's college libraries have in the main passed through the early days of discouragement and slow growth, that attend the development of most colleges, and we may now look forward with confidence to a rapid increase and improved facilities, particularly in view of the interest at present manifested in libraries at different institutions. May we aim to place Nebraska in the forefront of the western states."

Miss Dennis read a paper written by Miss Abbott, of Lincoln, on "Library co-operation in Lincoln." She said: "The fact that in our city there are books on any subject which may be consulted if only one knew where and how to find them is certainly reason that library co-operation in Lincoln should be discussed by our Library Association. If with the true spirit of serving each patron to the best of his ability, the librarian regards the special field of his library, and does not encroach upon his neighbor, a harmony and co-operation is brought about that greatly enlarges the scope of all library work. To be of the greatest value to the greatest number of people would be a good library motto, and then for our librarians to unite forces and see that aim carried out is what I am sure our Lincoln librarians desire—what they really aim at; but still there may be ways and opportunities to do the very thing they wish more profitably if a few matters are brought before them and discussed in an im-

partial manner. Taking up a few subjects in sequence as their importance seemed to demand, we could usefully consider the values of the different libraries as they are now—their aim and the work they accomplish; the value of the patrons to the libraries—their needs and their expectations; the value of the librarians; how all values may be increased by co-operation." These points were ably discussed and Miss Abbott suggested that librarians have an organization as do teachers—"An occasional coming together to discuss library matters in order to stimulate and encourage library spirit." "In library work as in all else 'in union there is strength.' Let us strive toward an ideal co-operation, each librarian doing his part as an individual and also as a member of a corps of librarians to whom much is entrusted."

Mr. Johnson Brigham, of the Iowa State Library, told "What a library commission can do for Nebraska." "If the education of the masses is to be carried beyond the 'three Rs.' with the mastering of which many are either compelled or content to turn their backs on the school, then the planting of libraries should become the serious business of communities and the creation of a library commission with that pioneer of the free public library, the travelling library, to back it in its missionary work among communities, is the imperative duty of this state." Iowa has taught us this much, that the travelling library is the forerunner of the free public library and to get the one or the other we must have a library commission. A library commission is practically the planting of libraries, the upbuilding of weak libraries, the strengthening of strong libraries, the bettering of conditions under which the work of the library is done, rendering that work thorough, complete and reliable, the uniting of all library interests in the state into one harmoniously working and mutually helpful whole, the arousal of communities and individuals to their duty and to priceless opportunities they are neglecting—the giving right directions to expenditures of thought, time and money for library purposes. Surely the least the state of Nebraska can do in this direction is to place herself in line with her sister states in preparation for 20th century achievement, to put into the field a strong, helpful library commission, backed by a well-equipped travelling library system, thus making it not only possible but easy for every community within her border to connect itself with the great outside world of thought and activities possible and for every citizen to feel coursing through his veins the life blood of the world's great master-thinkers and doers."

Mr. Wyer gave encouraging reports of library growth in Nebraska, and after a brief business session the meeting adjourned. The officers of the association were re-elected as follows: President, J. I. Wyer; 1st vice-president, Carrie Dennis; 2d vice-president, D. C. O'Connor; Secretary, Bertha Baumer; Treasurer, Margaret O'Brien.

BERTHA BAUMER, *Secretary.*

## Library Clubs.

### LIBRARY CLUB OF BUFFALO.

*President:* H. L. Elmendorf, Public Library.  
*Secretary-Treasurer:* Miss Ella M. Edwards, Buffalo Historical Society.

The Library Club of Buffalo met on Wednesday evening, Dec. 19, in the rooms of the Buffalo Historical Society, the president in the chair. The appointment was announced of Mr. Elmendorf to act as a special representative of the A. L. A. to present its interests regularly to the club. Miss Mary S. Campbell, chairman of the home library committee, reported that the first library had been opened immediately after its authorization at the November meeting of the club, and that so much interest in the work had developed that five more groups could be arranged at once. Several young ladies of superior ability, some kindergartners, had offered to act as visitors. One teacher in the Polish district had requested the privilege of conducting a home library among her children, hoping thus to lead them to greater familiarity with the English language. The committee was authorized to continue the work at its discretion, reporting to the club at the next meeting.

The paper of the evening was on "The forward movement in charity," by Mr. Frederic Almy, secretary of the Charity Organization Society. Mr. Almy's review of the improvements in charitable methods during the century was inspiring, particular emphasis being laid on the fact that the aim of modern charity is to prevent the need of charitable relief. Music and recitations concluded a very pleasant program.

ELLA M. EDWARDS, *Secretary.*

### BIBLIOGRAPHICAL SOCIETY OF CHICAGO. CHICAGO LIBRARY CLUB.

A joint meeting was held Dec. 13, 1900, in the new lecture room of the Public Library. At this meeting owners of private presses in and outside of Chicago and also one or two publishers and commercial printing houses had been asked to exhibit samples of their work. Such samples were sent by the Wind-tryst Press (Mrs. Martha Foote Crow and Mrs. Harriet C. Brainard); the Elm Press (E. L. Millard); the Blue Sky Press (Stevens & Langworthy); Frank Holme; H. P. Gilbert; all in Chicago; The Alvil Shop (Frank B. Ray, Jr.), Ridgway, L. I.; Brothers of the Book, L. G. Woodworth, Secretary, Gouverneur, N. Y.; R. R. Donnelley & Sons Co., Chicago; Hollister Brothers, Chicago. From Armour Institute of Technology some early printed books had been sent, and the Chicago Public Library exhibited several books, among them Grolier publications. A complete set of the Caxton Club publications was exhibited by R. R. Donnelley & Sons.

Productions from the Essex House and other English private presses were shown by Mr. W. Irving Way to illustrate a talk on the development of the printing type. Mr. T. S. Stevens followed Mr. Way, with a paper on the work of what he called the modern American school of printing as illustrated by the work of private presses. Mrs. Crow had prepared a paper on the work of the Wind-tryst Press which, in her absence, was read by Miss Zimmerman.

Mr. Way, in the beginning, remarked on the fact that the book that won the grand prize at the Paris Exposition this year was not printed in the large centers of civilization, but in Lisbon, Portugal. This judgment was given by a jury composed of professional printers wedded to tradition, not amateurs. The book thus honored was printed with large and light-faced Roman and Italian types, very close fitted, uncommonly readable, and of great beauty, with the old style mannerism.

He then sketched in a rapid survey the evolution of the type, from the oldest, formed on block books or mediæval manuscripts, through the various innovations of the Aldi, Plantins, Elzevir, Baskerville, down to De Vinne's new type first used in Boccaccio's "Life of Dante," printed for the Grolier Club; and Mosher's Child Christopher type. De Vinne's new type was formed from one used in Venice by a printer, Renner by name—not very well known. This type gives more daylight than William Morris's type. The latter printer was never quite satisfied with his "golden type." Blades demonstrates how already Gutenberg's work shows growth. The speaker then mentioned the work of several private presses, especially in England, and proceeded to show samples of printing from various periods.

Mr. Stevens said that in America has arisen what he would call the American school of printing. Its greatest exponent is Bradley. He was a poster artist before he began type-designing. He has done few books, and his best ones are not on hand-made paper. He always looked for new things, and found them. In designing type he went back to the printers of colonial times; they had small choice in type, "just Caslon type and bass rule." Bradley's ideas have gone into almost every book-making establishment; but perfect examples, except in the books Bradley has done himself, are rare. The enthusiastic followers of Morris scorn him.

In speaking of the presses in America which pretend to make books with other than a utilitarian point of view the speaker would leave out the Chicago book-makers, as already known to those present, and consider only the more important ones outside the city. He thought Mr. Mosher a publisher of a limited and perhaps over-refined taste which forbids originality of treatment or virility of

design. But he publishes well. His printers follow the English models of Horace Walpole's time. Unfortunately, they are beginning to feel the influences of his success. The Philosophers, of Wausau, Wisconsin, were perhaps the largest producers of hand-made books in the West. They make books with perfect registers, and are beginning to learn that that is not all. The ink is sometimes overlooked and they have queer notions about composition. Concerning the Roycrofters "Mr. Hubbard has said all he wants said about them and their work. His cleverness is the greatest thing in East Aurora. But about the books of the Roycrofters there is much to deplore. . . . The Roycroft shop is a success, and that atones for many shortcomings." The Brothers of the Book of Gouverneur, N. Y., have done little, "but what work they have done is good, being very plain, American, well printed and in excellent taste. But they are just one stage removed from amateurs." The University Press is a great commercial establishment, and it is only the fact that Bradley has the artistic supervision there that brings it under consideration here at all. The Alvil Shop at Ridgwood, L. I., is under the direction of Frank B. Rae, Jr., a Chicago man, a careful designer. He is not a printer, but has competent help. He uses water colors in illuminating. Many object to this, perhaps because Morris did not use it; possibly we have had too much bad illuminating. "But I believe that in certain kinds of work, where the color is put on by an experienced hand and the schemes are worked out by an artist who understands, illumination is an advantage to the decoration. At any rate it is one of the characteristics to be considered when we speak of American work."

Mrs. Crow's paper consisted of a sketch of the rise and short life of the Wind-tryst Press—"the property and enjoyment of two school teachers, who expended their hard-earned salaries on their new amusement. At length they emerged, wiser if not sadder, but with the wheels going around no more in their kitchen. But though wiser as to the make-up of a book than before they tried it themselves, these printers are not so wise as to recommend others not to try it. They never in any one single particular reached their ideal; they found that art is long and the art of book-making very long indeed. But they got so much of amusement and interest out of their attempt that they joyfully urge their friends to waste shekels in the same way they did. And they know of a truth that at any moment the press may call irresistibly loud and they may be won to begin again; and this knowledge has kept them from selling the silent machine and the pathetic type."

AKSEL G. S. JOSEPHSON,

*Sec'y Bibliog. Society of Chicago.*

MARGARET E. ZIMMERMAN,

*Sec'y Chicago Library Club.*

The Bibliographical Society of Chicago has issued a Handbook, 1899-1900, as a neatly printed pamphlet of 44 pages. It contains, in addition to constitution, by-laws, membership list, etc., three papers on bibliographical subjects—"Some recent events and tendencies in bibliography," by C. H. Hastings; "General and national bibliographies," by W. S. Merrill; "Some suggestions concerning the needs and methods of historical bibliography," by J. W. Thompson.

*LONG ISLAND LIBRARY CLUB.*

*President:* A. E. Bostwick, Brooklyn Public Library.

*Secretary:* Miss S. A. Hutchinson, Department Libraries, Brooklyn Institute of Arts and Sciences.

*Treasurer:* Miss Mabel Farr, Adelphi College.

The fourth meeting of the Long Island Library Club, held at the Pratt Institute Free Library Dec. 6, 1900, was a most successful one, both in attendance (67) and in the practical way treatment of its subject, "Co-operation among Brooklyn libraries."

Previous to the meeting a circular letter, embodying the following queries, was sent to all the libraries of the city:

1. What is your library doing to assist other libraries?

2. In what ways could other libraries be of assistance to you in your work?

3. In what ways could you, under present conditions and limitations, help other libraries?

4. What would you like to do to help other libraries, that you are now prevented from doing by your rules or by other adverse conditions?

The answers to these questions were tabulated and a copy of the tabulation was furnished to those who were to present papers, as a basis from which to work. Incidentally, the tabulation showed the desire for co-operation among Brooklyn libraries to be very strong.

Miss Mary W. Plummer, librarian and director of the Pratt Institute Free Library, read a paper from the standpoint of the free circulating library. She said that at first thought it would seem as if there were little that the free libraries could do in the way of co-operation from the very fact that they are free, but from the tabulated answers to the circular-letter referred to above, it would seem that they have not yet reached their limit. Among the suggestions made to further local co-operation were:

1. The distribution by free libraries of their printed catalogs and lists to other libraries in the city.

2. The use of one free library by another as a borrower, in order to lend books to its own constituency.

3. The turning over of medical books to the Library of the Kings County Medical Association in exchange, provided that they will be still free to those students who cannot afford the fee.

4. The admission of head-librarians to the shelves of other libraries; the reserving of books on special shelves at the request of other libraries.

5. The notification of other libraries *first* when a library has duplicate books or periodicals to dispose of in any way.

C. A. Green, librarian of the Spicer Memorial Library of the Polytechnic Institute, read a paper from the institutional library point of view. He said that the institutional library was in most cases so stifled by institutional rules as to be of little value in actual work. While from force of circumstances it might be able to do little for other libraries, the other libraries might assist the institutional library in many ways, among them being the granting to the institutional library the use of reference works which it is unable to purchase, allowing its professors and instructors access to the shelves of their respective libraries, or setting aside books for them to consult; by making it possible for their professors and instructors to draw more than the usual number of books on cards for home use; by access to collections of pamphlets, of government documents, of clippings, and of periodicals. The institutional library might occasionally help others by donating single copies of magazines, and it always welcomes the presence of other librarians for any purpose whatsoever.

R. R. Bowker, editor of the LIBRARY JOURNAL and trustee of the Brooklyn Library and of the Brooklyn Institute of Arts and Sciences, spoke for the subscription library. He said that its power to co-operate was limited from its pecuniary nature. He spoke on certain features of co-operation rather than from a specific point of view. He thought that it was very important that one library in Brooklyn should be a comprehensive depository for government documents. In most libraries certain lines of government documents are useful, and he suggested that special libraries should be assisted to procure those bearing on their subjects. He hoped to see the time when the government will send some of their documents without sending all. As one means of how co-operation can be made most useful for acquainting the public with the resources of the books of the city, Mr. Bowker referred to the Brussels idea—that is, each library should have as its catalog, in the larger sense, a card catalog of the library proper and a repertory of cards referring to the books in other libraries. Mr. Bowker also suggested that lists on special topics should be prepared which might be made more comprehensive than heretofore through the press or by posting on the bulletin-boards of other libraries. All of the above might be

emphasized with regard to periodicals. There ought to be a union list of periodicals in Brooklyn or Greater New York, and differentiation in purchase should be made with them as with books.

All of the speakers laid stress on the desirability of the division of the field of purchase, the circulation of joint lists of duplicates, and a joint bulletin of accessions.

The club was fortunate in having present Mr. Clement W. Andrews, librarian of the John Crerar Library of Chicago, who also spoke. Mr. Andrews regarded specialization as of primary importance. He gave a very interesting account of the division of the field of purchase by the libraries in his city, and he also touched upon their co-operative catalog, stating that the John Crerar Library distributed its cards to six libraries. He said that the ms. of their union list of periodicals has proved of great assistance to librarians. He also spoke of their method of disposing of duplicates, which is to put them into the hands of an auctioneer, to dispose of on commission.

After a general discussion of the subject of the meeting, it was voted that the chair appoint a committee on co-operation, to report at a later meeting.

The meeting then adjourned until the first Thursday in February.

SUSAN A. HUTCHINSON, *Secretary*.

#### NEW YORK LIBRARY CLUB.

*President:* Wilberforce Eames, N. Y. Public Library.

*Secretary:* Miss B. S. Smith, Harlem Library.

*Treasurer:* Miss Theresa Hitchler, Brooklyn Public Library.

The New York Library Club held a meeting on the afternoon of Thursday, Jan. 10, in one of the rooms of the Y. M. C. A. building, at 23d street and Fourth avenue. Stormy weather somewhat reduced the attendance, but there were in all about 40 persons present. In the absence of the secretary, Miss Smith, Mr. G. W. Cole acted as secretary *pro tem*.

President Wilberforce Eames called the meeting to order at 3.15, and asked for a report from the chairman of the committee on a club handbook. This was given by Mr. Cole, who stated that circular letters were immediately to be sent to about 200 libraries in Greater New York, and requested members of the club to notify the committee of any libraries that they may hear of which have not received such a letter. The subject of the annual dinner, for several years past held jointly with the New York Library Association, was brought up by the president, and it was voted to refer the matter to the executive committee for action.

A paper presenting "The need of a library reading room south of the post office," by Miss Lucy D. Waterman, was read, in the writer's absence, by C. A. Nelson.

This was followed by a paper on "On the books of 1900 for the young," by Miss Mary E. Burt. She cited among good examples of this class Olmsted's condensation of "The winning of the West," which gives all that a child really wants of Roosevelt's book; and Mme. Ragozin's adaptation of Flaubert's "Salambo," which was regarded as exceedingly interesting. Books of the year that children, in the speaker's personal experience, had found full of interest, were "The wit and wisdom of the Talmud," the "Howells story book," Du Chaillu's "World of the great forest," Seton-Thompson's "Biography of a grizzly," and Mrs. Seton-Thompson's "Woman tenderfoot," Burroughs's "Squirrels and other fur-bearing animals," Fraser's "Mooswa," and Slocum's "Sailing alone round the world." "Henty's 'With Buller in Natal' is probably the best-selling child's book of the year. Children have the Henty habit as they have the soda water habit." As a book for girls, Alice Stronach's "A Newnham friendship" was recommended. In fairy stories Abbie F. Brown's "Book of saints and friendly beasts," "McManus's "Donegal fairy tales" and Lang's "Grey fairy book" are all good. Miss Burt mentioned numerous books of a character not generally regarded as interesting to children — as Leroy-Beaulieu's "Awakening of the East" — and said: "There is really no such thing as a child's book. If it is good enough or suitable for a child it is good reading for his father and mother and grandfather and grandmother."

"Books of fiction published in 1900" were discussed by Miss Helen E. Haines, who mentioned especially Conrad's "Lord Jim," Hewlett's Richard Yea-and-Nay," "An Englishwoman's love letters," Barrie's "Tommy and Grizel," Mrs. Ward's "Eleanor," Mrs. Steel's "Hosts of the Lord," Miss Johnston's "To have and to hold," Tarkington's "Gentleman from Indiana," and Grant's "Unleavened bread." Various other novels and volumes of short stories were noted, and the speaker touched upon the influence of commercial book exploitation as impairing sound critical estimates of current books.

Mr. Nelson then made announcement of the death of J. Norris Wing, long an interested member of the club, and spoke briefly of Mr. Wing's services and character, noting the fact that the club necrology comprises so far but the names of six persons. He submitted the following resolution, which was adopted by a unanimous vote and ordered spread upon the minutes:

"The New York Library Club has learned with great regret of the recent decease of Mr. Josiah Norris Wing, a fellow-member almost from its organization, and one always active and zealous in promoting its interests.

"The Club desires to put on record its sense of its great loss, as well as an expression of its high regard and esteem for Mr. Wing as a man of unblemished character, a faithful citizen, an untiring worker in the library cause, and a true and genial friend."

Adjourned at 4.50 p.m.

## Library Schools and Training Classes.

### NEW YORK STATE LIBRARY SCHOOL.

Miss Edith D. Fuller began her course in dictionary cataloging with the opening of the winter session, Jan. 3.

Dr. E. C. Richardson, librarian of Princeton University, alumni lecturer this year, will deliver two addresses, Jan 31 and Feb. 1, on "Classification: the order of the sciences and the order of books." A cordial invitation is extended to all alumni of the New York state school and of other schools who may find it convenient to attend. A new feature of the lectureship, voted at the last meeting of the association in Montreal, will be the printing of the lectures in pamphlet form after their delivery.

The 14th anniversary of the founding of the school was observed on Saturday evening, Jan. 5, by a skating party held in the Pine Hills suburb of Albany.

SALOME CUTLER FAIRCHILD.

### UNIVERSITY OF ILLINOIS.

#### PRACTICAL EXPERIENCE IN COLLEGE LIBRARY WORK.

The report in LIBRARY JOURNAL for November explained somewhat the experience which the students have in public library work. Their experience in college library work covers the work in each department of the library of the University of Illinois. The practical work of each student averages two hours a day for two college years. This work is not determined by the necessities of the library, but by the advantages to the student.

A careful schedule is prepared, so that each student has practice in each department in logical order, and immediately following class instruction. The work is done at stated hours, with the regularity of laboratory work in the other university departments. It is done under supervision, so that mistakes are at once rectified. Wherever possible, junior students work under direction of senior students to test the executive ability of the latter. Realizing the difficulty of grading practical work by any fixed percentage system, the following card is used for reports:

#### UNIVERSITY OF ILLINOIS STATE LIBRARY SCHOOL

STUDENT	WORK
Spirit	Accuracy
Executive ability	Order
Originality	Neatness
Observation	Attention
Speed	Remarks (over)
Use Grades	INSTRUCTOR
{ a=excellent b=good c=medium d=poor	DATE

From the beginning each junior has a section of shelving to keep in order, reading the shelves, repairing and relabelling books, and covering pamphlets. Before the Christmas recess the juniors assist in the order routine, and look up trade details for select lists of books, write in the accession book, make simple reference lists, and read shelves in seminary rooms. Later they add classifying, shelf listing, and cataloging. Cataloging averages one-half of the apprentice time, and each student classifies each book which he catalogs.

Seniors work with gifts, duplicates, and periodicals, prepare material for binding, and assist in taking inventory. In cataloging, seniors take one large subject at a time, in order to see the relation of subject headings. Here, as in junior work, each book is classified as well as cataloged. Seniors have some experience in revising junior cataloging as a review. In a college library, the large number of continuations and periodicals and government documents offer work of an advanced grade. In reference, seniors prepare the most difficult lists and supervise the juniors in the easier lists, and they serve a certain time at the reference desk. The reserved books, seminary and department collections give the students familiarity with special features of college library work.

This year a pedagogical library and museum was started by the Department of Pedagogy, and the work of organization was given to the library school. The collection is to include books, pamphlets, supplies, apparatus, models, and pupils' work. Already several thousand items have been given. The seniors planned the organization and they now supervise the juniors in their daily work.

KATHARINE L. SHARP, *Director.*

#### WASHINGTON SCHOOL OF LIBRARY SCIENCE.

The present term of the classes in library science organized under the auspices of the Columbian University at Washington, D. C., continues from October to June. Professors Spofford, Cutter and Presnell are the instructors, the former giving weekly lectures on bibliography and libraries, and the two latter practical lessons and examinations in all departments of library work. The exercises are all in the evening hours, as many of the students are engaged in government employ.

The following is a list of students now enrolled: A. A. Albert, M. Averill, H. M. Cheney, M. B. Coffin, E. G. Cooney, A. G. Cross, M. B. Davis, E. H. Faison, S. C. Fenton, A. G. Gaines, M. B. Gaines, A. Griggs, M. G. Hunter, C. M. Jullien, M. L. Jones, A. Kavanagh, J. H. Laskey, M. C. Lillie, M. E. Marshall, E. G. Neel, L. L. Newcomb, A. M. Priest, S. W. Prince, K. G. Rea, F. W. Searle, M. L. Sewall, M. Smith, E. G. Spillman, F. G. Stock, C. F. Wolfley, J. P. Wood, E. L. Youmans. Nearly all the students are young women.

## Reviews.

FISH, Daniel. Lincoln literature: a bibliographical account of books and pamphlets relating to Abraham Lincoln. Minneapolis, Minn, published by the [Public Library] Board, 1900. 136 p. O. \$3.25.

This interesting publication was prepared by Judge Fish, a member and secretary of the Public Library Board of Minneapolis, as a result of the development of his personal collection of Lincoln literature. It records about 800 titles, excluding such material as prints, cartoons, broadsides, etc., and not touching upon the general literature of the Civil War in which Lincoln's life and work is incidentally treated. Indeed, it is thought to be the fullest bibliography yet published of any American, and it is probably the most comprehensive record existing of the immense mass of Lincoln literature, though it does not touch upon the wide field of periodical literature dealing with the subject, for which at present Poole must suffice as a key.

As a register of Lincoln literature the work is most creditable in extent and interesting in detail; bibliographically, and from the point of view of the student, it would have been improved by greater systematization and compactness. There are six divisions—Books and pamphlets relating to Lincoln; Lincoln's speeches and writings; Biographical; Partisan; Commemorative; Miscellaneous—but these are hardly distinctive, and there is almost necessarily much overlapping. Especially in the first and last divisions are many titles that might properly be classed as commemorative or biographical; and the only way to make sure of the inclusion or omission of a given work is to glance over every page of the list. Entries are given, under author's surname only, with fulness and in transcript of the title-page, even to punctuation and capitalization; titles not in the compiler's possession are designated by an asterisk. Prices are given in some instances, though not in several cases for which information was readily accessible, and a curious detail is the frequent indication of price immediately following author's surname and preceding the title-page record. A large, clear type is used, and the page is open, with wide margins. The material recorded is of great interest, not only to students, but to the general reader in this absorbing period of our national life, covering, as it does, all points of view, and every phase of the political and personal sentiment of the time. Among the entries are titles of French, German, Italian and Spanish works, and even single examples in Greek and Welsh. The edition is a small one—limited to 150 copies, a number that is hardly likely to supply all the libraries that will find this a useful addition to the bibliography of American history.

GREENWOOD, Thomas, (*ed.*) *British library year book, 1900-1901: a record of library progress and work.* London, Scott, Greenwood & Co., 1900. 16+345 p. D. net, 3 sh.

Mr. Greenwood's first "library year book" appeared in 1897 (*See L. J.*, Nov., 1897, p. 711), and it is now followed at a three-year interval by a manual on similar lines, issued partly as marking the jubilee year of the passing of the first public libraries act. The fact that it is devoted wholly to British libraries, and in general to libraries operating under the acts, has led to the change of title to its present distinctive limitation. The work will naturally be mainly valuable to English librarians; but it is of interest to Americans as a presentation and record of library activities on the other side.

In addition to general notes on library establishment and maintenance, full statistical tables of libraries of various classes and record of library organizations, there are several contributed articles on special phases of library work. These include "Some points in library planning," by F. J. Burgoyne; "Library classification," by L. Stanley Jast; "Developments in library cataloging," by J. H. Quinn; "Children and public libraries," by J. J. Ballinger; "Fire prevention and insurance," by C. T. Davis; "The educational work of the Library Association," by Henry D. Roberts; and "The Library Assistants' Association," by N. G. Chambers. The contributions are in general simple and practical; there are numerous illustrations of buildings, and some portraits; and the elaborate statistical information regarding individual libraries is unusually explicit, including characteristics of administration and statement of salaries paid. The total number of libraries operating under the libraries acts is given as 400 for the United Kingdom, this being an increase of 70 in three years. Of the present total, there are 309 libraries in England, 25 in Wales, 43 in Scotland, and 23 in Ireland.

In his introduction Mr. Greenwood touches upon the main features of library development during those years, noting progress in the reform of classification, the development of annotated catalogs, the gradual increase of methods of open access in various modifications, and the need for training of library assistants. He is still an advocate of close classification and open access, and holds to his convictions; but these burning questions are not unduly emphasized, and the manual has less pugnacity of statement than its predecessor. Of special interest and value is the department of "statistical abstracts," in which special methods and details of library administration are recorded, with note of the libraries identified therewith. Thus there are such headings as "Branch libraries," with record of libraries conducting such branches; "Staff," giving the number of the force in representative libraries; "Staff hours weekly,"

"Women librarians," "Printed catalogs," "Reference library issue methods," and similar subjects, on all of which the practice of representative libraries is concisely cited. The usefulness of this department is at once apparent, especially for library committees or others who wish to know "what other libraries do" in regard to such questions, and it gives the desired information in most compact form. There is a good index, covering 22 two-column pages.

WINSHIP, G: Parker. *Cabot bibliography; with introd. essay on the careers of the Cabots, based upon an independent examination of the sources of information.* N. Y., Dodd, Mead & Co., 1900. 52+180 p. O. cl., net, \$5.25.

A small Cabot bibliography prepared by Mr. Winship at the suggestion of Mr. W. E. Foster, of the Providence Public Library, for use during the celebration of the 400th anniversary of John Cabot's visit to North America, is the foundation of the present important work. Mr. Winship, with great industry and research, has collected practically everything of importance known about the Cabots, in the shape of manuscripts, books and maps. Each article is amply described, and the full title, collation, and, wherever possible, location given. Under each item are noted all important reprints and translations, and cross references are given to other authors who have used the same material. The variations are pointed out, and the different authors' opinions and deductions are stated and compared. Wherever practicable, the original source of information is indicated. Many of the notes extend to several pages in small type. An exhaustive account is given of the celebrated Cabot map in the Bibliothèque Nationale at Paris. In all 579 main titles are given, besides references to numerous other works referred to in the notes. In an introductory essay Mr. Winship gives a matter-of-fact connected story of what is actually known of the Cabots and their voyages, which in many respects varies greatly from the accepted versions of many historians, both old and modern; however, for every fact stated in his introductory essay, Mr. Winship gives his authority by marginal references to the bibliography, so that the reader is enabled to follow his deductions step by step. The book has been printed at the Chiswick Press, under the auspices of Henry N. Stevens, of Henry Stevens, Son & Stiles, London, which is sufficient guarantee for excellence of workmanship. It is not exaggeration to say that the work is indispensable in any library collecting Americana, as in the Cabots and their voyages we have practically the germ of England's colonial greatness in America and her taste for maritime exploration. \*\*.

## Library Economy and History.

### GENERAL.

DANA, J. C. The use of the library. (*In Journal of Education* [New England and Nationale], Dec. 13, 1900, 52:375.) 1½ col.

Hints for the school teacher.

CUTTER, C. A. The development of public libraries. (*In N. Y. Evening Post*, Jan. 12, 1901. Sec. 3, p. 7-8) 4½ cols.

A valuable compact review of the library history of the 19th century, emphasizing the educational significance of the great library development of the last 25 years. One of the series of essays in the *Post's* "Review of the 19th century."

*The Library Association Record* issues belated numbers for October, November, and December. The October number is devoted to the proceedings of the recent Bristol meeting of the L. A. U. K. Some of the papers in the other issues include "Principles of dictionary subject-cataloging in scientific and technical libraries," by E. Wyndham Hulme; "Paper-making in England, 1588-1680," by Rhys Jenkins; "The colonies in relation to public libraries," by J. R. Boosé; "On library readers' unions," by C. F. Newcombe; and "On the learning of librarians," by Basil Anderton.

PUTNAM, Herbert. The public library in the United States: some recent phases and tendencies. (*In International Monthly*, Jan., 1901. p. 57-70.)

A general review of the library development of the last quarter century. Its special characteristics are noted as "activity" and popularization; work with children; informality of use; variety of function; training of librarians; the development of a standard of qualifications for service; zest for observations and experiments; and co-operation and propaganda.

### LOCAL.

*Albuquerque, N. M.* The controversy between the local library association and the recently established city library has resulted in the maintenance of two libraries. A recent vote by the library association to transfer its books to the city library was overruled by the opposition, and the books which had been taken possession of by the city authorities were returned to the association rooms. A popular subscription was then started to buy books for the city library, and \$2000 was promptly secured. Questions of ownership of the library association collection, and of right to the library tax levy, still remain unsettled.

*Braddock, Pa. Carnegie F. L.* The librarian sends the following summary of statis-

tics: Added 5264; total 25,224. Issued 163,276 (fact. 69.7%); ref. use 6721. No. readers' cards 8225.

*Brooklyn, N. Y. Pratt Institute F. L.* In consequence of the numerous requests made by parents that the children's library would recommend books good for Christmas gifts, the Pratt Institute Free Library exhibited in the children's room for several weeks before Christmas new copies of books desirable for children to own. At the same time, a list of these was posted near, showing publishers and prices. The experiment aroused considerable interest.

The statement in the recent report of the library— noted in the December L. J.— that the time limit on books in the children's department had been uniformly extended to 14 days, has in several cases been misunderstood as applying to all books in general circulation. It is only in the children's room that this change has been made; for the books of the main circulating department the usual distinctions of seven-day and 14-day terms are in force.

*Buffalo (N. Y.) P. L.* The report of the Superintendent of Public Instruction recently submitted to the Buffalo Common Council, contains the following comment on the work with the schools carried on by the Buffalo Public Library: "Too much cannot be said in praise of the helpful manner in which the public library has co-operated with the work of the schools. In the 29 districts where the management of the library has taken entire charge of supplying home reading for the pupils, 186,126 volumes were furnished from January to December, 1900. The books have been selected with great care and excellent judgment, and it seems to me that in schools where this plan has been in vogue, pupils have had access to a much greater variety of good books adapted to the different grades than they possibly could have from the ordinary school library.

"The library has not only been of great assistance to schools where it has assumed entire charge of the reading supply, but also to teachers and pupils in all the schools, and especially to those of the eighth and ninth grades. Careful examination of the course of study and the outlines used in these grades has been made and a large number of excellent books selected that bear directly on the geography, United States history, civil government and English work of the eighth and ninth grades. Circulars in which these books are helpfully classified under the headings, Reference, Biography, Stories, etc., have been furnished to every class of the above grades, and both teachers and pupils are at liberty to visit the open shelf department of the library and consult these books or draw them."

*Dallas, Tex.* Work on the public library

building is progressing rapidly. The cornerstone will be laid in January, and the contract calls for completion of the building the following June, when it is hoped to open the library with at least 10,000 v. ready for use on the shelves. At a book reception held Dec. 11, between 1100 and 1200 v. were donated to the library. The reception was made the occasion of presenting the librarian, Miss Leeper, recently of the St. Louis Public Library, to the citizens of Dallas. It is planned to hold another reception in January to which all the children in Dallas will be invited.

*Dracut (Mass.) P. L.* On Dec. 11 the library was opened for public inspection in the remodelled public school building which gives it ample and attractive quarters.

*East Orange (N. J.) F. L.* The library trustees have selected as the plans for the new Carnegie building the designs submitted in competition by Jardine, Kent & Jardine, of New York City.

*Hartford, Ct. Watkinson L.* (37th rpt., 1900.) Added 2695; total 53,812. There were 3787 readers during the year, an increase of 3 per cent.

"Last January a very interesting invoice of about 90 titles was received of books relating to the recent Spanish-American war. These books are all in Spanish, printed either in Spain, in the island of Cuba or in the Philippines and are all written from the Spanish point of view. Campaign history of the conflict, the causes, the condition of the colonies prior to 1898, the results in the colonies and at home, factional matter relating to Spanish politics, are all represented in this collection. It is of course very prejudiced history, but very interesting literature, and although many libraries will have the works of American writers on this subject we feel confident that this collection will, in the course of a generation, be exceedingly rare and valuable."

The old card catalog has been conformed to standard size, revised, and its five alphabets merged into a single record, the work of revision being carried through by Miss Elizabeth P. Andrews. New catalog cases with removable drawers were installed.

*Illinois travelling libraries.* The system of travelling libraries conducted by the Illinois Farmers' Institute, from its headquarters in the State House, Springfield, Ill., is described in the recent report of the Institute for 1900 (p. 24-27). There are 21 libraries now in operation, each containing 50 volumes suitable for family reading. "There are books on the various lines of farming, live stock and dairying, books on domestic science and household subjects, and books that will interest boys and girls." The libraries are sent on application to any rural community, transportation charges being paid by the borrowers, and may be kept for six months.

*Jersey City (N. J.) P. L.* The new building of the Jersey City Public Library was practically completed by the close of the year, and the work of removal is now in progress. The building has been in course of erection for about two years, and its cost, including the site, was \$275,000.

The building is four stories high, with a stack room in the rear five stories high, the fifth floor of the stack room being level with the second floor of the main building. It is solidly built and is fireproof. The interior dimensions are 46 by 190 feet. The stack room measures 34 by 38 feet. The broad staircase of white Italian marble from the doorway to the top floor is one of the most beautiful features of the building. A finely wrought iron grille separates the first landing from the cloak room.

On the entrance floor to the right is the newspaper reading room, with a private entrance from Montgomery street. The room measures 41 by 57½ feet. At the other end of the corridor are work rooms and a wagon delivery room. One large room will be used for the law library, if, as is now anticipated, the Hudson County Bar Association turns over its volumes. There are two other rooms, both for the use of employes, one fitted up with lockers and the other to be used as a lunch room.

The second or main floor contains the more important departments. Above the newspaper room is the main reading room, of the same dimensions. A women's reading room, about one-third the size of the main reading room, opens out of that room. In the center is the delivery room, in quartered golden oak. Its dimensions are 25 by 65 feet. Directly behind it is the stack room, and in front of it are the librarian's public office, the children's catalog room and the adult catalog room. A book lift runs through the five stories of the stack room.

On the third floor the children's reading room is found above the general reading room. It is 38 by 42 feet in size, with oak wainscoting and plain ceiling, and is fitted up with low tables. The children's reference room opens out of this and connects with the assistant librarian's room. In the reference room, which has nooks and corners, are tables in four heights, suitable for various ages, and a pretty terra cotta fireplace. The room is 18 by 49 feet. Next to the assistant librarian's room is the trustees' room. On the opposite side of the corridor are five study rooms averaging 12 by 17 feet, and a dictionary room, 17 by 17 feet. On the fourth floor are several unassigned rooms, at one end the art gallery and at the other the lecture hall. In the lecture hall there is a movable stage. The art gallery is 33 by 53 feet and the lecture hall is 33 by 72 feet.

*Memphis, Tenn. Cossitt L.* (7th rpt.—year ending Nov. 30, 1900.) Added 4006; total 18,120. Issued, home use 51,027 (fict.

73%.) Record of lib. use is not given, "but I can state positively that the reference use has increased fully 50% during the year." New cards issued 1371; total cards in use 7421. The work of cataloging has continued, with the result that the library has now a complete author catalog and a partial subject catalog, with separate catalogs of fiction and juvenile books. On the completion of the subject catalog, work will be begun on a dictionary catalog.

*Milwaukee (Wis.) P. L.* (23d rpt., 1899-1900.) Added 10,886; total 119,686. Issued, home use 491,458 (fict. 36.1%; juv. fict. 27.5 %.) New registration 11,916; cards in use 26,850. Receipts \$86,366.55; expenses \$54,129.03. No record of general reference or reading-room use is given, though statistics showing the use of these departments on Sundays and holidays are included in a special table.

The school circulation for the year amounted to 22,821 v., issued 97,896 times by 323 teachers in 47 graded public schools, one state normal school, three high schools, one school for the deaf, four parochial schools, seven Sunday-schools, one vacation school and one music class. An interesting change is the establishment of what are practically two open shelf departments—one on the third floor devoted to history, travel and biography, about 25,000 in all; and the other on the second floor for the departments of zoology, botany, physics and the applied sciences.

The duplicate collection of popular novels, issued on payment of five cents a week, has proved satisfactory, and Dr. Peckham says, "our experience for about a year in this work only emphasizes its value." The work of the children's room has gone on smoothly. An inventory taken on June 26 gave a total of 8269 v. on the open shelves in this room, and showed 30 volumes missing. In the art room 15 books out of a total of 3283 were missing in a period of eight months.

*New York P. L.* A beautiful model of the new library building, to be erected in Bryant Park, is now on exhibition in the Governor's room at the City Hall. The model is of plaster of paris and contains 3000 different parts. It stands on a revolving stand placed on a draped pedestal, about five feet from the floor. It is on an eight-inch scale, and cost \$3500.

Progress has been made in the plan for establishing libraries and reading rooms in the public schools, through the co-operation of the Board of Education, and it is now likely that early in January branch libraries will be opened in eight school-houses in congested neighborhoods. The purpose of the libraries was thus stated in a recent interview with President O'Brien of the school board: "We purpose to establish reading-rooms equipped with magazines, newspapers and other periodical literature, while on the shelf will be volumes for reference and use within the rooms, furnished by the library. At first the circulation of books outside of the library will be limited to volumes closely related to the work of the free lecture centres of the district. Later, however, I hope, the little local libraries will be in a way circulating book places in the highest sense of the word."

*New York City. Y. M. C. A. L.* (Rpt. 1899: in 47th rpt. of Assoc., p. 36.) Added 2446 v.; total 51,881. Issued 83,333, of which 44,592 were drawn at the 23d street branch. Attendance of readers 41,331, of whom 23,809 were recorded at the 23d street branch.

The open-shelf arrangement of popular reference books "is greatly appreciated by all classes of readers and students. Our 'questions of the day' shelves, upon which have been placed at various times periodicals and books containing information on the questions of present day interest, have been a source of delight and benefit to many readers."

*Philadelphia F. L. Frankford branch.* On the evening of Dec. 14, the Frankford branch of the Free Library was opened in remodelled quarters on the first and second floors of Wright's Institute building, Frankford. Addresses were delivered by J. G. Rosengarten, president of the board of trustees of the Free Library; W. W. Foulkrod, of the Frankford Library; Rev. John B. Laird; and John Thomson; and an historical sketch of the Frankford Library was presented by George W. Wright, for many years secretary of that institution. The Frankford branch is the 16th branch of the Free Library of Philadelphia.

*Philadelphia F. L. Port Richmond branch.* The keynote of the second anniversary of the Port Richmond branch of the Free Library of Philadelphia on Wednesday, Dec. 12, was brightness. The rooms were tastefully decorated for the occasion with palms, potted plants and bunting lent by interested borrowers and an orchestra added to the general animation.

About 250 people had gathered when John Thomson, librarian of the Free Library of Philadelphia opened the meeting with a brief salutatory address, followed by Richard E. Wilson, librarian in charge of the branch, who gave an interesting account of the year's work. Several residents of the neighborhood also spoke of the library's excellent work in Port Richmond. Not more than 40 minutes were appropriated to speechmaking and then all entered heartily into an informal reception, which proved wholly enjoyable.

Port Richmond is a community of toilers little devoted to reading, many of whom regard a library with something of awe, and it was to overcome this that the program was

arranged. Since the opening of the library so well has the habit of reading been fostered that in two years of the library's existence nearly 100,000 books have been circulated, with only 5000 volumes on the shelves. There are 3000 registered borrowers, 786 of whom have taken out cards during the past year. The library is in close proximity to the Cramp shipyards and other large manufacturing concerns and on this account the section devoted to technical books is unusually large. 727 books on engineering were circulated during the year and an interesting proof of their value is given in the fact that a local engineer secured a very high figure of merit in the new municipal examination for engineers and was complimented by the examiners on his theoretical knowledge, "all largely due," he himself says, "to books taken from this branch."

*Providence (R. I.) Athenæum.* (65th rpt., submitted Sept. 24, 1900.) Added 941; total 62,049. Issued, home use 59,832 (fict. 32,268). a decrease of 2495. Receipts \$7280.77; expenses \$7179.85.

The directors say: "During the early spring the Athenæum was highly honored by the appointment of its librarian, Mr. Harrison, to take charge of the American Library Association at the Paris Exposition and a three months' leave of absence was granted him that he might engage in this work. Thus through the efficient services of its librarian the Athenæum has been enabled to contribute very materially to the success of this impressive exhibit of American progress and is entitled to a just proportion of the credit therefor along with Mr. Carnegie, through whose generosity the necessary funds for their expenses were provided."

*San Francisco (Cal.) F. P. L.* (Rpt. — year ending June 30, 1900.) Added 15,104, of which 9377 were added to the main library; total 128,052, of which 105,776 are in the main library. Issued, home use 638,250 v., of which 289,826 v. were drawn from the six branch libraries; lib. use 220,594, of which 69,910 were used at the branch libraries. New cards issued 15,744; total cards in force, 30,099. Receipts \$67,242.69; expenses \$60,369.59.

Borrowers' cards are available for use at either the main library or the branches, so that "it is not possible to know the exact number of readers of each place." The total statistics of circulation show an increase in home use of 93,731 v., and in lib. use of 11,011 v. "The number of technical books used shows a noticeable increase," attributed in part to the recent issue of a printed catalog of this class.

Mr. Clark calls attention to the relative cost per borrower of the different branches: "Without including the portions of the salaries of the librarian, secretary, and others,

whose service is chargeable to the entire system, and omitting the Fillmore branch because of the unusual expenses incidental to getting it well established, the average cost per annum for each borrower in the remaining five branches is \$1.60. Instead of maintaining permanent collections of books in the smaller branches, thus tying up quantities of popular books but little used after the newness has worn off, the books could be deposited temporarily and changed from time to time. In this and other ways it is possible to materially reduce expenses without impairing the efficiency of the branches."

Appended to the report are the examination papers prepared for applicants for positions in the library service, at the examinations held in November, 1899.

*Seattle (Wash.) P. L.* The library was destroyed by fire on the night of Jan. 2. The fire originated in the basement, it is supposed from the furnaces. The contents of the library, about 25,000, were a total loss. The building was erected about 10 years ago, at a cost of about \$60,000, by Henry Yesler, one of the famous pioneers of Seattle.

Immediately after the news of the fire it was announced — on Jan. 5 — that Andrew Carnegie would give the sum of \$200,000 for the re-establishment of the public library in a new building, provided the city make a yearly guarantee of \$50,000 for maintenance and improvement.

*Spokane (Wash.) City L.* The library was opened free to the public on Jan 1, in accordance with a vote of the city council on Dec. 19. Heretofore there has been an annual fee of \$1.

*Stamford, Ct. Ferguson L.* An interesting architectural exhibition was recently opened in the reading room of the library. It included as a special feature designs of library buildings, especially in New York and Connecticut; and charts were also shown illustrating Gothic, Roman, Byzantine, and other orders of architecture.

*Theresa, N. Y.* At an election held Dec. 11 it was voted by a total of 173 votes against 54 to establish a public library by town support.

*University of Wooster, Ohio.* The handsome new library building given by H. C. Frick to the University of Wooster was dedicated with impressive ceremonies in Kauke Chapel on Dec. 11. Addresses were made for the architect, trustees, faculty, librarian, alumni, students, and citizens of Wooster. The presentation address was made by Jacob Frick, and the building was accepted in an appropriate address.

*Wesleyan Univ. L., Middletown, Ct.* (Rpt. — year ending May 31, 1900; in *University Bulletin*, Nov., 1900.) Added 3027; total

59,000. There were 7045 v. drawn for home use, and in addition 1307 v. were withdrawn for reserved use. The re-classification, begun in 1899, was continued during the summer, when about 7000 v. in theology were classified, marked and shelved. The work of preparing a shelf list on cards for the books included in the new classification (upwards of 25,000 v.) has been completed. This shelf-list will be kept up to date, and will be extended to include the unclassified books as they are classified. About \$3000 has been added by subscriptions to the Alumni Library Endowment, which now amounts to \$28,956.70. The Hunt Library Endowment Fund amounts to \$26,483.

*Wisconsin State Historical Soc. L., Madison.* The annual meeting of the society was held on the evening of Dec. 14, when the report of the secretary and superintendent for the year past was presented. The accessions of the period were stated as 3577 v. and 5406 pamphlets, giving a total of 215,606 titles. Mr. Thwaites gave the details of the removal of the library and museum from the capitol to its new building, a mile away. The time required was six weeks, the cost was \$1100; not a volume was lost, and only a few minor injuries to museum exhibits were sustained. The work of duplicating cards for the official card catalog of the new library is making rapid progress, as are also the catalogs for the several departmental libraries—public documents, maps and manuscripts, newspaper files and genealogy and art.

An appeal was made for a larger appropriation from the legislature—an additional sum of \$12,000 a year being requested, of which \$2000 is for additional administration and \$10,000 for books. The annual appropriation from the state is now \$15,000, but it was shown that this is wholly consumed in administrative expenses, leaving nothing whatever for books.

#### FOREIGN.

*Bradford (Eng.) P. Ls.* (30th rpt.—year ending Aug. 12, 1900.) Added 3909, of which 1062 were added to the Central Reference Library. Total issue, 598,763, of which 85,678 were consulted at the Central Reference Library, and 146,320 were issued from the Central Lending Library, the remainder being issued from the 10 branches. The entire circulation showed a net decrease of 20,833 from that of the previous year.

*Falkirk, Scotl.* Plans have been accepted for a new public library building, toward the cost of which £3000 has been contributed by Andrew Carnegie.

*Manchester (Eng.) P. F. Ls.* (48th rpt., 1899-1900.) Added 14,121, of which 4155 were added to the reference library; total 285,309. Issued, home use, from 12 lending libs., 85,4587, as against 870,401 issued in the

preceding year. Consulted at ref. lib. 415,153, as against 410,116. At the 12 branches 522,111 v. were used in the children's reading rooms, and 59,830 v. were read in the news-rooms, in addition to reference books on open shelves. It is estimated that 3,663,526 visits have been made to the 17 newsrooms, and there are 43,450 recorded cardholders. The Sunday use for the year at the reference library has been 10,816 v.

### Gifts and Bequests.

*Chattanooga, Tenn.* On Dec. 9 Andrew Carnegie offered to give \$50,000 for a public library building for Chattanooga, provided the city guarantee to appropriate \$5000 yearly for maintenance. It is reported, indeed, that if the city will agree to appropriate an annual sum of \$10,000, the Carnegie gift will be raised to \$100,000. The offer seems sure of acceptance, though formal action has not yet been taken.

*Columbia Univ. L.* The Holland Society of New York has decided to deposit with Columbia University its entire library, consisting of a collection of books and pamphlets, most of them in the Dutch language, and many of them old and very valuable. The nucleus of the library is a collection of 258 volumes of the works of Grotius, and of books relating to him which were presented in 1890 to the society by Robert B. Roosevelt, who was at that time its president.

*Crete, Neb.* On Dec. 27 T. H. Miller, president of the Crete State Bank, offered to give to the city the sum of \$10,000 for a public library building, provided the city furnish a site approved by the donor.

*Fort Dodge, Ia.* On Dec. 21 Andrew Carnegie offered to give \$30,000 for a public library building for Fort Dodge, provided the city furnish a site and guarantee to maintain the library.

*Litchfield (Ct.) P. L.* By the will of the late Roger Wolcott, of Boston, the Litchfield Public Library receives a bequest of \$1000.

*Milton (Mass.) P. L.* By the will of the late Roger Wolcott, of Boston, the Milton Public Library receives a bequest of \$2000.

*Pekin, Ill.* In December it was announced that Andrew Carnegie had offered, through the Pekin Women's Club, to give \$10,000 toward the establishment of a free library, provided the city appropriate \$1000 annually for maintenance and that a site be furnished. The offer was accepted by the city council at a meeting on Dec. 18, when an ordinance providing for the appropriation of \$1500 a year for library purposes was introduced and passed.

*Tuskegee Institute, Ala.* Andrew Carnegie has offered to give \$20,000 for a library building for Tuskegee Institute. The building will be erected entirely by student labor.

*Washington and Jefferson College, Washington, Pa.* A gift of \$10,000 has been added by Mrs. Mary Thaw Thompson to the \$50,000 given by her husband, William R. Thompson, for a new library building for Washington and Jefferson College. The plans for the building have already been completed by Rutan & Russell, the architects, and it will cost \$40,000. The remaining \$20,000 will be held as a fund, only the interest of which will be expended in the purchase of books. Mr. Thompson's gift is intended as a memorial to his mother, Mrs. Elizabeth Donaldson Thompson.

### Librarians.

ALLEN, Miss Mary W., Pratt Institute Library School, class of 1900, goes from the Bensonhurst Library to the Brooklyn Institute Library early in the year.

BROWN, Miss Edna A., of the Pratt Institute Library School, class of 1900, has been engaged to catalog the new Carnegie Library at Carnegie, Pa.

CASAMAJOR, Miss Mary, of the N. Y. State Library School, 1899-1900, has been appointed librarian of the Munson Steamship Line, New York City.

CLARK, Miss Josephine A., of the N. Y. State Library School, 1888-89, who since 1893 has been assistant librarian, has been appointed librarian of the U. S. Department of Agriculture, succeeding W. P. Cutter, resigned.

COOKE, Miss Elizabeth R., Pratt Institute Library School, class of 1900, is cataloging at the Coburn College Library, Colorado Springs.

CUTTER, William Parker, for eight years librarian of the U. S. Department of Agriculture, has been appointed head of the order department of the Library of Congress. Mr. Cutter was born in Washington in 1867, and is a graduate of Cornell University. He was for several years engaged as chemist at the U. S. Utah Experiment Station, and was for a year librarian of Utah Agricultural College. His appointment to the librarianship of the Department of Agriculture was secured as a result of civil service examination against 16 competitors. During his administration the library of the department has been developed in usefulness, especially through the issue of printed index cards for the year books of the department and other publications. Mr. Cutter is a charter member of the Library Association of Washington City, and has been actively interested in the course in library

training conducted by the Columbian University in Washington. He has been a member of the A. L. A. since 1894.

DAVIS, Miss Esther M., of the New York State Library School, 1899-1900, has been appointed cataloger at the University Club Library, New York City.

DOAN, Enos L., librarian of the Wilmington (Del.) Institute Free Library, died on Dec. 18 at his home in Wilmington. Mr. Doan was born in Indiana 40 years ago, and was a graduate of Haverford College. He was for several years connected with the Friends' School, in Wilmington, first as teacher and later as assistant principal and principal, and in the spring of 1899 he resigned that office to accept the appointment of librarian of the Wilmington Institute Free Library, succeeding Willis F. Sewell. He had previously been active in the development of the library, and as chairman of the library committee his efforts had aided in the reorganization of the former subscription institute library into a free public library. As librarian he gave faithful and devoted service to the library and his administration commanded appreciation and respect. Mr. Doan leaves a wife and two children.

GOULDING, Philip S., of the N. Y. State Library School, 1898-99, has been appointed head cataloger at the University of Missouri, beginning January 1, 1901.

MALTBY, Mrs. Adelaide B., of the Pratt Institute Library School, class of 1900, has been appointed head of the children's department in the Buffalo Public Library.

PELLECHET, Mlle. Marie Catherine Hélène, honorary librarian of the Bibliothèque Nationale and compiler of the well-known catalogs of French incunabula, died at her country home at Marly-le-Roi, near Paris, on Dec. 11 of an infectious grippé, of which she had been ill about a month. Mlle. Pellechet was born in Paris, in 1840. Her bibliographical work, in which she displayed rare talent, was the result of a natural inclination in this direction, and was carried on with devotion and enthusiasm as a labor of love. Her first catalog of incunabula (devoted to the collection of the library of Dijon) was completed in 1886, and was followed in 1887, 1889, 1892, and 1893 by other volumes, including the incunabula at Versailles, in the Bibliothèque Ste Geneviève at Paris, and at Lyons. Of her great work the "Catalogue général des incunables des bibliothèques publiques de France," a first installment, covering "Abano-Biblia," was printed in 1897, but publication was then deferred to allow of references to the facsimiles in the forthcoming history of French printing, by M. Claudin. It is understood that Mlle. Pellechet's work will be taken up by her friend,

M. Polain, but there must be general regret that the enthusiastic spirit which shaped its plan might not have seen its completion. A portrait and an interesting biographical sketch of Mlle. Pellechet, by Miss M. W. Plummer, appear in the special "Library number" of the *Pratt Institute Monthly* for December, 1900.

ROSE, Miss Alice, formerly assistant in the Forbes Library, Northampton, has completed the work of reorganizing the Public Library of Suffield, Ct., and classifying it upon Cutter's expansive system, and has returned to the Forbes Library.

SMITH, Mrs. M. M., librarian of the Riverside (Cal.) Public Library since its organization, died at her home in Riverside on Dec. 6, after a prolonged illness.

SPRINGER, Miss May Z., of the New York State Library School, 1899-1900, has been appointed librarian of Alma College, Alma, Mich.

STEELE, Miss Edith McH., of the Pratt Institute Library School, class of 1900, has been appointed librarian of the Carlisle (Pa.) Indian School.

STEINMAN, Miss Elizabeth, first assistant in the Grand Rapids (Mich.) Public Library, was on Jan. 5 elected librarian of that institution, succeeding Miss Lucy Ball, resigned.

TITCOMB, Miss Mary L., secretary of the Vermont Library Commission, and well known as a library organizer, has been appointed librarian of the Washington County Free Library, at Hagerstown, Md. The library is in process of formation, and is established upon the endowment of \$50,000 given by B. F. Newcomer, of Baltimore. The building, on which work was begun some months since, is expected to be completed by June. Miss Titcomb will enter upon her new duties on Feb. 1, when she will take up the selection, purchase, and cataloging of books for the library—a work in which her experience has been especially valuable. Miss Titcomb was for 10 years librarian of the Rutland (Vt.) Free Library and since giving up that post in 1899 she has organized and cataloged several of the new libraries of Vermont, while her untiring interest has been of much influence in the development of libraries in that state.

VANCE, Joseph H., assistant librarian of the law department of the University of Michigan, died at his home in Ann Arbor on Dec. 23, of typhoid-pneumonia. Mr. Vance had been connected with the university for nearly 40 years, chiefly in the law library, though he was general librarian from 1854 to 1856 and had acted for a time as steward. He was graduated from the law department in 1861,

and was about 73 years old at the time of his death.

WAIT, Miss Marie F., of the New York State Library School, 1894-95, who has since 1896 held a position in the New York Public Library, has been appointed librarian of the New Jersey Historical Society in place of Miss Henrietta R. Palmer, resigned.

WINDEYER, Miss Margaret, graduate of the N. Y. State Library School, class of 1900, has been appointed librarian of Wells College, Aurora, N. Y.

WING, Josiah Norris, for nearly two years librarian of the New York Free Circulating Library, and for many years previously head of the library department of Charles Scribner's Sons, died at his home in New York City on Dec. 20, 1900. Mr. Wing was born near Lynchburg, in Prince Edward county, Va., Sept. 29, 1848. His father, E. N. Wing, a native of Maine, was engineer of the East Tennessee and Virginia Railroad, and built High Bridge over the Appomattox River, at Farmville, Va. He was a Union man, and after the siege of Knoxville removed to New York City, where his son attended the public schools and entered the College of the City of New York. Before completing his first year at college, however, young Wing accepted a position as clerk in the New York Mercantile Library. He remained for 13 years in the service of that library, becoming first assistant librarian; but his unceasing work and conscientious devotion to details undermined his health, and he was obliged to retire for a time from active work. In 1880 he was placed in charge of the library department of Charles Scribner's Sons, for which his library training had given him an excellent equipment, and in this position he continued until in April, 1899, he was appointed to succeed Arthur E. Bostwick as Librarian of the New York Free Circulating Library. Mr. Wing was always devoted to his calling, and deeply interested in library matters. He was a member of the American Library Association for 14 years, and was almost from its beginning an active member of the New York Library Club. Of the New York Library Association he had been treasurer for seven years, and he held that office at the time of his death. He was also prominent in book trade organizations, and in the various civic reform movements in New York City. He was a man of kindly nature, always ready to give help and service in any good cause, and he will be missed by many friends among library people, as among book-buyers, collectors, and civic workers.

WOODS, Henry F., for 10 years past a member of the staff of the St. Louis Public Library, has been appointed librarian of the East St. Louis (Ill.) Public Library, succeeding Miss Minnie Turner, now Mrs. H. L. Browning.

## Cataloging and Classification.

AMERICAN CATALOGUE, 1895-1900. Author and title alphabet. In 2 pts. N. Y. Office of the *Publishers' Weekly*, 1900. c. 559 p. F. (for complete work.) sheets, \$10; hf. mor., \$12.50.

The second part appeared in December, 1900, succeeding part I at an interval of three months. The subject alphabet, completing the work, is announced for publication early in 1901.

BOSTON P. L. Annual list of new and important books added; selected from the monthly bulletins, 1899-1900. Boston, Published by the trustees, 1901. 12+174 p. O.

The fourth annual issue of this list, which, like its predecessors, should possess decided value to other libraries. No change has been made from the methods previously followed, except that a selected list of recent public documents is appended. The record as a whole is comprehensive and the selection judicious in character and proportions.

The JOLIET (*Ill.*) P. L. has issued an attractive Christmas bulletin, compiled by Mabel K. Davison. The little pamphlet is gayly bound in green covers with a design of holly.

The NEW YORK P. L. *Bulletin* for December is mainly devoted to a careful record of documents, maps, reports, and similar material relating to "The northeastern boundary," prepared by Miss A. R. Hasse.

PLAINFIELD (*N. J.*) P. L. Class list no. 1, November, 1900. New York, 1900. 4+102 p. O.

A short-title fiction list, consisting of author list and title list; appended is a 13-page list of historical fiction, and a short list of fairy tales and folk tales.

A SCHEME OF CLASSIFICATION FOR PSYCHOLOGY. (*In Psychological Review*, January, 1901. 8:60-63.)

This classification has the authority of an international committee and embodies the opinions of experienced bibliographers of psychology. It is a modification of the classification heretofore used in the "Psychological index."

SPRINGFIELD (*Mass.*) CITY L. Books on architecture: a list from the City Library collection selected and classified with brief notes by Guy Kirkham, architect. Springfield, Mass., 1900. 8 p. D.

UNIVERSITY OF STATE OF NEW YORK. State Library, bulletin 53, December, 1900. Bibliography 23: Reference list on Connecticut local history; comp. by Charles A. Flagg. Albany, 1900. p. 175-283. O. 15 c.

## CHANGED TITLES.

"All sorts," by L. T. Meade, was published in London by James Nisbet & Co., Ltd., in 1899. George W. Jacobs & Co., Philadelphia (copyright date 1900), have published the same book from the same plates as "A plucky girl, by Laura T. Meade." The Philadelphia edition is illustrated by Ida Waugh. S: H. R.

## FULL NAMES.

*The following are supplied by the Catalogue Division, Library of Congress.*

- Allen, Alfred Henry (Commercial organic analysis . . .);  
 Armes, George Augustus (Ups and downs of an army officer);  
 Barbour, Anna Maynard (That Mainwaring affair);  
 Benson, Blackwood Ketcham (Who goes there? . . .);  
 Berkley, Henry Johns (A treatise on mental diseases);  
 Berry, William Harvey (Restricted industry);  
 Bogardus, Harriet Steele (Lessons in applied ethics of Christ);  
 Comer, Charles Evelyn (Book-keeping and office work);  
 Conant, Charles Arthur (The United States in the Orient);  
 Condon, William Henry (Life of Major-General James Shields . . .);  
 Conwell, Joseph Alfred (Our nation's need . . .);  
 Culbreth, David Marvel Reynolds (A manual of materia medica and pharmacology . . .);  
 Dietrich, Christian Earnest (The solution of the social problem);  
 Dofflemyer, James Jasper (Students' manual of United States history);  
 Duboc, Henry Alfred (Outlines of English history);  
 Fiske, Asa Severance (Reason and faith);  
 Fitz Patrick, Hugh Louis (Golf don'ts);  
 Foltz, Kent Oscanyan (Diseases of the eye . . .);  
 Fuller, Benjamin Franklin (History of Texas Baptists);  
 Gjerde, Mons Pedersen (Kamp og seier);  
 Guenther, William George (The law of insurance of the state of Ohio);  
 Guynes, Lelie Jasper (The 20th century telegraph cipher code);  
 Haddock, Frank Channing (The king on his throne);  
 Harrison, Mitchell Charles, *comp.* (New York state's prominent and progressive men);  
 Hathaway, Evangeline, and Dunbar, Mary Elizabeth (The A B C of palmistry);  
 Haverstick, Alexander Campbell (The Churchman's ready reference . . .);  
 Hawley, John Savage (Creeds and religious beliefs . . .);

- Holstrom, John Gustaf (Modern blacksmithing);
- Ingersoll, Henry Hulbert, and Turner, Charles Willard (Syllabi of work in pleading and practice . . . University of Tennessee);
- Judson, Frederick Newton (A treatise upon the law and practice of taxation in Missouri);
- Killikelly, Sarah Hutchins (Curious questions);
- Kimball, Lillian Gertrude (The structure of the English sentence);
- Lampton, William James (Yawps and other things);
- Lewis, Mrs. Martha Williams (Twice tried . . .);
- Long, William Joseph (Wilderness ways);
- Luce, Edward Jewett, *comp.* (Table of statutes included in the general statutes of New Jersey, 1703-1895);
- McDermut, Whitney Byron (The typographic style-book);
- Macy, Mrs. Maude Little, and Norris, Harry Waldo (A general physiology . . .);
- Mason, William Lesley (A complete course in phonography);
- Monell, Samuel Howard (Elements of correct technique . . .);
- Montgomery, Edward Emmett (Practical gynecology);
- Murray, Charles Augustus (A treatise on hell . . .);
- Niblo, Edward (The complete palmist . . .);
- Pattee, William Sullivan (Illustrative cases in contracts);
- Rayon, Mesha (The mystic self . . .);
- Schaefer, Emma Caroline (Thoughts on social problems and Scripture readings in verse);
- Schamberg, Jay Frank (A compend of diseases of the skin);
- Selden, Edward Griffin (In the time of Paul);
- Shepard, William Edward (Wrested scriptures made plain);
- Shurly, Ernest Lorenzo (A treatise on the diseases of the nose and throat);
- Skotheim, Olaf Halvorsen (Vaekkelsharpen . . .);
- Smith, Thomas Berry (In many moods. Poems);
- Southwick, Frank Townsend (Steps to oratory);
- Stevens, Frederick Waer (A treatise on practice in actions at law in the circuit courts and Supreme court of Michigan . . .);
- Sutherland, Edward Alexander (Living fountains; or, Broken cisterns . . .);
- Sutphen, William Gilbert van Tassel (The cardinal's rose);
- Widney, Joseph Pomeroy (The way of life . . .);
- Williams, Milan Bertrand (Consecration; its relation to life and sound doctrine);
- Young, Emanuel Sprankel (The Bible geography).

## Bibliography.

AMERICAN LITERATURE. Wendell, Barrett. A literary history of America. N. Y., Charles Scribner's Sons, 1900. 11+574 p. O. (The library of literary history.) \$3.

Pages 533-554 contain a very useful list of authorities and references.

ANTARCTIC REGIONS. Fricker, Karl. The antarctic regions; with maps, plates, and illustrations in the text. London, Swan Sonnenschein & Co., Ltd., 1900. 12+292 p. 8°.

Pages 283-286 contain an annotated list of important books, articles and maps, a large number of which are German. Under History of early discovery there are 5 titles; under History of late discovery, 27 titles; Most important modern geographical works on the Antarctic, 16 titles; and a list of 9 general maps of the whole south polar region, all published since 1872.

PROFESSOR EDWARD ARBER has undertaken the preparation and publication of "The term catalogues, 1668-1709 A. D.," edited from the rare quarterly lists issued by the booksellers of London. The work is described as "a line for line reprint of a contemporary bibliography of English literature, in the reigns of Charles II., James II., William and Mary, and Anne; and containing the titles of about 20,000 editions of books, etc., together with maps, engravings, packs of cards, etc." It will appear in two volumes, each including text and index, covering the periods 1668-1692 and 1693-1709 respectively, volume 1 to appear about July, 1901, and volume 2 early in 1902. The work is sold only by subscription, at £21 (\$105) net for the large paper edition (100 sets), £10.10 (\$52.50) for the small paper edition (1000 sets). It will contain in all about 1550 pages, large folio. In his announcement, Prof. Arber says: "I have made strenuous endeavors to induce likely publishers to undertake the reproduction of the Term Catalogues; but they all, with one consent, began to make excuse. I must therefore attempt another privately printed impression, like the 'Transcript of the registers of the Company of Stationers of London, 1553-1640 A. D.,' which was edited and issued by me in 1875-1877; or else this great literary record, which has so nearly perished, will pass out of the knowledge of mankind. The work will be undertaken as soon as 250 sets have been subscribed for, and the subscribers will be immediately informed to that effect. Of course, a text like this would be virtually useless without a masterly index to each volume. This will be attempted, and it will not only be an index of authors, editors, and translators, but also of subjects and places, together with publishers and (as far as practicable) printers. Every effort will be made

to render this text — which represents all the branches of human knowledge of that age — readily accessible to all classes of inquirers. Librarians will not fail to grasp the fact that 'The term catalogues' will not only be a work of reference, but that, printed on writing paper, with ample margins for press marks in ink, they will constitute a ready-made historical, classified and indexed catalog of new books and new editions, 1668-1709, and that this reprint will enable them to know at once not only what editions of those 41 years are in their library, but also what other editions of that age they have yet to seek after." Circulars and sample pages may be had from Professor Edward Arber, 73 Shepherd's Bush Road, West Kensington, London, W.

ARCHAEOLOGY. Fowler, H. N., *ed.* Bibliography of archæological books, 1899. (*In American Journal of Archaeology*, 2d ser., July-Sept., 1900. 4:387-414.)

This classified bibliography was published in December, 1900.

THE BIBLIOGRAPHICAL SOCIETY OF LANCASHIRE, England, has recently been organized, with Henry Guppy, librarian of the John Rylands Library of Manchester, as honorary secretary. Its objects are "the discussion and elucidation of questions connected with books and literary history; the promotion and encouragement of bibliographical studies and research; the exhibition of rare or remarkable books, printed or in manuscript; the yearly issue of selected papers, reprints and facsimiles." The membership fee is £1 annually, and "libraries and public institutions shall be entitled to receive the ordinary publications of the society on payment of £1 per annum, and any special publications on a further payment of the subscription price of the same."

BOWDOIN, W. G. Art in American book-bindings. (*In Independent*, Dec. 13, 1900. 52:2963-2968) il.

Historical and descriptive of processes in artistic bookbinding.

CONNECTICUT STATE LAWS: a bibliographical list of editions of Connecticut laws from the earliest issues to 1836; compiled by Albert Carlos Bates, librarian of the Connecticut Historical Society. Connecticut, Acorn Club [W. M. C. Carlton, Hartford], 1900. 8+1201 p. 4°. \$5. (102 copies.)

The material recorded is arranged in four divisions: Public acts and laws arranged chronologically from 1672-73 to 1837; Special acts and resolves, 1758 to 1814; New Haven's settling, 1656-1858; and Parliamentary acts reprinted. Indication of the location of each issue recorded is given when possible for three different library collections,

giving preference first to the Connecticut State Library, the Connecticut Historical Society, and Yale College Library; second, to other libraries within the state of Connecticut; and third, to libraries in other states. When no copies were found in public libraries, collations have been given in a few cases from private collections, but without giving the names of owners.

GEOGRAPHY. *Annales de géographie 9<sup>me</sup> bibliographie géographique annuelle*, 1899. Paris, A. Colin & Cie, 1900. 320 p. 8°.

GERMAN TRANSLATIONS. Wilkens, F.; H. Early influence of German literature in America. N. Y., Macmillan [1900]. 105 p. 8°.

An appendix (p. 63-105) contains an annotated list of the translations of German literature that were printed in the United States before 1826. The list is arranged chronologically, with an index of authors. The first translation was published in 1762, Gessner's "Death of Abel," and this work was reprinted six different times up to 1770; and until 1778 no other German translation was published in America. Kotzebue was the most popular of the authors translated, and at least 35 of his works were so published, "Pizarro" being represented in eight different translations or editions.

LASTEYRIE, Robert E. *Bibliographie des travaux historiques et archéologiques publiés par les sociétés savantes de la France*, dressée sous les auspices du ministère de l'instruction publique. Tome 3, livrais. 2. Paris, Imp. National, 1900 p. 177-400. 4°.

LIBRARY OF CONGRESS, Division of Bibliography. A list of books (with references to periodicals) on mercantile marine subsidies; by A. P. C. Griffin, chief of Division of Bibliography. Washington, Gov. Print. Office, 1900. 43 p. O.

Includes in addition to lists of books and periodical articles, lists of articles in U. S. Consular reports, of speeches in the *Congressional Record*, and of articles in Board of Trade journals.

YVE-PLESSIS, R. *Petit essai de bibliothérapie*; ou, l'art de soigner et restaurer les livres vieux ou malades. Paris, Daragon, 1900. 95 p. 18°. 3 fr.

The first issue in the series "Collection du bibliophile parisien." The author divides his essay in two parts, the first dealing with the "hygiene" of books in general; the second treating the "therapeutics" of old or injured books. Appended is a bibliography of special works consulted (19 titles).

## INDEXES.

ENGINEERING NEWS. Index to *Engineering News* for the years 1890 to 1899, inclusive; comp. by Mary E. Miller. New York, *Engineering News* Pub. Co., 1900. 4+324 p. O. \$2.50.

An excellent example of compact indexing, making available for reference a mass of useful technical material. The index was developed from a consolidated card index begun several years ago, in which additions were inserted from year to year, and which was finally revised and amalgamated to cover the 10-year period. As printed, it contains about 25,000 references, covering almost every branch of engineering science and related subjects. Entries are compactly arranged, with inversions of title when necessary to bring out a specific subject. Useful features are the designation of year in Arabic numerals, instead of giving volume number in Roman form, the indication of illustrated articles by an asterisk affixed to the page number, and the denoting of inset sheets of engravings by the similar affixing of a dagger sign. But one type is used throughout, which makes the page monotonous, and has made it necessary to emphasize cross references by enclosing them in parentheses. The indenting, and bringing out of subjects is well contrived. The index will be indispensable in libraries possessing a set of the *Engineering News*, and it should have practical usefulness simply as a register of material in this technical field.

RANDALL, D. T. Indexing periodical literature. (*In American Machinist*, Dec. 27, 1900. 23:1235-1237.)

"To be of greatest possible value, an index should indicate the following: (1) The title of the article; (2) The name of the author; (3) How many pages and how many illustrations; (4) A description of the article giving the *real* subject and outlining its treatment—or possibly a synopsis of the article; (5) A note regarding the value of the article; (6) In what book or periodical, in what volume and on what page it may be found. Such a system avoids the necessity of looking further than the index until the right article is found, and almost doubles the value of the information at hand by lessening the time required to find it."

### Anonyms and Pseudonyms.

"Carolus," pseud. for Charles Didier. ("The romance of l'Aiglon.")—*Catalog Division, Library of Congress*.

Caroline Brown, pseud. of Miss Caroline Virginia Krout, author of "Knights in fustian," a novel.—E. G. B.

### Humors and Blunders.

There is a misprint in Farrar's "Life of lives" (p. 15) that must amuse all who recall the days when children used to be drilled in Milton's "Paradise Lost," in reference to "that forbidden fruit

"Whose moral taste  
Brought sin into the world and all our woe."

ASKED FOR AT THE DELIVERY DESK:

"The unleavened bread winner."  
"A knot of gold ribbon."  
"To git & to keep."  
"The dimnight marriage."  
"You and me and some others."

HEARD AT THE DELIVERY DESK:

*Reader*—This book is really not fit to be in the library.

*Clerk*—What is it?

*Reader*—Richard Yea-and-Nay.

*Clerk*—I have not read it, and don't know much about it. We have another by the same author.

*Reader*—What is its name?

*Clerk*—The Forest Lovers.

*Reader* (eagerly)—*Is it in?*

(When told that it is not, she spends half an hour at the open shelves in a vain search for it.)

### THE TRAINED LIBRARIAN.

OBSERVATIONS MADE IN A LIBRARY BY A PEEPING TOM.

Her name is self-assurance, and said name is plainly writ  
On her snippy up-turned nose, and her inky finger tip.

The list of her accomplishments sounds like a fairy fable.  
It must measure twice the length of the Transatlantic cable

To show their depth and height, I will mention just a few

That man may understand what dainty maid can do.

She can mark clean title-pages with artistic dots and lines,  
The professional librarian's cabalistic signs.

She can "subject-head" all works, be they Sanskrit,  
Dutch or Greek,

Though the tongues in which they are written, she can  
neither read nor speak.

When the learn'd professor ponders o'er some scientific  
book,

She will classify its contents, scarcely giving it a look.

And she illustrates her point by such a fitting term,  
That the doctor and the lawyer for very envy burn.

But the summary of attainments at her ladyship's command

Lies in a sort of penmanship known as "the library hand."

She will point to twenty cards in as many different styles,  
From the adept's practiced writing to the school-boy's  
early trials.

When the auditor, bewildered at this wonderful array,  
Is fain to ask the question "Which?" in tones of deep  
dismay;

With forehead raised in great surprise and eyes with  
fervor lit,

She waves her hands o'er all the cards, and proudly  
answers "It,"

ANNA C. LAWS.

## BOOK DEPARTMENT

ON account of a large increase in the volume of business which we are now doing with the libraries of the country we have decided to establish a special LIBRARY DEPARTMENT in order to make our services more efficient. We invite you to take advantage of our facilities.

We have the largest miscellaneous book stock in the United States, embracing the publications of the various publishers, and assure you that our facilities for the proper handling of our correspondent's orders are of the best. We promise you the most careful attention and prompt dispatch on all business entrusted to us.

Would be pleased to receive from you a list of books on which you desire quotations, and, when possible, will be pleased to have you visit us and make use of the facilities of our store and library department in making a selection of books.

Very truly,

THE AMERICAN NEWS COMPANY,  
39-41 CHAMBERS STREET, NEW YORK.

BENJAMIN FRANKLIN STEVENS.

HENRY JOHN BROWN.

# B. F. STEVENS & BROWN,

American Library and Literary Agents,  
4 TRAFALGAR SQUARE, CHARING CROSS, LONDON.

THIS Agency was established in 1864 for supplying American Public Libraries, Institutions, and Book Collectors, with English and Continental Books, Manuscripts, Drawings, Philosophical Apparatus, etc., at the lowest London prices.

Special attention is paid to the selection and purchase of rare old books and manuscripts. Auction sales are carefully watched and good knowledge kept of the stocks of the old Booksellers of Europe.

Lists of Desiderata have the best attention and Librarians are respectfully requested to test the value of the Agency by sending trial orders on by submitting lists for Estimates for goods to be delivered, either free in London or New York, as desired.

Auction Catalogues when printed in advance and Catalogues issued by Publishers and Second-hand Booksellers are mailed to Customers when desired.

Large shipments are sent by cheapest and quickest route, or as ordered. Small shipments are made weekly through our New York Agency, at a minimum of expense and trouble to purchasers, or single books are sent by mail on receipt of order.

Special attention is given to Bindings in all styles.

Periodicals are supplied either direct by mail from London or by mail from New York Agency at lowest rates for prompt and efficient service. Send for Lists.

Payments may be made either direct to London or in U. S. Currency through our New York Agency.

*Ready January, 1901. 100 Copies Printed for Subscribers Only.*

## B. F. STEVENS'S

### Facsimile of the Unpublished British Headquarters Coloured Manuscript Map of New York and Environs (1782)

Reproduced from the Original Drawing in the War Office London.  
24 sheets. Scale,  $6\frac{1}{2}$  inches to a mile. 10 feet by 4 feet. . . . .

The successive British Commanders-in-Chief in America, Generals Sir William Howe, Sir Henry Clinton, and Sir Guy Carleton, during their respective occupations of New York and Environs in the Revolution, caused this manuscript plan from time to time to be kept up.

The plan extends from below Guanas Bay to the Heights of Spikendevil, a distance of about eighteen or nineteen miles. It shows the Fortifications, Defences, Topography, Streets, Roads, etc., of the whole of the Island of New York with the Harbor, Islands, Water Ways, and River Frontages on the Hudson and East Rivers, the Military Works on Long Island including Brooklyn, the Works in Paulus Hook and parts of the Jersey Shore. It has a copious Table of References to various works (British and American), some of them with notes as to the time of their construction or destruction.

The Original Drawing, ten feet by four feet, is on a scale of about six and a half inches to a mile. It is handsomely reproduced for subscribers only, in careful facsimile on 24 sheets which can be joined up and mounted like the original as a Wall Map or mounted on linen if desired. It will be issued either mounted on linen to fold in book form with leather (slip) case, 13 x 10 inches, or the 24 sheets (22 x 15 inches each), will be supplied in a portfolio.

No more than 100 copies are being printed and the engravings are erased as each sheet is printed off.

A few extra copies of sheet 8 have been printed so that it can be sent as a specimen on application from intending subscribers.

#### Prices to Subscribers

Mounted on linen to fold in book form with leather (slip) case. . . \$30 net.  
Unmounted, on 24 sheets in portfolio. . . . . \$25 net.

The above prices include delivery to any Public Library or Institute in the United States or Canada, but private subscribers must also pay the duty.

**B. F. STEVENS & BROWN, 4 Trafalgar Square, Charing Cross, London, W. C.**  
New York Agency, 45 William Street.

# The H. B. Claflin Company.

## BOOK DEPARTMENT.

LIBRARIANS preparing for Fall purchases are earnestly requested to permit us to price their lists before placing orders.

Combining full assortments of publishers' stocks with the largest purchasing capacity of any house engaged in the book trade we are enabled to quote the best prices and thereby enable the librarian to make his appropriation purchase the greatest number of books.

The further fact that we have access within thirty minutes to publishers' stocks enables us to assure prompt delivery, as titles can only be temporarily "out of stock" with us, if in print. This is an important feature where books are wanted hurriedly for special purposes.

We now list as regular customers many of the leading libraries and are constantly adding to the number. We would be glad of an opportunity to prove to librarians the advantages we offer.

Respectfully,

THE H. B. CLAFLIN CO.,  
NEW YORK.

AND

BOOKBINDER { Duro-Flexile,  
Vellucent,  
Reliure de Luxe.

*"Buy Your Popular Books and Your Costly Books*

## **in Duro-Flexile Binding."**

I OBTAIN books from the publishers in sheets and bind them "ONCE FOR ALL." This binding lasts longer than the leaves of the book, and the leaves of the book are preserved and their life immeasurably lengthened by this binding. Librarians cannot persuade publishers to print special editions for them, but I supply books specially bound for them.

If the paper is bad I sew and forward the book so that the leaves are subject to no strain and are indeed strengthened in the folds. If the paper is very stout I sew the book and forward it in a special manner adapted to the thickness of the paper, in other words I adapt Duro-Flexile-binding to both good and bad paper with the results that the utmost service and the longest possible life are obtained for both.

No binding in the world is adapted to the varied qualities of the paper as is Duro-Flexile.

The service obtained from a book of bad paper when supplied bound in this way will surprise you.

A papier maché box and a steel safe are not hinged in the same way. Thin tough paper and thick spongy paper also require very different treatment, and with Duro-Flexile they get it.

**TIGHT BACKS** are used for books of a thickness and quality of paper best suited for such treatment.

**LOOSE BACKS** are given where such are better suited.

My bookbinding is in short adapted in its every detail, both of material and method, to the requirements of a Public Library Book.

500 Public Librarians in all parts of the English speaking world buy these books.

## **POPULAR BOOKS AND COSTLY BOOKS**

bought of me, bound from the quires, give 50% more service.

*A catalogue of Standard Fiction and popular recent books priced net delivered free to your Library will be sent on application.*

# HENRY MALKAN,

*Library Department.*

---

Now that the rush and excitement of the Holiday season are things of the past, and business is beginning to assume normal shape, we wish to again call the attention of Librarians to our unexcelled facilities for filling all library orders in the most complete manner, in the shortest space of time and at prices that have never been equalled. We are now carrying what is probably the most varied assortment of books in the country, and can pick out of stock more books on any library order than any other house. We have just received a very large consignment of books—published within the last two years—on almost every conceivable subject, and it would be to the interest of librarians to send us a list of their wants, as there are books among this lot which are very hard to procure; as the quantities are very limited we would suggest that such lists be sent in at once. Prices given on this lot will defy competition.

HENRY MALKAN,

## LIBRARY DEPARTMENT

# A. C. McCLURG & CO., CHICAGO.

OUR LIBRARY DEPARTMENT, with many years of practical experience, is devoted exclusively to the requirements of Public, University, College, School, and Club Libraries, and every endeavor is made to fill all orders completely and promptly and with the greatest care.

We carry in our stock at all times not only a more nearly complete assortment of the worthy, standard, and popular books of all American publishers than any one single house in the United States, but also a very large stock of technical and scientific books and other books for which there is little demand, and which are not carried by the general bookseller.

We are, therefore, in an exceptionally good position to fill orders direct from our stock with the utmost despatch.

We are continually receiving from our agent in London large consignments of **Foreign Books**—those for Public Libraries being imported free of duty—and we make a specialty of picking up both domestic and foreign books which are out of print, or which for other reasons are difficult to secure.

Librarians are cordially invited to correspond with us and, when possible, to visit us and make use of the facilities of our store and Library Department in making their selection of books.

**A. C. McCLURG & CO., CHICAGO.**

NEW YORK: **G. P. Putnam's Sons,** 27 and 29 West 23d St. LONDON: 24 Bedford St., Strand.  
**LIBRARY AGENTS.**

**M**ESSRS. PUTNAM have peculiar facilities for handling all library business intelligently and to the best advantage of their customers.

Their Branch House in London (through which they receive English orders for American books) enables them to supply, promptly, English books, without the commission usually paid by American dealers.

Their extensive miscellaneous and retail business makes it practicable to buy all books at the lowest prices, to carry a large stock of standard books in every department of literature, and to keep in touch with the current publications of the day. Their business experience covers more than half a century.

## Books for Libraries.

We offer an efficient and experienced service, promptest filling of orders, and prices based on our wholesale buying in the chief American Book Market.

Send for our Library List, a representative classified collection of 2500 vols. Endorsed by library authorities. Special price for the complete library.

Librarians will be interested in our Clearance Catalogs, Overstock Bargains, Current Books.

**THE BAKER & TAYLOR CO.,**  
 WHOLESALE BOOKDEALERS,  
 5 and 7 East Sixteenth St., New York.

## CHARLES SCRIBNER'S SONS,

153-157 Fifth Avenue, New York

Librarians and others will do well to communicate with us before placing their orders.

The latest publications of all the leading American and English publishers are kept in stock, thereby enabling us to fill orders with utmost despatch.

Special attention is asked to our facilities for importing books free of duty.

Correspondence solicited. Send for catalogues and specimen copy of **THE BOOK BUYER**, a monthly magazine devoted to books, authors, and literary affairs.

IN PREPARATION.**Annual American Catalogue,  
1900.**

THE ANNUAL AMERICAN CATALOGUE for 1900, which will appear in January, will contain:

- (1) Directory of American Publishers issuing books in 1900.
- (2) Full-title Record, with descriptive notes, in author alphabet, of all books recorded in THE PUBLISHERS' WEEKLY, 1900.
- (3) Author-, title-, and subject-index to same, in one alphabet.
- (4) Publishers' annual lists for 1900.

This volume forms the **FIRST ANNUAL SUPPLEMENT** to the AMERICAN CATALOGUE, 1895-1900.

One volume, if ordered before date of publication, half leather, \$3.00; in sheets, \$2.50.

After publication the price will be raised to half leather, \$3.50; in sheets, \$3.00.

The edition, as usual, is a limited one. The volumes for 1890 to 1893 are all out of print, and orders for those of 1894 to 1899, to ensure supply, should be promptly filed. THE ANNUAL ENGLISH CATALOGUE, for which we have the American market, now includes full title entries, after the manner of the American volume, instead of the previous abbreviated entries. It will be furnished at \$1.50 paper, or bound with the American in one volume, half leather, at \$5.00, *net*.

Address the OFFICE OF THE PUBLISHERS' WEEKLY,  
P. O. Box 943. 298 Broadway, New York

IN PREPARATION.**The Annual Literary Index, 1900**

Including Periodicals, American and English; Essays, Book-Chapters, etc.; with Author-Index, Bibliographies, Necrology, and Index to Dates of Principal Events. Edited by W. I. FLETCHER and R. R. BOWKER, with the co-operation of members of the American Library Association and of the *Library Journal* staff.

THE ANNUAL LITERARY INDEX complements the "Annual American Catalogue" of books, published each year, by indexing (1) articles in periodicals published during the year of its issue; (2) essays and book-chapters in composite books; (3) authors of periodical articles and essays; (4) special bibliographies; (5) authors deceased; (6) dates of principal events during the year. The two volumes together make a complete record of the literary product of the year.

"Of great value to all who would keep advised of the topics and writers in the periodical literature of the day."—*Universalist Quarterly*.

"Good indexing could no further go."—*The Nation*.

# EDW. G. ALLEN'S

## London Agency for American Libraries

28 HENRIETTA ST., COVENT GARDEN, LONDON.

### Special Notice to Librarians.

Mr. E. G. ALLEN desires to lay before you the advantages of using this Agency for procuring English and Foreign Books, Magazines, Periodicals, etc., and for General Library Work in Great Britain.

Long existing relations with the Booksellers and Publishers of the United Kingdom enable him to execute orders of any magnitude promptly and economically. All important books collated before delivery.

Specialty is made of the finding of Out of Print Books. His success in this department is unrivalled, possessing unique means of search, by which he is able to supply scarce books expeditiously and at moderate prices.

A good selection of Second-hand Dealers' Catalogues is sent to clients by every mail, and no commission charged on orders from them.

New Books supplied on the most advantageous terms, and the Full Trade Discount allowed off the published price.

Auction Catalogues Mailed, Sales Attended, and Commissions Executed with Care and Judgment.

Defects of Rare Books Reproduced in Facsimile.

Long Sets of Scientific and Other Periodicals Supplied. Imperfect Sets Completed.

Large consignments sent by fast steamers at through rates. Small orders can be sent by mail or by express system at low charges.

Special note is kept of all continuations of serials, which are forwarded immediately on publication.

Bookbinding in every style, Cheap and durable for library use. Dilapidated old binding skilfully repaired. Pamphlet binding at specially cheap rates.

Should you at present be without the services of a London Agency, MR. ALLEN would be pleased to answer any inquiries. All orders receive his personal attention, and with an experience of forty years in library business, and the thorough equipment of his agency, he believes himself capable of meeting every library requirement in a satisfactory manner.

**References permitted to first-class Libraries.**

**Special terms for large orders.**

**FOUNDED IN 1856.**

# THE LIBRARY JOURNAL

VOL. 26.

FEBRUARY, 1901.

No. 2

IN planning for attendance at the meeting of the American Library Association, to be held at Waukesha, Wisconsin, in July, librarians should give special heed to the fact that the National Educational Association is scheduled to meet in Detroit at a date immediately following upon the library conference. In Mr. Utley's brief notice of this meeting, printed elsewhere, the importance of a representative library attendance is emphasized, in its relation to the constantly growing work done through the libraries for and with the schools. A meeting of the Library Section of the educational association will fill a part of the program of the Detroit convention, and here the attendance and interest of librarians should be of marked value in stimulating co-operation, from the teachers' side, in library extension. Work with the schools is now looked upon as an important function of the active public library, and many and varied measures have been developed to extend its scope. One of the most interesting evidences of the proportions this work can assume is to be found in the admirable graded and annotated "Catalogue of books for the use of the city schools," recently published by the Carnegie Library of Pittsburgh. Here are listed books chosen with the aid of the Principals' Association of the city, and adapted with great care to the various school grades, to which are added special lists for kindergarten and art work and in pedagogy. The books are not intended to be made a part of school work, but are rather to give delight and instruction outside of school routine; they are sent through the schools to the homes of the children; and through this catalog, placed in the hands of every teacher, there is given opportunity to guide the child's reading according to the child's character, and to exert one of the most powerful of educational influences. Such work as this is of value in its relation to the teacher even more than in its relation to the library, and the presentation of these and other phases of co-operation between schools and libraries before the national convention of teachers should be of great public usefulness.

LIBRARY progress long ago outgrew the field of individual effort, and most of the leading states have now effective library legislation upon their statute books and have appointed library commissions. There is still much to be done, particularly at the south, where Georgia's efforts make it a radiating center of development. At the north, Pennsylvania has lagged behindhand in library development. For years the state where Benjamin Franklin founded one of the oldest American libraries and from which his influence radiated as far as France and gave name to the Franklin Association, which was for a generation the library propaganda center for that country, went on in a staid, steady-going sort of way, now and then to wake up with new and astounding vigor — as in the extraordinary development of the Free Library of Philadelphia. That city was the place of the initiatory meeting of the American Library Association, and of some of the finest libraries of the country, but from the public library point of view it was dead asleep, until suddenly the new library movement there came to the front, and to-day its library shows the banner circulation of the country, although it has not yet a central building worthy of the name.

EFFORT is now being made to bring Pennsylvania as well as Philadelphia to the front by means of a library law giving the state the benefit of the experiences of its sister states which have been able to try different methods of legislative promotion of libraries. At the present time the act passed in 1895 for the benefit of cities of the first class, practically only affecting Philadelphia, and the act authorizing library support from school boards, make up Pennsylvania's chief library legislation, and the ineffectiveness of the latter statutes may be judged from the statement that only one library has been established under the school board enabling act. The outline of the proposed law, which permits the establishment of libraries by all cities and boroughs, is given elsewhere, and it is to be hoped that the present efforts may result promptly in entire success, so that the state

of Franklin may lead instead of follow in library progress. Missouri, which has long enjoyed in St. Louis an important library center, is also waking up in its state relations, and is making an earnest and united endeavor, led by the new library association, to provide for a state library commission there. Still further west, Nebraska is on the alert, with a repeated endeavor to obtain the passage of the bill for a state library commission, which had previously failed to pass. If Illinois also will retrieve her reputation by passing this year the bill for a state library commission, which came so near to passage at the last session of the state legislature, it looks as though 1901 might be notable for library extension by state development.

WHILE the early unit in New England was the township, in the south it has always been the county, and in the west it may perhaps be said that both systems have been in some measure combined. Reflecting this development, two libraries, one in Ohio and one in Maryland, have been established for the pioneer work of radiating out from a county-seat center throughout the county, making the town the library hub with branch or travelling libraries going out along the line of the spokes toward the limits of the county. Cincinnati and St. Joseph, among other cities, have for some time supplied reading within county as well as within city limits, but in both cases the city was the great part of the county. The Brumback Library in Van Wert, Van Wert county, Ohio, however, and the Washington County Free Library, of Hagerstown, Maryland, are likely to find in their respective counties a much larger field outside than within the town. The work at Hagerstown, where Miss Titcomb has come from Vermont to do the pioneering, is peculiarly interesting, as here the library site was the gift of one public-spirited citizen, an unrestricted endowment was given by another, and the building is the result of other gifts, while both town and county authorities contribute an annual sum for current support. The specific plan here is much that of the organization of a large city library, on a small scale, the central library being that of the town, while the branch libraries are to be located in schools or elsewhere throughout the county. Much credit is due to Hagers-

town and to Van Wert people for striking out on new lines, which may have a radical influence in parts of the country where the township method does not fit in with the sparser conditions of population.

BROOKLYN, which, like Philadelphia, has been lagging behind in the library procession until recent years, has been kept literally in a "state of mind" since its public library was started by the "donation parties" of the Brooklyn Public Library Association. To the leading spirit of that organization, Mrs. Craigie, is really due the initiative and impetus which gave Brooklyn the nucleus of a public library system that now includes almost all of the previously unattached libraries throughout that great city and now greater borough, and has this year a municipal income of nearly \$100,000. The pioneer spirit and the administrative faculty are not always joined, and in this case the result of making the pioneer nominally assistant librarian has been a situation which, not having been squarely met by decisive action on the part of the library board, has induced Mr. Bostwick to return to his old field in New York, with its new prospect of development as a part of the library system so wonderfully developed by Dr. Billings. Brooklyn offers one of the best possible fields for library development on the part of a library executive of the first rank, but a necessary preliminary to the obtaining of such a man—the Admirable Crichton of librarians, outlined in the committee's statement of the ideal candidate it is looking for—must be a full concentration of responsibility, supported by a united board. Until the problem is worked out on these lines, Brooklyn is likely to be regarded with curiosity rather than with sympathy by the library profession at large. Des Moines has recently passed through a somewhat similar trial, owing also to weakness of backbone on the part of its board, out of which it is emerging with good result for the city and for the library community.

THE Pratt Institute Library School, in printing a selection from its term-examination questions, as given elsewhere, has made a somewhat novel departure and one that cannot fail to interest all who have at heart

library matters. The monthly notes from the library schools, their reports, their handbooks, and their printed outlines, keep the library world in touch with their aims and methods; but the present contribution gives unusual insight into the results that it is desired to produce. These term-examinations seem to a marked degree to possess freedom from "catch questions." The students are seldom confronted by the necessity of quoting a definite rule or a particular book, so that the element of "luck"—inherent in all examinations—is to a great extent eliminated. If the student has secured an intelligent grasp of the principles of each subject as it came up, he must find this sort of an examination an enjoyable and invigorating exercise. The first question under Library Economy is especially happy in this respect. So also are question 6 under Cataloging and question 7 under Reference-work; there has been no effort to select unusual or out-of-the-way examples, but each subject heading and reference query is more or less typical of a class. Perhaps the most interesting point in the examinations is that they are adapted to test not only the information retained and the judgment formed by each student, but also the student's individual bias and point of view. The tenor of the questions is not "What is correct?" or even "Which is best?" but "Which would you choose?" The glimpse of the "personal equation" which the faculty of the school should get from such examinations should be of direct service to them when it comes to placing their graduates. The importance of this element suggests the thought that the use of a few such liberal semi-technical questions in the competitive entrance examinations of the school should give the faculty a useful indication of the attitude towards library matters in the mind of each competitor before it has been shaped by technical study.

As a rule printed library reports are marked by an evidence of entire harmony in opinions and recommendations between trustees as the governing body and the librarian as working executive. An instance to the contrary, however, is furnished in the recent report of one of the smaller Massachusetts libraries—that of the town of Gardner. Here the librarian makes an earnest recommendation for the

abolition of the present age limit restricting library privileges to persons over 12 years of age; which the trustees meet with an expression of willingness to consider reducing the age limit only to "ten or perhaps nine years," and a strongly-expressed conviction that it is unwise to go further for fear of misbehavior and injury of books by the children—fears which a little practical experience would probably allay. There are doubtless other libraries where suggestions so fully in line with approved library methods as the abolition of an age restriction, provision for children's reading, or the use of books through the schools, are met with distrust if not with opposition from conservative trustees, and where library development is to that degree retarded. And it is here that local library associations—so well provided for in Massachusetts—should find one of their best fields of work, in bringing a realization of modern library opportunities and activities to directors and others in authority in the smaller places that are outside the main currents of library organization.

#### THE PROVIDENCE LIBRARIES AND THEIR BULLETIN.

AN unauthorized publication entitled *Bulletin of the Public Library, Providence, R. I., Successor to the Co-operative Bulletin of the Providence Libraries*, has been issued and circulated by the Library Bulletin Company, Boston, Mass., bearing the date of "January, 1901."

The only publication authorized by the three Providence libraries, or by any one of them individually, for the year 1901, is the publication entitled *Co-operative Bulletin of the Providence Libraries*, which will be published during 1901 by Snow & Farnham, 63 Washington st., Providence, R. I.

No material intended for use in the year 1901 has been sent or will be sent to the Library Bulletin Company by the Providence Public Library, nor used with its consent; and no copies of the bulletin above referred to, issued by the Library Bulletin Company, will be distributed by the Providence Public Library, or by either of the other libraries undersigned.

Advertisers and others will be interested to know that no copies of the bulletin above referred to have been delivered by the Library Bulletin Co. to the Providence Public Library, whose name it bears, nor to either of the other two libraries.

If any perplexity arises as to sequence of

volumes, it may be sufficient to say that the *Co-operative Bulletin of the Providence Libraries* is still published, under the same managing editor as in 1900, and consequently is in no need of a "successor" as intimated above.

JOSEPH L. HARRISON,  
Librarian, Providence Athenaeum, and Managing Editor of the *Co-operative Bulletin of the Providence Libraries*.

HARRY L. KOOPMAN,  
Librarian, Brown University.

WILLIAM E. FOSTER,  
Librarian, Providence Public Library.

#### SIZE MARKS FOR CLASS NUMBERS.

It may be of interest to say, apropos of Mr. Ashley's article in the Jan. L. J., that a method like the one suggested by the writer was adopted from the beginning for the printed card catalog of the John Crerar Library, and has proved very successful. We use, to designate the books not on the regular shelves, not the actual size marks, but the letters "L" and "A," the former standing for "Lower shelves," the latter for "Atlas shelves." Thus, a book too large to go on the regular shelves of, say, 540, would be marked "L540.09248 G88," or, if too large to go on even the large size shelves, the letter "A" would be substituted for the "L." The reason for not using the size marks "Q" or "F" is that the books may not be divided exactly according to the size.

AKSEL G. S. JOSEPHSON.

JOHN CRERAR LIBRARY,  
Chicago, Ill.

I HAVE written the over-size marks first on labels, catalog cards and elsewhere for years, as suggested by Mr. Ashley in the January issue of the LIBRARY JOURNAL, and I prefer that to the more usual order. I do not hesitate to disregard precedent when I think that utility demands it.

OLIN S. DAVIS.

LAKEPORT, N. H.

#### CORRECTION—GIFTS AND BEQUESTS, 1900.

I WISH to correct an error in Mr. Stockwell's "Report on gifts and bequests, 1899-1900," as it appeared in the August, 1900, LIBRARY JOURNAL. The bequest of W. A. Goodwyn is for the establishment and maintenance of a library and lecture hall in Memphis to be known as the Goodwyn Institute, and not for Cossitt Library as reported. The bequest, which, it is thought, will amount to \$250,000, will not be available during Mrs. Goodwyn's lifetime.

CHAS. D. JOHNSTON.

COSSITT LIBRARY,  
Memphis, Tenn.

#### GOVERNMENT PUBLICATIONS OF SPECIFIC AUTHORSHIP.

IN connection with the article of Miss Hasse in the LIBRARY JOURNAL of January, permit me to suggest that a list of the publications of the government, which have specific authorship, would be exceedingly useful. Types of the works I mean are Wharton's

"International law" and Coues' "Birds of the Colorado Valley;" these books and many similar are frequently quoted by author and title, without indication of their publication among the Congressional documents. I think that the Superintendent of Documents at Washington will readily supply you, for publication in the LIBRARY JOURNAL, a list of such books accompanied by the serial number. Such a list would not occupy more than four columns and probably not more than two, and would be of immense service to librarians, especially if you print a number of copies separately for distribution.

LIBRARIAN.

[THE Office of the Superintendent of Documents, we have reason to know, has its force and time fully occupied for the present by routine work, and in the completion of the general "Check list of public documents." Mr. Ferrell expresses his cordial willingness to undertake work of value to the public, properly within the scope of his office, and a list of this sort would certainly be useful. It is probably, however, a work of considerable magnitude, and could hardly be expected until much other work is disposed of.—Ed. L. J.]

#### MICHIGAN GEOLOGICAL REPORTS.

IN response to complaints that have reached this office that large libraries, which would be expected to have a complete file of reports of the Geological Survey of Michigan, do not have them, I wish to make the following statement:

The reports of the first or Douglass Houghton Survey are very rare and a complete set hardly exists outside of the state library. Even of the present series, of which we are now issuing vol. 7, complete sets are so rare as to sell for between \$20 and \$30. The set in this office is borrowed from the state library. The editions have been small, ranging from 1000 to 2500 — at present 1500 — and are naturally absorbed. Volumes which we have still in stock, to wit 5, 6 and 7, are sold to the general public, but we are authorized to supply them to the college libraries of the state gratis, and the larger libraries outside the state, upon application and payment of express charges which are usually much less when paid in advance. We hope and intend to notify by postal those who have previous volumes, of each succeeding volume and should be glad to receive notice of people who have complete sets. I have also a circular list of our publications which may be obtained. Until the legislative policy as to the size of edition is changed, I am not prepared to recommend to the board any farther action along this line. I may say that the state library has been allowed 150 copies for exchange purposes.

ALFRED C. LANE,  
State Geologist.

GEOLOGICAL SURVEY OF MICHIGAN,  
Lansing.

## THE LIBRARY OF THE FUTURE IN "LIGHT AND LEADING."

BY MARY W. PLUMMER, *Director Pratt Institute Free Library, Brooklyn, N. Y.*

THE continual increase of libraries in this country and the constant expansion of those already established, bid fair to cover the land with a network of these intellectual centers whose influences radiate in every direction. They cannot fail to heighten the intelligence of our reading people, as well as to afford opportunities for reading and study to those who have heretofore been without such opportunities. The system and *esprit de corps* of these institutions arouse the admiration of workers in other fields. But this work of expansion will one day come to an end for want of territory to conquer, and we must begin on our third dimension, depth. There are signs already that the most thoughtful are going below the surface in their work. The subject of book-selection excites attention as never before, while the work of co-operation with the schools, the study of the library's constituency, young and old, the more thorough preparation of the library schools in the study of books as books—all testify to a deepening of our sense of responsibility and of the function of the library, as well as of our own comparative ignorance. For many years teachers have been studying their own profession, while librarians have but recently begun. If in the few years devoted to it so much has been accomplished, what may we not hope for in time to come?

Certain points whereon the library of the future should be equipped may be set down briefly here, premising that all will require expenditure of money; but we should not hesitate to spend money on the quality of our work when we do not scruple to spend it on the quantity.

The first contact with the library should be made as agreeable as possible, and to this end the most tactful and sympathetic person obtainable, with a wide knowledge of general literature, particularly in the field of novels and romance and books for young people, should be the first official whom the new borrower meets. A prime requisite for this position should be absolute freedom as to time on the part of the official. He, or she, should

not be bound down to desks or to clerical work, but should be considered to be doing his duty quite as much, in listening to the grievances, aspirations or other confidences of the borrower, as those assistants who are engaged in filing applications, registering new borrowers, or giving out books. It is through these voluntary confessions on the part of the reader or student that he can best be helped—and fortunate is the assistant who has the power of drawing out these confidences. Specific library-training is not really a necessity for the person holding this position, though where that is added he will have additional and earlier command of the resources of the library. It is to this desk that young people should be sent who have been transferred from the children's room, where their intercourse with the librarian and her assistants has been informal and friendly. Otherwise, there must be a certain shock, even a chill, from the impersonality of the new department where every one is so busy that only in occasional instances can the individual receive individual attention. The bringing back into demand of good but forgotten authors, the stopping of the disconcerting runs on a few writers for boys and girls, are things that can be brought about in a very short time by the right person, the reading horizon infinitely widened, and the quality of reading gradually raised, if a library is willing to put money into this most effective but unostentatious work.

A second point needing development is the establishment of co-operative relations between parents, teachers, and the children's librarians. So far as the teachers are concerned, this would not be so difficult to bring about after their first discovery of what the library can do for the school children. To awaken the father and mother, of any social class, to the importance of quality in the child's reading, and to secure their personal co-operation, is not so easy. We are daily discovering points of ignorance in ourselves as to the value of the books we handle and their fitness in given cases; and like all new

converts we are anxious to convince others of the importance of this subject. The time will come, I believe, when there will be classes on reading, in connection with the children's room, classes of mothers, teachers, and librarians, all intent on the question of surrounding the children with the best literary influences in their early reading days. This will mean the study of the children as well as of the books. It will mean that the librarian and her assistants must have time for this sort of work. But it will mean, on the other hand, this, that a girl who has been doing excellent reading all the year will not have a set of "Elsie" books given her for Christmas by a well-meaning but injudicious parent, and that boys will no longer be referred by teachers to stories of sheer blood and prejudice under the impression that these are history. It will mean, too, that gaps in the literature of knowledge for children will be discovered and the right author found to fill them. It will mean so much that I could devote the whole of this paper to its significance, if that were practicable.

A third essential is the training of students in the use of books. The ability to hunt down a subject, or follow a scent, does not come naturally to most persons, though with some fortunate ones it is an inborn gift. The ability to seize quickly the essential word or phrase or bit of information from a page or chapter is also rare. But these things can both be taught, and who so well calculated to teach them as the librarian and assistants of the reference department of the library? The average student needs weeks of practice to learn some of the most obvious ways of using books, the consultation of indexes, of bibliographies, of tables of contents, of chapter-headings. For a while the teacher of the librarian has to point out chapter and page. When required to put into an abstract the things he has gathered from his reading, his inability to choose and sift is one of the discouragements of the teacher. Equally difficult is it for him to weigh authorities. One writer is the same as another to him. To estimate an author's value, judging from his known experience or proved insight, is not only beyond his ability, but something unheard of and undreamt of. Is he to debate? Chapters in books bearing on the question

are put before him, and the *ne plus ultra* of assistance is supposed to have been given him. But he should be taught to look up authorities for himself. True, this end is sometimes secured in those libraries which have not time to do close reference-work—but the librarian never knows how many fail and grow discouraged for want of help. In every such class of students as I have indicated there would probably be at least one who has the love of research and the faculty of seizing upon the salient point, and the librarian instructor could secure considerable aid from this student. A school of which I am thinking, in which work in the library is a part of the curriculum, has sent several graduates to colleges and universities who have entered with flying colors—indeed, to such a degree have they been successful that congratulatory letters have come to the school from the college authorities. In these cases the students, when interrogated, have replied that their success came from their familiarity with the uses to be made of a library. They were not set down in the university library as strangers, for the habit of systematic research, the knowledge of book-helps and of authorities made them feel at once at home.

A fourth essential, that of making study interesting by bringing to bear upon it all the illustrative material of the library, has been recognized for years by many libraries which have not been able to carry on this work as well as by a few which have made it signally successful. The gathering together in a separate room of the photographs, maps, plans, etc., bearing for instance upon a certain period in a country's history (and the proper dispersal of these afterwards) is a work requiring not only time but a mind that does not get into ruts, that adds material each year to that previously used, that keeps up to date or knows how to bring itself up to date quickly on any subject under consideration. There should be one or two persons in a library especially to take charge of such work as this; and we may look forward to the time when this class-room will have its regular schedule of hours like any other; *e. g.*, 9-9.50, class from high school, to study material on the French Revolution; 10-10.50, class from ——— Academy, to see portraits of Elizabethan period; 11-11.50, Mrs. Blank's art class, for examples of Leonardo; 12-12.50,

class in botany from——Seminary, for the illustrations of orchids, etc., indefinitely.

A fifth essential will be a corps of extra assistants that every large library, at least, may be able to call on from the professional people or educated craftsmen among the personal acquaintance of the library staff. From these it should be able to secure the bibliographical information of each on his own specialty, for the use of the young student or the unlettered artisan, the sort of information which the librarian, not being a specialist except in his own line, could not possibly furnish. If these extra assistants could be brought into direct contact with those needing help, so much the better—it might result in classes or in good printed helps for such emergencies.

One more point and then I shall stop, reluctantly, I admit, for the subject stretches out in a long perspective and radiates in all directions also, as one advances in it. Every one who has read Leigh Hunt's "Imagination and fancy" must remember how the author's enthusiasm and admiration for certain poets stimulated his own, and we all know how quickly enthusiasm spreads from those who have reasons for it to those who have none except its easy contagion. Why

not utilize this fact in our catalogs, in those entries representing the literature of power? Why not put upon our catalog cards annotations showing the enjoyment of a given author or work by some well-known appreciator of literature? Edward FitzGerald's comments, or those of T. E. Brown, are among lately published examples of this sort of appreciation. As one reads their letters at home one says, "I shall surely look up that book that he enjoyed and admired so much"; but if one were at the library and found the comment on the card or in the printed catalog, how much more likely one would be to keep one's resolution!

The work of libraries for the next few decades is certainly cut out for them, if it should lie in the line of these suggestions. To teach children and young persons how and what to read and how to study, and to make it easy even for older people to change and better their reading—to spend time and money and effort on these things as they have been spent ungrudgingly on collections of books and perfection of methods, to search unweariedly for the persons properly equipped to do this educational work and to remain unsatisfied until the right ones have been found, to my mind, this is the program of the future for many libraries.

## OPEN SHELVES AND PUBLIC MORALS.\*

BY ISABEL ELY LORD, *Librarian Bryn Mawr College.*

THAT open shelves in public libraries are an integral part of the ideal education has come to be so widely accepted a dictum that here, I consider, I do not need to argue regarding it. Even those who judge it unwise, because inexpedient, to throw open a given library to-day or to-morrow, feel called on to explain their reasons and in a sense to apologize to the public. All sorts of restrictions may be put upon practise, each man differing from every other man as to detail; but whether the concealed books of a library be only the very rare and the very valuable or whether they include also a great number considered by the librarian for some reason unfit to be circulated generally without warn-

ing—in other words, whether the library follow the Philadelphia plan or the Buffalo plan—the principle is the same. The public should have access to the mass of worthwhile books, and should be able to do its own choosing among these.

This all runs on very smoothly: we believe it, we are happy in it. Then a doubt occurs to someone—what great movement is not subject to the chill of doubt?—and the question is plainly asked, "Are you not teaching the crime of theft?" Sometimes it is more than a question; it becomes an assertion. Now a doubt should never be kept in the background of the consciousness; it is a drag on one's work. If it be recognized as plainly the suggestion of perversity, it may be banished summarily; if however, as in this case,

\*Read before the Pennsylvania Library Club, Nov. 12, 1900.

it has a reasonable air, it should be got out of the way once and for all by a process of reason, or else accepted as destroying the principle to which it refers. Let us reason concerning this doubt of which I speak; let us see whether it will become substantial or will vanish into thin air.

A library of any sort, as far as it exists for human beings, is of necessity an educational institution. When there has been added to it the directing power of a librarian it takes its place as an active educational body. While it remains a club, an institutional or an athenæum type, it is meant for a class only and it becomes modified more or less by the needs and wishes of its users. When, however, it becomes a free public library, class distinctions no longer exist, and its work broadens until it covers, or endeavors to cover, a field so wide that no other moral or intellectual force but that of the church attempts the like. It exists for the scholar and for the school-boy, for the man who reads fifty-seven languages, and for the man who is laboriously learning to read his own. It is an institution of the people and for the people. By the people it cannot be administered, as can no educational body, but for the people it must be, and for the people as a whole.

But what, after all, is an educational institution? and what is its function in the community? Let us put it broadly and reply, To make for progress. And progress? What is that? Does it mean the making of money, the discovering of fact, real and ideal, or the winning of heaven? The progress of a city, state or nation means, or should mean, the raising of the moral and intellectual standards of its citizens. If the intellectual standard is put up while the moral is neglected, there follows a degradation of humanity of which history offers us terrifying examples. If attention be turned to the moral alone, that great end is defeated in the very effort to gain it, and intellectual weakness ends in hopeless corruption. A true educational institution must make for the advance of its people in both directions. If this, then, is the work of every educational institution, it is the work of the public library.

The especial means employed by the library in its endeavors to make for progress is that mighty engine known as the printed page. In a way the term is a misleading one.

The aim of the library is not to induce the reading of any printed page whatever. It is unfortunately true that if quantity of reading were the desideratum, the state or the city could gain its end better and more cheaply by distributing an enormous number of free copies of the *New York Journal*—along with a few of the more conservative papers—than by subsidizing a public library. A thorough perusal of the *Journal's* columns would occupy all the minutes in a day that the average citizen can give to reading. But the library desires to help its reader to the best printed page for that particular reader's need. If he is a working man who wishes to better himself in his trade it will give him the best available book that is suited to his capacity. To the scientist who may be studying the same subject it offers the most authoritative treatise. To the school-boy who has become interested in the question it probably gives the "Boy's own book." For those who seek inspiration it provides the great books of the ages and also that multitude of minor books which will not live for the generation that follows us, but which by being closely in touch with the one of which we are a part exert a potent influence. For those who seek only amusement the library buys scores and hundreds of those productions in light literature that are entertaining without being debasing. (Every normal book and no abnormal one would be an excellent rule to follow in choosing.) It does not exist for one side of the life of a community, but for every good side. And if it refuses to provide for any of these, it shirks a duty and renounces a privilege.

Its means, then, is the printed page; its method is to spread as widely as possible both the page itself and the desire for it. Perhaps one had better say the knowledge of it: bring people to know what delight, what food for thought, what useful information, what consolation and what inspiration may be given by those black marks on a sheet of white paper, and the desire for all this or some part of it comes with the knowledge. If you can give your reader the book he really wants, or if you can give that reader the chance and the help of finding it for himself, half your problem disappears. And the other half will be solved if you are wise and he is earnest. You cannot force a man to read the things he most needs—his eyes may scan the words, but if he has been driven to the water, his

drinking will not follow — you can only bring him, by ways many and difficult for you, to the point where he himself conceives the desire for the book and himself chooses it.

Besides this general educational function there is, indeed, another way in which a public library trains in the school of progress those who are, so to speak, its parishioners. This is by teaching them the right use of a public institution. If the library gives the people the impression that it is a disguised penal institution, it definitely lies to the public, which is good neither for the public nor for those responsible for the lie. If it has the air of a shop, after the fashion of the worst type of mercantile libraries, it has lied in another way. If its users feel that the library staff is only there, to use the phrase of an assistant in a well-known public library, to "shovel out books," and whatever books the public asks for, it is fostering a lamentable error. If in any way or to any extent it tells the people who enter its doors that its existence has any other aim than to serve them as well as its limits allow it, it is thwarting the very purpose which alone justifies its being. That it is easy to maintain the middle way between assuming a pedagogical air and relapsing into that of a clerk paid to serve customers with anything they ask for if only it is in stock — that this is easy, I do not contend. On the contrary, it is exceedingly difficult, and that, as Pistol would say, is the humor of it. If the librarian walks a primrose path, he is not walking the one he belongs in. But to return to our library atmosphere. It is only by giving the right idea of a foundation for the people which is a trust of the people, that the library induces on the part of that people an attitude that forbids abuse. This is an important civic lesson, in truth, yet it is only a part of the great and direct intention of the library. It is taught quite incidentally in the carrying out of the main purpose.

It is obvious that to carry out this main purpose the library must bring people and books together, and that this is best accomplished through open shelves we are taking for granted. But here we return to our doubt, now for some time lost sight of. If the people are taught theft by this method, we must abandon the method, however good it may be in other respects. A supposition

containing such a wholesale accusation carries absurdity on the face of it. "If the people are taught theft!" Does anyone for a moment believe that such a thing is possible? Since democracy has emerged as the leading governmental principle of the civilized world of to-day and to-morrow, it is an axiom that the only school for the voter is the ballot-box. It is equally true, and on reflection equally obvious, that the only way to teach people how to use the public library is to give them the library to use. We need no psychological proof of this, while as for statistics, they are not full enough to quote either for or against. How much greater a proportion of their books are lost by the libraries whose shelves have been open for some time than by the old book-thro-a-wire-cage type of library? Does the proportion of books lost in open-shelf libraries grow larger each year? The answer of the librarians of these collections would be a warm denial, I know, but I am speaking now of the absence of figures. What is going to be the effect in this matter of the children's rooms so new and so powerful to-day? Now that people are brought up in the library, so to speak, is not their attitude toward it going to be different than when they were vigorously shut out till they had passed a proper "age limit"? These questions we can only answer with opinion; but that opinion, formed by our best judgment, is very surely to the effect that we are not afraid of those statistics — to come!

Setting figures aside, then, let us from our present knowledge question as to who it is that steals the books taken from any public library. A small number, first, is taken unregistered through misunderstanding or through ignorance of the library rules. These usually reappear after a longer or shorter period. The people — ordinarily children — that take them are in no sense thieves. A certain number of books, next, is devoured by eminently respectable members of society. By what inward somersault they get into that moral condition where they are enabled to see with equanimity public books in their private bookcases, we do not know. The fact is indisputable. It is not to be supposed, however, that open shelves will add to the temptations of these offenders. They could get shelf permits from the hardest-hearted librarian. Their existence as library depreda-

tors is to be deplored, but not to be taken seriously as to this matter.

We come, then, to those who may be definitely affected by the action of the library in making it easy to commit theft. There are two classes here, the one made up of those who are already thieves, the other of those who have not yet become so, but who are morally weak enough to fall before temptation. Shall we consider the first of these at all? Why? They are not a normal part of the community. They belong to the criminal class, a portion of society that is either potentially or actually shut out from the benefits of society itself. Is a decision to be founded on their existence alone in an institution which is for the whole people? Surely not. They are to be guided and trained as far as lies in our power; they are to be dealt with by reforming bodies of all sorts, but of these the public library is not one. It does not exist primarily to convert the wicked, but to give an opportunity to every man to develop toward moral and intellectual soundness. If the public library can help the man, woman or child who is already a thief, it should do so; but it should not, legitimately it cannot, restrict the privileges of the honest for the sake of removing temptation from the dishonest.

There still remains the class about which we may be troubled with some reason. These are they who are not yet thieves, who may never become so, but who are exposed to a temptation difficult to resist when we leave them to wander at will among thousands of bits of portable property. They may never be tempted, or at least beyond their strength, in any other way. Shops are not thrown open with the same freedom, and moreover the very fact that the articles in shops are there for the purpose of being turned into money is a hindrance in itself. There are many people who would shrink from stealing what is practically money who have quite another feeling about a piece of property like a public library book, which never is to be changed into money and which in belonging to the whole community belongs in a sense to each member of it. I beg you to believe that the logic of this last sentence is not my own; that it is, nevertheless, the logic of the average American citizen as regards public property is as true as it is lamentable. Granted

this logic, then, together with the moral weakness I have supposed, has the public library the right to expose these weaker vessels to temptation as does no other institution of society? There would be hardly a doubt as to the answer to this question if we could put it in that way alone. But we not only need not, we cannot, let it stand by itself. We must ask as its corollary: Has the public library a right to consider this class to the exclusion of all other classes? The answer then is again not doubtful. We have no right to punish the innocent for the fault of the guilty; we have no right to treat every member of the community as a possible thief because statistics and common sense alike tell us that a certain small proportion of it will prove to be such.

But although we cannot consider these individuals alone, we must consider them somewhat. After throwing open the library to them we must do our best to make it an incentive to right-doing rather than a temptation to wrong-doing. How are we to do that? I have said that we have no right to treat every member of the community as a possible thief. I will go further: we have no right to treat any member of the community as a possible thief. Not only before the law is a man innocent until he is proved guilty; he is innocent also in all social relations. I should, indeed, deprecate resting the argument for such conduct toward man on the legal basis only; its foundation lies in Christian morality. Beyond this even we have an added plea. We may go as far as possible in recommending such treatment: the law demands it, society expects it, Christianity exacts it—and expediency counsels it. For which, pray, is more likely to suggest to the man who is not already a thief the idea of theft, the taking it for granted that he is to be trusted or the watching him as if he were not to be? All the high authorities I have adduced unite in declaring that the man in question should be trusted until he proves himself unworthy of trust. After counsel, give him a chance to walk alone, and then if he falls—well, what if he falls? and how are we to know it?

Let me answer the last question first, by beginning with the way that should not be taken to find him out. This I have intimated in speaking of his being watched. There

should be no spy system whatever. The attitude of the necessary library attendants should be that of assistants in the usual sense, not that of keepers. The main charging desk should, of course, be near the exit, as a matter of convenience and also to obviate errors. It should not, however, be a point where every person leaving the library is searched, literally or with a look. The attendants at such a desk should know, as so many of them do know, how to stop a person leaving the library with an unregistered book by a pleasant reminder of the library rules containing no doubt, expressed or implied, of the moral character of the person addressed. Even the signs may bear a suggestion in one direction or the other. There is no difference in fact between

"Books must not be taken from this room until charged at the desk"

and

"If you wish to take a book out of the room charge it first at the desk,"

yet there is a difference in the effect of the two which may make a difference in the library atmosphere. It would be going too far, I am afraid, to say that it may make the difference of a thief more or less!

This, then, is the way of guarding public property that I believe to be wrong. But what, wrathfully asks the stricter guardian of books, is the use of any other way? What can be done when the property is once stolen? If it is stolen to be kept, I reply, nothing, or practically nothing. And after? Unless such losses become very marked they are not serious. While they are not generally known they can be harmful only to the soul of the thief and he, it is to be remembered, may repent. If, however, books are stolen for their money value, much may be done.

In the first place, every second-hand dealer in the vicinity of the library can help in this work, for the books would naturally come there for sale. This is a simple fashion of protecting oneself, but I appeal to experience to pronounce if it is not an effectual one. In the next place advertisements may be inserted in local papers, preferably under the name of an individual, asking for a copy of the lost book. It is true that this is a trap, but I have no objection to the most ingenious patent devices when it is a proven thief you are trying to catch. In extreme cases detec-

tives may be employed, though I should hesitate long before admitting them within the library itself. A right feeling about the library among its users will also be of much service, if not in discovering the thief, at least in recovering the book. A Children's Library League might do something here, not of course by being turned into an amateur detective agency, which would be abominable, but by the fostering of a feeling of responsibility which might lead on occasion to definite aid.

But even if we find infallible methods of recovering the property and detecting the thief, there remains still a problem. The treatment of offenders when apprehended is a question of great difficulty, the more so that it must depend on the circumstances of each individual case. Leniency is sometimes wiser than punishment: of that there is no doubt; but when punishment is inflicted it should be severe and it should be generally known. It is not a light offence, the stealing of public property, and it should be treated according to its gravity whenever it seems best to let the matter come into a court of justice. It is, by the way, easily imaginable that the right kind of charge by the right kind of judge might have an influence on public opinion. The community, you observe, is to be the most powerful agent of the library, whether it expresses its opinion through the attitude of a mass of people or through the direct address of an individual. And we, on our side, must recognize that when such difficulties arise for us, it is by remembering that the library exists for the greatest good of the greatest number and also for the advancement of every member of the community; it is by remembering this and by believing it with an unconquerable faith that we shall win through in a way both creditable and profitable to our work.

It seems hardly worth while to consider the question of the expense of such losses as we are treating of. A public library is not a commercial affair, and it is not run for the saving of money. I do not doubt for a moment that open shelves save more money by lessening the regular number of attendants than they lose in the shape of books, but I refuse to consider that as an argument. It is a statement. The administration of the library should of course be economical; but

that word means "characterized by freedom from wastefulness, extravagance or excess;" it does not mean "sparing of money regardless of results." I cannot regard seriously the deductions in the last report of a well-known librarian who, in a library of 30,000 volumes, considers the mutilation or loss of ten current magazines and the loss of forty-seven books a year a justification for the abandonment of attempts toward open shelves. Perhaps I misunderstand his words—yet he certainly implies that the visitors of the library should be restricted in their privileges on account of the depredations of a few petty thieves. His objections as stated seem to be to the money waste. What was it? And what is the limit the public can afford to throw away for the sake of the advancement of the community at large? For here, after all is said, lies the kernel of the matter. The public library exists for the community, and its privileges are open alike to every man, woman or child in

it, except to the few whom the community itself has put under lock and key. In considering the work and the methods of work of the public library we have neither the obligation nor the right to suit them to those only who are in restraint or who may become liable to restraint. The public school exists for the whole community, and in no way limits or specializes its work for the abnormally weak. The public library should follow its example. Every individual who has not definitely proved himself unworthy the privilege should have the opportunity to find what he needs in the books in its collection. That this opportunity was to be got and given best by means of open shelves I have taken for granted, you remember, at the beginning of my argument. If my major premise is untrue, I can scarcely hope much for my conclusion; if, however, it is correct, the argument from it seems to me clear and convincing. Reason commends, and librarians are notably amenable to reason.

### SHOULD LIBRARIES BUY ONLY THE BEST BOOKS OR THE BEST BOOKS THAT PEOPLE WILL READ?\*

BY CHARLES A. CUTTER, *Forbes Library, Northampton, Mass.*

THE question answers itself; there is no real opposition between its parts. Of course, we are to buy the best books, and if we have limited funds we can buy no others, or else we shall not get all of the best. But equally of course, this means the best books for the particular library in question, and that is the same as the best books that its people will use; for an unused book is not even good. Not the best books for the librarian, nor for the book committee, nor for the self-elected book committee outside of the library, nor for the shelves (to keep them warm by never leaving them); but the best books to satisfy the just demands of our clients for amusement and knowledge and mental stimulus and spiritual inspiration. The library should be a practical thing to be used, not an ideal to be admired.

Mr. Edmund Gosse in his "Century of English literature" in the New York *Evening Post* of Jan. 12, speaking of lyric poetry of

the 19th century, well says: "The poetry is to be judged, not by the number of persons who have appreciated it—for those have often been few—but by the force, skill, and variety of the poets themselves. That is to say, time soon eliminates the commercial element of success, and one fit reader overweighs a million of the unfit. Mr. Percy B. Shelley and Miss Jane Porter, for instance, attempted to address the English public at the same moment. It is no exaggeration to say that the lady possessed ten thousand admirers for every one that listened to the gentleman. The instance is not an unfair one, because the authoress of 'Thaddeus of Warsaw' was not one of the worst, but one of the best deciduous novelists of her time. Yet her romantic prose is forgotten, and Shelley's verse is as indestructible as diamonds."

"One fit reader," he says, "overweighs a million of unfit." Is it so? Yes, from the point of view of the literary critic and of the literary historian and of posterity, but not from the point of view of the librarian. The

\*Read before Western Massachusetts Library Club, Springfield, Mass., Jan. 23, 1901.

whole history of libraries in the past century may almost be condensed into one sentence: They *were* the libraries of the one fit reader; they *are* the libraries of the million unfit as well as the one fit. The librarian will buy the novels of the Miss Jane Porter of to-day for the ten thousand, and the poems of the Shelley of to-day—if he can find him—for the one. He will buy the "David Harums" and the "Richard Carvels" for the first class and, shall we say, provisionally, the Stephen Phillips, the Rostands, for the other.

When you have a perfect people you can afford to have only perfect books, if there are such things; perhaps there will be then. When you have a homogeneous public you can hope to have a stock of books exactly fitted to them all, and no book shall be unfitted to any one of them. But so long as there is a public of every diversity of mental capacity, previous education, habits of thought, taste, ideals, you must, if you are to give them satisfaction or do them any good, provide many books which will suit and benefit some and will do no good, perhaps in some cases may do harm, to others. It is inevitable. There is no escape from this fundamental difficulty. The poor in intellect, the poor in taste, the poor in association are always with us. The strong in intellect, the daring in thought, the flexible in spirit, the exquisite in taste are only sometimes with us. We must manage somehow to provide for them both.

I think many most excellent persons do not really enter into the state of mind of those who are at a stage of culture or mental ability or æsthetic taste which they have passed beyond. If they could, they would know that there are men of a certain rigidity of mind to whom a book which is two degrees above them is as much a sealed book as if written in Chinese. Sometimes it need not even be above a man to be lost to him. A book on his level, if it be a little aside from his ordinary range, is as if it did not exist, is unreadable. A man came to our library repeatedly and asked for Mrs. Southworth's novels. We had only two or three, and when none of them was in he would go away without taking anything. The attendant tried to get him to borrow something a little better, but without success. Then she recommended

some of the same sort, Mrs. Mary J. Holmes and the like; but he would have none of them. "Why don't you get some more of Mrs. Southworth's?" he burst out; "they're splendid!" Those novels were just suited to his capacity, "the best he would read," "the best" for him. And we shall give them to him. We are even getting more of them at his request. But I do not yet despair of introducing at least a little variety into his diet.

Everybody knows that in a reference library many more books have to be bought than are at any one time in process of consultation. So in a reading library, it is necessary to get many works which are good for only a portion of the readers. We are continually talking of "the public," as if there were one public, a homogeneous body with one set of likes and dislikes, similar associations, the same previous reading. We even complain that the progress of civilization is rendering everything detestably uniform, that there is no local color, no individuality. But let any one in an agricultural, manufacturing, mercantile, and college town stand for a day at the delivery desk, and he will find that there is quite as much diversity of demand as he can deal with.

Once upon a time at a concert the occupant of the next seat to me happened to be a young lady with whom I was slightly acquainted. A singer was singing with such a metallic voice, such faulty enunciation and absence of feeling that I was saying to myself all through, "This is certainly as bad as they make them." Pardon the slang; it shows to what a state of mind I was reduced. Finally when she ended some complicated vocalization with the usual shrill shriek, and I was about to express my opinion the young lady exclaimed with evident sincerity, "Wasn't that beautiful!" Since then I have been very careful not to assume that my dislike measures the appreciation or the enjoyment of the world.

For, after all, "best," like many other words, is relative. A year or two ago a certain librarian sent out circulars to a score of other librarians asking each to furnish a list of the ten best books. I wrote back asking for definitions—Best in what? in style? in interest? in instructiveness? in suggestiveness? in power? Best for whom? for the ignorant? for children? for college grad-

uates? for the retired scholar? for the people in general? He replied, Best for you. Evidently it will not do for any book-selector to take that definition of "best" as his absolute guide. Not to be disoblising I sent him a list of the ten (or twenty) books that, so far as I could tell, had most influenced me. I wasn't quite prepared to call them the best books. One of them was, I think, Carlyle's "Sartor resartus," that had happened to fall into my hands just at the psychological moment, just when I was ready for it. It opened my eyes to a whole new world of thought and expression. I believe I owe a great deal to it. And yet I can imagine its being taken up by some one not prepared for it to whom it would say absolutely nothing, and by some one else who had passed by its stage to whom it would seem empty and pretentious. Probably something like this might be said of every one of the books on my list and on all the other lists of best books, at least in respect of many readers not being ready for them.

A high school teacher said lately, "You would be surprised to see how low the capacity of many of the boys is. Give them Sir Walter Scott, they cannot read him. They do not know what he is talking about." We librarians have to deal with whole bodies of readers of that quality. We must provide them with something which they can read and understand.

Select your library, then, as Shakespeare wrote his plays, the highest poetry, the deepest tragedy side by side with the comic and the vulgar. Do not make the regularity, balance of parts, dignity of expression, of the French classic drama your model or you will have only a *succès d'estime*. Imitate a Gothic cathedral. Do not fancy that libraries can be Grecian temples, made by rule, all just alike wherever they are, perfect in form, suited to one limited use. To sum up, what I have been trying to show is the great diversity in very many respects of those who come to the library, the consequent diversity of the best each can read, the necessity of providing many different kinds, qualities, degrees of good books, the impossibility of limiting one's choice to any one degree of good, lest it should be too high for some and too low for others.

This doctrine is discouraging. It is of a piece with the proverb that there is no royal road to learning. There is no royal road to the selection of a library. There are no "best books." "Each in its place is best." There are no books which can truly be called "the only good books." There are very many desirable books of very varying degrees of literary—and other—merit, which must be provided to suit, I do not say the tastes, but the needs of the public; and the library so made is not going to be at all a library of standard books or an ideal library or, in the judgment of most people, a well-selected library. But it may nevertheless be a very useful and a very educational library.

It is always possible, given time and patience enough, to drive out evil by good, the lower by the higher. It is not so much exclusion of the inferior as inclusion of the attractive superior that should be our aim. The question proposed to us was skilfully worded, "the best that people will read," not "the best that they *do* read." People improve. They are not always averse to, in fact they often desire—the young usually desire—to read what is a little above them, if it is not too unintelligible, and if it is not forced upon them. The mere presence of the books-just-beyond-them in the library is sure to lead some of them sometimes to attempt these and so to move up to a little higher plane. And the library is sure to have the books that are just a little better than any of its readers if it proceeds on the principle of getting what suits each grade, which, of course, will be a little above those that suit each lower grade.

The natural inclination to better one's self must be gently and unobtrusively assisted. Here, as in all *pastoral* work, success comes from sympathy. He can best minister to another's wants who can put himself into another's place, enter into his mind, and so feel those wants himself. As the librarian will do injustice to the scholar unless he has himself felt the sacred thirst for knowledge; as he will not, indeed, cannot supply the demand for the beautiful unless he has himself felt the artistic thrill, so he will fail in properly providing for many of his people unless he remembers the gradual opening of his own mind or is able by imagination to recreate his forgotten state of ignorance and inability.

OUTLINE OF MODERN LIBRARY  
MOVEMENT IN AMERICA, WITH MOST  
IMPORTANT FOREIGN EVENTS.\*

THE modern library movement began about 1850, took on its strongest characteristics in 1876 and received a strong forward impulse in 1893.

Before 1850 there were in the United States only 423 public libraries of 1000 volumes or more; in 1896 there were 4026. (U. S.—Bureau of Education. "Public, society and school libraries in the U. S." 1897. p. 340.)

Under each year events are arranged as far as possible in chronologic order.

- 1638 Harvard University Library founded  
1731 Library Company of Philadelphia founded by Benjamin Franklin; characterized by him as the "Mother of all the North American subscription libraries"
- 1796 New Jersey State Library founded  
1800 Library of Congress founded  
1807 Boston Athenæum founded  
1818 New York State Library founded  
1820 New York Mercantile Library founded  
1833 Peterboro (N. H.) Public Library founded  
1835 New York school district library law passed; the first recognition of the principle of taxation for support of public libraries  
1837 Sir Anthony Panizzi became "Keeper of printed books" at British Museum. (LIBRARY JOURNAL, 1879, 4:163-65. Fagan, Louis. "Life of Panizzi." 2 v. Lond., 1880)  
1841 British Museum cataloging rules printed  
1848 First edition of Poole's "Index" published; 154 p. O. Massachusetts passed library law allowing Boston to tax itself for support of public library.  
1849 New Hampshire passed library law allowing towns to tax themselves for support of libraries. Astor Library founded; a great endowed reference library, open to the public.  
1850 First free library act for Great Britain passed through the instrumentality of William Ewart.  
1852 Boston Public Library founded.  
1853 Second edition of Poole's "Index" published; 10+521 p. Q. First conference of librarians held in New York City; 53 delegates present. (LIBRARY JOURNAL, 1886, 11:217-19.)  
1855 Charles Coffin Jewett appointed librarian of Boston Public Library.
- 1868 Justin Winsor appointed superintendent of Boston Public Library.  
[1869 C. A. Cutter appointed librarian Boston Athenæum.]  
1871 Cincinnati Public Library opened on Sunday for first time.  
1872 Illinois free library law passed; copied subsequently by several states.  
1873 Dr. William Frederick Poole appointed librarian of Chicago Public Library.  
1876 LIBRARY JOURNAL established. American Library Association founded; first meeting held in Philadelphia. "Public libraries in the U. S.," issued by Bureau of Education; included Cutter's "Rules for a dictionary catalogue." Library Bureau established for manufacture of library supplies. First edition of Dewey's "Decimal classification" published.  
1877 First international conference of librarians held in London. Library Association of the United Kingdom founded.  
1880 Publication of "American catalogue" begun by Frederick Leypoldt.  
[1883 Melvil Dewey appointed librarian of Columbia University.]  
1884 Library school authorized by Columbia trustees.  
1885 New York (city) Library Club organized.  
1886 *Library Notes* established; edited by Melvil Dewey.  
1887 Columbia College school of library economy opened.  
[1888 Melvil Dewey appointed director of New York State Library.]  
1889 School transferred to New York State Library; name changed to New York State Library School. University law of New York state passed.  
1890 New York (state) Library Association organized. Iowa Library Association organized. New Hampshire Library Association organized. Massachusetts Free Public Library Commission established. Massachusetts Library Club organized. New Jersey Library Association organized. Pratt Institute School of Library Training established.  
1891 Wisconsin State Library Association organized. Connecticut Library Association organized. Maine Library Association organized. Michigan Library Association organized. Kansas Library Association organized.\* Minnesota Library Association organized.

\*This valuable chronological record is prepared by Mrs. S. C. Fairchild, Vice-director of the New York State Library School, and is issued in pamphlet form. It is here reprinted in full, as an important contribution to library history. A few additions, designated by brackets, have been made to the record as prepared by Mrs. Fairchild.

\*Later defunct; new Kansas State Library Association formed 1900.

- 1891 Chicago Library Club organized.  
Indiana Library Association organized.  
New Hampshire Board of Library Commissioners established.  
Cocheco Library Club organized (N. H.).  
New York State Home Education department established; travelling libraries sent to university extension centers.  
Cutter's "Expansive classification" published.
- 1892 Southern California Library Club organized.\*  
Pennsylvania Library Club organized.  
New York state passed new library laws more fully recognizing importance of libraries.  
Library department of Drexel Institute established.  
Bibliographical Society organized (London).
- 1893 Colorado Library Association organized.  
A. L. A. exhibit made at World's Columbian exposition, Chicago.  
World's Library Congress held at Chicago.  
General travelling libraries first sent out by New York State Home Education department.  
Connecticut Public Library Committee formed.  
Newberry Library, Chicago, opened.  
Department of Library Science of Armour Institute established.
- 1894 Library Association of Washington city organized.  
Vermont Library Association organized.  
Rhode Island librarians made eligible to membership in Massachusetts Library Club.  
"Catalog of 'A. L. A.' library" completed.
- 1895 Astor and Lenox libraries and Tilden trust consolidated to form New York Public Library, Astor, Lenox and Tilden foundations.  
New building of Boston Public Library opened.  
Papers prepared for 1893 meeting of American Library Association issued by U. S. Bureau of Education ("World's fair papers").  
Vermont Free Library Commission established.  
California Library Association organized.  
Ohio Library Association organized.  
Ohio State Library Commission established.  
Nebraska Library Association organized.
- 1895 Wisconsin Free Library Commission established.  
Library Section of Wisconsin Teachers' Association organized.  
Milwaukee Library Round Table organized.\*  
Institut International de Bibliographie founded (Brussels).
- 1896 Bibliographic conference held in London. (LIBRARY JOURNAL, 1896, 21:499-500).  
National institutions in England (including British Museum) opened on Sunday for first time.  
Library Section of National Educational Association organized.  
*Public Libraries* established.  
Library conference held in Melbourne, Australia.  
Library Association of Australasia founded.  
Illinois State Library Association organized.  
Western Pennsylvania Library Club organized.†  
North Wisconsin Travelling Library Association organized.
- 1897 New building of Chicago Public Library opened.  
New building of Library of Congress opened.  
Library Section of Illinois Teachers Association organized.  
Second International Library Conference held in London.  
Georgia Library Association organized.  
Georgia Library Commission established.  
Twin City Library Club organized (Minneapolis and St. Paul).  
Department of Library Science of Armour Institute transferred to University of Illinois; name changed to University of Illinois State Library School.
- 1898 Western Massachusetts Library Club organized.  
Bay Path Library Club organized (Mass.).  
Library Club of Buffalo organized.  
Fox River Valley Library Association of Wisconsin organized.  
New Jersey Travelling Library Commission established.
- 1899 Indiana State Library Commission established.  
Maine State Library Commission established.  
Library Art Club organized (Mass.).  
Pennsylvania Library Commission established.  
Colorado State Board of Library Commissioners established.  
Kansas State Library Commission established.

\*Later defunct; succeeded by California Library Association, 1895.

\*No longer active.  
†No longer active.

- 1899 Michigan State Library Commission established.
- Minnesota Library Commission established.
- Bibliographic Society of Chicago organized.
- Herbert Putnam appointed Librarian of Congress.
- 1900 Iowa State Library Commission established.
- A. L. A. exhibit made at Paris Exposition.
- International Congress of Librarians held in Paris.
- Long Island Library Club organized.
- Bureau of Library Information instituted by General Federation of Women's Clubs.
- Ontario Library Association organized (Toronto).
- [Cape Cod Library Association organized.]
- [Kansas Library Association organized.]
- [Missouri Library Association organized.]

"One great difficulty in starting an enterprise of this magnitude is that a large amount of capital is needed to cover the preliminary expenses and to pay for the printing of the first set of volumes, and for other work which must be done before the grants from the various countries are received, and before any sales of the volumes to the public can be effected. This initial difficulty was met by the Royal Society, which generously offered to advance the necessary capital. This offer was accepted by the International Council, which expects to be in a position to repay the sum advanced during the next few years.

"The Royal Society offered to act as the publishers of the catalog, and to sign the necessary contracts with the printers and publishing agents. This offer was unanimously accepted by the International Council, which, after carefully examining the clauses of the proposed contracts, declared its approval of them.

"The three principal countries which have not yet joined in the scheme are Russia, Belgium and Spain; and the Royal Society was asked by the International Council to address the Imperial Academy of Sciences of St. Petersburg on the subject, and also to take steps to induce the other countries to join in the catalog.

"A code of instructions for the use of all who are taking part in the preparation of the catalog was considered, and, after some amendment, adopted.

"In this connection the chief point discussed was whether it is desirable to publish complete lists of new botanical and zoological species. It was decided that lists of new species should be published, and that they should, as far as possible, contain all the additions to our knowledge in this direction made within the year.

"It was also decided to include translations in the catalog, but to indicate that they are translations. Schedules of classifications for the subject indexes of the several sciences were adopted.

"An executive committee was appointed, consisting of the four delegates of the Royal Society and the representatives of the four largest subscribers to the catalog—France, Germany, Italy and the United States. Dr. H. Forster Morley was appointed director of the catalog.

"Finally, it was resolved to begin the work on Jan. 1, 1901, and to include in the catalog all literature published after that date."

### THE "INTERNATIONAL CATALOGUE OF SCIENTIFIC LITERATURE."

A MEETING of the International Council in charge of the "International catalogue of scientific literature" was held Dec. 12 and 13, 1900, in the rooms of the Royal Society, London. The meeting was called to receive the report presented by the Provisional International Committee, appointed to carry on the preliminary work of the enterprise. The meeting is reported in *Science* for Jan. 11, 1901. There were present the following representatives:

Professor B. Schwalbe, representing Dr. Milkau (Germany), Professor G. Darboux, representing Professor H. Poincaré, and Dr. J. Deniker (France), Professor A. W. Rucker, Sir M. Foster, Professor H. E. Armstrong and Dr. L. Mond (Great Britain), Professor J. H. Graf (Switzerland), Dr. E. W. Dahlgren (Sweden), Professor Korteweg (Holland), Dr. M. Knudsen (Denmark), Mr. Roland Trimen (Cape Colony), Dr. W. T. Blanford (India), Senor del Paso y Troncoso (Mexico), and M. Metaxas (Greece.) Dr. Ludwig Mond represented Italy in the absence of Professor Nasini. Sir Michael Foster was elected chairman of the meeting.

"It is proposed that the annual cost of a set of 17 volumes shall be £17, and on this basis it was announced that the number of sets subscribed for by the various countries was as follows:

United States of America.....	68
Great Britain.....	45
Germany.....	45
France.....	35
Italy.....	27
Japan.....	15
Switzerland.....	7

SPECIAL COLLECTIONS, AS ILLUSTRATED BY THE HARRIS COLLECTION OF BROWN UNIVERSITY.

H. L. Koopman in *Brown Alumni Monthly*, January, 1901.

THE practical and laboratory use of libraries has thrust the old museum idea into the background. Libraries, like all other institutions, exist for those who use them; and the users of our libraries, whether public, proprietary or university, with rare exceptions, clamor for the latest editions of the latest books. The exceptions, however, though not many, are intellectually important. In the use of university libraries they even rise from the category of "scattering" to the dignity of a minority, and it is for this minority that the museum idea of the library must be maintained.

Briefly stated, the museum idea in library management implies the building up of the library for historical as well as for contemporary study. For the practice of chemistry, for instance, one wants the latest book, or even article, issued. But to one who is tracing the history of chemistry, a work on alchemy, or even on primitive folk-lore, may outweigh in value scores of books published in the last decade.

Applying the same principle to works of literature, we find it true, indeed, that the average undergraduate has no occasion to read works of American poetry printed before 1800. But Prof. Bronson has acknowledged that he could not have written his "History of American literature" without the material of research afforded by our Harris collection of American poetry. Similarly, Mr. Stedman, in the preface to his "American anthology," makes acknowledgment of the services which we were able to render him from the resources of this collection. At the present time another distinguished American critic is compelled to send 500 miles to the Harris collection for material which he cannot obtain elsewhere, and with which we, of course, are glad to be able to supply him.

Not all libraries, even the largest, can specialize in everything; but the smallest library can specialize in something. Usually local history affords the most natural and, perhaps, the most useful subject for town libraries to make a specialty of. In college libraries some gift of books or money usually determines the trend of the specialization. The Dante collections at Harvard and Cornell, and the Avery Architectural library at Columbia are cases in point. Sixteen years ago Brown University came into possession, through the will of Senator Anthony, of the collection of American poetry founded by Albert Gorton Greene, built up by Caleb Fiske Harris, and finally enlarged by Senator Anthony's own purchases. This collection, ex-

clusive of strict duplicates, numbered 5000 volumes, and was at the time undoubtedly the most extensive collection of American poetry in the world.

No fund was provided for keeping the collection up to its high rank; so it is not to be wondered at if it should have lost in the interval something of its great superiority over all rival collections. Almost no additions, in fact, were made to it until three years ago, when Samuel C. Eastman, Esq., of the class of 1857, began to enrich it with gifts that now amount to hundreds of volumes. In November, 1900, there was dispersed one of the most important collections in the same field, the library of the late Thomas J. McKee of New York. It was felt to be of crucial importance that the university should not lose this opportunity of supplying certain deficiencies in the Harris collection; and, as there were no regular funds available, the chancellor came forward with a gift of \$1000 for the purpose. With this sum at his disposal the librarian attended the sale and purchased 200 volumes, which materially add to the completeness of the collection. Important editions of Poe's works were secured, the collection of Walt Whitman's writings was made one of the most complete in the country, and valued additions were made to our already excellent collections of the two dramatists, William Dunlap and John Howard Payne.

The chief present need of the collection is a fund to provide an income for the purchase of current books of poetry and drama, while they may be obtained at their publication prices; so that we may not be forced in the future to pay hundreds of dollars for some tiny pamphlet — if we are to obtain it at all — which originally sold for as many cents.

A LIST OF LEGAL NOVELS.

THE following suggestive list of legal novels was compiled by Prof. J. H. Wigmore, of Northwestern University Law School, and appeared in the *Brief of the Legal Fraternity of Phi Delta Phi* for January, 1900:

ABBREVIATIONS: A, Trial scene described; B, Typical traits of lawyer portrayed; C, Delineation of methods of law in the detection, pursuit and punishment of crime; D, Points of law affecting the rights or conduct of the personages.

- AINSWORTH, Harrison.  
 Jack Sheppard (C.)  
 Star chamber (C, D.)  
 ALDRICH, Thomas Bailey.  
 Stillwater tragedy (C.)  
 ALLEN, Grant.  
 Miss Cayley's adventures (A, D.)  
 BALZAC, Honoré.  
 César Biotteau (D.)  
 Cousin Pons (B, D.)  
 Père Goriot (D.)  
 Two brothers (D.)  
 BECKE, Louis, and JEFFERY, Walter.  
 First fleet family (C.)  
 BESANT, Walter, and RICE, James.  
 Chaplain of the Fleet [Prison] (C, D.)

- BLACKMORE, R. D.  
   Lorna Doone (A.)  
 BOLDREWOOD, Rolf.  
   Robbery under arms (C.)  
 BULWER-LYTTON, Edward.  
   Eugene Aram (A, C.)  
   Night and morning (D.)  
   Paul Clifford (A, C.)  
 CLARKE, Marcus.  
   His natural life (C.)  
 COCKTON, Henry.  
   Valentine Vox the ventriloquist (B, D.)  
 COLLINS, Wilkie.  
   Armadale (B, C.)  
   Law and the lady (A, D.)  
   Man and wife (D.)  
   Moonstone (C.)  
   Woman in white (D.)  
 COOPER, James Fenimore.  
   Bravo (C.)  
   Headsman (A.)  
   Monikins (A.)  
   Spy (A.)  
   Ways of the hour (A, B, C.)  
 CRADDOCK, Charles Egbert.  
   In the stranger people's country (C.)  
   Prophet of the Great Smoky mountain  
   (C.)  
 DICKENS, Charles.  
   Barnaby Rudge (C.)  
   Bleak house (A, B.)  
   Little Dorrit (C.)  
   Oliver Twist (C.)  
   Our mutual friend (B.)  
   Pickwick papers (A, B.)  
   Tale of two cities (A, B.)  
 DOYLE, Arthur Conan.  
   Firm of Girdlestone (C.)  
   Sherlock Holmes, Memoirs and adven-  
   tures (C.)  
 DUMAS, Alexandre.  
   Black tulip (C.)  
   Count of Monte Cristo (A, C, D.)  
   The forty-five, part I (A, C.)  
   Marguerite de Valois (A, C.)  
   Twenty years after, part II (A.)  
   Vicomte de Bragelonne, part VI (C.)  
 EDWARDS, Annie.  
   Archie Lovell (A, D.)  
 EGGLESTON, Edward.  
   Graysons (A.)  
   Hoosier schoolmaster (A.)  
 ELIOT, George.  
   Adam Bede (A.)  
   Felix Holt (D.)  
   Romola (C.)  
 FIELDING, Henry.  
   Jonathan Wild (C.)  
   Joseph Andrews (C.)  
 FOOTE, Mary Hallock.  
   John Bodewin's testimony (A.)  
 FORD, Paul Leicester.  
   Honorable Peter Stirling (B.)  
 FREYTAG, Gustav.  
   Debit and credit (D.)  
 GABORIAU, Emile.  
   File no. 113 (C.)  
   Monsieur Lecoq (C.)  
 GOLDSMITH, Oliver.  
   Vicar of Wakefield (C.)  
 GREY, Maxwell.  
   Last sentence (A.)  
   Silence of Dean Maitland (A, D.)  
 HAGGARD, H. Rider.  
   Mr. Meeson's will (D.)  
 HALE, Edward Everett.  
   Philip Nolan's friends (A.)  
 HARRIS, Richard.  
   Mr. Bumpkin's lawsuit (B.)  
 HARTE, Francis Bret.  
   Gabriel Conroy (A.)  
 HAWTHORNE, Nathaniel.  
   Scarlet letter (C.)  
 HOLLAND, Josiah Gilbert.  
   Sevenoaks (A, D.)  
 HOWELLS, William Dean.  
   Modern instance (A, D.)  
 HUGO, Victor.  
   Les misérables (C.)  
 JOKAI, Maurice.  
   Pretty Michal (C.)  
 LEVER, Charles.  
   Martins o' Cromartin (B.)  
 MACDONALD, George.  
   Wilfred Cumbermede (D.)  
 MARRYAT, Frederick.  
   Poachers (A.)  
 MULOCK, Dinah Maria.  
   Hannah (D.)  
 O'REILLY, John Boyle.  
   Moondyne (C.)  
 PAGE, Thomas Nelson.  
   Red Rock (D.)  
 READE, Charles.  
   Foul play (D.)  
   Griffith Gaunt (A.)  
   Never too late to mend (B, C.)  
   Terrible temptation (A.)  
   Hard cash (A, B, C.)  
 SCOTT, Michael.  
   Tom Cringle's log (A.)  
 SCOTT, Walter.  
   Anne of Geierstein (A, C.)  
   Fortunes of Nigel (C.)  
   Guy Mannering (A, B, C, D.)  
   Heart of Midlothian (A.)  
   Ivanhoe (A.)  
   Old Mortality (C.)  
   Peveril of the Peak (A.)  
   Quentin Durward (C.)  
   Redgauntlet (B.)  
   Rob Roy (C.)  
   St. Ronan's well (D.)  
 STEVENSON, Robert Louis.  
   Kidnapped: with its sequel,  
   David Balfour (or Catriona) (B, C.)  
 SUE, Eugène.  
   Wandering Jew (C, D.)  
 THACKERAY, William Makepeace.  
   Adventures of Philip (B.)  
   Pendennis (B.)  
 THANET, Octave.  
   The missionary sheriff (C, D.)  
 TROLLOPE, Anthony.  
   Orley farm (A, B, D.)  
 TWAIN, Mark.  
   Pudd'nhead Wilson (A.)

- WARREN, Samuel.  
Adventures of an attorney in search of a  
practice (B.)  
Ten thousand a year (B.)  
WEYMAN, Stanley.  
Castle inn (D.)  
Man in black (A.)  
WOOLSON, Constance Fenimore.  
Anne (A.)

RESERVED AND UNRESERVED BOOKS  
—COMPARATIVE CIRCULATION.

A COMPARISON between the circulation of reserved and unreserved books has, so far as I know, never been published. Such a comparison has been recently made at the Bedford branch of the Brooklyn Public Library. It was made possible by the fact that at this branch we have been trying the experiment of exempting from reserve some of the copies of very popular books. The following table shows the difference in circulation for a brief period, the corresponding numbers always referring, of course, to the same length of time and the same number of volumes:

		Reserved.	Un- reserved.
Bachelor .....	Eben Holden.....	11	14
Barr.....	Maid of Maiden Lane.....	6	7
Burnett.....	De Willoughby claim.....	25	32
Cholmondeley .....	Red pottage.....	5	5
Churchill .....	Richard Carvel.....	27	41
Crawford .....	Palace of the king .....	7	9
" .....	Via crucis.....	21	19
Ford.....	Janice Meredith.....	28	41
Harland.....	Cardinal's snuff-box.....	12	14
Johnston.....	Prisoners of hope.....	39	54
" .....	To have and to hold.....	23	37
Tarkington .....	Gentleman from Indiana.....	14	29
Ward.....	Eleanor.....	11	14
		229	316

It will be seen that in the aggregate, as in a large majority of individual cases, the unreserved books have had a much larger circulation, and it seems probable that the reserve system reduces circulation very considerably. Notwithstanding this fact, however, it seems to me that it is justified by the fact that a reserved book goes to the people who especially want it, and in the order of their desire for it as shown by priority of application; while an unreserved book goes to the people who happen to be in the library at the particular time when it is placed on the shelves. The aggregate amount of satisfaction given by a reserved book, and the good that it does, are therefore probably larger, although its actual circulation is smaller, than that of the unreserved book.

Entirely apart from these considerations, however, the statistics given above are interesting in themselves, and are probably worth a place in the columns of the JOURNAL.

ARTHUR E. BOSTWICK.

ADVERTISING A LIBRARY THROUGH  
PAY ENVELOPES.

WITH the beginning of the new year the Enoch Pratt Free Library, of Baltimore, began a scheme of systematic advertising in the mills and workshops of the city. It is a notorious fact that few of the libraries of our large cities are reaching 10 per cent. of the people who are old enough to use them. Thousands and tens of thousands of the workers in the factories have never been inside the library buildings, and many of them do not know, even in the vaguest sort of way, the object for which the library exists. To remove ignorance, to call the attention of the people to the library, and to enlist the co-operation of employers of labor for the spread of its usefulness are the ends directly sought in the methods pursued by the Enoch Pratt Free Library.

Three manufacturing companies, having over 3000 employes, are located in the section of Baltimore in which Branch no. 7 of the library is situated. While the scheme of enlisting the interest of these people in the library was under discussion Mr. James A. Gary, the president of the board of trustees and a large employer of labor, suggested that the proper authorities be seen with reference to advertising the library through the pay envelopes. This suggestion was followed up, and in every instance, so far as the neighborhood of Branch 7 is concerned, the managers of the mills and shops readily agreed to distribute the printed matter which the library might send them. Small slips, of which a facsimile is shown herewith, were printed for distribution through the pay envelope, and the number of new persons brought to the library is already large.

EXAMPLE OF SLIP USED:

THE ENOCH PRATT FREE LIBRARY  
OF BALTIMORE CITY

Eight Buildings, 205,000 books.

CENTRAL LIBRARY, Mulberry Street, near Cathedral, 127,000 books, and 400 current periodicals.

The books and magazines in all the library buildings are for your use FREE. Are you using them? You will find the library reading rooms delightful, comfortable and profitable places in which to spend your evenings. Try it.

BRANCH LIBRARY No. 7, building presented by Mr. Robert Poole, Falls Road, below Fourth Avenue, contains more than 4000 books. New books added frequently; 30 current magazines. Reading Room open Wednesday, Thursday and Friday, from 9 a.m. to 9 p.m., and Monday, Tuesday and Saturday, from 2 to 9 p.m. The delivery of books begins at the same hours, but closes at 8.30 p.m.

It is the purpose of the library to take up section after section of the city in this way, always, however, with reference to a particular branch. The personal visit of an official of the library to the manager or owner of a concern employing a large number of people usually establishes personal relations that are exceedingly helpful to the library. It is believed that few employers will refuse to distribute these slips; thus far there are none.

SAMUEL H. RANCK.

## LIBRARY LEGISLATION FOR PENNSYLVANIA.

THE Pennsylvania State Library Commission, through a special committee, has drafted a library law, which has been introduced into the state legislature. It is based largely upon the laws of Massachusetts and New Jersey, and should open the way to a large library development in the state, as it abrogates the existing and inadequate library laws and replaces them with one comprehensive and definite enactment. The law as presented is as follows:

An act for the establishment and maintenance of public libraries in cities of the second and third class, and in boroughs.

SECTION 1. Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same, That councils may submit to the qualified voters of the cities of the second and third class, and boroughs, at any annual election, the question of the establishment and maintenance of a public library in such municipality; and must submit the question if petitioned for by at least three per cent of the voters registered at the last annual election. At said first mentioned election the question of establishing said public library, and the rate of the annual tax not exceeding two mills on the dollar on all the taxable property in the municipality shall be submitted and voted upon. A majority of the votes cast on the question shall decide.

SECTION 2. The rate of tax so voted shall be an annual tax rate until another popular vote is taken changing the same. The tax shall be levied and collected in like manner with the other taxes in the municipality and shall be in addition to all other taxes, and shall be used for no other purpose than that of establishing and maintaining a public library. The money so raised shall be under the exclusive control of a board of library directors appointed as hereinafter provided.

SECTION 3. If five per cent. of the registered voters of any municipality shall petition councils to submit the question of creating a bonded indebtedness for purchasing ground and erecting buildings for public library purposes, councils must submit the question to be voted upon at the next annual election in the same manner as hereinbefore provided.

SECTION 4. The affairs of a public library shall be under the direction and control of a board of directors of not less than five or more than nine, as determined by councils. They shall be appointed from the citizens at large by the mayor or burgess and confirmed by councils. The first appointees shall be appointed one-third for one year, one-third for two years and one-third for three years. The mayor and superintendent of schools of the municipality shall be ex-officio members of the board. The terms of office of the members of the board appointed by the mayor or burgess shall be for three years. The board shall be organized by the election of a president and treasurer from its membership, and such other officers and agents as the board may deem necessary. The treasurer shall be required to give bonds.

SECTION 5. Every library or reading room established under this act, shall be forever free to the use of the inhabitants of said municipality or borough where located, always subject to such reasonable rules and regulations as the board having the library in charge may adopt, in order to render the use of said library and reading room of the greatest benefit to the greatest number; and said board may exclude from the use of said library and reading room any and all persons who shall wilfully violate such rules. And said board may extend the privileges and use of such library and reading room to persons residing outside of such municipality or borough, upon such terms and conditions as said board may from time to time by its regulations prescribe.

SECTION 6. Said board shall make an annual report to the councils of such municipality or bor-

ough, covering the fiscal year of such municipality or borough, stating the condition of the library and of the branch or branches, if any, the various sums of money received from the library tax and from other sources, and how such moneys have been expended and for what purposes, the number of books and periodicals on hand, the number added by purchase, gift or otherwise during the year, the number of registered readers, the number of books loaned out, and the general character and kind of such books, with such other statistics, information and suggestion as they deem of general interest.

SECTION 7. The councils of said municipality and boroughs have power to pass ordinances imposing suitable penalties for the punishment of persons committing injury to such library, or to the grounds or other property thereof, or for injuring or failing to return at the time and in the manner specified in the rules of said library any books belonging to the same.

SECTION 8. Any person desiring to make donations of books, money, personal property, or real estate for the benefit of such library, shall have the right to vest the title to such books, money, or real estate, so donated in the board duly constituted for the management of such library, to be held and controlled by such board when accepted according to the terms of the deed, gift, devise, or bequest, of such property, and as to such property, the board shall be held and considered to be trustees.

SECTION 9. The following acts are hereby repealed: An Act approved May 23, 1887, entitled "An Act empowering any city in this commonwealth to take and hold donations of money, books, real and personal property for the purpose of a free library in said city and make appropriations to maintain the same, provided however, that this repealing clause shall not affect any library established under and in pursuance of said act, nor shall it in any manner effect a change in the manner of appointing a Board of Directors where the same has been created by gift or deeds wherein the manner of appointment of the Board of Directors is in said gift or deed provided for, but shall in all other respects be subject to this Act." The Act approved June 28, 1895, entitled "An Act for the establishment of free public libraries in the several school districts of the Commonwealth, except in cities of the first and second class." The Act approved March 30, 1897, entitled "A Supplement to an Act entitled 'An Act for the establishment of free public libraries in the several school districts of the Commonwealth, except in cities of the first and second class,' approved the twenty-eighth day of June, Anno Domini one thousand eight hundred and ninety-five, authorizing school districts to aid free public libraries otherwise established." The Act approved May 25, 1897, entitled "An Act to authorize boroughs of the Commonwealth of Pennsylvania to make appropriations for the establishment and maintenance of free public libraries."

SECTION 10. All Acts or parts of acts inconsistent herewith are hereby repealed.

The need of an appropriation for the work of the state library commission is also to be submitted to the legislature. Since its organization in 1899 no provision has been made for the expenses or work of this body, and its activities have been maintained through contributions from its members and others interested in the library development of the state. In this way the nucleus of a travelling library system has been established, and in January, 1901, the first boxes were sent out from the Free Library of Philadelphia to towns and other small places whose applications had long been on file. For the continuation of the work of the commission and its development to meet the demands that will be made upon it, an annual appropriation such as is granted for like work in Wisconsin, Iowa, and other states, is needed.

AFFAIRS AT THE BROOKLYN (N. Y.)  
PUBLIC LIBRARY.

THE resignation of Mr. A. E. Bostwick from the post of librarian of the Brooklyn Public Library, recorded elsewhere, is the climax of a disturbed condition of affairs at that library. Mr. Bostwick's appointment to the headship of the Brooklyn Public Library was made on March 8, 1899; his resignation was presented to take effect Feb. 1, 1901, and it was evidently the result of a conflict in relations between Mr. Bostwick and Mrs. Mary E. Craigie, the assistant librarian, that seems to have existed practically throughout his administration.

Mrs. Craigie, as is well known, was one of the most instrumental in the organization of the Brooklyn Public Library, through the agency of the Brooklyn Public Library Association, which was formed for that purpose. Mainly through her energetic exploitation the library was first opened in one of the unused public school buildings, and later the present quarters in a private residence building were secured. She was elected librarian when the library was established, and filled that position until Mr. Bostwick's appointment, when it was felt by the trustees that a man of experience and capacity in library administration was needed to develop the library on a plane consistent with its opportunities. For Mrs. Craigie the post of assistant librarian was created, in recognition of her past services and continuing interest in the library. The results of this arrangement were the ordinary ones under like conditions. The librarian's authority seems not to have been regarded and for a year or more the dissensions of the Bostwick and Craigie factions have furnished paragraphs for the local press. It is understood that these factions had representation in the board of directors, so that the librarian's authority was not fully sustained by his board, and that the influence of Mrs. Craigie's supporters rendered any definite settlement of the matter impracticable. The terms of both Mr. Bostwick and Mrs. Craigie expired at the close of 1900, and at the December meeting of the board it is understood that an effort was made to displace Mrs. Craigie and reelect Mr. Bostwick. It was defeated and the matter was referred to the executive committee, which later reported in favor of extending the terms of both officers for another month. At the January meeting no action was taken, and the librarian and assistant librarian were thus left in "hold over" condition. The result of this state of affairs was that when the post of superintendent of circulation for the New York Public Library was tendered to Mr. Bostwick in January of this year it was promptly accepted—for the frankly expressed reason that the conditions of the Brooklyn office had been "far from what was anticipated," and that the new field offered a more congenial environment.

Mr. Bostwick's retirement came apparently as a surprise to the Brooklyn Public Library authorities, and the local press seems to regard it as not greatly altering the fundamental situation.

The *Standard-Union* for Jan. 23 says: "All that can fairly be said is that it changes the issue and protracts the uncertainty which, whatever may have been the merits of the half-concealed antagonism and cross-purposes, whether publicly admitted or not, had a great deal to do with the efficiency and promise of the library. It must be obvious at the first glance that the step which has been taken is rather backward than forward; that is to say, that the foreknowledge and outcoming of the perplexities of the situation will discourage men of the first ability from entering a field where evidently either something else than professional ability of the highest type is demanded, or where there is not courage to sustain it and give it free play. Librarians are much like other men; they are not likely to hunt trouble, or to seek to prosecute their peaceful calling in the face of distracting and opposing influences, whether masked or avowed, and therefore the situation is heavily handicapped at the outset."

A special meeting to consider a successor to Mr. Bostwick was held by the directors on Jan. 27, when a committee of five, with Prof. F. W. Hooper as chairman, was appointed to take up the question and report upon it. This committee held a meeting on Feb. 4, when it approved and promulgated the following memorandum of the qualifications desired:

"The man who is sought as librarian for the Brooklyn Public Library is one who has had a thorough elementary, secondary and collegiate, or university training; one who has been able to get from his training thorough scholarship and a living interest in science, art, literature and philosophy, as means of educating and uplifting human society; who has a deep sympathy with the physical, intellectual, ethical and religious needs of all social conditions, and who has breadth of vision and depth of conviction on important religious, social, scientific and philosophical questions.

"In addition to breadth of culture and positive character, he should have been trained for the special profession of librarian and should have had successful experience in library work, including a successful administration of the affairs of a library, either as chief librarian or as a trusted and valuable first assistant in a library of excellent standing.

"In addition to scholarship and professional training, the librarian desired should have executive ability, thereby enabling him to secure the very best service possible from the many subordinate employes; great power of discernment of the character and qualifications of persons engaged in library work, thereby enabling him to make good selections of subordinates; great tact and skill in deal-

ing with the public, thereby avoiding friction with the people who support the library; wisdom in practical affairs, thereby enabling him to advise with the board of directors and the city authorities as to the proper expenditure of public moneys; great public spirit, thereby allying himself with the hopes, the needs and the aspirations of the people whom he is to serve; and, in short, an all-round citizen who will be capable of shaping public sentiment in library matters, of taking an influential position in educational matters, and one who will be deserving the respect and support of the whole community.

"The board of directors will not consider as a candidate for the position of librarian any one who has been trained for some other profession and who has not had valuable experience as a successful librarian. They will not accept some school teacher who seems to have missed his calling; or some minister who has missed a parish; or some book-worm who, under the name of librarian, has delved among library shelves, instead of making the library that he served a living fountain of knowledge and culture to the community about him.

"The board of directors will be satisfied with nothing short of the best available man for the position to be filled; a man in the prime of life who has many years of work ahead of him; a man who has his chief life work before him rather than behind him. The salary of the position is fixed by the board, and will be commensurate to the position and to the merits of the man finally selected."

#### THE N. E. A. MEETING IN CONNECTION WITH THE A. L. A. CONFERENCE OF 1901.

THE attention of librarians should be called to the fact that the National Educational Association, which has a library section, will hold its next meeting in Detroit, July 8 to 12, inclusive. Since this meeting immediately follows that of the librarians at Waukesha many of the latter will doubtless feel enough interest to lead them to attend it. The subject of reading for the young, and especially of co-operation between the librarian and the teacher, has become a very interesting and practical one. It is a subject upon which the librarian and the teacher should get closer together than they have yet done. It was for the purpose of bringing about a more cordial and intelligent understanding that the library section of the N. E. A. was created, some three or four years ago. The necessity for a deeper interest on the part of teachers was apparent. That this interest has been aroused and that the meetings of the library section have been growing in attendance of teachers and have demonstrated a success should be acknowledged by a corresponding enthusiasm on the part of librarians. There has never before been so convenient an ar-

range of time and place with reference to the meeting of librarians as this year, and this circumstance ought surely to be taken advantage of by all who are interested. In making travel arrangements for the Waukesha meeting it can be very easily managed that a route through Detroit shall be selected for all parties originating eastward of that city and that stop-over privileges shall be granted for the return trip. With this matter properly settled I see no reason why there should not be a very general attendance at the educational association on the part of eastern librarians. The round trip fare secured for teachers will enable western librarians to visit Detroit at very small expense.

H. M. UTLEY.

#### NEW YORK LIBRARY CLUB HANDBOOK.

THE New York Library Club has undertaken the preparation of a handbook, giving full information, with record of the statistics and specialties of the libraries of New York City and vicinity. The special committee in charge of the work, of which G. W. Cole is chairman, has sent out circulars asking information on the lines indicated. In addition to the usual questions regarding character, officers, hours, sources of income, etc., special request is made for data as to "leading features and specialties, giving name of classes and number of volumes in each. (If divided into departments, give name of officer in charge of each department.) In case of special collections, *e. g.*, Shakespeariana, Architecture, Americana, incunabula, periodicals indexed in Poole, etc., the statement that a library has 325 volumes on Kant or 495 on Shakespeare is more to the point than that it has 1500 volumes on philosophy or 3000 on English literature." All communications regarding the handbook should be addressed to the chairman, G. W. Cole, 501 W. 113th street, New York City.

#### American Library Association.

*President:* H. J. Carr, Public Library, Scranton, Pa.

*Secretary:* F. W. Faxon, 108 Glenway st., Dorchester, Mass.

*Treasurer:* G. M. Jones, Public Library, Salem, Mass.

*23d General Meeting:* Waukesha, Wis., July 3, 1901.

#### COMMITTEE APPOINTMENTS.

The secretary announces the appointment of Mr. George Watson Cole, of New York, as reporter on Gifts and Bequests for the Waukesha meeting of the A. L. A., *vice* F. W. Ashley; and of Miss Agnes Van Valkenburgh, of Milwaukee, as secretary of the Catalog Section of the A. L. A., *vice* J. C. M. Hanson.

## State Library Commissions.

**INDIANA PUBLIC LIBRARY COMMISSION:** W. E. Henry, secretary, State Library, Indianapolis.

The first biennial report of the Indiana library commission, covering the period since its organization, April 14, 1899, to Oct. 31, 1900, is printed as appendix C of the 23d report of the state librarian. The commission was established by act of 1899, with an annual appropriation of \$500 for expenses and of \$3000 for purchase of books and equipment of travelling libraries. Two classes of libraries were organized: general libraries, each consisting of 40 miscellaneous volumes; and study libraries, of from 10 to 15 volumes upon some specific subject. There are now 66 miscellaneous and 20 study libraries. The equivalent of 60 libraries have been in circulation for 12 months, and have reached 69 towns or other centers in 30 counties. The number of books in the libraries sent out to Oct. 31 is given as 1874, and the number of books ready for circulation at that date as 2674. The number of "volumes read" is given as 2554, and the "total number of readings" as 7062. The report includes full lists of associate libraries, a map showing the radius of the system through the state, the state law and rules of the commission, and full finding lists of the travelling library collection.

**KANSAS STATE LIBRARY COMMISSION:** J. L. King, secretary, State Library, Topeka.

The first biennial report of the Kansas Travelling Libraries Commission for 1900-1901 appears in a small 16-page pamphlet. The movement for travelling libraries in the state was started in May, 1897, by club women, through whose efforts a system of such libraries was established and conducted by the Kansas Social Science Federation. 3000 volumes were collected as a nucleus for a permanent system and the legislature was then asked to turn the development of the work over to the state, by making it a department of the state library. This was done by the legislature of 1899, when the state commission was established with an annual appropriation of \$1000 for its support. The history of the movement is reviewed more fully in the report, which states that the department now contains 5565 books, with 117 library cases. "There are 104 libraries of 50 books each now in use throughout the state with prospect that all of the libraries will be in service before the end of the present year." Since the organization of the commission 170 libraries have been sent out, making, with the work of the clubs before state control, "a total circulation of 210 libraries since the travelling-library system was inaugurated." The circulation is estimated at about 16,800 v. for the 210 libraries. "It has been found that the best patrons of the system are the public schools and the city and country reading

clubs." A list of the counties (64) and of the towns (132) is given to which libraries have been sent since the state has conducted the system. "Could they be presented, the letters received from the various stations showing the popular interest taken in the little libraries, and the benefits conferred by their visits, would gratify and charm any man or woman who feels an interest in library work and the cause of education."

**NEW JERSEY PUBLIC LIBRARY COMMISSION:** H. C. Buchanan, secretary, State Library, Trenton.

On January 22 Governor Voorhees made appointments for the board of state library commissioners as follows: Moses Taylor Pyne, Princeton, five years; W. C. Kimball, Passaic, four years; Everett T. Tomlinson, Elizabeth, three years; Frank P. Hill, Newark, two years; E. C. Richardson, Princeton, one year.

**PENNSYLVANIA FREE LIBRARY COMMISSION:** Dr. G. E. Reed, secretary, State Library, Harrisburg.

A meeting of the commission was held at Harrisburg on Wednesday, Jan. 16, when Messrs. John Thomson, of the Free Library of Philadelphia, Henry Belin, Jr., of Scranton, W. M. Stevenson, of Allegheny, and Dr. George Edward Reed, the state librarian, were present.

The arrangements for the issue of the first sets of travelling libraries were completed, and it was expected that several of these would be issued to small localities before the month expired.

The most important matter discussed and settled by the commission was the proposed library law for Pennsylvania, which was later introduced into the legislature, which cannot fail to have a most important bearing on library development in the state, when it is passed. At the present time, excepting an act of legislature passed in 1895 affecting only cities of the first class (that is to say Philadelphia) and an act enabling school boards to give subsidies to libraries, there is no library legislation in the state. It is hoped that by the end of the session this evil may be mitigated. Only one library has been established under the school board enabling act, and the bill now being introduced will cover all cities and boroughs other than cities of the first class (*see p. 79*).

The present travelling library commission has no appropriation and the work they are accomplishing is being done at the instance of a few liberal minded gentlemen who made up a fund of \$2800 in order to start the movement. If the work is to continue, it will be indispensable that some appropriation be made by the state, and the proper application will, therefore, be submitted to the appropriations committee, and it is hoped that this important movement may receive recognition and be able to extend its good work.

## State Library Associations.

### CALIFORNIA LIBRARY ASSOCIATION.

*President:* C. S. Greene, Oakland Public Library.

*Secretary:* F. B. Graves, Alameda Public Library.

*Treasurer:* Miss M. F. Williams, Mechanics' Institute Library, San Francisco.

The annual banquet of the California Library Association was held on the evening of Jan. 11, in the California Hotel, San Francisco. At the business meeting, which preceded the banquet, the election of officers for the ensuing year was held, resulting as follows: *President*, C. S. Greene, Oakland Public Library; *vice-president*, Miss M. L. Jones, Los Angeles Public Library; *secretary*, F. B. Graves, Alameda Public Library; *treasurer*, Miss M. F. Williams, Mechanics' Institute Library.

H. C. Nash of Stanford presided at the banquet as toastmaster and among the speakers were Professor J. M. Stillman of Stanford University, Rev. Bradford Leavitt of the First Unitarian Church, J. C. Rowell, librarian of the state university, Professor Charles H. Shinn of the state university, and Horace Davis.

### ILLINOIS STATE LIBRARY ASSOCIATION.

*President:* E. S. Willcox, Public Library, Peoria.

*Secretary:* Miss M. E. Ahern, *Public Libraries*, 215 Madison street, Chicago.

*Treasurer:* Miss Mary B. Lindsay, Public Library, Evanston.

The sixth annual meeting of the Illinois State Library Association will be held at Lincoln, Ill., Feb. 21-23. The following program has been arranged:  
Feb. 21, 8 p.m.

Address of welcome. Hon. S. A. Foley, trustee Public Library, Lincoln.

President's address. E. S. Willcox.

Informal reception in parlors of Lincoln House.

Feb. 22, 8 a.m.

Library institute, conducted by Miss Eleanor Roper, John Crerar Library.

10 a.m. Library legislation.

Condition of libraries in Illinois. Miss K. L. Sharp.

Report of committee on legislation.

Farmers' institute travelling libraries. A. B. Hostetter.

Attitude of women's clubs toward library work. Mrs. Florence Allen Ingalls.

Friday afternoon, Feb. 22.

2 p.m. Library administration.

Co-operative cataloging. C. W. Andrews.

Proper distribution of labor in a small library. Miss Evva L. Moore.

Reorganization of an old library.

Reserve force in a small library. Miss

Anna Felt, trustee Galena Public Library.

A. L. A. announcements. Mrs. Alice G. Evans, Decatur.

Friday evening, 8 p.m.

Address: How to make the library of value to the town. Rev. Jenkins Lloyd Jones. Saturday morning, Feb. 23.

9.30 a.m. Business.

Amendment to constitution.

Increase of dues.

Committee reports.

Election of officers.

### MASSACHUSETTS LIBRARY CLUB.

*President:* H. L. Koopman, Brown University, Providence, R. I.

*Secretary:* F. O. Poole, Boston Athenæum.

*Treasurer:* Miss Theodosia E. Macurdy, Boston Public Library.

The Massachusetts Library Club has just issued an excellent compact "Handbook of the library clubs of Massachusetts," serving as a manual and directory for that club and the several local associations affiliated with it. These include the Bay Path Library Club, the Cape Cod Library Club, and the Western Massachusetts Library Club. The Library Art Club is not given, possibly because its membership and activities extend widely beyond the state, but it seems entitled to record among the library organizations of Massachusetts. Lists of officers, constitution, by-laws, and record of meetings, are given for each of the associations, and there are two comprehensive lists of members and libraries represented in all the clubs, with designation of the specific body in which membership is held. The handbook is well arranged and neatly printed, and it gives a most interesting and useful record of the extent and activity of organized library effort in Massachusetts.

### MISSOURI LIBRARY ASSOCIATION.

*President:* F. M. Crunden, St. Louis Public Library.

*Secretary-Treasurer:* J. T. Gerould, University of Missouri, Columbia.

The Missouri Library Association has taken up with vigor the work of securing a library commission for the state. A bill creating such a body has been prepared and introduced into the legislature and a circular letter has been sent to all members of the assembly and others concerned, pointing out the great modern development of the "library spirit," and urging the necessity of a state commission in the interest of economy and public education. The work in Massachusetts and Wisconsin is cited, and approval of the pending bill is strongly urged.

### NEW YORK LIBRARY ASSOCIATION.

*President:* H. L. Elmendorf, Buffalo Public Library.

*Secretary:* Miss M. E. Hazeltine, James Prendergast Library, Jamestown.

*Treasurer:* E. W. Gaillard, Webster Free Library, East Side House, New York City.

The executive board of the New York Library Association has appointed Mr. Edwin White Gaillard treasurer of that association, succeeding the late J. Norris Wing.

#### PENNSYLVANIA LIBRARY CLUB.

*President:* Allen C. Thomas, Haverford College, Haverford.

*Secretary:* Luther E. Hewitt, Law Library, 600 City Hall, Philadelphia.

*Treasurer:* Miss Mary Z. Cruice, American Philosophical Society, Philadelphia.

The January meeting of the club was held by the courtesy of the board of trustees of the Apprentices' Library, in their large room on Monday, Jan. 14, at eight o'clock.

Professor Thomas of Haverford presided and the attendance was large. The preliminary business did not occupy much time and the principal point under discussion was the adoption of the revised by-laws for the government of the club. They were adopted in conformity with the terms of the resolution passed at the meeting held at Haverford in May last.

The secretary was ordered to print 500 copies and the meeting settled down to a very enjoyable lecture by Frank P. Hill of Newark. He exhibited between 60 and 70 slides illustrating many of the principal libraries, both abroad and in America, keeping up a running commentary on the various libraries and their special points of merit and received, as was his due, a hearty and unanimous vote of thanks for his interesting talk.

The trustees of the Apprentices' Library were thanked for the use of their room and announcements were made that the bi-state meeting of the Pennsylvania Library Club and the New Jersey Library Association would be held at Atlantic City on Friday and Saturday, March 22 and 23.

#### WISCONSIN STATE LIBRARY ASSOCIATION.

*President:* Dr. H. H. Hurd, Chippewa Falls.

*Secretary:* Miss Bertha Mower Brown, Public Library, Eau Claire.

*Treasurer:* Miss Tryphena G. Mitchell, Ashland.

A meeting of the Wisconsin Library Association will be held at the Public Library, Eau Claire, on Thursday evening, Feb. 21, and Friday, Feb. 22. The program will be as follows:

Thursday, Feb. 21, 8 p.m.

Informal meeting of visiting delegates and townspeople.

Friday, Feb. 22, 10 a.m.

School and library. Miss B. M. Brown, Eau Claire.

Bulletins in our library. Miss Ada Kelsey, Menominee.

Some mistakes in starting libraries. Miss L. E. Stearns.

The up-to-date library. Miss Cornelia Marvin.

Wisconsin Summer School of Library Science. Miss Bess Kennedy, Neillsville.

Five-minute reports from librarians or representatives.

Friday, 2 p.m.

President's address: Relation of trustee to library. Dr. H. H. Hurd.

American Library Association. R. G. Thwaites.

Extension of public library privileges to rural communities. F. A. Hutchins.

Travelling libraries:

Dunn county — Miss Stella Lucas, Menominee.

Chippewa county — Mrs. E. Porter, Estella.

Eau Claire county — Mrs. M. S. Frawley, Eau Claire.

Saturday, Feb. 23, will be given to a post-conference visit to the Mabel Taintor Memorial Library and Stout Manual Training School at Menominee.

### Library Clubs.

#### LIBRARY CLUB OF BUFFALO.

*President:* H. L. Elmendorf, Buffalo Public Library.

*Secretary-Treasurer:* Miss Ella M. Edwards, Buffalo Historical Society.

The Library Club of Buffalo held its regular meeting on Thursday evening, Jan. 17, in the rooms of the Buffalo Historical Society, President Elmendorf in the chair.

Hon. T. Guilford Smith, regent of the university, gave a talk on "The University of the State of New York." This was followed by a discussion of the various functions of the university, Mr. Smith answering questions regarding degrees conferred, and aid granted to libraries. The basis of apportionment to reference libraries was a subject of special interest.

Miss Bushnell, of the committee on home libraries, reported on the work of that committee to date. Three libraries are now in operation and another will be started during the month. Recommendation was made for an appropriation from the club funds to defray expenses of printing, and also for subscription to a current magazine for each of the home libraries. Mr. Elmendorf suggested that the Buffalo Public Library furnish back numbers of the magazines for the present. The committee was authorized to draw on the treasurer for printing expenses.

ELLA M. EDWARDS, *Secretary.*

#### BIBLIOGRAPHICAL SOCIETY OF CHICAGO.

*President:* Camillo von Klenze, University of Chicago.

*Secretary:* A. G. S. Josephson, John Crerar Library.

*Treasurer:* Carl B. Roden, Chicago Public Library.

The regular meeting of the Bibliographical Society of Chicago took place in the society room of the John Crerar Library, on the evening of Thursday, Jan. 3, the president, Prof. Camillo von Klenze, in the chair. Mr. C. B. Roden acted as secretary, in the absence of Mr. Josephson. A communication was read from Prof. Frantz Funck-Brentano, president of the Société des Etudes Historiques, Paris, acknowledging receipt of the year-book and suggesting collaboration and closer relations between the two societies.

The committee on private libraries, charged with the duty of devising means for making available the book rarities of private collectors of the city, submitted a report in the form of a circular letter to be addressed to a number of owners of libraries which contain collections of especial value, requesting co-operation and asking that information be furnished to be tabulated in the form of a catalog. The society hopes that owners of books not possessed by any of the public libraries of the city may occasionally loan such individual volumes for the use of accredited scholars, under strict surveillance of one of the public libraries. In the case of collections pertaining to special fields it is hoped that the student or investigator might be allowed the liberty of examining such.

The secretary read a paper prepared by Mr. Josephson, proposing plans for a bibliographical institute and looking toward the preparation of a complete bibliography of American literature. The plan has been submitted heretofore to the American Library Association and the American Historical Association. It embodies the following provisions: The Co-operation Committee of the A. L. A. and the Bibliographical Committee of the Historical Association, and representatives of other societies interested, to be made permanent committees and together constitute a National Bibliographical Commission, each society contributing to a fund for the maintenance thereof. A central bureau to be created under the commission, consisting of a director and other necessary officers, who shall compile a code of cataloging rules and communicate with leading libraries regarding a co-operative scheme for dividing the field. Copy (typewritten and corrected) to be transmitted to the central bureau and be printed and revised under its direction. Subscriptions to be received for full or partial sets of titles and provisions to be made also for separate publication of special bibliographies in book form.

After some debate, and an explanation by Mr. C. W. Andrews of the co-operation plans of the A. L. A., the president, on motion, appointed Messrs. Andrews, Hild and Roden a committee to consider Mr. Josephson's suggestions. Mr. L. T. Damon and Mr. W. N. Roundy, of Chicago, and the Grolier Club, of New York City, were elected to membership.

C. B. RODEN, *Secretary pro tem.*

#### CHICAGO LIBRARY CLUB.

*President:* W. B. Wickersham, Public Library.

*Secretary:* Miss Margaret Zimmermann, John Crerar Library.

*Treasurer:* C. A. Torrey, Chicago University Library.

A regular meeting of the Chicago Library Club was held Jan. 10, in the lecture hall of the Chicago Public Library.

The subject chosen for the evening's discussion was "The relation between libraries and schools," particularly in Chicago. The speakers of the evening were Col. Francis W. Parker, principal of the new Chicago Institute, and Edwin G. Cooley, superintendent of public schools of Chicago. Invitations to attend the meeting had been sent to the representatives of the city schools, the district superintendents, principals of high schools, and teachers. Several responded to the invitation, were present at the meeting, and took an active part in the discussion.

Col. Parker's talk was entitled "Some beginnings." He gave a brief history of the modern educational movement, and from his long years of experience furnished many amusing reminiscences. He contrasted the old methods of teaching reading with the modern method, and pointed out the errors, psychological and pedagogical, of the old way. Children have heretofore been deprived of the right kind of knowledge. If they are properly taught to study nature and use books there will be a great demand for good reading. The library will grow in direct proportion to this demand, and it will soon be tremendous.

A new literature is springing up which means much for the children. Their reading will be broadened and enriched. Books and science have completely revolutionized the old ideas of education and knowledge. The needs of society determine the function of the school. Children should be educated in citizenship, in character-building. The teacher must realize that the child is a being for development and public opinion must be educated also. An ideal in modern education is the children's library, containing only the best material which literature affords; a place where child and teacher may work and study together.

Mr. Cooley's address had for its subject "How may the library help the public school?" He said that the library should aid in forming the reading habit, and that the two forces to accomplish this end, to bring about this habit, are the library and the school. Teachers do not now rely on the library and the librarian as they should and do not teach children how to use books. Indeed, some of the teachers themselves fail to use the libraries. Entire dependence on the school library is not to be commended.

Education may become a life-long affair through reading; and children should be

taught the existence and use of the library, which belongs to them in their capacities as citizens. Their present ignorance is appalling.

Some sort of federation of library and school needs to be started—for co-operation must be accomplished before the desired result may be obtained. The present system of the library's aiding the school does not seem to be the best. The existing rules appear an obstruction rather than a help. A desired change is greater ease in securing cards. One decided objection to the present plan is the placing of delivery stations in small shops. The idea of putting side by side general merchandise and books from our library, the latter to be a benefit and use to the people, is an ignoble one, and quite contrary to modern educational ideals.

Another need is an adequate supply of better catalogs, and carefully-made lists, topical and graded, to reach even the lower grades are much needed.

A plan successfully carried out in many cities is a children's reading-room. Even better and more practicable for Chicago's needs would be the opening of branch reading rooms in the schools. Each should have its trained librarian to assist teacher and children, its own permanent supply of reference books and its regular changing supply from the main library as any delivery station.

This last idea was one which met with the hearty approval of many persons present. After a lively discussion, in which both librarians and representatives from the schools joined, it was decided to appoint a committee to confer with the board of education and the public library board, to see if such a plan might be carried out by the co-operative action of the two boards. It was also voted that the committee look into the matter of improved reading lists and catalogs.

Such a committee, consisting of Mr. Hayes, Mr. Hopkins, and Miss Warren, has been appointed, and it is hoped that it will be the means of bringing about the much-desired change which will afford help to the schools and render the library far more efficient and useful.

MARGARET E. ZIMMERMANN, *Secretary.*

#### LONG ISLAND LIBRARY CLUB.

*President:* A. E. Bostwick, Brooklyn Public Library.

*Secretary:* Miss S. A. Hutchinson, Department Libraries, Brooklyn.

*Treasurer:* Miss Mabel Farr, Institute of Arts and Sciences, Adelphi College, Brooklyn.

The February meeting of the Long Island Library Club was held at the Polytechnic Institute, Brooklyn, on Thursday evening, Feb. 7, 1901. The meeting was called to order by President Bostwick, between 40 and 50 librarians and teachers being present. Six new

members were admitted to the club. A social committee of five was appointed for the year.

The chair announced that the A. L. A. had appointed Miss M. W. Plummer its representative to further its interests at the Long Island Library Club meetings. Miss Plummer then spoke of the desirability of membership in the A. L. A., setting forth what was necessary in order to become a member, and the advantages accruing therefrom.

The committee on co-operation among Brooklyn libraries reported through the chairman, Miss Plummer, that the idea of a joint bulletin had seemed to appeal to nearly all of the libraries, and recommended that a committee follow up the subject and see what further can be done. For the division of the field of purchase, a subject table showing the strength of Brooklyn libraries had been prepared, and the committee recommended that a copy of the list be made for each library and each board of library directors, for reference in case of future purchases. It also recommended that libraries post at the meetings of the club lists of their duplicates of all kinds and of their wants.

It was voted that the committee be continued and its recommendations carried out. "Co-operation between libraries and schools" was the subject of the evening's program.

Miss Josephine A. Rathbone read an interesting paper on the "History of co-operation between libraries and schools in the United States," reviewing the development of the work since it was inaugurated by Charles Francis Adams, jr., in 1876. Miss Rathbone thought that the next advance in educational expansion must be in the direction of co-operation with museums.

Dr. Walter B. Gunnison, Principal of the Erasmus Hall High School, spoke on co-operation from the standpoint of the instructor. He spoke of the change in the character of the reading required in the schools at the present time as compared with that of 15 years ago. He thought that the library spirit had taken hold of educators as well as librarians. He sounded a note of warning against the indiscriminate reading of children, and thought that the librarian was going to do much to avert that danger.

Mrs. Elizabeth H. Spalding, instructor in English at the Pratt Institute High School, also spoke from the instructor's point of view. She favored the giving of children individual work to do in the library, for the benefit of the whole class. Many children never go beyond the high school, and she thought it very important that they should be taught how to use the library before leaving school that their education might continue afterward. The teacher should co-operate with the librarian in order that the latter may understand something of the individual. Co-operation between teacher and

librarian soon becomes co-operation between librarian and pupil.

Mr. E. M. Bassett, of the board of education, was the next speaker. He spoke of the tendency of the abundance of books and magazines to foster superficial reading. This he deplored, and thought that librarians should encourage the reading of books requiring concentration.

Mr. W. R. Eastman, of the State Library at Albany, was present and spoke for a few moments.

The chair was authorized to appoint a committee of three to investigate the conditions of the public schools in regard to library work and the general possibility of co-operation between libraries and schools.

The club was invited to inspect the Spicer Memorial and the academic libraries of the Polytechnic Institute at the close of the session, after which the meeting adjourned.

SUSAN A. HUTCHINSON, *Secretary*.

#### WESTERN MASSACHUSETTS LIBRARY CLUB.

*President:* W. I. Fletcher, Amherst College Library.

*Secretary:* Ida F. Farrar, City Library, Springfield.

*Treasurer:* Mrs. A. J. Hawks, Meekins Memorial Library, Williamsburg.

The ninth meeting of the Western Massachusetts Library Club was held at the Art Building, in Springfield, Mass., Tuesday, Jan. 29, with the president, Mr. W. I. Fletcher, of Amherst College, in the chair.

Rev. Bradley Gilman welcomed the guests in behalf of the City Library Association, and invited them at noon to visit the Church of the Unity, of which he is pastor, and see the stained glass windows. He gave a brief preliminary talk on stained and painted glass, telling something of its history and illustrating the process of making by samples which he had brought.

Following this came papers and talks on "How can the library help the people? In a farming community—in a mill community." Mrs. Hawks, of Williamsburg, said it was as difficult to get people to come to the library as to go to church; that they are kept away by their lack of knowledge of the use of a card catalog and the difficulty of getting near the books. This shows the need of printed book lists, and she had found great pleasure in preparing special lists for different classes of people. Finding that the farmers usually come to the village on Saturday morning with their produce, she opened the library for them for two hours in the morning, giving them free access to the shelves, inviting them to look over the card catalog with her, and encouraging them to suggest books they saw advertised. As a result of these efforts 95 farmers take books now where two years ago there were only eleven subscribers among

them, and books and their contents form a familiar topic of conversation where formerly gossip was all-absorbing.

Mrs. J. Q. Adams, of Hampden, said many of her patrons lived at some distance from the center, and regarded it as quite a Saturday afternoon treat to "harness up" and drive over to the library. They are not limited to one volume, but take enough for the whole family and their friends and neighbors as well, starting with quite a travelling library and never a fear of fines, as none are ever charged; the mere mention of fines often driving away the very people who need the books. They must be treated with great tact.

Mrs. Kate S. Gates, of Longmeadow, emphasized the need that the librarian know his books and the people who take the books, and endeavor to choose the books with special reference to the people.

Miss Roberta F. Cowan, of South Hadley, traced the development of the library in the town since it was started three years ago with 100 volumes to its present number of 6000 well classified, and circulation of 600, with two centers, and branches at the schools. As the population is quite scattered, arrangements have been made whereby a number of books are kept at the house of one of the trustees and can be taken any time.

In the absence of Miss Martha A. Ludden, of Easthampton, her paper was read by Miss Taintor, of Northampton. Miss Ludden is in the heart of a mill community, in fact the library was fathered by mill manufacturers and a large proportion of the borrowers are shop girls (they object to the term "mill hands"), who read the best fiction and discuss the merits of the books no less than the wives of the professors of the same town.

Miss Mabel Tempie, librarian at North Adams, a typical mill community, sent the results of a talk with a manufacturer. Each town should aim to buy books and periodicals along the line of its particular interest, not necessarily expensive, exhaustive treatises, but clear, concise works. The advice and approval of the manufacturers should be secured, and after the books are bought they should be well advertised by posting lists in the mills, publishing lists in the papers and by slipping these lists into the pay envelopes. Large clear placards advertising special events at the library, such as picture exhibitions, could be posted in the mills as an inducement to draw the people. The two-book system has been a great help in North Adams in getting the people to read the better class of books.

The subject of bookbinding was discussed by W. C. Stone, of the Springfield Library, and W. J. Eldred, a practical binder of the same city. Mr. Stone showed the evolution of binding at the Springfield Library, where formerly everything was put into skiver

binding, with sheep back and corners, which soon wore out; then a zinc back and heavy wire was tried, which never wore out, but were very clumsy; next the split cowhide, or American Russia; then the full canvas, which soiled badly; and now the art vellum or Holliston cloth of a reddish shade; also the Chivers or duroflexile binding. He also exhibited the magazine or pamphlet binding which at 15 cents a copy is a means of preserving many of the valuable pamphlets which a library is constantly receiving. Mr. Eldred showed the strength of this by offering the president one cover while he pulled the other, with great danger of making the president lose his balance, while the book seemed uninjured. Mr. Eldred advised sending books to the bindery as soon as they showed any signs of weakness. The use of a cent's worth more of glue or another inch of grass cloth on a book would render it very much stronger.

An hour and a half at noon was spent in visiting the Church of the Unity, and the Christ Church, where five new windows, fine specimens of the English glass painter's art, have just been placed. Here the brother of Phillips Brooks, Rev. J. C. Brooks, who did most of the selecting, and is thoroughly conversant with his subject, helped the company to better understand their beauty by his vivid description.

At half-past one dinner was served at the Evans House, and the session resumed at 2.45, when the following topic was discussed:

"Choosing books for a library: two questions: 1, What per cent. of fiction should be purchased by libraries with a very small income? 2, Should small libraries buy only the best books or the best books that people will read?"

Mr. C. A. Cutter, of Forbes Library, Northampton, was the first speaker, and he confined himself to the second of the two questions. His paper is given in full elsewhere (see p. 70).

Mr. J. C. Dana, of Springfield, followed, speaking without notes. He said that what is best depends upon the people who use the library; certain people want only a certain grade of reading—supply it. It is a question, however, how far away from literary standards a library should go. Some people would like the *Police Gazette* in the library instead of in the barber's shop—should they have it? Keep books on as high a grade as possible as long as people will use them, and before lowering the grade use all possible means to attract them to the higher. Buy a little better books than people would choose to read; lead them up by degrees. The duplicate system, or books loaned at two cents a day, helps solve the problem of the inveterate new novel reader, as does the giving out of novels for inspection. The person who complains because the latest trashy novel is not purchased, when she has the responsibility placed upon

her shoulders of deciding whether or not this very book shall be put into the library, hesitates and finally says, "better not." It is difficult to find really high grade novels. When a first 50 has been selected it is hard to find another.

In an address which followed on "A child's thoughts about books and libraries," Rev. Newton M. Hall, of Springfield, began by deprecating the lack of understanding between the child and the adult, saying, "The trouble is this: when the pious lady (the adult) left the house of childhood she locked the door and threw away the key and never went back." He drew a humorous picture of the library of 25 years ago when the books were kept in a sort of holy of holies into which no one but the librarian, or possibly the president of the board of trustees, ever penetrated, when the "business of the librarian was to make it as difficult as possible for the public to take books from the library," when if "the boy" asked for suggestions he was informed that a librarian could not spend his valuable time in finding books for boys to read. He traced the delight of "the boy" in "Oliver Twist," "Bleak House," and "Jane Eyre," as stories pure and simple, never a thought of the problems involved having entered his mind. "Grown-up people are bound by the most absurd desire to see the things they read about. But the boy required only a moment's notice to prepare for the jungle." A wide range of interest had this "boy," poetry, history, adventure—all this proves to him now as a man the opportunity of the modern librarian "to make friends with the child, to awaken the love of the best and to help to satisfy it, to introduce the eager mind to the company of the elect; to lead it forth into the fields of literature and thus to enlarge its vision, to strengthen its understanding, to make its life richer and better; there can be no higher occupation than this."

After a discussion as to what the club might attempt during the year the meeting adjourned.

IDA F. FARRAR, *Secretary.*

LIBRARY ASSOCIATION OF WASHINGTON CITY.

*President:* F. A. Crandall, Office of Documents.

*Secretary:* Hugh Williams, Library of Congress.

*Treasurer:* F. E. Woodward, 11th and F sts., N. W.

The 52d regular meeting of the Library Association of Washington City was held at the Columbian University Wednesday evening, Jan. 2. These officers were elected: President, F. A. Crandall; vice-presidents, Henderson Presnell and Miss Josephine A. Clark; secretary, Hugh Williams; treasurer, Fred E. Woodward; executive committee, Charles Martel, Miss Mary A. Hartwell, and C. L. Burchard.

F. H. PARSONS,

*Secretary pro tem.*

## Library Schools and Training Classes.

### DREXEL INSTITUTE LIBRARY SCHOOL.

The class spent an afternoon recently in visiting a large publishing house to see the making-up of a book. The printing and binding processes were studied with much interest.

An alcove of the library has been made into an exhibit room where a collection of fine Japanese color-prints first attracted attention. Now the picture bulletins made by the students of the library school are on exhibition. Some of the subjects are: Holland, Wagner and his music dramas, Polar expeditions, Our feathered friends, Social settlements, Animal stories for children, The Pan-American Exposition, The Victorian era, etc.

The date for entrance examinations to the school has been changed from September to June 18.

### NEW YORK STATE LIBRARY SCHOOL.

The important events of the month have been the lectures by Mr. George Iles and Dr. E. C. Richardson, the former given Jan. 10 and 11, the latter Jan. 31 and Feb. 1. In his first lecture, "An author at work in a library," Mr. Iles gave a clear idea of the demands made by authors on the sources of the library, in writing a trustworthy book, laying great stress on the thought that the time has come "when librarianship means not merely the custody of books, but the trusteeship of letters." In his second lecture he expounded his well-known theories of book annotation under the title "Books in the balances." He brought us the welcome intelligence that the "Annotated guide to American history," edited by Mr. J. N. Larned, is actually in press.

Dr. Richardson, the alumni lecturer, developed his subject, "Classification: the order of the sciences and the order of books" by laying down in the first lecture a philosophic basis for classification, and in the second showing the practical application of the theory. Many of the students received the lectures enthusiastically. All found the second lecture, which dealt with classification in its practical aspects, exceedingly helpful and suggestive. The two will be printed in the form of a monograph and will thus be made available to all interested. Mr. Dewey gave a very pleasant reception in honor of Dr. Richardson.

A timely picture bulletin on Queen Victoria and her reign was sent Feb. 6 to the Cleveland Public Library.

Miss Frances K. Ray, who entered the school in Oct., 1898, and who left at the close of the fall term on account of ill health, returned to finish her junior year Jan. 1, 1900.

The following student has matriculated in the junior class since Oct. 3, 1900:

McKnight, Herbert, Albany, N. Y., B.L., Cornell University, 1895.

SALOME CUTLER FAIRCHILD.

### PRATT INSTITUTE LIBRARY SCHOOL.

#### TERM-EXAMINATION QUESTIONS.

It seems advisable to print, from time to time, some of the questions asked in the regular term-examinations of the various classes, for several reasons. One is, that librarians may know on what points students receive instruction and what therefore they are expected to know; another to show that the effort of the school is not merely to give information which is asked of them again, but to develop judgment and critical power; another still that such questions may serve, if desired by the library assistant, as tests of his own knowledge and judgment.

A brief selection from the first term-examinations of the three classes, general course, historical course, and course for children's librarians, is therefore offered herewith:

#### General Course: Library economy, theory.

1. Given, a high school library of 3000 volumes, shelved around the room in wall cases, with free access to the books, which circulate only among the teachers and students: *a.* If you were to organize and catalog this library, what supplies would you need? Select from dealer's catalog, giving the catalog numbers, amount and price in every case. *b.* Describe the charging system you would adopt, with reasons for its adoption. *c.* Select 25 periodicals to be taken for this library.
2. What works of fiction can you mention that you, as a delivery-room assistant, would give to a person wanting books illustrating *a.* The period of our Civil War; *b.* Social conditions in central New York, in Chicago, in the Mississippi Valley states, among the peasantry of Ireland; *c.* the settlement and early history of America.

#### Cataloging.

1. Name the kind or kinds of book-numbers you would use for a growing popular library of 20,000 volumes, stating the reasons for your choice.
2. Give fully the rule for cataloging periodicals.
3. Give a brief sketch of the various forms of card-catalog. Describe the one you would choose for a growing library of 25,000 volumes. State briefly its advantages and disadvantages.
4. Mention the two principal editions of U. S. documents. How should they be arranged on the shelves? What notation would you use?
5. Give a brief description of the check-list of government documents, and explain the uses of the various parts.
6. Which, if either, of the following headings would you use, giving reason in each case:

Pneumatics or Gases.  
Press or Newspaper.  
War or Peace.

Perpetual motion or Motion, Perpetual.  
Abolition of Slavery or Slavery.  
Angling or Fishing.  
Fall or Autumn.  
Wheeling, Cycling, or Bicycling.  
Poorhouses or Almshouses.  
English etymology or English grammar, etymology.

*Reference-work.*

1. In what works of reference besides the general encyclopædias would you expect to find an account of
  - Roman law of inheritance?
  - Chronological list of works of Poe.
  - Immigration law of the U. S.
  - Sacred symbolism of colors.
  - Buddhism.
  - Life of Disraeli.
  - Specimens of Anglo-Saxon literature.
  - Whether the ship *Constitution* is still in commission.
  - Correct form for promissory note.
  - References on factory inspection.
  - Mater pulchra, filia pulchrior.
  - Organ construction.
  - Map of Macedonia.

(Answer ten.)

2. Compare — emphasizing difference of scope and kind of information to be looked for in each —
    - Statesman's year-book and Almanach de Gotha.
    - Hazell's and Appleton's annual.
    - "Men of the reign," and "Men and women of the time."
    - Century and Standard dictionaries.
    - Minerva* and the "College year-book."
- Course for Childrens' Librarians.*

1. a. Mention six of the articles you have read in the LIBRARY JOURNAL, *Public Librarians*, *Pedagogical Seminary*, or other periodicals, which have seemed to you most helpful and suggestive to the children's librarian. b. Give the substance of one of these articles and tell in what way it was suggestive.
2. a. Mention five or more of the suggestions which were given in the practical lectures concerning personal relations with children. b. Enlarge upon one of these, giving the results of your own experience since you came into the children's room, and the observations that you have been able to make of the work of others, or the information you have gathered through reading.
3. Make a list of the first ten books that you would order for the reference department of a children's library. Give reasons for your choice.
4. What books would you recommend as useful in preparing for a Washington's birthday celebration?
5. Tell something of two publishers of children's books before this century, and also of two men who were famous for their illustrations.

6. Name at least six English illustrators who have worked since that time, and suggest a few of their books that you would buy for a children's library.

*Historical Course.*

1. Name one or more German printers who later moved to Italy, and tell how we may distinguish between their works printed in Germany and Italy, when no place is indicated.
2. What city was especially noted for the production of illustrated books? Mention and describe briefly one published there or elsewhere.
3. Give the form to be used on catalog-cards of Guntherum dictū Zeyner.  
Augusta Vindelicorum.  
Moguntia.
4. Give the facts in their proper order that should make up the complete description of an early printed book.
5. a. Name five of the most important reference-books you have used, and tell in what particular you have found each useful. b. Of what value are sale-catalogs as works of reference in cataloging incunabula? c. Write out in full and translate the following: (1) F 2a incip. ab inscriptione 18lin. comprehensa, quæ in aliis exempl. rubro, in aliis nigro collore impre. est. (2) f. g. ch. s. s. c. et pp. n. 291-18ff. (3) s. l. a. et. typ. n.

## Reviews.

---

INDIANA STATE LIBRARY. Subject catalogue of United States public documents in Indiana State Library, 1900. (*In* 23d report Indiana State Library, Appendix A.)

This catalog is a careful and interesting piece of work, and all who have to deal with public document problems will find suggestive the review of aim and methods given in the preface. The classification chosen is the D. C., with some modification to provide for special subjects. For annual reports the book number adopted consists of the abbreviation "Un," and the last two figures of the date of report, "which places them on the shelves in chronological order." By frequent use of work marks the confusion of shelving a book between two reports is avoided, the work mark being placed between the letters and figures of the book number. "For example, the report on finance for 1896 has for its call number 336 Un 96, and the report of the commissioner of internal revenue for 1896 has for its call number 336 Uni 96." Subject classification is used wherever practicable, the large number of miscellaneous volumes being put in 328, with the remainder of the call number according to the New York State Library scheme, which is cited in full. The same scheme is used for laws, which are put

in 345, and for the American state papers the Biscoe system of time numbers (also given in full) is used. Analytical work has been done for many articles, especially for those of importance to the Indiana State Library.

The details of the methods adopted are stated concisely, and the preface is direct and helpful in its suggestions. The catalog proper covers 280 pages, and is arranged alphabetically by subjects. Under subject the arrangement is alphabetical by author, with subdivision for large subjects. Titles are quite full; imprint data includes size, place and year of publication and paging. It may be noted that under "Libraries" record is given only of the reports of the Librarian of Congress from 1875 to date, and of the 1849 Smithsonian "Report on public libraries of the U. S.," the important Bureau of Education reports being evidently missing from the library's collection, while under "Catalogues" we do not find Cutter's "Rules." Appended as a separate list is an index to the "Documentary journal of Indiana to 1899," covering about 40 pages, and similar in general arrangement to the main catalog. Mr. Henry points out that the catalog may be used in other libraries as a guide to the same documents "by such library merely copying our call numbers and following our shelf arrangement"; and in this way it will probably be of practical service, although of course the desideratum in this line is not the individual catalog of a partial collection, but a general catalog of public documents that will be available in all libraries as a test of completeness and an accurate guide in collections of varying size.

MURRAY, James A. H. *The evolution of English lexicography.* Oxford, Clarendon Press, 1900. 51 p. 8°, (Romanes lecture, delivered in Sheldonian Theatre, Oxford, June 22, 1900.)

Dr. Murray outlines in a masterly way the growth of the English dictionary and discusses briefly the characteristics of those that introduced important new features. The different stages are best described in Dr. Murray's words:

"These are: the glossing of difficult words in Latin manuscripts by easier Latin, and at length by English words; the collection of the English glosses into glossaries, and the elaboration of Latin-English vocabularies; the later formation of English-Latin vocabularies; the production of dictionaries of English and another modern language; the compilation of glossaries and dictionaries of 'hard' English words; the extension of these by Bailey, for etymological purposes, to include words in general; the idea of a standard dictionary, and its realization by Dr. Johnson with illustrative quotations; the notion that a dictionary should also show the pronunciation of the living word; the extension of the function of quotations by Richardson; the

idea that the dictionary should be a biography of every word, and should set forth every fact connected with its origin, history, and use, on a strictly historical method." This last is the idea of "A new English dictionary on historic principles," of which Dr. Murray is the editor.

The early English dictionaries had many names, but it was not until 1538 that *dictionary* itself was used, by Sir Thomas Elyot in his work published that year. Among the curious names for dictionary are the following: *Nominale*, or name-book; *Medulla Grammatices*, or Marrow of grammar; the *Ortus Vocabulorum*, or Garden of words; the *Promptorium parvulorum*; the *Catholicon Anglicum*; the *Manipulus Vocabulorum*, or Handful of vocables; the *Alvarie*, or Beehive; the *Abecedarium*; the *Bibliotheca*, or Library; the *Thesaurus*, the World of words; the Table alphabetical; the English expositor; the *Ductor in Linguas*, or Guide to the tongues; the *Glossographia*; the *Etymologicum*; and the *Gazophylacium*. "Dictionary" has become a word of such daily use that it requires an effort to imagine ourselves referring to the "gazophylacium" to find the meaning of a word or consulting Cutter's Rules for a "gazophylacium" catalog. In the first half of the sixteenth century the phrase "dictionary catalogue" would have been unmeaning, for all dictionaries were not yet arranged in alphabetical order. The strictly alphabetical order of arrangement of words in our present-day dictionaries was a matter that required centuries of evolution. First there was no alphabetical arrangement whatever, then came the first letter order, all the words beginning with a certain letter of the alphabet arranged together, then the first two letters of a word were considered, next the first three letters, and finally all the letters of the word were taken into account.

The work which first assumed the title of "The English dictionary," was published in 1623. The author H. C., Gent., (Henry Cockeram) divided the work into three parts. Part 1 contains the "hard" words with their explanation in ordinary language. Among the hard words are abandon, abrupt, absurd, action, and actress, defined as a "woman doer." Part 2 contains the ordinary words explained by their "hard" equivalents and is intended to teach a learned style. Thus, we learn that "youthful babbling" may be changed into "juvenile inaniloquence." Part 3 treats of "Gods and goddesses, men and women, boyes and maides, giants and diuels, birds and beasts, monsters and serpents, wells and riuers, herbes, stones, trees, dogges, fishes, and the like."

A noteworthy circumstance in connection with the English dictionaries of the early seventeenth century is that their preparation was largely due to a consideration of the educational wants of women. Robert Cawdrey's "Table alphabetical of hard words," published in 1604, says on its title-page that it

was "gathered for the benefit and help of ladies, gentlewomen, or any other unskilful persons." A number of other dictionaries of this period contain similar references.

Dr. Murray discusses Bailey's and Johnson's dictionaries with some fulness and speaks highly of the work of Richardson, which follows an idea correct in theory, but "humanly impracticable." "The last edition of Webster, the International, is perhaps the best of one volume dictionaries." Webster's dictionary is the only distinctively American work that is mentioned. Dr. Murray's lecture can be heartily recommended to all as one to be read with both pleasure and profit.

S: H. R.

## Library Economy and History.

### GENERAL.

*The Library* opens its second year with an excellent January number, to which there is a fine frontispiece portrait of M. Léopold Delisle, the veteran head of the Bibliothèque Nationale. Its contents include notes "On certain quotations in Walton's 'Angler'" by Austin Dobson; the fifth and final instalment of F. M. Crunden's exposition of "How things are done in one American library"; "Some old initial letters," by Oscar Jennings; "The Juvenile Library," an account of the quaint periodical in which were published youthful effusions of Leigh Hunt, De Quincey, and other famous men; and "A meditation on directories," by A. W. Pollard.

UNIVERSITY OF STATE OF NEW YORK. Home Education Department. Bulletin 32, December, 1900. Travelling libraries and collections I: Travelling pictures and school-room decoration; by Myrtila Avery. Albany, 1900 [1901]. p. 278-430, pl. O. 50 c.

This is practically an elaborate descriptive catalog of the collection of "travelling pictures" sent out from the New York State Library to the schools of the state. It includes 100 examples of famous works of art, each of which is shown in a fine reproduction, accompanied by descriptive text. The handsome plates give the volume much artistic interest. The catalog is prefaced by a short statement of the principles that have guided this work of schoolroom decoration, and the method of selection of pictures. The hundred examples given were chosen with the advice of about 75 persons, including artists and members of religious and social organizations, and represent the results of a rigorous censorship, unavoidable in the case of a constituency "as varied in taste, moral and religious prejudices and art perceptions as that which state ownership of the pictures and the system made it necessary to consider."

B. G. TEUBNER, of Leipzig, and Carl Graes-

er & Co., of Vienna, have begun the publication of the *Centralblatt für Volksbildungswesen*, which is to be the organ for all those institutions, including the public libraries, that have for their aim the education of the masses. The editor is Dr. A. Lampa, of the Vienna University, who will be assisted by the principals of the institutions whose interests the journal aims to represent. The first issue, a double number, is dated Nov. 15, 1900, and contains among others an article on the organization of urban and suburban public libraries, by Dr. E. Reyer. The journal is to appear 12 times a year at 3 marks.

### LOCAL.

*Asbury Park (N. J.) P. L.* The new library building was dedicated on the evening of Jan. 15 with appropriate exercises. A large audience was present, and addresses were made by Secretary of State George Wurts, and F. P. Hill, of the Newark Free Public Library.

*Atlanta, Ga. Carnegie L.* The finance committee of the city council has awarded \$2000 to the Carnegie Library authorities for the purchase of books, in addition to the maintenance appropriation of \$5000.

*Atlantic City, N. J.* Petitions have been circulated requesting the city council to submit the question of establishing a free public library to popular vote at the spring election, and on Feb. 11 the council voted to grant the request.

*Baltimore. Enoch Pratt F. L.* The board of trustees of the Enoch Pratt Free Library, at the annual meeting in January, authorized the opening of the reading room of the central library on Sunday, from 2 to 7 p.m., beginning with the first Sunday in February. On Feb. 3 the experiment was tried for the first time in the history of the library, and it proved a great success. Nearly every seat in the reading room was occupied, and the great majority by persons who are unable to come to the library during the week.

*Bangor (Me.) P. L.* The librarian's annual report, submitted on Jan. 14, gives the following facts: Added 2052; total 48,186. Issued, home use 38,744; reading room use 31,981. Receipts \$6287.61; expenses \$5662.46. The building fund now amounts to \$15,172.50, in addition to which is held the bequest of \$18,347.26 left for this purpose by A. D. Manson, and a site, costing \$7500, presented by Nathan C. Ayer.

The previous subscription fee of \$1 per year was reduced on Jan. 14, 1901, to 25 cents, "which makes the library almost free to every one." On the first day of the new rates 253 cards were sold, and a rebate of 75 cents for each card purchased was made to all who had taken cards for 1901 previous to Jan. 14.

The matter of a new building was brought up at the January meeting of the city coun-

cil. It was decided to accept the offer of \$50,000 from the trustees of the Hersey estate in settlement of all claims held against them by the city, and to transfer this sum to the library trustees to be added to the building fund. It was also voted to appropriate \$1000 yearly for the support of the library, in view of the reduction of the library fees from \$1 to 25 cents per year. The matter of a library site was considered, and the city solicitor was asked to report on the city's right to condemn land for this purpose.

*Brooklyn (N. Y.) P. L.* On Jan. 1 the Free Lending Library of the Union for Christian Work, which has for years been one of the independent libraries of Brooklyn, was merged into the Brooklyn Public Library, as the Schermerhorn street branch. This transfer is the result of the recommendations made by the city authorities toward consolidation, and the appropriation of city money in one sum for maintenance of a central library system instead of in separate allotments, as previously. No changes in the library administration will be made, except to bring its methods into uniformity with the general system, and Miss Hull, for many years the efficient librarian, will remain in charge.

The library of the Union for Christian Work was one of the first free circulating libraries in Brooklyn. The society itself was organized in November, 1866, and incorporated in June, 1871. The library was started as a branch on Feb. 21, 1882, with about 7000 volumes, although for several years prior to that time a reading room and small library had been in use. In January, 1888, the library was removed to its present quarters at 67 and 69 Schermerhorn street, where it occupies the entire second floor of the handsome building of the society.

The present library contains about 46,000 volumes, and had a circulation in 1900 of 205,000 volumes among 30,000 readers. While the city formerly appropriated \$5000 annually to the maintenance of the library, this did not meet the expenses, the difference being made up by subscriptions from those associated with the Union for Christian Work.

On Feb. 1 Mayor Van Wyck announced the appointment of directors of the Brooklyn Public Library for three-year terms, as follows: R. Ross Appleton, 146 Joralemon street; Cyrus B. Davenport, 15 Monroe place, in place of Arnold W. Catlin; Frederick C. Cocheu, Seventy-fifth street and Fort Hamilton avenue, in place of F. W. Coler; Herbert F. Gunnison, Washington and Johnson streets; Robert F. Cunningham, 513 Madison street; Thomas P. Peters, 24 Broadway; Daniel M. Somers, 105 Halsey street; Charles H. Fletcher, 143 Lincoln place, in place of Alfred C. Barnes, resigned, and for the unexpired portion of his term ending Feb. 1, 1902.

*Chattanooga, Tenn.* In his annual message, made public on Jan. 15, Mayor Wassman re-

fers with appreciation to Mr. Carnegie's offer of \$50,000 for a library building, and says: "I recommend that the board take such action as in its judgment will secure to the city the benefit of such donation. I do not know that I would favor a permanent expenditure of \$5000 per year, for the maintenance of such library, and I do not understand that this is demanded as a pre-requisite to securing the donation. I do, however, favor the expenditure of \$5000 for the first year, and annually thereafter make such appropriation as may be necessary for the proper maintenance and support of the library."

At a meeting of the chamber of commerce, held on Jan. 24, a motion was unanimously adopted, asking the city council to make the necessary appropriation to secure Mr. Carnegie's gift.

To permit the city to make the required appropriation a bill was promptly introduced into the state legislature, where its passage is practically assured. It is general in its terms, providing that cities of from 30,000 to 60,000 population may levy a tax of 5 cents on each \$100 of assessable values for library purposes.

*Connecticut State L., Hartford.* The report of State Librarian Godard, as submitted to Governor Lounsbury, is noted in the local press. It records accessions of about 2000 v. since October, 1899, but states that no figures can be given as to the number of books and pamphlets contained in the library. "The fact that they are stored in four different rooms, often with two or more rows upon a shelf, or in heaps, and the fact that no accession numbers have been maintained, makes even an estimate unsatisfactory." Mr. Godard has undertaken the preparation of a card catalog, and proposes also to issue a quarterly bulletin of additions and special items. The installation of new shelving is recommended.

*Crete, Neb.* The offer of T. H. Miller to give \$10,000 for a public library building, provided the city furnish a site, was formally accepted by the city on Jan. 12. The site will be paid for by public subscription.

*Dallas (Tex.) P. L.* The cornerstone of the Carnegie library building was laid on the afternoon of Jan. 16, with Masonic ceremonies.

*Denver (Colo.) P. L.* The librarian's report for 1900, presented on Jan. 14, is summarized as showing additions of 4520, and a total of 77,000. The circulation is given as 685,937, of which 61.6 per cent. were adult fiction, and 21.2 per cent. were juvenile fiction. Receipts and expenditures were \$38,080.81.

It is stated that the gain in circulation, since consolidation with the former public library, is 153 per cent., while the use of books in the library is two-fold greater than in 1899.

*Des Moines (Ia.) P. L.* The Des Moines Library has recently passed through a period of "storm and stress" regarding its internal administration, that seems to have resulted usefully for the principles of civil service. The conflict arose with the expiration of the term of the librarian, Miss Ella McLoney, at the close of the year, when a strong effort against her re-election was made by a faction of the board led by the president, A. P. Fleming, in favor of two local applicants, neither of whom possessed library training or experience. This effort was defeated, and Miss McLoney was re-elected at the annual meeting, but with a reduction of salary from \$1200 to \$1000. The meeting, which was held in public in the library, was attended by a special delegation of women and taxpayers, who made strong appeals for the present librarian, and condemned the introduction of personal influence into the library service. One of the women speakers said: "I do not understand why politics should enter into the deliberation of this board or why personal friendships should count in the selection of a person for this place. I assure you I know Miss McLoney only as I have met her in this library, but I have seen enough of her and of her work and hear enough of it to appreciate her capabilities and her value to this city in her present position, and in saying this I want it understood that I am talking against a near and dear friend who is a candidate for this place, and because I believe that competency and experience should be rewarded. The question should not be viewed from the standpoint of personal friendships. We should look to the good of the library and the good of the city at large."

Another citizen explained that he had come to the library for another purpose, and had learned upon his arrival there of the effort to depose Miss McLoney. He said: "I cannot believe that it is a purpose seriously entertained by members of this board to depose a woman as worthy as Miss McLoney to make a place for some one wholly without experience. I have no personal acquaintance with Miss McLoney only as I have met her here, but I know from those meetings and from what I have heard of her competency, and want to say that I believe as a citizen and a patron of the library, that I have the right of all good citizens to protest against this action and the deposing of an experienced librarian to make a place for persons without special training for the place."

As a result of the feeling evinced, the re-election of the librarian was secured, the chief candidate for her place, Miss E. K. Matthews, being elected first assistant, the former first and second assistants being reduced to second and third assistants. This action of the board met with general protest through the press, the Des Moines *Leader* printing an editorial with the caption "For Shame!" which cited the library regulations

providing that all assistants shall submit to a written examination and be appointed by recommendation of the librarian, and continued: "The library board yesterday elected as first assistant librarian one who had complied with no detail of the above rules; who had made no application on a printed form and whose application was not on file; who had submitted to no examination, and who had not been recommended by the librarian, or by the committee on administration, and who, moreover, has had no experience in city library work. The majority of the library board trampled on the rules of its own making, and struck a blow at the efficiency and discipline of the library, the result of which cannot be other than ill." It called upon the board to observe "fair play" and to rescind its action, in respect to "the rights of the assistants already in the library, as well as the rights of the public, which pays for and sustains the library."

The matter was finally settled on Jan. 1 by the declination of Miss Matthews to accept the position of first assistant, and the restoration of the library force to its original status. It was explained that Miss Matthews had not understood the exact state of affairs, and that she was unwilling to accept a position that would place her over the heads of library employes of long years of meritorious service, who had earned and deserved promotion.

*Detroit (Mich.) P. L.* The matter of a new library building has been receiving consideration from the library and city authorities. At a meeting of the heads of the city government with the library commission on Jan. 14, the general feeling seemed to be unanimous as to the necessity of a building. It is suggested that an enabling act should be passed by the legislature to allow the library board and the school board to condemn property for this purpose. It was also thought that bonds to the amount of \$750,000 might be issued by the city to provide a building fund.

*Gardner, Mass. Levi Heywood Memorial L.* Library reports for the year ending Dec. 31, 1900, were submitted at the board meeting on Jan. 14, and are printed in the local press. The statistics were as follows: Added 450; total 8524. Issued, home use 23,290 (fict. 75%), showing a decrease of 801 from the figures of the year preceding. New subscribers 234. Receipts \$3252.47; expenses \$2056.80. "While the circulation has been steadily increasing during the last 10 years, the increase during the past five years has been much slower than for the preceding five. Unless there should be a decided increase in the population of the town, the gain in circulation in the future will probably continue to be slow."

During the year what is mentioned as "a branch library on a small scale" was maintained at one of the schools through the efforts of one teacher, who drew extra books

for her pupils' use and made herself responsible for their return. In the three months of the fall term 62 v. were drawn in this way, of which the home circulation was 430. "The success of her experiment goes to show that the children are glad of good reading, if they can get it readily," and it is suggested that this field of reaching children through the schools should be more fully developed. The librarian strongly recommends that the present age limit of 12 years be abolished, but her suggestion, so fully in line with the best modern practice, is not fully approved by the trustees. The latter, while "inclined to think that the age limit might safely be reduced from 12 to 10, or perhaps 9 years," are not willing to go farther, fearing misbehavior or injury to books by the children.

*Haverhill (Mass.) P. L.* The fact that at the close of the year 1900 the library completed its first quarter century has brought out some historical and comparative statistics in the local press. The library opened with about 20,000 and circulated 78,757 during its first year; it now contains about 65,000 v. and the circulation for 1900 was 146,840. The total circulation for the period is given as 1,822,003. Comparing the circulation for 1900 with the population, given at the last census of June, 1900, as 37,175, Mr. Moulton writes: "Comparing Haverhill with the principal cities in Massachusetts, this makes us 12th in population among cities, and among the public libraries sixth in size and eighth in circulation. The libraries ahead of us in size are Boston 746,383 vols.; Worcester 125,496; Springfield 115,091; New Bedford 72,508; Forbes 69,515; and in circulation Boston 1,251,541 vols.; Somerville 215,448; Worcester 196,485; Cambridge 175,026; Newton 170,006; Springfield 164,091; and Fall River 159,745. These figures are taken from the latest printed reports of the libraries."

Various changes in the library have been made since Mr. Moulton's appointment as librarian in October, 1899. These include removal of the age limit, development of the school delivery system begun in 1894, improvement of reference room facilities, display of art exhibits, installation of open shelves for new books, and the establishment of a children's room.

*Illinois, State library commission.* The bill providing for a state library commission, in which the state library association has been actively interested, has been re-introduced in the state legislature. The association, through its president, Mr. Willcox, has issued a circular urging the necessity of the measure, and it is hoped that the efforts in its behalf may prove successful.

*Indiana State L., Indianapolis.* (23d rpt. — two years ending Oct. 31, 1900.) This is an interesting and useful report in several fields. It contains in addition to the concise report of the state library a full subject catalog of

the government documents contained in the library, covering 326 pages, and the first biennial report of the state library commission, covering 99 pages, both of which are noted elsewhere. The report gives no statistics of accessions, total number of volumes, or of any other detail of the work of the period except a financial statement and an author list of additions. It is mainly a review of general policy and development, with recommendations of further improvements desired.

Mr. Henry refers to the enactments made by the last General Assembly, in accord with his recommendations, for improving details of library service. These included provision for binding the "Documentary journal" in several volumes of about 1000 volumes each, thus preventing the previous great unwieldiness, and the stamping of the table of contents upon the back of each volume; and the assignment to the state librarian of 150 copies of every state publication except court reports, with provision for their distribution by the librarian to all public and institutional libraries within the state. The two latter enactments have been of great importance, as previous to their passage "it had been quite impossible for any state office to secure a complete set of our publications for any years." It is added: "Not only have the centers to which these publications go increased, but the number of documents sent out has multiplied many times. Under the old law we distributed three documents in two years, while under the new law since Jan. 11, 1900, we have distributed 83 publications." Further recommendations are made, including a request for increased funds for book purchases, the revision and simplification of existing library laws, the need of an appropriation for collecting Indiana historical material, and the advisability of permitting books to be loaned to citizens at a distance from the capital, provided proper guarantee is assured.

Directions in which progress has been made are in cataloging, through the completion of a dictionary card catalog of U. S. public documents, and the preparation of a card index to the "Documentary journal," both of which are printed as part of the report (*see p. 90*); and work toward an index to state history as reported in Indiana newspapers and like material.

The "clearing house" scheme, for the utilization of duplicates among the libraries of the state, inaugurated about two years ago, has not met with general response. Among the few libraries represented in it, however, the success has been so great that all others are urged to join in the system. "From the libraries so far co-operating we have received more than 3000 numbers of standard magazines, besides many books, pamphlets, and reports. From the standard magazines received we have distributed more than 600 numbers to the co-operating libraries to complete broken files."

*Jersey City (N. J.) P. L.* The fine new building of the Jersey City Public Library was opened to the public and formally transferred to the city on Jan. 14. The transfer was made with appropriate exercises in the evening in the presence of a large audience. The presentation address was made by Dr. Leonard J. Gordon, president of the board of trustees, and a short speech of acceptance was made by Mayor Hoos. The greater part of the evening was given to the inspection of the building, a bevy of the young women attendants acting as guides and informants. A feature of the occasion was the presentation to Dr. Gordon by the mayor of a handsome gavel in recognition of the devotion and energy given by the former to the interests and development of the library.

The process of removal of the books to the new building occupied but five days, and at the end of that time the 70,000 volumes were completely installed in the new stack.

*Leavenworth (Kan.) P. L.* The librarian's report for 1900, as summarized in the local press, gives accessions of 611 for the period, with a total of 2816; 14 books and about 50 magazines are recorded as missing. The circulation was 23,989, of which 15,818 was fiction. Receipts \$3658.69; expenses \$1194.50, leaving a library fund of \$2464.19.

*Maine State L., Augusta.* The report of L. D. Carver, state librarian, is noted in the press. It covers a period of two years, during which time 6291 books and pamphlets have been added; there has also been purchased 2100 v. for the travelling library department. This department has proved a success beyond all expectations. From the 40 libraries in use during six months there has been a circulation of 9000 volumes. It is suggested that the work undertaken by this department might be supplemented through a state library association. "This association should include the state library and every free library in the state, together with such other libraries and institutions as may desire to unite with them. The purpose of such association should be to promote the use of books by exchanging or loaning for a definite time books found in one library and needed for temporary use by patrons of another library—the borrowing library or association becoming fully responsible for the proper usage and safe return of the books or manuscripts loaned."

On behalf of the state library commission it is recommended that the fee for use of travelling libraries be reduced from \$5 to \$2.50, and that the laws of 1897 be amended "to authorize small towns to raise and appropriate money for the purpose of securing the free use of a library, located in an adjoining town or city, and to enable two or more adjacent towns to unite in establishing a free library with branches in each town."

During the past two years free libraries

have been established at Mechanic Falls, Thomaston, Readfield, Monmouth, Clinton, Newport, Houlton, Oakland, Scarborough, and Southport. The total number in the state is now 72.

*Middletown, N. Y. Thrall L.* The fine library building erected for Middletown from the bequest of the late Mrs. S. Marietta Thrall was formally presented to the city on Jan. 4. Its total cost amounted to \$31,300. The building was presented to the mayor in a short speech by John W. Slauson, of the building committee, and the address of the evening was delivered by Hon. William Van Amee, of Middletown.

*Nebraska, Library commission for.* A bill for a state library commission, prepared under the auspices of the state library association, is pending in the legislature. It is modelled upon the commissions created for Iowa, Wisconsin, and other states, and includes provision for a system of travelling libraries.

*New Britain (Ct.) Institute L.* The handsome new library building of the New Britain Institute was dedicated on the afternoon of Jan. 19. The building has been about two years in course of construction, and its total cost, including site, reached \$104,000. This was defrayed from the building fund, which was created by careful investment of a yearly amount set aside for the purpose. The resources of the institute are largely derived from legacies amounting to \$163,000, bequeathed to it by the late C. B. Erwin. After the erection of its building, there are still left permanent funds amounting to about \$101,000, the income of which is available for the uses of the institute. It is pointed out by the directors that "under the new conditions the maintenance of the library in the expense of lighting, heating, and janitor work will be very largely increased. In addition to the maintenance of the building, there will also need to be an increase in the library force, so that the income will be nearly all required to pay the operating expenses. It is to be hoped that the city and town will see their way clear to make a liberal appropriation, so that the institute may enlarge its usefulness by being able to purchase annually a reasonable amount of books for the free use of the public, for whose benefit the institute and library has been established."

The new building has a present book capacity of 75,000 v., or nearly four times the present number of volumes, with provision for extension to a capacity of 100,000 v. It is an imposing structure, classic in general outlines, built of buff brick, with granite base and black slate roof. On the first floor is the main reading room, 35 x 40 feet, the general reference room, 14 x 25, a patents room, children's room and delivery room, each 14 x 16, and a librarian's office 12 x 12. There is also

a cataloging room and work room. The second floor is mainly devoted to an assembly hall, 32 x 50, with accommodations for 200 persons; there are also a directors' room, art room and historical room. The basement is given to a newspaper room, and the usual storage, janitor's and toilet accommodations. The stack building is a separate fireproof structure, 35 x 42 in dimensions. It was equipped by the Library Bureau, and contains three floors, with provision for a fourth if required. Each floor gives shelving for 25,000 volumes.

*New Hampshire State L., Concord.* (Rpt. — two years ending May 31, 1900.) A most interesting and suggestive report, covering not only the record of two years' work, but touching upon broad plans for the future. The chief statistics are as follows: Added 13,249; total 62,059. In addition unbound volumes are given as 31,794, and periodicals as 11,671. The library expenses for 1898-99 were \$17,424.80; for 1899-1900 \$17,203.92. The present state of the various departments — law, historical, medical, religious, etc. — is briefly noted. During the period the subject-author card catalog was completed, containing in all about 87,000 cards. Work upon a printed catalog was at once begun. "In connection with the card catalog, there has been prepared a classed subject-list of all books in the library belonging bibliographically to New Hampshire. The idea in preparing this list has been to furnish a foundation for a complete printed bibliography of the state." This is regarded as of great importance, and a legislative appropriation for the purpose is recommended.

Mr. Chase touches at some length upon the relations that should exist between the state library and the libraries and citizens of the state, emphasizing the function of the state library as a center of public influence and service. The development of the state collection to be a depository of all books not found in public libraries, and the necessity of a freedom of use that will make such books accessible to all citizens are points of special importance; and it is pointed out that "the state library is already making rapid progress" along these lines, both in purchases and in the plan of loaning books through the public libraries of the state. The trustees also emphasize the need of a broad conception of the library's function and touch upon the development in this direction that the future is likely to show.

*New Orleans, La.* The opening address of the winter session of the Round Table Club, of New Orleans, was delivered by William Beer, librarian of the Howard Memorial and Fisk Free Libraries on "The 20th century library."

*New York City.* Webster F. C. L. (Rpt.; in 9th rpt. East Side House, Jan. 1, 1901.)

Added "over 1600"; total 10,840. Issued, home use "over 91,000"; total registration 13,380. An interesting and suggestive report, showing high standards and varied methods for reaching a constituency that sadly needs the help the settlement can give it.

The circulation shows a gain of 20,000, but circulation alone "is not the chief work of the library." "More care than ever has systematically been taken to suit the right books to the right people. Special shelves have been set apart for special sets of people, and much time and thought have been devoted to the making and using of lists of books for particular purposes. The aim is to so systematize the work that special attention may be given to a very large number of people." An additional room has been added to the library's quarters, and two new members have been added to the staff, which now numbers five librarians and three boys. One room is mainly given up to co-operative work with the schools. "Here are the special shelves and cases of books which have been selected for certain of the children. Here are the collections of various kinds, of minerals, of curious books, of anatomical models, of historical relics, and of the many things gathered together to show in a practical manner something of the life, the manners and customs of those countries which these children are obliged to study." Numerous exhibits illustrating countries and other subjects were held through the year, and teachers bear witness to the helpfulness of the work. Of the 617 teachers of the neighborhood 276 use the library, and 129 are systematic borrowers of books and influence their pupils in the same direction. "Indeed, not less than 2300 boys and girls have come to the library for books within 12 months, upon the recommendation of their teachers. Nearly 50 per cent. of the teachers use this library in some way." Relations with churches, clubs, and other centers of educational influence have been developed as far as possible. "A fruitful work is that of getting technical books for boys which bear upon their specialties and which help them to become better workmen." The Bohemian department has been always especially appreciated, and during the year its circulation reached 2593 volumes. "Many of the Bohemians, cigar makers, pearl button workmen, bakers, etc., have read every book in the little collection." It is urged that this department should be at least doubled. Mr. Gaillard adds: "Each line of work now planned should be permanent and should receive its full share of attention. Every bit of work and every cent of money spent in this work of education and cultivation shows a direct return."

*New York P. L. — Astor, Lenox, and Tilden Foundations.* The city Board of Estimate, at its meeting on Jan. 30, took action on the new library building in course of construction

in Bryant park. A report was received from Comptroller Coler recommending that corporate stock to the amount of \$2,850,000 be issued for the building of the library. The city has already decided to spend \$40,000 for the building of vaults and \$500,000 for the removal of the old reservoir, which will bring the total cost of the library up to \$3,390,000. The appropriation was unanimously authorized. The question as to whether the library should be built of marble or sandstone was raised, and Mayor Van Wyck expressed himself as strongly in favor of "appropriating a little more in order to have the library built of marble. It should be a lasting monument to the city."

An exhibition of old documents relating to the history of the city was opened to the public in the Lenox Library on Jan. 21. The exhibit is mainly made up of material from the library's collection, but a number of early deeds and other manuscripts have also been lent for the purpose by private owners. The two exhibits which attract most general attention are the original parchments of the Dongan and Montgomerie charters of the "Province of New-York," dated respectively 1686 and 1731. These two parchments are the property of the city government. The exhibit is arranged by periods and is displayed in glass showcases.

A bill was introduced into the state legislature on Feb. 13, permitting the library corporations in the city of New York to convey their property to the New York Public Library. Two-thirds of the members of other library corporations must consent to such amalgamation. The Regents of the state are authorized to accept a surrender of such library corporation charters and discharge the directors thereof from their trusts.

*Ottumwa, Ia.* The conditions upon which Mr. Carnegie's library offer of \$50,000 was made last year have been fulfilled by the decision that the city shall appropriate \$5000 annually for library maintenance. The provision of a site for the building is also agreed upon, and on Jan. 7 Mr. Carnegie instructed the library board to draw upon him at its convenience. The selection of plans will be promptly undertaken, and it is hoped to have the building under way early in the spring.

*North Adams (Mass.) P. L.* Mr. William Arthur Gallup, who gave the equipment for the children's room, recently fitted up, has been elected trustee for three years in the place left vacant by the death of Mr. Robinson.

In his recent inaugural address the mayor of North Adams paid an interesting tribute to the usefulness of the library. He said: "This institution was never more appreciated by our people than at the present time, and never under better management or doing better work. The number of books taken from the library the past year was 72,962, an increase of 7000 over any previous year and the largest during the existence of the library.

The number of readers the past year was 59,111. The number of books in the library is now 17,942, 1475 having been added the past year. The library now touches all classes of our people, from the man who leaves his pickaxe at the door while he goes in to read, to the professional man looking up some subject of study."

*Portland (Ore.) P. L.* The library was opened for the free circulation of books on Jan. 7.

*Raleigh, N. C. Olivia Raney Memorial L.* The Olivia Raney Memorial Library, given to the city of Raleigh by Richard Beverley Raney as a memorial to his wife, was opened to the public on the evening of Jan. 24, when dedication services were held in the presence of a large audience. Mr. Raney, the giver, was unable to be present, owing to illness. The chief address was by Rev. M. M. Marshall, rector of Christ Church, who spoke of the life and character of Mrs. Raney, in whose memory the library was established, and of the equipment and purpose of the institution. At the close of the exercises the library building was inspected throughout by the guests.

The building is centrally placed on a site overlooking the capitol grounds. It is 45 x 91 feet, three storied, with a basement, and built of cream-colored brick, with red tile roof. The entrance is by a brownstone portico, of the Corinthian-Doric order. On the first floor are two stores, the rent from which will be used for library maintenance, a trustees' room, and the rooms of the librarian, who will reside in the building. The second floor is devoted to the library quarters, with an open access book room and reading room combined, 62 x 42 feet, a men's smoking-room, ladies' reception room, and librarian's office. The third floor contains a music hall, which will be rented for approved purposes, and thus provide another source of income.

The library contains 5000 volumes, mainly based on the "A. L. A. catalog"; it has been cataloged and organized under the direction of Miss Jane H. Abbott, of Lincoln, Neb. The librarian is Miss Jennie H. Coffin, for many years a friend of Mrs. Raney, and the assistant librarian is Miss Theodora Marshall. It is estimated that the rental of the building will give an income of about \$1500 a year; to this Mr. Raney will contribute as much in addition as may be required, and it was suggested at the dedication exercises that some city support might also be secured if legal sanction could be obtained.

The regulations provide that the library shall be free for reference and home use to all white people of the city. It is understood to be the first free circulating library in North Carolina. It is open every week day from 10 a.m. to 10 p.m.

*St. Louis (Mo.) P. L.* At the board meeting held on Jan. 13, the librarian's report for

the year 1900 was submitted. The press summary gives the year's accessions as 10,000 v., with a total of 145,000; and the total issue of books and periodicals as 982,540 v., of which 700,000 were for home use. In various public schools and Sunday-schools the library has placed collections of books numbering from 50 to 300 volumes, books are delivered at stations throughout the city and one branch has been established. A Polish branch has also been opened. The purchase of six more sets of supplementary reading for the public schools has been authorized by the book committee, duplicating sets which have proved most popular, and raising the total to over 275 sets.

*Seattle (Wash.) P. L.* The offer of Mr. Carnegie to give \$200,000 for a library building to replace the structure destroyed by fire on Jan. 2 has been a subject of great local interest and appreciation. The offer was accepted by the city council on Jan. 6. At a special meeting of the Chamber of Commerce on Jan. 7 resolutions of thanks were passed, and the press seems absolutely unanimous in its appreciation and approval of the offer. Immediately after the destruction of the old building the following telegram was sent to Mr. Carnegie on behalf of the library and the city: "Seattle Public Library and its building totally destroyed by fire this morning. City authorities willing to purchase site and guarantee \$50,000 annually for maintenance. Can you give Seattle a library building?" An answer was received stating that it was presumed that the expression "\$50,000 a year" was "an error in transmission. Later telegrams made clear that the city was fully prepared to guarantee that amount yearly, and finally Mr. Carnegie telegraphed: "I like your pluck offering \$50,000 yearly for library purposes. You may build up to cost \$200,000, which I shall provide as needed. Be sure to have spare grounds about building for additions, which Seattle's brilliant future will surely require."

The work of building up a new collection of books has been promptly undertaken by Librarian C. W. Smith. An additional appropriation of \$5000 has been asked from the city council, and it is intended to make purchases in lots that can be expeditiously handled. Arrangements have also been made for the rental of a part of the old building of the University of Seattle as temporary quarters for the library during its process of reorganization.

*Scranton (Pa.) P. L.* (10th rpt., 1900.) Added 2545; total 37,924. Issued, home use 110,007 (fict., incl. juv. fict., 73.18%); lib. use 4626. New registration 2034; total cards in force 7676. Receipts \$13,001.25; expenses \$11,543.38.

The circulation showed a decrease, as in the two years preceding, which is partly attributed to local epidemics of disease. "Judg-

ing from the increased number of registrations and some other indications, it is believed the coming year will show a steady upward tendency." The working force of the library was somewhat reduced during the year, and although expenditures were thus kept within appropriation limits some important matters of detail was necessarily blocked and extra labor was entailed upon the staff. The trustees make a strong appeal for an increase of the yearly appropriation to \$15,000, and deprecate "the unwise enforcement of a fierce economy whereby the library is rendered unable to meet the wants of the public."

*University of California, Berkeley.* (Rpt. —two years ending June 30, 1900; in President's rpt., 1898-1900, p. 85.) The report is submitted by Assistant Librarian J. D. Layman, in the absence of the librarian, J. C. Rowell. It records additions of 8246 v., of which 3988 were purchases, giving a total of 80,224 cataloged books. "The loss of books continues. In two years 388 have disappeared and 88 reappeared, leaving a net loss of 300. This is almost as great as the total previous net loss of 342 reported on Oct. 5, 1898."

Mr. Layman makes several recommendations: that the library rules be modified to give greater privileges to students as they advance, *i. e.*, permitting the issue of one book at a time to a freshman, two books to a sophomore, three books to a junior, four to a senior, and five to a graduate student; that appropriations for repairs to the library should be available promptly on the closing of the college; that the appropriation made to the librarian for purchase of books should equal or exceed that made to the head of any other department; that access to the stack be restricted, as soon as additional assistants can be arranged for; that the periodical list be increased.

The absence of Mr. Rowell on eight months' leave of absence, and the resignation of reference librarian C. K. Jones to join the staff of the Library of Congress, are noted, with the comment that "in our library, with our limited number of assistants, with our open shelf system, with the unchecked selfishness of certain borrowers, and with no elevators, the librarian and assistants run great risks of mental and physical collapse."

*University of Michigan L., Ann Arbor.* (Rpt. — Oct. 1, 1899-June 30, 1900.) Added 12,256, of which 9595 were accessions to the general library; total 145,460, of which 114,874 are in the general library. Appropriation for book purchases \$15,000. Recorded circulation 152,956, of which 8500 were drawn for home use by professors. This is an increase of five per cent. over the year 1898-1899, but represents only about one-half the recorded use of the library. Additions to the book room have given much better facilities

for the arrangement of the books, previously greatly crowded.

Mr. Davis refers to the loss of seven volumes during the year. He adds: "In my reports for 1894 and 1895 the following volumes were reported as lost; viz.: Carlyle's "Critical and miscellaneous essays," 4 vols.; Emerson's works, 6 vols.; and some others that it is not necessary for my purpose that I should name now.

"Last fall I received the following brief note:

COVINGTON, KENTUCKY, Nov. 2, 1899.

*Librarian, U. M.*

To-day expressed books prepaid for which am indebted.  
L. M. WHITE.

"The books arrived and proved to be those named above, and which had been reported lost in the years 1894 and 1895, with the addition of four others that we had not missed, and one volume that had never belonged to us. In most cases the title-page on which the library stamp is placed had been torn out, and efforts had been made to erase all of our marks of ownership." Efforts to trace the identity of the sender were unsuccessful, but "by whatever pressure the so-called Mr. White was moved to return the books he had succeeded in purloining, we are glad he did so, and wish that some pressure might be operative to prevent the abstraction of books."

*Van Wert, O. Brumback P. L.* The handsome library given to Van Wert, the county seat of Van Wert county, for the use of residents of the city and county, by the family of the late John S. Brumback, was dedicated on Jan. 1, 1901. The library was founded by Mr. Brumback, and his heirs carried out his intentions in completing it and transferring it to the county. The building, which cost about \$50,000, is situated in an attractive park and is a handsome graystone structure in the Gothic style. A writer in the *Dial*, Jan. 16, speaks of the interest of this library in its character of a county institution. He says:

"Most of the cities and many of the larger towns and villages of our country have their public libraries; it remained for this Ohio county to inaugurate a movement that may eventually bring library privileges where they are most needed, viz., to the rural districts.

"The library is named the Brumback Library, in honor of its founder, the late J. S. Brumback, a prominent and wealthy citizen. A special law made possible by the Brumback heirs was passed by the Ohio legislature, providing for the maintenance of the library by the county, and this was almost unanimously favored and approved by the people throughout the county concerned. The library building has a capacity of 100,000 volumes, represents a value of \$50,000, and under the new decennial appraisalment will have an annual income of \$8000.

"Two thoughts which were especially emphasized in the dedicatory exercises may be worth repeating here: First, we have in the bequest of a county library one of the few

philanthropies that tend to benefit all the people—country as well as town. Our philanthropy has heretofore directed its efforts chiefly to the elevation of the city or town only. Second, the recent census, which shows how great during the past decade has been the migration from county to city, is an appeal to American citizenship to look in the future more to the welfare and enlightenment of our great rural population, the bone and sinew of our national life."

#### FOREIGN.

*Bibliothèque Mazarine, Paris.* The authorities of the Bibliothèque Mazarine are making a special effort to complete the extensive series of "Mazarinades" which they already possess. The set of those which were printed in Paris is almost complete, and an appeal is now made for copies of such pamphlets against the great cardinal as appeared in various small towns and cities of the provinces. From 1648 to 1652 the stream of "Mazarinades" in France, as of Civil War tracts in England, was in full tide, and a complete bibliography would form a work of great interest to a student of the period. — *Athenaeum*, Jan. 19.

*Lindsay (Ontario, Can.) P. L.* (Rpt.—year ending Dec. 31, 1900.) Added by purchase 266, at a cost of \$264.72; by gifts 79; total 3366. Issued 16,823. "There has been a decided increase in the departments of history, biography, voyages, science and fiction, and a falling off in general literature, miscellaneous, and poetry. The proportion of fiction circulation to non-fiction is about 2 to 1." The present total membership is 989. Receipts and expenses for the year were \$1113.77. "Much larger quarters are necessary, if the library is to develop as it should." Efforts were made during the year to secure rooms in the town building, but without results.

*Montreal, Can.* The matter of establishing a public library was considered at a meeting of the finance committee of the city council on Jan. 15. Two suggestions were presented—that the Chateau de Ramezay collection be made a nucleus of a public library and given city support; or that such a library be created by amalgamation of existing libraries, including those of Fraser Institute, the Historical Society, Mechanics' Institute, Chateau de Ramezay, Fine Arts Association, and the Museum of National History. It was suggested that a committee be appointed to report on the possibilities of either of these plans; but no action by the city authorities was recommended.

*Worcester (Eng.) Cathedral L.* FLOYER.

J. K. A thousand years of a cathedral library. (*In The Reliquary*, January, 1901. 7:11-26) il.

An interesting account of the formation of

the Worcester Cathedral Library. The first record of the library is the presentation of a book by King Offa in A.D. 780. In 1464 there was a regular endowment for the acquisition of books. By its rules the library was to be open every day two hours before and two hours after nine "to any person wishing to consult it for the sake of erudition." Another rule of this period provided that "if any book were missing through neglect of the keeper, he was to pay the value of it within a month, or forfeit 40 shillings above its value, one half to the bishop and the other half to the sacrist, the latter having power to retain the librarian's salary till another book was purchased and the fine paid." In 1660 the librarian was deprived of his salary, and it was only restored to him after 10 years, when he was ordered to make an exact survey of the books on the first Monday of every month. "In 1680 it was ordered that fees to be paid by every official and servant on the Cathedral foundation at their installation or appointment should go to the support of the library." In 1683 the burial fees for interment in the cathedral were applied to the use of the library, and in the following year the fees for the setting up of monuments in the cathedral were applied to the same end. In 1685 the fines of the dean and prebendaries for every week of non-residence during their appointed times and the fees for burial in the cloisters were added. Five years later a new burial ground was laid out on the north side of the cathedral church, and half the burial fees were to go to the use of the library. "More than five hundred years ago the library had an embryo 'accession book'; for a rule provided that an inventory of books be kept, specifying the value of each, and any new book added to the stock was to be immediately chained, and entered by its true title in the inventory, and on the first visit of the bishop to be certified to him by the sacrist or keeper, and inserted also in the bishop's inventory."

### Practical Notes.

**AUXILIARY BOOK-GUIDE.** (Described in *Official Gazette of the U. S. Patent Office*, Jan. 8, 1901, 94:334) il.

A device for inserting index reference slips between the leaves of a book.

**BOOK-OPEN-HOLDING DEVICE.** (Described in *Official Gazette of the U. S. Patent Office*, Jan. 29, 1901, 94:887.)

The device is a single piece of wire adapted to hold open a book.

**BOOK-SIGNATURE GATHERER.** (Described in *Official Gazette of the U. S. Patent Office*, Jan. 8, 1901, 94:385) il.

### Gifts and Bequests.

*Ashland, Wis. Vaughn L.* By the will of the late Mrs. Vaughn-Marquis, the Vaughn Library, valued at \$60,000 is left to the city of Ashland.

*Aurora (Ill.) P. L.* On Jan. 18 it was announced that Andrew Carnegie would give \$50,000 for a public library building, provided the city furnish a site and guarantee a maintenance fund of \$6000 a year. As the library already has an excellent site, and the income from the present library tax is \$6000 a year, all the requirements of Mr. Carnegie were fulfilled in advance, and there will probably be no delay in carrying out his intentions.

*Conneaut, O.* It was announced on Jan. 14 that Andrew Carnegie had offered to establish a \$100,000 public library in Conneaut. The city is to be the headquarters of the projected new tube works of the Carnegie Company. The usual conditions, that the city provide a site and guarantee maintenance, are imposed.

*Derby, Ct.* On Jan. 30 it was announced that Col. and Mrs. H. Holton Wood, of Boston, had offered to present to the town a fully equipped public library building. The only condition to the gift was that the city should agree to maintain the library, and that \$5000 be raised for a book fund, to which sum the donors would add an equal amount. A site for the building has already been purchased by Col. and Mrs. Wood, and plans are now being prepared. The city authorities have shown cordial appreciation of the gift, and have appropriated \$2000 toward the book fund.

*Dubuque (Ia.) P. L.* On Jan. 8 F. D. Stout, of Dubuque, offered to provide a suitable site for the library building offered by Andrew Carnegie. The site is given by Mr. Stout in memory of his father. It is well situated, and valued at about \$17,000. The gift was promptly accepted by the library trustees.

*Goshen, Ind.* On Jan. 18 Andrew Carnegie offered to give \$15,000 for a public library building, provided the city furnish a site and guarantee a yearly maintenance fund, the amount of which is not stated. It is stated that Goshen is the first city of less than 15,000 population that has received a Carnegie library gift.

*Grand Junction, Colo.* On Jan. 24 it was announced that Andrew Carnegie had offered to increase his gift for a library building from \$5000 to \$8000. It is hoped that the building may be completed by April.

*Greenwich (Ct.) P. L.* The Greenwich reading room and library, which was provided with a home some years ago by Mrs. A. A. Anderson, of New York, has been endowed with \$25,000 contributed by wealthy New Yorkers.

*Hinsdale (Mass.) P. L.* By the will of John W. Curtice, of Washington, D. C., for many years a resident merchant in Hinsdale, Mass., the public library of that town will receive \$5000, to be known as the "Curtice fund," the income to be used for the purchase of books.

*Iowa Falls, Ia.* E. S. Ellsworth, of Iowa Falls, has offered to erect for that city a fine public library building, provided the city will furnish a suitable site.

*Lewiston, Me.* On Jan. 19 Andrew Carnegie offered to give \$30,000 for a public library building, provided the city furnish a site and appropriate \$3000 annually for maintenance. At a special meeting of the city government on Jan. 28 it was unanimously decided to accept the offer, and a resolution was passed providing for selection and acceptance of a site and for appropriation of \$5000 for library maintenance. This increase in the maintenance fund will, by the terms of Mr. Carnegie's offer, result in the gift from him of \$50,000 instead of the \$30,000 first contemplated.

*Malden (Mass.) P. L.* The library trustees have received from Hon. Elisha D. Converse, of Malden, a gift of \$125,000, to be known as the Elisha and Mary D. Converse Endowment Fund. The handsome library building, which cost \$125,000, was presented to the city a few years ago as a memorial to his oldest son. In referring to the library in his recent inaugural address Mayor Dean said: "A peculiar feature of this gift, in which it differs from funds which are held by many institutions, is that it is given with conditions that will enable its income to be used freely in any direction in which it may conduce to the welfare of the library. There are no narrow restrictions which may leave some departments to languish while others are overfed. The broad intentions of the gift are worthy of the givers."

*Marquette (Mich.) P. L.* On Jan. 20 a gift of \$5000 was made toward a new library building by a friend whose identity has not been made public.

*Pekin (Ill.) P. L.* On Jan. 16 the library board accepted the gift of a site for the proposed Carnegie library building, made by George Herget, of Pekin. The selection of plans for a building will be promptly undertaken.

*Plymouth (Mass.) P. L.* On Jan. 19 it was announced that the heirs of the late William G. Russell, of Boston, had offered to erect a new library building to cost about \$20,000 as a memorial to their father and mother. A central site has already been selected.

*Providence (R. I.) P. L.* The library has received a gift of \$3000 from a friend whose

identity is not made public. It is to be invested, and the income devoted to the purchase of books.

*Seaboard Air Line travelling libraries, Norfolk, Va.* Andrew Carnegie has made another gift of \$1000 toward the system of travelling libraries conducted by the Seaboard Air Line under the charge of Mrs. E. B. Heard.

*Sioux Falls, S. D.* It was announced on Feb. 3 that Andrew Carnegie had offered to give \$25,000 for a public library building, provided the city furnish a site and appropriate \$2500 for maintenance.

*Syracuse (N. Y.) P. L.* On Jan. 17 Andrew Carnegie expressed his willingness to give \$200,000 to the city of Syracuse for a new library building, on condition that the city furnish a site and guarantee \$30,000 yearly for maintenance. Later the gift was raised to \$260,000. The offer was immediately accepted by the city authorities, and the matter of deciding upon a site, etc., have been already given consideration. The yearly appropriation is but little in excess of the present sum given to the library's maintenance. The library trustees have recommended the use of the present site, with purchase of additional land adjoining.

*Upper Iowa University, Fayette.* On Jan. 16 it was announced that the university authorities had received from Andrew Carnegie a check for \$25,000. It will be devoted to library purposes—probably for a new building—although no direct stipulation as to its use was made.

*Windsor (Ct.) L. Assoc.* A gift of \$4000 toward the library building fund has been made by Miss Olivia Pierson; a further gift of \$1000 has also been offered by a friend whose name is not disclosed.

*Windsor (Vt.) L. A.* By the will of the late Charles C. Beaman of New York, the library received a bequest of \$2000.

---

## Librarians.

---

BARRON, Miss Lucy, of Manning, S. C., was on Jan. 22 elected state librarian of South Carolina for a two years' term at a salary of \$800 per year. The election was made by the state legislature, on a third ballot. There were 10 applicants, all women, whose nominations were presented.

BASSETT, Homer F., for nearly 30 years librarian of the Bronson Library, of Waterbury, Ct., resigned from that post on Feb. 2, when he was appointed librarian emeritus at a salary of \$800 a year. He has been succeeded by Miss Helen Sperry. Mr. Bassett is now in his 75th year, and his retirement is due to ill health and to a desire for rest and study.

BOSTWICK, Arthur E., for the past two years librarian of the Brooklyn (N. Y.) Public Library, accepted on Jan. 21 the position of superintendent of circulation in the New York Public Library, a place created in view of the pending consolidation of the city circulating libraries with the larger institution. Mr. Bostwick's resignation takes effect Feb. 1, but he has expressed his willingness to give a part of his time to the direction of the Brooklyn library until his successor has been chosen. On Jan. 30 Mr. Bostwick received from the staff of the Brooklyn Public Library the gift of a set of cuff links and studs, "in token of affection and esteem."

FARR, Miss Mary Parry, formerly of the Drexel Institute Library School staff, is now engaged in cataloging the library of the Society for the Prevention of Cruelty to Animals, New York City.

FREAR, Cornelius, of Dover, has been appointed by Governor Hunn state librarian of Delaware, succeeding Thomas Jefferson, whose term of office expired on Feb. 12. The appointment is for a term of four years, at a salary of \$500 a year. Mr. Frear is a law student in Dover.

GRIGGS, Miss Margaret, of the Pratt Institute Library School, class of '99, having completed her work at the Library of Pennsylvania University, became a member of the Pratt Institute Library staff in January.

HAMILTON, Morris R., for 15 years state librarian of New Jersey, died at the home of his son-in-law in Trenton on Jan. 23. Mr. Hamilton was born at Oxford Furnace, Sussex county, N. J., May 24, 1820, and came of a well-known New Jersey family, his father having been quartermaster general of the state for 25 years. In 1839 he was graduated from the College of New Jersey, now Princeton University, and in 1842 he was admitted to the bar. He practised law for several years, and later received an appointment in the Philadelphia post-office, which he gave up in 1849 to become editor of the Trenton *True American*. Mr. Hamilton's journalistic career lasted for more than 40 years, and brought him into connection with various newspapers in the east and west. He was elected state librarian on Feb. 27, 1884, and held that office until Feb. 1, 1899, when he was succeeded by H. C. Buchanan. For many years Mr. Hamilton was one of the most familiar figures about the New Jersey state capitol, and he was always active and interested in political and social circles. He was a member of the Sons of the Revolution, of Masonic and other societies, and had special pride in his distinction as the second oldest living graduate of Princeton, whose commencements he had attended with but one exception since his graduation in 1839. He always emphasized the coincidence that his birthday was identical with that of Queen Victoria, though one year later; and he had

a favorite prediction that death would come to both at the same time—which was indeed practically fulfilled, with a difference of but 12 hours.

HUBBELL, Miss Jennie P., was on Jan. 19 elected librarian of the Rockford (Ill.) Public Library. Miss Hubbell has for nine years been a member of the library force, and has taken the summer course in library economy conducted at Madison, Wis., by the Wisconsin Free Library Commission.

SEWALL, Willis F., for several years librarian of the Wilmington (Del.) Institute Library, from which he resigned owing to ill health, has regained his health through the influence of a thorough rest and now expects to re-enter the library field.

SPERRY, Miss Helen, graduate of the N. Y. State Library School, with honor, class of '94, has resigned her position as librarian of the Carnegie Library, Homestead, Pa., and has been appointed librarian of the Bronson Library in Waterbury, Ct., succeeding Homer F. Bassett, now librarian emeritus. Miss Sperry was for several years a valued assistant in the Bronson Library, and her appointment meets with general local approval. In 1894, after graduating from the Library School, she entered the Carnegie Library, at Braddock, Pa., where the next year she was appointed librarian. This position she held for three years, when she resigned to take charge of the Homestead Carnegie Library. Miss Sperry is a native of Waterbury, and has a thorough appreciation of its local conditions and opportunities for library development.

THOMSON, Miss Frances Danner, Pratt Institute Library School, class of 1900, has resigned her position at the Jacob Tome Institute Library to accept one in the Y. W. C. A. Library, New York City.

TITUS, Miss Mary V., of the Pratt Institute Library School, class of '97, has been engaged to assist in the cataloging of the newly organized Public Library of Trenton, N. J.

WADDELL, Miss Nina T., of the Armour Institute Library, class of '97, has joined the staff of the Kansas City (Mo.) Public Library as second assistant librarian.

WATTS, Miss Florence A., of the Pratt Institute Library School, class of '99, has resigned her position on the staff of that library to accept one as cataloger in the Osterhout Free Library, Wilkes Barré, Pa. Her place was filled in the Pratt Institute Library by Miss Lida V. Thompson, of the same class.

WILCOX-SAXTON. Miss Ida Louise Saxton, B.L.S. N. Y. State Library School, class of 1900, and Mr. Albert Henry Wilcox, of Rochester, N. Y., were married Dec. 26, 1900, at Clyde, N. Y.

## Cataloging and Classification.

**BIBLIOTHEQUE NATIONALE.** Catalogue général des livres imprimés de la Bibliothèque Nationale. Auteurs. Tome III. André-Aristophile. Paris, Imprimerie Nationale, 1899 [1900] 1-1238 col. 8°. Dates of sheet printing: Décembre, 1899-Avril, 1900.

The BOSTON BOOK Co.'s *Bulletin of Bibliography* for January contains a first instalment of a "List of fiction in the French language, contained in the *Revue des Deux Mondes*, 1856-1899," in execution of the suggestion made by Mr. Beer in the LIBRARY JOURNAL for September last (25:570). The list is compiled by the New Haven (Ct.) Public Library. Mr. Cole continues his supplementary list on "Bermuda in periodical literature," and there is a fourth section of Miss Medicott's list on "Oliver Cromwell," and the usual quarterly index to reference lists published by libraries.

**CARNEGIE L. OF PITTSBURGH.** Monthly bulletin, v. 5, nos. 8-9, Oct.-Nov., 1900: Additions to the library from July 1 to Dec. 1, 1900.

Contains no. 12 in the series of reading lists on "Contemporary biography," devoted to sovereigns and rulers.

The *Open Shelf*, published by the Cleveland (O.) Public Library, prints in its quarterly issue for January a good reference list (4½ col.) of books and articles dealing with the Madonna in art.

**FISK FREE AND PUBLIC L., New Orleans, La.** Finding list of books added Jan. 1 to Sept. 30, 1900. New Orleans, 1900. 20 p. O.

A D. C. classed list. Most of the entries include date and place of publication.

**INDIANAPOLIS (Ind.)** P. L. has issued "A selected missionary list," in two small, neatly made pamphlets. Part 1 is devoted to general works; part 2 to missions in various countries; both being prepared by Miss Jessie Allen, reference librarian.

**MANCHESTER (Eng.)** P. F. Ls. Index to the Owen mss. in the Free Reference Library, comp. by Ernest Axon, asst. librarian. Manchester, 1900. 26 p. O. (Occasional lists, no. 6.)

This collection, which was purchased by the Manchester Library in 1899, was gathered by John Owen, known locally as "Old Mortality," during some 50 years, and consists of 80 folio volumes of historical and genealogical material relating to Manchester and its vicinity. *The Athenaeum* says: "The value of

the collection of this Lancashire worthy deserves to be appreciated outside Lancashire, for it is of great genealogical and archæological value for other parts of the north of England as well, including especially the Isle of Man. The Manchester Corporation is to be congratulated on its public spirit in securing the mss." The collection includes church notes and sketches, transcripts of registers, and rubbings and transliterations of inscriptions. The index is compact, adequate, and well-arranged, and is prefaced by a short account of the collection, abridged from a more extended paper by Mr. Axon.

**MEDFORD (Mass.)** P. L. Bulletin, 1899-1900: Additions. May, 1899, to January, 1901. Medford, 1901. 33 p. O.

The SALEM (Mass.) P. L. *Bulletin* for January devotes its special reading list to Music.

**TUFTS L., Weymouth, Mass.** Class list no. 1: English fiction, 1879-1900. Weymouth, Mass., October, 1900. 2+66 p. l. O. 10c. A title-a-line author list.

**WISCONSIN F. L. COMMISSION.** Bulletin no. 3: New book list and library notes, Jan. 25, 1901. Madison, 1901. 16 p. O.

The book list gives a good selection of recent publications for libraries with small book funds.

### CHANGED TITLES.

"Les romantiques," by Edmond Rostand, translated by Mary Hendee, was published as "The romancers" in 1899 by the Doubleday & McClure Co. The same play, translated in verse by George Fleming, was published as "The fantasticks" by R. H. Russell in 1900.

"Lichtenstein," by Wilhelm Hauff, has been published in English under at least two titles by different translators: "Lichtenstein," adapted for English readers by L. L. Weedon (London: Ernest Nister, 1899), and "Marie of Lichtenstein," translated by R. J. Craig (London: Digby, Long & Co., 1897).

"Picturesque tours in America" and "The land we live in," both edited by Rev. Edward T. Bromfield, D.D., are the same book, printed from the same plates. Under the first title it was published by R. Worthington (New York, 1885) and under the second by Worthington Co. (New York, 1891).

S: H. R.

### FULL NAMES.

Catalogers may be interested to know that the Navy Register for 1901 introduces the innovation of printing the officers' names in full. As the Register includes all living officers of the Navy, both active and retired, it will be likely to furnish the solution of some hitherto unsolved initials.

W: S. BURNS.

## BOOK DEPARTMENT

ON account of a large increase in the volume of business which we are now doing with the libraries of the country we have decided to establish a special LIBRARY DEPARTMENT in order to make our services more efficient. We invite you to take advantage of our facilities.

We have the largest miscellaneous book stock in the United States, embracing the publications of the various publishers, and assure you that our facilities for the proper handling of our correspondent's orders are of the best. We promise you the most careful attention and prompt dispatch on all business entrusted to us.

Would be pleased to receive from you a list of books on which you desire quotations, and, when possible, will be pleased to have you visit us and make use of the facilities of our store and library department in making a selection of books.

Very truly,

THE AMERICAN NEWS COMPANY,  
39-41 CHAMBERS STREET, NEW YORK.

BENJAMIN FRANKLIN STEVENS.

HENRY JOHN BROWN.

**B. F. STEVENS & BROWN,**  
 American Library and Literary Agents,  
 4 TRAFALGAR SQUARE, CHARING CROSS, LONDON.

**T**HIS Agency was established in 1864 for supplying American Public Libraries, Institutions, and Book Collectors, with English and Continental Books, Manuscripts, Drawings, Philosophical Apparatus, etc., at the lowest London prices.

Special attention is paid to the selection and purchase of rare old books and manuscripts. Auction sales are carefully watched and good knowledge kept of the stocks of the old Booksellers of Europe.

Lists of Desiderata have the best attention and Librarians are respectfully requested to test the value of the Agency by sending trial orders on by submitting lists for Estimates for goods to be delivered, either free in London or New York, as desired.

Auction Catalogues when printed in advance and Catalogues issued by Publishers and Second-hand Booksellers are mailed to Customers when desired.

Large shipments are sent by cheapest and quickest route, or as ordered. Small shipments are made weekly through our New York Agency, at a minimum of expense and trouble to purchasers, or single books are sent by mail on receipt of order.

Special attention is given to Bindings in all styles.

Periodicals are supplied either direct by mail from London or by mail from New York Agency at lowest rates for prompt and efficient service. Send for Lists.

Payments may be made either direct to London or in U. S. Currency through our New York Agency.

*Just Ready. 100 Copies Printed for Subscribers Only.*

**B. F. STEVENS'S**

**Facsimile of the Unpublished British Headquarters Coloured  
 Manuscript Map of New York and Environs  
 (1782)**

Reproduced from the Original Drawing in the War Office London.  
 24 sheets. Scale, 6½ inches to a mile. 10 feet by 4 feet. . . . .

The successive British Commanders-in-Chief in America, Generals Sir William Howe, Sir Henry Clinton, and Sir Guy Carleton, during their respective occupations of New York and Environs in the Revolution, caused this manuscript plan from time to time to be kept up.

The plan extends from below Guanas Bay to the Heights of Spikendevil, a distance of about eighteen or nineteen miles. It shows the Fortifications, Defences, Topography, Streets, Roads, etc., of the whole of the Island of New York with the Harbor, Islands, Water Ways, and River Frontages on the Hudson and East Rivers, the Military Works on Long Island including Brooklyn, the Works in Paulus Hook and parts of the Jersey Shore. It has a copious Table of References to various works (British and American), some of them with notes as to the time of their construction or destruction.

The Original Drawing, ten feet by four feet, is on a scale of about six and a half inches to a mile. It is handsomely reproduced for subscribers only, in careful facsimile on 24 sheets which can be joined up and mounted like the original as a Wall Map or mounted on linen if desired. It will be issued either mounted on linen to fold in book form with leather (slip) case, 13 x 10 inches, or the 24 sheets (22 x 15 inches each), will be supplied in a portfolio.

No more than 100 copies have been printed and the engravings were erased as each sheet was printed off.

A few extra copies of sheet 8 have been printed so that it can be sent as a specimen on application from intending subscribers.

**Prices to Subscribers**

- Mounted on linen to fold in book form with leather (slip) case. . . **\$30 net.**
- Unmounted, on 24 sheets in portfolio. . . . . **\$25 net.**

The above prices include delivery to any Public Library or Institute in the United States or Canada, but private subscribers must also pay the duty.

BOOKBINDER { Duro-Flexile,  
Vellucent,  
Reliure de Luxe.

*“Buy Your Popular Books and Your Costly Books*

## **in Duro-Flexile Binding.”**

I OBTAIN books from the publishers in sheets and bind them “ONCE FOR ALL.” This binding lasts longer than the leaves of the book, and the leaves of the book are preserved and their life immeasurably lengthened by this binding. Librarians cannot persuade publishers to print special editions for them, but I supply books specially bound for them.

If the paper is bad I sew and forward the book so that the leaves are subject to no strain and are indeed strengthened in the folds. If the paper is very stout I sew the book and forward it in a special manner adapted to the thickness of the paper, in other words I adapt Duro-Flexile binding to both good and bad paper with the results that the utmost service and the longest possible life are obtained for both.

No binding in the world is adapted to the varied qualities of the paper as is Duro-Flexile.

The service obtained from a book of bad paper when supplied bound in this way will surprise you.

A papier maché box and a steel safe are not hinged in the same way. Thin tough paper and thick spongy paper also require very different treatment, and with Duro-Flexile they get it.

**TIGHT BACKS** are used for books of a thickness and quality of paper best suited for such treatment.

**LOOSE BACKS** are given where such are better suited.

My bookbinding is in short adapted in its every detail, both of material and method, to the requirements of a Public Library Book.

500 Public Librarians in all parts of the English speaking world buy these books.

## **POPULAR BOOKS AND COSTLY BOOKS**

bought of me, bound from the quires, give 50% more service.

*A catalogue of Standard Fiction and popular recent books priced net delivered free to your Library will be sent on application.*

# HENRY MALKAN,

## *Library Department.*

---

In overhauling our stock we find some books published within the last year or so, which we wish to close out at prices that will appeal very forcibly to the economical librarians. These books are not shop-worn or damaged in any way, but are in perfect condition just as they came from the publishers. The range of Literature covered is very wide but naturally fiction predominates and there is scarcely a work of this kind that we cannot furnish at prices heretofore unequalled. Our facilities for filling orders are unsurpassed and we can pick out of stock more books on the average library order than any other house in the business.

We are noted for the promptness with which we make shipments and complete manner in which we fill orders. The fact that a book happens to be published in an out-of-the-way place, never causes us to give such a report as, "publishers out of," "cannot get in New York," or any other of the stereotyped excuses. We go direct to the publishers and get the book. So far as prices are concerned, we defy competition; and would like very much to have estimates submitted to us for quotations.

HENRY MALKAN,

**Special Notice to Librarians.**

Mr. E. G. ALLEN desires to lay before you the advantages of using this Agency for procuring English and Foreign Books, Magazines, Periodicals, etc., and for General Library Work in Great Britain.

Long existing relations with the Booksellers and Publishers of the United Kingdom enable him to execute orders of any magnitude promptly and economically. All important books collated before delivery.

Specialty is made of the finding of Out of Print Books. His success in this department is unrivalled, possessing unique means of search, by which he is able to supply scarce books expeditiously and at moderate prices.

A good selection of Second-hand Dealers' Catalogues is sent to clients by every mail, and no commission charged on orders from them.

New Books supplied on the most advantageous terms, and the Full Trade Discount allowed off the published price.

Auction Catalogues Mailed, Sales Attended, and Commissions Executed with Care and Judgment.

Defects of Rare Books Reproduced in Facsimile.

Long Sets of Scientific and Other Periodicals Supplied. Imperfect Sets Completed.

Large consignments sent by fast steamers at through rates. Small orders can be sent by mail or by express system at low charges.

Special note is kept of all continuations of serials, which are forwarded immediately on publication.

Bookbinding in every style, Cheap and durable for library use. Dilapidated old binding skilfully repaired. Pamphlet binding at specially cheap rates.

Should you at present be without the services of a London Agency, MR. ALLEN would be pleased to answer any inquiries. All orders receive his personal attention, and with an experience of forty years in library business, and the thorough equipment of his agency, he believes himself capable of meeting every library requirement in a satisfactory manner.

# THE LIBRARY JOURNAL

VOL. 26.

MARCH, 1901.

No. 3

ARRANGEMENTS for the Waukesha conference of the American Library Association in July next are gradually taking shape, and although no definite announcements are yet made, indications point to a large attendance and a program admirably representative of the manifold activities of the library profession to-day. The general plan favored seems to be that which we have seen in process of evolution for the last few years—the assignment to the general sessions of the broader phases of the subject, and the reservation of specific and technical aspects to more informal presentation in section and round table meetings. For the first division this year, special attention seems likely to be directed to the general subject of library development through agencies national, state, and local, with possibly some consideration of factors influencing book production and distribution, as copyright. For the second division of the program there will be specific consideration of children's work through a program prepared by the newly established section on this subject; questions of cataloging, through the Catalog Section; college and reference problems; matters affecting trustees and librarians in their joint relation; state library commission and state library association work; and the special sessions of the National Association of State Librarians, which holds its annual meeting in connection with this national conference. Visits to the great public library of Milwaukee, and to the magnificent library of the State Historical Society at Madison, will be important features of the meeting; and the local arrangements include various social reunions and entertainments under direction of the Wisconsin commission, associations, and summer school. In its professional aspects, and in the truly national extent and character of the attendance indicated, the Waukesha conference promises to be a most valuable manifestation of the methods, aims, and remarkable development of American libraries.

A SUBJECT of felicitation at the Waukesha meeting will doubtless be the growth of li-

braries under the direct inspiration of Mr. Carnegie's gifts for buildings. The supreme offer within a single week of \$5,200,000 for branch library buildings in Greater New York, \$1,000,000 for St. Louis, and \$1,000,000 for the Braddock, Homestead and Duquesne libraries reaches the high-water mark of public-spirited giving. For the month preceding our record shows gifts to over twenty places exceeding \$1,000,000, and the total for this year is already near to the \$10,000,000 point. Adding to the Astor, Lenox and Tilden foundations this Carnegie gift, and the municipal expenditure previously and provisionally assured, New York will have for library purposes investments or income representing a capital of practically \$15,000,000 to \$20,000,000, and an opportunity absolutely without parallel. One result of the Carnegie gift, especially in the present Brooklyn situation, may be to open a way for the inclusion of all libraries throughout Greater New York, except such as those of Columbia and of the Pratt Institute, in a comprehensive consolidation or federation that will immensely strengthen the whole library service. There is always the underlying criticism that the money which Mr. Carnegie gives for the people should be given by the people themselves, for their own benefit; but this criticism is met in large degree by the fact that Mr. Carnegie conditions his gift on public support of the beneficial enterprises to which he gives the initiative. It is certain that Mr. Carnegie's methods must result in a great stimulation of library activity throughout the country, and it is to making this stimulation the basis of a real public sentiment, sincere and not artificial, that organized library effort is most needed.

THE plans for a "library post" are again brought to the front by their indefatigable promoter, and it is to be hoped may take such shape as to make them unobjectionable both to the council of the A. L. A., which found much ground for disapproval in the original plans, and to the Post-Office Department. Meantime, Dr. Canfield, as Columbia's libra-

rian, adding his energy to the endeavors already made by Mr. Whitney of Boston, and others, has obtained from the Third Assistant Postmaster-General a ruling in happy contradiction to the red tape restrictions usually emanating from the department at Washington in reference to postal affairs. Hitherto the marks added to books, necessarily in writing, to identify their location or to designate their classification, have been considered as subjecting them to letter-postage, because made in writing—a disadvantage which has been a serious one in the library exchange of books by post. The new ruling that such marks, not being personal in character, may be considered within the meaning of the “inscription” permitted by law is in line with common sense and will be of direct usefulness in the library field.

THE plan of providing printed catalog cards, which called forth so much enthusiasm at the Montreal conference, lags behind practical realization because the number of libraries which have responded to the Publishing Board's circulars has been so surprisingly small. Only about fifty have yet been heard from—less, in fact, than the number indicated by the show of hands at the Montreal conference. The plans, as indicated in the circulars, are in rather better shape than was thought possible when the subject was discussed at the conference, because of the unexpected proffers of co-operation from the Library of Congress, yet the proffered co-operation of the national library is likely to come to naught because of the uncertainty as to the support of the libraries most interested. Surely at least one hundred libraries in this country ought to appreciate the direct benefit which such a plan would be to them—and the support of one hundred libraries would make the plan practicable. Mr. Andrews' talk before the Illinois Library Association has indicated the great variety of uses to which these cards may be put, and it suggests also the great gain that can be made by relieving catalogers of the merely mechanical work and using their brains to better purposes than at present. If those libraries which are minded favorably toward the plan will make themselves heard, it should be possible to put it into prompt practical operation—otherwise the opportunity must be lost.

## Communications.

### INFORMATION WANTED.

CAN anyone inform me whether the following book exists (title is from Henri Stein's “Manuel de bibliographie générale”):

“R. S. Guernsey. Bibliography of legal bibliography. New York, 1874.”

Astor Library catalog gives:  
“Guernsey, Rocellus S. Legal bibliography; a catalog of the New York Law Institute. [New York, 1874.]”

Did Mr. Guernsey publish a reprint of the portion of this catalog dealing with bibliography?

AKSEL G. S. JOSEPHSON.  
THE JOHN CREER LIBRARY, }  
Chicago. }

### OUTLINE OF LIBRARY MOVEMENT IN AMERICA: ADDITIONS.

IN looking over Mrs. Fairchild's outline of the modern library movement in America (L. J., Feb., p. 73) I notice two omissions. One is the Bray library movement, noted in the L. J. some years ago, and the other that the Peterboro (N. H.) Public Library was opened on Sunday in 1834, a long time before Cincinnati in 1871.

S. H. RANCK.  
ENOCH PRATT FREE LIBRARY, }  
Baltimore, Md. }

### LIBRARIES IN GÖTEBORG, SWEDEN: A CORRECTION.

IN the November, 1900, number of the LIBRARY JOURNAL, which I have not seen till now, you have reviewed my book, “Folkebogsamlinger, deres historie og indretning.” In this review, by which I feel much honored, I find the following passage:

“The largest city library in Sweden is that of Göteborg. Dr. Steenberg states that it contains 7730 volumes, but this is a surprising error. The library really contains over 80,000 volumes, and includes the library of the Göteborg University.”

Permit me to say that it is not I, but the reviewer, who is wrong. He confounds two different libraries, *viz.*, “Göteborg stadsbibliotek” (Göteborg town library) and “Göteborg stads folkbibliotek” (The people's library of the town of Göteborg). The first is a purely scientific library, and therefore I have not mentioned it in my book. It has replaced the libraries of Göteborg Museum and of Göteborg University. The second, “Göteborg stads folkbibliotek,” is a popular library, and I trust that my statement about it is correct.

ANDR. SCH. STEENBERG.  
HORSSENS, DENMARK.

[It is a curious coincidence that almost simultaneously with Dr. Steenberg's communication we should receive from Mr. Josephson his review of the “Festskrift” of the “Göteborg stadsbibliotek,” in which he makes explanation and correction of his error. His review, printed elsewhere, gives further details of this interesting Göteborg library.—Ed. L. J.]

## LIBRARIES IN THE TWENTIETH CENTURY: A SYMPOSIUM.

## DEVELOPMENT AND EVOLUTION.

For a quarter century I have been "eating, sleeping and drinking" libraries. My study convinces me that the next quarter century will show great changes; development and evolution, not revolution. Space limits me to mere mention of heads, but these can be successfully defended.

Books and libraries will be farther releast from restrictions and straight jackets, and mobilized or made aggressiv and omnipresent in their influence. The public will demand more, get more, and consider libraries still more essential and worthy of liberal support.

*Traveling libraries.* This idea will spread and reach homes and individuals as it now reaches only communities. Students can get a dozen books for a winter instead of one or two for two weeks. There will be a greater freedom of access. Open shelves in spite of some losses will become more abundant. Books except a few rarities will be less fetishes to be protected with a kind of sacred awe, and more for use. When a volume cost as much as a village this reverence and jealous watchfulness was justified. Now that it can be bought for the price of a single meal, such reverence is a medieval survival. Students will cut up books freely for notes and scraps. Libraries will lose and wear them out and charge to running expenses with no more worry than for an equal value in stationery, wrapping paper or other supplies that can be reproduced any day at small cost. The book is to be used and also used up, if that—as often happens—will save time worth more than its cost.

*Library faculties.* That modern admirable invention, the reference librarian, will be developept in large libraries into faculties of specialists available by mail and telephone to the wide constituency belonging to each.

*Centralization.* The immense increase in new books publisht, cost of shelving and cleaning, cataloging and handling, and chiefly larger and growing demands of the public, to be met only by a large staff which can be paid only by libraries with a great income,

will drive smaller libraries to abandon general collecting and send their surplus books to the nearest state or great university library which will use them in trust for the benefit of all scholars and smaller libraries in its territory. Telephone, mail and express facilities are becoming cheaper and universally available. Libraries will be driven for financial reasons, rapidly growing more serious, to follow the law of business and to attempt to carry only such stock as frequent local demands warrant, supplying the rest on order from the central storehouse as a bookseller orders rare and costly books. Libraries will be mobilized. Books must travel more.

*Libraries as bookstores.* The public which pays the cost of lending a book for the sake of having it read will soon learn that it can much better afford to help the reader select the best and to buy it for him at wholesale cost, because to own a book means so much more than to borrow it. The library will thus become the local bookstore where sample copies can be examind and orders left. This means cheaper books and the gradual elimination of the commercial element from much of our publishing and bookselling just as it has been similarly eliminated from higher education, then from secondary and now from professional and technical, till with a few exceptions it is coming to be hardly respectable for people to make very large incomes out of any form of education any more than they would out of religion. Education in its nature is a thing to be furnisht with little or no profits. The public ought to afford to every man at actual cost or even less, good water, drainage, roads, education and so far as he needs them the results of the world's previous experience as recorded in books, maps, etc.

*Libraries as publishers.* The universities and great central faculty libraries have already begun to take up their new but proper function of publishing, and endowments will follow to carry this beneficent work forward. Librarians will stimulate and help in the experiments on scientific bookmaking till we really know how to get maximum legibility and convenience at minimum cost, and vast improvement will be workt in severa<sup>l</sup> details

of bookmaking, chiefly in size, face and leading of type and in books decrease length of line so that the eye can move down the page without the strain of zigzagging.

*Pictures.* These will go forward further and fully take their proper place without discrimination in favor of books. Not as history of art or mere decoration, though both are legitimate functions, but as illustrating almost every subject. Wherever pictures carry either information or inspiration easier, quicker or cheaper than books, they will take their place and be paid for from the same funds. The graphic side of printing will be greatly developed.

*Museums.* These will be recognized as an integral part of both large and small libraries, for consulting a museum is really "reading" natural language instead of conventional and arbitrary forms of our types.

*Home education.* As with museums, study clubs, extension teaching, reading circles, individual study and the whole group of agencies now happily named "home education," are rapidly grouping themselves around and becoming integral parts of the modern library. The word library will little longer convey to most minds the notion merely of a collection of books, but it will mean the center in every community of all those educational agencies and influences which in our time and country are universally proved as worthy public confidence and support, and which can be maintained more cheaply and effectively as a part of our library system than anywhere else.

When we look back a quarter century and realize that we have been living in what is distinctively the library age of the world, we are amazed at the growth. To him whose vision is as keen looking forward as looking backward the magnificent results already accomplished are exceeded by the almost sure promise of the still better things which are soon to be.

MELVIL DEWEY,

*New York State Library.*

#### THE INVASION OF THE PRINTED PAGE.

A CERTAIN weekly illustrated paper is boasting of the fact that it has successfully invaded the field of the monthly magazine. It probably does not thus boast without good reason. Yesterday we could count on a little respite

from the daily papers and their flood of news and views by withdrawing each month to the reputable monthly's more careful résumé and more carefully considered opinions. To-day the artist, the camera, and reporter, and philosopher, each and all speak to us from the columns of the weekly journal. We may say we do not heed this new form of journalism; but in fact we do. Journals do not speak and continue to speak unless they have an audience. They do speak, therefore the audience is here.

I have suggested my text: the invasion of printed things. Writers will continue to multiply, books will become cheaper, daily and weekly papers and monthly journals will increase in number and will meet the public taste more and more successfully. Things to read will be under every man's eye all his waking hours. Library shelves will groan: the buildings of yesterday will be too small by to-morrow. I doubt if in any town in this country of more than twenty-five thousand population there is a library building erected more than five years ago which is adequate to present needs.

All this is to librarians no cause for lamentation. Rather it means more work to do, and better. As print multiplies our duties increase, our calling is magnified, and there remains for us simply the duty and the pleasure of living up to our opportunities. We have been the keepers of books. There was a time when that was a proper function of the librarian, almost his only one. Even to-day there are treasures of print which someone must guard. We have been promoters of reading, and this duty will, in a measure, but in less and less degree as time goes on, continue over into the next phase of the librarian's development. Not all, as yet, have the reading habit. Probably not all, even in our own country, will acquire it for some decades to come. But these two fields of work—the keeping of books and the promoting of reading—will soon begin to grow smaller. Librarians of the future, if they live up to their opportunities, if they do not reject the gift of good work to do which the gods offer them, will be not so much guardians of books, or promoters of reading, as appraisers of printed things. Mr. Iles saw this ten years ago. To-day we must all see it. The all-

inclusive library will be an impossibility in another decade. Even the smaller collections will outgrow their storage room long before any but the most far-seeing now think possible. Already even the careful buyers find their shelves loaded with dead and useless material before they have laid even the foundations of the all 'round library.

We must learn to select; then we must learn to reject, after it has passed its brief day of usefulness, much of that which we have carefully selected. An army of books, judiciously selected but generous in numbers, must soon begin to march valiantly on from the library to the paper mill. A useless book transformed into useful paper is a sight we must learn to delight in.

Printed things must be evaluated. The flood of print will soon make this imperative. Perhaps the newspapers will take up the task, tho' heaven knows that they have shown as yet no more desire to discriminate in books than they have in patent medicines. Perhaps the colleges and universities will attempt it, and certainly much of the actual work must come from them, in any event. But it is pre-eminently the librarian's task. It is his, at least, to lay out the work and to see that it is accomplished. We should establish an independent, inexpensive, widely circulated, weekly or monthly journal which shall select, reject, praise, condemn and summarize the largest possible part of the books of the day, and shall contain a series of select, classified, annotated and evaluated bibliographies concerning the books of the past.

Commercialism and the wish to print will supply an abundance of things read. One can already almost see the librarian, as I have said, losing from his list of functions that of keeper of printed things. But skilled guides thro' the mountains and deserts of print the public must have. To help to secure those guides, to organize them and make available their services, here is work in plenty and of the kind that makes life worth while.

J. C. DANA,

*Springfield (Mass.) City Library.*

#### FEDERATION AND CO-OPERATION.

WE hope that library progress during this century will be marked by national federation and international co-operation.

Co-operation has been the watchword of American libraries during the latter part of the nineteenth century, but it is only beginning to be a matter of universal scope. It is beginning, however, and the century will doubtless see China, India, and Africa as well as Europe and South America using common bibliographical standards and uniting to produce a universal catalog of world literature.

Co-operation at home has accomplished great things in an informal way, but already feels the need of organization. Informal understanding has not yet, *e. g.*, effected the proper economy either in the selection or cataloging of books. There is therefore a field and a need for formal organized co-operation, and this is what is here meant by federation. The field for this is both local and national.

Locally there is quite a tendency toward the union of many libraries in one, as in New York, but this at best can never include all the great libraries of a great city. There might, however, be a federation which should take in practically all the libraries of a given community, and organize and administer their common tasks without destroying the identity or organization of each, and leaving to each a large measure of self-government. They would be a "United Libraries" after the analogy of the "United States." The present tendency in railroads and industrial enterprises of all sorts is somewhat in this direction.

Nationally, organized co-operation might be extended throughout the United States by means of (a) Bureaus for co-operative cataloging; (b) Bureaus for the organized loan exchange of the rarer and less frequently used books; and therefore (c) for systematic avoidance of duplication. That this organized co-operation will take in some cases at least an incorporated form is probable and to be desired. If the whole problem should take the form of organized local co-operation through strict local federation and centralized national federation through the Library of Congress, so much the better. But by all means let us hope for better organized co-operation at home extended as far as possible abroad.

E. C. RICHARDSON,

*Princeton University Library.*

## THE CLASSIFICATION OF BOOKS.\*

BY ERNEST C. RICHARDSON, *Librarian of Princeton University.*

## I. BOOK CLASSIFICATION AN ART.

THE aim of this paper has been described as practical. By this is meant that it aims chiefly to suggest certain adjustments or adaptations of the strictly logical order which are made necessary in the matter of book classification by the fact that we are dealing not with ideas but with concrete things.

The main fact about the classification of books is in brief the fact that it is an art not science. The classification or order of things is nature and is not a human creation. The classification or order of ideas follows the order of this classification of things and is science. The classification of books, on the other hand, is an art—a human creation for a human end. The order of sciences is its backbone, but in the adjustment of books in this order there are many practical accommodations to be made, determined by not merely complexity or material but by the end in view.

In describing this paper as practical, therefore, it is intended to imply not a systematic technical treatise, but only the treatment of the practical modifications of the theoretical order called for by the fact that we are here

treating complex material with reference to a practical end. When these papers are printed they will have something of the nature of a historical sketch with outlines of various systems both theoretical and practical; but for the brief treatment of this lecture the historical and technical must be largely disclaimed; as has been said, its aim is to distinguish the difference between book classification and theoretical classification.

## II. BOOK CLASSIFICATION AND CARD CLASSIFICATION.

The first step in this process of differentiation is evidently to explain what it is here intended to include under book classification. In speaking of the classification of books here then, it will be understood that both the classification of the material books on the shelves and the analytical classification of the contents of these books in catalogs and bibliographies will be included. Although there are some differences between the two kinds which will, from point to point, be noted, the principles and practical difficulties of these two forms of book classification are substantially the same. The chief difference lies in the fact that the card classification can be carried nearer to scientific completeness than that of books on the shelves, for it is not conditioned by the paper and binding, and the analysis can therefore be carried further. The librarian who analyzes his books in this way approaches nearer to the chemist who vaporizes his material and yet he never reaches his point. He is rather like a mineralogist who is so situated that he cannot apply the blow pipe and must get as pure a lump of ore as may be by breaking. It is only the author who uses the contents of books to make new books, breaking up the very ideas in the alembic of his own mind, who is the scientist of books. He alone makes the book-atoms free to take their affinities. Nevertheless as has been said, the difference between shelf-classification and analytical card-classification is considerable in this respect and is like the difference between big rough lumps of mixed ores and smaller purer specimens which can be arranged with greater exactness.

\*The previous lecture, to which frequent reference is made in this, was one of two lectures on "Classification: theoretical and practical," delivered before the Albany Library School, on January 31st and February 1st, in the "Alumni lecture" series. The paper here printed is the second of the two, considerably abridged and somewhat adjusted in parts. The following brief statement will give the clue to allusions in this paper to the first, which was a strictly theoretical treatment of "The order of the sciences," preceded by an introduction on the nature, kinds and laws of classification. Classification was described as a putting together of like things. The kinds described were the logical, the geometrical, the chronological, the genetic, the historical, the evolutionary, the dynamic, the alphabetical, and the mathematical. The laws defined were the laws of likeness, of history and of evolution. The lecture itself called attention to the facts that the order of the sciences follows the order of things; that things include things past as well as things present and include ideas as well as other things. Applying the various laws in view of these facts it was said that the logical, historical and evolutionary order came out at one and the same point, and that this common order might be expressed as Hylology, Biology, Anthropology, Theology.

But whatever differences there may be between these kinds they are alike as to (1) the object that they have in view and (2) the different ways in which the classification can be carried out.

### III. THE OBJECTS AND IMPORTANCE OF BOOK CLASSIFICATION.

If we come down to the real fact why we put books or cards together according to subjects in a library, we find that it is to get together those books or cards which will be most used together. The object is a practical one just as the object of the library itself is a practical one. Libraries are not gotten together as a museum to exhibit what we have called the fossils of knowledge. It is a machine got together to instill that knowledge into men's minds. The books are collected for use. They are administered for use. They are arranged for use; and it is use which is the motive of classification.

The putting of the most used books together saves in the first place actual labor on the part of users and librarian in assembling any given mass of material for use. No catalog can take its place. A prime advantage of having most used books in classes together, therefore, is the fact that the rough bulk of material so gathered together saves a vast amount of bibliographical work and a vast amount of work in actual gathering together and use of material.

A second and great advantage of having the most used books together in the classes in which they are used together, is that they furnish in this way an incentive to the user to get a full view of his material. This is a matter of the utmost value. Men are naturally lazy. They are too little inclined anyway to exhaust material, and when you add to this also the fact that the scientific man is generally also extremely ignorant of books, you open a vast field of profit in a method of setting out before a man so that he can get at it with the least trouble a large amount of his material.

And what is true of trained scientific research I take is still more true of popular work—on the one hand, there is a great economy to the librarian who has to help in school work, essay work, club work, etc., in his task of hunting up references, and on the other hand, where there is access to shelves especially, there is the greatest educational advantage in the actual incentive to the reader

to read or at least, what is of almost greater importance, browse through books in order to pick out certain things. The "average reader" will hardly study even a classed catalog, and is utterly at sea with an alphabetical list or an unclassified library. If, however, he can look over the shelves in a classified library he is surprised to find how much there is that is interesting, he learns to get facts that he wants more readily, and in the end saves much time for himself and for the librarian, while at the same time he gets far better cultivation in the same time than he could possibly have thought of getting in an unclassified library.

And besides this economy of time and labor there is a third advantage in classification, by no means to be despised, in the fact of the psychological or mnemonic training of those who, through seeing books arranged in certain classes, get in the habit of running over these categories in their minds and associating their own ideas in these classes. Men are bound to make up such pigeon holes for themselves, otherwise there is no thought at all—they must make up for themselves some sort of schedules in which to associate their ideas together. The nearer these schedules approximate the real order of things, of course, the better it is, the more retentive the memory, the more intense the developed power of attention, but they must have the schedules, and any well thought out system of classes is better than the rubbish heap of odd boxes which serves most men in lieu of pigeon holes.

The object of classification is thus economy and increased efficiency in the use of books. "Use" is the watchword of book-classification as "truth" or "true order" is of theoretical classification. Any variation whatever from the scientific order is permissible if so be it promote this end of use—the motive of the whole process is "getting together the books most used together."

Passing now to:

### IV. THE KINDS OF BOOK CLASSIFICATION.

We have already spoken in the first lecture of the theoretical kinds of classification. The kinds of book classification are the same but they have more concrete applications, combinations and variations. It will be worth while to note some of those which are more familiar in ordinary use. You have seen in use, *e. g.*, (a) the *natural or logical classifica-*

tion—books arranged in series according to degree of likeness, the ordinary form to which we refer in the use of the word. You have seen that classification arranged forward in an evolutionary form from simple to complex and also backward in the strictly logical form from the complex to the simple. You have seen the Baconian and the inverted Baconian.

You have seen also (b) the purely artificial *alphabetical system* where books are arranged strictly by author throughout the library as used to be the case in the New York State Library under an earlier administration.

I am not sure that I have ever seen (c) a strictly *alphabetical subject arrangement*, but we have often seen large subdivisions of a system arranged chiefly alphabetically by subjects. In fact almost all classifications have this element in it, as they usually reach sooner or later the point of arranging in the order of the "person biographed" and here it becomes a strict alphabetical classification by subjects.

In the same way again (d) the strictly *chronological* by periods throughout a whole library may not be exclusively applied anywhere, but it enters into almost all classification and is a legitimate principle in its place. This principle like all others is sometimes carried to excess, but it is hard to think of a system where at certain points the recognition of dates and periods is not a practical advantage.

(e) This is still more true of *geographical classification* which is still a favorite notion with many as a semi-universal principle. While this again may not be absolutely in use as an exclusive first principle, in many libraries there is a strong tendency to urge it as at least one of a few primary principles and to arrange, for example, things under Europe, History, Geology, Mining, Agriculture, etc., rather than under Geology, Agriculture, etc., with geographical subdivisions. As a subordinate principle it is of course in use in substantially every practical library system.

(f) The primary *division* of all books by *size* into three classes, folios and over, quartos, octavos and under, is one of the commonest of the older classifications, and even to-day we are obliged, for reasons of space, to observe it in a sense, though, as a principle of classification, it has practically gone out, and in libraries the principle of the "dummy" has taken its place.

Another artificial principle of arrangement

which we have met is (g) the *arrangement by color*. This is ordinarily an *ex post facto* principle, and the colors are applied to the classes rather than the classes made an induction from the color. In this form it is common enough, *e. g.*, green books may be books on Germany, red books on France, etc. One can imagine a man arranging books in a private library on the strict principle of color for the sake of artistic effect, but I have never actually quite met it, although I fancy almost everybody makes some concession to harmony of color in a library with colored bindings not otherwise classified.

This classification by color differs somewhat from the principle of (h) *classification according to binding*. There is said to be known instances in which the principle of placing the best bindings nearest the door in a comprehensive series from the best bound to the worst was the actual ruling principle of the classification—and a most excellent principle it was in a library which, like one of these that I knew, was perhaps more suited to be looked at than looked into.

You have of course heard also of the theological library where the ruling principle was (i) *orthodoxy*, the separation of the sound from the unsound—the sheep from the goats. What a chance by the way for the application here of the "mnemonic binding"—say white, sheep; and black, goat; or blue, orthodoxy; and yellow, heterodoxy. This indeed is one of the earliest classifications of Christian theology. The ante-Nicene fathers divided their books into those "received" and "not received" or else "orthodox" and "heretical."

(j) The *form* principle of classification is also sometimes practically a universal first principle. It is used in fact in all systems where, *e. g.*, all encyclopædias are picked out from the other books in their subjects and it becomes a prime principle in the case of those libraries which put together all encyclopædias including such as those of Medicine, Political Economy and the special sciences in a department of encyclopædias. The same thing is true in the matter of periodicals.

An example of what may be called (k) *classification by literary value* is the putting together of select books in a reading room. Another possible distinction is (l) classification according to *interest*. This usually has the utilitarian purpose of saving steps, but is illustrated by the putting out on special

shelves of the latest books and the putting of fiction and biography and in general the most used books nearest the delivery desk. The principle of (m) *linguistic classification* is also much used. In the popular library this is liable to be a fundamental principle, books being arranged first of all according to language throughout, etc. This principle always comes in, too, at the point where we separate an author's works into editions and translations. (n) Classification *chronological by books* includes arrangement both by order of publication and by order of accession.

This list of kinds of book classifications in actual use might be extended still further—(o) *breadth* of book sometimes governs location, as in the case of oblong folios, (p) *thickness* even, in the case of broadsides and pamphlets generally. There is hardly a characteristic imaginable which may not modify the grouping on shelves at least: (q) *weight* (as in the case of inscriptions), (r) *fragility* (as in the case of papyri), (s) *financial value* (in the case of rare books), etc., etc., All these principles are not only in use but are legitimately in use, for it is the useful purpose which determines, and if in any case the most useful service which classification can perform for its users is, say, to separate the orthodox and unorthodox, then this becomes legitimately the prime principle, and after it but only after it the logical, historical, etc., principles may come in. It is clear therefore that the kind of classification to be used—judged by its leading principle—depends on the kind of use to which it is to be put.

This gives us a clue in the case of the special libraries, but what of the general libraries? What is the prime principle for them, and is there any order of subordination in the application of the secondary principles? With so many principles in actual use as dominating principles is there any way of deciding when doctors disagree? I say yes. When doctors disagree we let some principle decide. In this case, as the first lecture tried to show, the fundamental law is the law of likeness. The order which dominates is the one which takes into account the greatest number of points of likeness, and in the use of subordinate principles the order of sequence in use depends on the same law. The true order, according to total points of likeness as here interpreted (whether interpretation is just or not

each must judge for himself) is as follows: (1) The *logical order* or order of likeness of contents following the order of real things from the complex to the simple. This, which is the inverted evolutionary order, is on the whole better practically as well than the evolutionary or the order from the simple to the complex, because the most complex books containing the greatest variety of subjects should precede instead of follow their inclusive subdivisions in the book classification. Nevertheless in subordinate parts the evolutionary (or, what is identical, the "historical") order is often the more useful. (2) The *geographical order* or classification according to the position of things in space includes all kinds of things, though each at only a single instant of time. (3) *Chronological classification by subjects* indicates the position of only a single thing in space though showing it at different instants of time. This exhausts the "natural" order. (4) The *alphabetical* now follows, taking up an artificial series at the point where the natural stops. It may be alphabetical by subjects or alphabetical by authors. (5) To this should be added, and ordinarily only after we have gotten past the alphabetical by subjects and the alphabetical by authors, a second artificial form, *the linguistic*. (6) Finally we have the *chronological by books* (not subjects), or the arrangement by dates or dates of first edition, of the works of any individual author in his particular language. This should only come in as a rule after others have been exhausted.

This I take to be the true sequence of principles as applied to a classification for any general library: Logical, geographical, chronological by subjects, alphabetical, linguistic, chronological by books: *e. g.*, History (logical or natural); France (geographical); the Revolution (chronological); Carlyle (alphabetical); French translation (linguistic); 1865 (chronological by books). Note that by chronological is here meant not the chronological by accession, which is a very common usage at this stage, but chronological by date of publication, which is a very different thing. The accession sequence only comes in where there are two books of the same date and hardly deserves to be called a "principle." We have here thus no less than six distinct principles of classification all legitimately used in one system and all in use in most approved systems.

V. LIKENESS BETWEEN THEORETICAL CLASSIFICATION AND BOOK CLASSIFICATION.

Having defined thus the object and kinds of book classification we return again to the prime object of the paper, which is to call attention to the differences between theoretical and practical classification and the adjustments of the former necessary in the latter. We must not forget, however, that the two things are essentially the same, and that the principles which guide in forming as well as the actual sequence of the theoretical order are to be regarded as the normal which hold except as they have to be modified by practical conditions.

Attention was called in the introduction to the first lecture to the meaning and laws as well as to the kinds of classification, universally considered. The same considerations as to the real nature of the act and the laws which govern the process hold in the formation and application of a practical book classification. Among these the chief thing to be kept in mind is the fact that the arrangement of your books as a whole and in detail is a discrimination of likeness and an arranging of the books according to likeness or unlikeness from the most complex to the simplest. There is no definition that was there given or law there defined which does not hold equally well for your book classification as principles, however much the application of them may consist of exceptions, and the quintessence of the whole is the *law of likeness* itself—especially the law of sequence from the like to the like-and-unlike, or vice versa. The principle of likeness and of sequence through the more to the less alike governs the whole process of practical classification; the order of the classes in the making of schedules; the preparing of notation, the plan of arranging the books on the shelves or the cards in their cases, and the actual practice of assigning of books to their places. It may be said therefore that theoretical and practical classification are absolutely alike in their principles, however radically they may differ in their application to concrete things.

VI. DIFFERENCES BETWEEN THEORETICAL CLASSIFICATION AND BOOK CLASSIFICATION.

These differences may be roughly summed up as differences which come to light in making the schedules, in making a notation, in arranging cards, in locating books on shelves,

in the practical work of assigning books to their classes. Under each of these classes variations arise, chiefly from the nature of the material and circumstances and the intended use.

I. *Making the schedules.*

The basis of the schedules for book classification is of course the order and divisions of the sciences. It has already been said that in general the closer a classification can get to the true order of the sciences and the closer it can keep to it the better the system will be and the longer it will last. True as this is, it is nevertheless also true that there are many adjustments of the pure order of the sciences useful and even necessary in making the classes in book classification, and that the too wooden insistence on having the schedules follow the order of the sciences will often miss the real spirit of classification and result in putting books where a delicate common sense would not put them. In short, the common sense adaptation is often at bottom the more scientific.

(A). *Modification by circumstances.*

If you wish this expressed in technical terms I should say "variations arising from environment."

For most librarians the making of a classification is merely a selection of one already made. They make their schedules thus wholesale. An important question in the selection of such a ready made system of classification for any individual library is the question whether that system is actually much used. After all that I have said about conservatism and the petrification of ideas, I shall not be misunderstood in saying that the first principle in the construction (or choice) of a classification is a true conservatism. The very fact that a large number of people do think already in certain schedules, that large amounts of actual material have already been arranged in these schedules, is in itself a reason for wise conservatism. This, you will note carefully, is especially true when the general spirit of the prevailing classification is not directly contradictory to the natural order. The great gain to librarians trained in one set of schedules or to users similarly trained, in being able, in passing from one library to another, to use the same system is obvious. In cases therefore where the main classes do not overlap and contradict one another and especially when the variations

are merely matters of geographical order or personal taste, the giving up of a practical system actually in use for one ideally better is to be deprecated, except when the new is so markedly better that it is likely to command general use. For this reason the Dewey Decimal Classification, from the very fact of its wide use, will probably endure long after some of the systems now rising, which have more pretension to follow the true order of the sciences are dead (though having said this much it should be said also that the tenacity of the Dewey Classification is due even more to a certain versatility and hospitality towards adjustments within its limits). It is for this reason, too, together with the other very important circumstance that they are more fully worked out than others, that librarians generally, even those who like the writer have a special system better adapted as they think to their own libraries, always advise other librarians to "take Dewey or Cutter" rather than their own. What is true of a general system is true also of its parts, and one must take into account in any attempt to make a system, *e. g.*, the conventional divisions of Economics or Philosophy and the Hagenbachian divisions of Theology. The fact that men are in the habit of looking for things under certain heads is quite reason enough for a strict conservatism when there is question of changing to some other order.

(B). *Variation arising from the nature of books.*

The order of things and the corresponding order of sciences follow naturally in their statement the order of progress from the simple to the complex, from the like to the like and unlike, from the less various, therefore, to the more various, from the less to the more inclusive.

The classification of books on the other hand does not in the first instance follow the historical order or order of complexity, but the inverse evolutionary order, the more to the less inclusive, the unlike to the like. It follows thus rather the order in which the human mind proceeds in tracing out the order of things than the natural order of things itself.

(C). *Differences arising from intended use.*

Again, the practical classification of books is conditioned by the kind of use which is to be made of the books. The kind of classi-

cation, *e. g.*, which is needed in a free public library is not necessarily the same in its details as that which is suited to a university library, although the general outline may be the same. The chief differences regard (1) the adjustment to building, (2) the principles of subdivision, (3) the question of degree and proportion in subdivision.

(1). *Adjustment to building.*

The general order in which the main classes are to be placed with reference to one another in a library may not be so much determined by their natural relation as by the shape of the library building and by the rule that the most used books are to be placed nearest the delivery desk. Most public libraries keep fiction nearest the door. One famous library already mentioned and not wholly without its counterpart in others, classified its books so that the best bound ones should come nearest the door. This was correct. This being the chief use, the books were placed where they would be most used. According to the law of use books should be arranged from the most to the least used. In a reference library, therefore, where the reading room is at the top of the building, as will be the case in the New York Public Library, there most used classes should be nearest the top, and where, as is generally the case, the reading room is at the bottom, there they should be nearest the bottom. In case it happens to be a stack after Mr. Winsor's favorite scheme, exemplified in the Cambridge Public Library, where delivery desk is at the middle of three floors, then most used classes should be on the middle floor. In all circulating libraries the most used classes should be nearest the door. In an agricultural college, therefore, Agriculture should be nearest the desk, and in medical, theological, engineering, etc., schools, the same law would prevail. In the Massachusetts Historical Society Library, Massachusetts history, and in the New Jersey Historical Society Library, New Jersey history would be nearest the desk. As a matter of actual practice, something like this is actually done even when the notation follows a different order. It is regarded as a small matter whether main divisions follow the notation order or not. It is this practice by the way which tends to remove the chief practical objection to the D. C. by allowing the 400's and the 800's to be put side by side.

## (2). The principles of subdivision.

This question of the 400's and 800's in the D. C. is a good illustration of a possible modification of the scientific order by the law of putting together the books most used together. In some libraries "Language" and "Literature" are main classes and books are arranged under each in the order of languages. In other libraries "Language and literature" is one class divided by languages and then under each language again divided into "Philology and literature." This latter rather than the D. C. method is usually preferred in a college library according to the law of the most used, since a "department" generally is linguistic and the same professor handles both language and literature. This is typical of all branches in a college library where the department generally rules — and departments (strange as it may seem) by no means strictly follow the real order and divisions of the sciences. In each case, whichever order is finally pitched on, the ground of choice is, rightly, less the "real order" than the order in which the books are used together.

## (3). The question of degree and proportion in subdivision.

This question is in brief the burning question of close or broad classification; or at least the question which once was burning — the question in other words whether classification distinctions shall be carried beyond the limit even of the minutest subdivision of the sciences or shall be limited to the most general schedules. The controlling law in the matter is the principle of usefulness and the general rule is "the greater the number of different books the closer the classification." So long as there is only a shelf-full or two, a class subdivision is of little importance; when there are a hundred or two shelf-fulls it becomes a matter of great importance. It follows therefore that every library feels this need of minute classification in its specialties and can be satisfied with broad classes in the rest. Thus the Halle Library devotes about one-third of all its schedules to a very minute subdivision of Law. In the same way we at Princeton wish to use three times as many prime schedules for New Jersey history as we do for the history of any other state, and fifty times as many for the United States as for Holland. The library of a zoological

museum really needs to follow the scientific subdivisions of animal classes to the very farthest sub-class, but it may arrange such botanical works as it happens to have in a very few classes. The proportion in subdivision therefore depends on the kind of books that the use of the library calls for. That this proportion would be, in a general classification, a pretty hard thing to judge, is witnessed by Dr. Wire's complaint against the Decimal Classification, that it gives 100 places each to Philosophy and Theology where they should be joined in one! There are still, probably, as many books on theology in existence as on all the other sciences put together, and for a universal system surely one-tenth of the schedules is none too many.

The question of degree of subdivision is really included in what has been said. No general scheme of classification has ever been carried out in all its parts to the minuteness with which these parts have been carried out in special libraries. I doubt if 100,000 schedules would do this. As a rule the best general systems carry to about 10,000 places, and the question over which dispute has raged so violently may fairly be said to reduce itself to a question, between 100, 1000 and 10,000.

2. *Making a notation.*

A notation is simply a shorthand series of names for classes. There are three methods which may be distinguished among attempts at a representation of the whole of things: (1) The systematic encyclopædia, which attempts to give a description of all things in a form more or less full of detail as the case may be, from a complete treatise down to the barest definition. (2) The "system of classification" with which we librarians are familiar, which gives the same outline, but defines each class by a single word only or a phrase at most. (3) The "notation" which is really a condensed word for each class, but which nevertheless may and should convey a representation not merely of the division, but also of the sequence, and not only of the artificial sequence, but of the logical sequence, so far as it can be expressed.

In preparing a notation therefore the logical and mnemonic element is of prime importance. This element may exist either with the alphabetical or with the decimal or with the mixed system of notation. It cannot so well exist with the consecutive whole number and does

not exist at all in the notation which is mnemonic in the sense of beginning with the first letters of the *name* of the class—the system which is, I believe, in use in the Sorbonne, and in some American libraries, and which has been accepted by Mr. Langton and Mr. Maire.

It is not a part of the plan of this lecture to go into the discussion of the various combinations which serve as notations, except to say that the idea of a notation seems to be one distinctly numerical, and that every practical system sooner or later does make use of both letters and figures. It is only a question of at which end or where in the middle the letters shall go, and whether the figures shall be decimal (*i. e.*, logical) or consecutive, Roman or Arabic. As a matter of personal opinion, I hold that a classification should be strictly logical throughout in one series with decimal notation, but that where portions of the library must be differentiated into separately located collections of Reference, Kept books, Mss., etc., this should be so done by the prefixing of letters. Theoretically, however, one may hold himself free to introduce his new symbol at any point whatever in his number. It is a matter of practical judgment as to whether points shall be introduced after three letters or four letters, or whether the decimal series shall be broken up after certain distance or not, *e. g.*, by introducing the initial letter with the author number, as in the Cutter table, or keeping the decimal still with authors as we do. However that may be, the strictly logical notation must be broken at times by the need of separating certain classes of books from their logical order and indicating this difference in the notation.

The choice of notation again is limited by the ability of the users, and what will pass well in a learned library may not do so well in a popular one. Theoretically therefore one may use Roman, Italic, Greek, Hebrew and what not letters, Roman and Arabic numerals all together, and there are systems which attempt nearly all, but practically the simpler a system is the better.

### 3. *The classification of the card catalog.*

The practical adjustments required for use are less in card classification than in the actual location of books on shelves, simply because the list of the contents of books can be broken up on cards while the books them-

selves cannot. It comes therefore near to being the science of which book classification is the art. Books are in card catalogs resolved into their elements in some sort as molecules into their atoms by the chemist. This breaking up is, however, only relative and partial—no one, *e. g.*, analyzes an encyclopædia in the general catalogs or wants to. The catalog would get altogether too cumbersome. Moreover, the breaking up must still leave unbroken sections, and is rather the breaking of rocks into fragments than resolving them chemically into their elements, as has been already suggested. The variations are at bottom, therefore, the same as in book location, though less marked.

### 4. *The classification of books on the shelves.*

The actual putting together of books in groups on the shelves is conditioned practically in the first place by the heterogeneous character of many books, such as encyclopædias, essays, periodicals, etc. There are those who on a small scale go so far as to attempt to break up their periodicals and to classify the individual articles, but this scheme cannot be carried very far. Books must, as a rule, be handled as a whole just as the physiographer handles his conglomerate mass, not as the chemist who resolves his into the individual atoms.

A second practical conditioning of the classification of books on the shelves is the matter of size. I have gone so far as to stand up the Paris Polyglot beside the little Stevens edition, but the most fanatical advocate of complete sequence on the shelves would not dare put some elephant folios that you have seen next to the Pickering classics. There must be a limit somewhere. This does not necessarily affect the schedules. It need not even affect the notation, although it generally does so. The user must simply know that he must go to two or three series of books instead of one series in order to completely exhaust the material of his subject, and the modern system of "dummies" even saves him much of the need of this, and he need only examine one series in nine cases out of ten, if he is tolerably familiar with the bibliography of his subject. At the very best, however, the size does limit the actual putting of all books together in their "natural" order.

This same thing is true where books of special value, or books considered unsuitable for general reading on account of immorality

or (in special libraries) unorthodoxy, have to be locked up behind the scenes. The theoretical order is practically disturbed.

5. *The putting of the books in their classes.*

By this is meant the actual work of classification on the part of the classifier. Even at this stage, after the schedules, the notation and all the rules for location have been well settled, the need of adjustment of the theoretical to practical use continues. If, for example, a university has a Department of Economics and no Department of Agriculture, why, then, should a book on agricultural prices be placed the whole distance of the library away from Economics under Agriculture, instead of under Agricultural production in Economics? Yet in a university with an agricultural department it might be much more important under Agriculture than under Production. In the same way a book on railways in all their aspects in a technological school might belong under Engineering, and in a business college under Business, and in an arts college under Economics.

It is just such common sense adjustments as this which test the mettle of the classifier, and it is the fact of this need which makes the really good classifier so rare.

VII. CRITERIA OF A PRACTICAL BOOK CLASSIFICATION.

What, then, are the criteria of a good classification for books?

1. It should follow as nearly as possible the order of things. A properly classified library is perhaps the nearest thing that there is to a microcosm. A human mind which knew all things might be more perfect in this regard, but in reality no one can or does keep the whole of things in mind as a library does. It must therefore follow the order of complexity or of history, or, if you please, of evolution.

2. It should be carried out in minute detail.

3. It should be provided with a notation which will allow for indefinite subdivision, using mixed symbols, but with a predominant decimal base.

4. It should be provided with a detailed and specific index.

5. The value of such a system is increased in direct ratio to the generalness of its use.

How do existing systems answer these requirements? The Halle system is disproportionate and its notation entirely too complex; but it is in some respects the most logical of leading systems. The system of Bonazzi is too brief and broad, and its notation is not satisfactory. Rowell's University of California system is also too brief, and its notation cumbersome for interpolation. But it is sensible in its order and division. Practically speaking, the Decimal Classification and the Expansive Classification are the only ones of considerable extent which can be counted finished, and the E. C. is still a little short of that. In the matter of criteria of use, complete indexing and general practicality, the D. C. is of course without rival. It is somewhat out of proportion at certain points, but perhaps not seriously so. Its general order, though in many classes admirable, is less satisfactory logically on the whole than either the E. C. or the Halle system. The E. C. is sensible, logical, applies a predominant alphabetical notation with great success, is well indexed up to the sixth expansion and is coming to be a good deal used. The final expansion, so far as it has gotten, is a monument of patience and adequate scholarship, and demonstrates, as it has never been shown before in any system, that the alphabetical base is a truly logical and very flexible base. As classification itself is the highest function of the librarian's work, calling into play every faculty and every attainment of knowledge—the acme of bibliothecal work—so these two systems of classification mark the high water line of American library science and are the climax of its achievement.

VIII. CONCLUSION.

Do you ask, What, then, is left of the theoretical order after all these practical modifications? That is the question which we used to ask of our Latin grammars. Is the "rule" anything but a hook on which to hang exceptions? To this question I answer that the theoretical order is yet the rule, however many exceptions there may be.

FIVE MILLIONS FOR THE NEW YORK  
PUBLIC LIBRARY FROM AN-  
DREW CARNEGIE.

THE announcement was made on March 15 that Andrew Carnegie had offered to give to New York City the sum of \$5,200,000 for the erection of 65 branch library buildings for the New York Public Library, provided the city furnish the sites and guarantee the maintenance of the libraries. The offer was made in a letter from Mr. Carnegie to Dr. John S. Billings, director of the New York Public Library, dated March 12, as follows:

"DEAR DR. BILLINGS: Our conferences upon the needs of greater New York for branch libraries to reach the masses of the people in every district have convinced me of the wisdom of your plans.

"Sixty-five branches strike one at first as a very large order, but as other cities have found one necessary for every sixty thousand or seventy thousand of population, the number is not excessive.

"You estimate the average cost of these libraries at, say, \$80,000 each, being \$5,200,000 for all. If New York will furnish sites for these branches for the special benefit of the masses of the people, as it has done for the central library, and also agree in satisfactory form to provide for their maintenance as built, I should esteem it a rare privilege to be permitted to furnish the money as needed for the buildings, say, \$5,200,000. Sixty-five libraries at one stroke probably breaks the record, but this is the day of big operations, and New York is soon to be the biggest of cities.

Very truly yours,

ANDREW CARNEGIE."

Further details of the matter are presented in the following letter sent to Mayor Van Wyck by George L. Rives, on behalf of the library directors:

NEW YORK, March 15, 1901.

*The Hon. Robert A. Van Wyck, Mayor, etc.*

"DEAR SIR: By direction of the Board of Trustees of the New York Public Library, Astor, Lenox and Tilden foundations, I have the honor to hand you herewith a copy of a letter which we received through our director, Dr. John S. Billings, from Mr. Andrew Carnegie, on the 13th inst., the day of his sailing for Europe.

"You will observe that Mr. Carnegie offers to bear the expense of building a large number of branch libraries, at an estimated total cost of \$5,200,000, provided the city will furnish the necessary land, and provided satisfactory arrangements can be made for the maintenance of these branches. There are no other conditions.

"I am instructed to say that, if the city authorities look with favor upon the general plan our Board of Trustees will hold itself in readiness to co-operate in every way possible in furthering the beneficent purposes which are the object of Mr. Carnegie's munificent offer.

"It is understood that Mr. Carnegie's offer is intended to apply to the entire city. The methods and agencies of administering branches in boroughs other than Manhattan and the Bronx may well be left to be settled hereafter.

"I am further instructed to say that in communicating Mr. Carnegie's proposal to our board Dr. Billings accompanied it with the following statement:

"In the conferences referred to by Mr. Carnegie the suggestions which I have made have related mainly to a free public library system for the boroughs of Manhattan and the Bronx.

"I have stated that such a system should include the great central reference library in 42d st. and Fifth ave., about 40 branch libraries for circulation, small distributing centers in those public school buildings which are adapted to such purpose; and a large travelling library system operated from the central building. Each of the branch libraries should contain reading rooms for from 50 to 100 adults and for from 75 to 125 children, and in these reading rooms should be about 500 volumes of encyclopædias, dictionaries, atlases and large and important reference books. There should be ample telephone and delivery arrangements between the branches and the central library.

"To establish this system would require at least five years. The average cost of the branch libraries I estimated at from \$75,000 to \$125,000, including sites and equipment. The cost of maintaining the system when completed I estimated at \$500,000 a year. The circulation of books for home use alone in these boroughs should amount to more than 5,000,000 of volumes a year, and there should be at least 500,000 volumes in the circulation department, with additions of new books and to replace worn out books of at least 40,000 a year.

"With regard to the other boroughs of greater New York I have made no special plans or estimates, but have said that about 25 libraries would be required for them.

"The following are some of the data which I have furnished Mr. Carnegie. The population figures are those of the last census:

"Boston, with 569,892 people has 15 branch libraries and reading rooms, and 14 delivery stations, and appropriates \$288,641 for library purposes, being at the rate of over 50 cents per head of population, and of about 2 5-10 one-hundredths of one per cent. on the assessed value of property.

"Chicago has 1,689,575 people, six branch libraries and 60 delivery stations, besides stations in the public schools, and appropriates \$263,397 for library purposes, being at the rate of 15 5-10 cents per head of population, and 7-100 of one per cent. of the assessed value of property.

"Buffalo has 352,387 people, and appropriates \$145,238 for library purposes, being at the rate of 41 cents per head of population.

and 5-100 of one per cent. on the assessed value of property.

"New York City (Boroughs of Manhattan and the Bronx) has 2,050,600 population, and appropriates \$183,935 for library purposes, being at the rate of 8 9-10 cents per head of population and 6-10 one-hundredths of one per cent. on the assessed value of property.

"Greater New York has 3,437,202 population, and appropriates \$299, 663 for library purposes, being at the rate of 8 4-10 cents per head of population and 8-10 one-hundredths of one per cent. on the assessed value of property.

"The contract made by the city of Buffalo with the Buffalo Public Library, under the provisions of Chapter 16 of the laws of 1897 of the state of New York, is worth careful examination in connection with the question of how best to provide for maintenance of a free public library system for New York City."

"I am, very respectfully yours,

G. L. RIVES, *Secretary.*"

The Buffalo arrangement referred to by Dr. Billings, is provided for by chapter 16, laws of 1897, state of New York. The city of Buffalo is authorized by its mayor to enter into a contract with the Buffalo Library for the proper care, maintenance, etc., of the public library and reading rooms, and to make all necessary appropriations for the same, and the common council of the city of Buffalo is authorized to raise annually, a sum not less than three one-hundredths of one per cent. and not more than five one-hundredths of one per cent. of the total taxable assessed valuation of the property of the city.

In an interview given on March 15, Dr. Billings said: "Mr. Carnegie's offer, if accepted, will result in the greatest free public library system in the world. We may fairly infer that Mr. Carnegie's idea is that the whole system should be under one management, that of the trustees of the New York Public Library, but this is not made one of his conditions.

"As to the question of sites, it is not improbable that a considerable number could be obtained without cost to the municipality through gifts by public-spirited citizens.

"It is of the greatest importance that the system of public schools in the city should be supplemented by such a system of free public libraries as is proposed, and the sooner that work can be commenced upon it the better it will be for the people and for the municipality as a whole.

"My estimate that it will take five years to provide and equip all the buildings necessary is probably a reasonable one, but if the matter is taken up promptly by the municipal authorities, it would seem as if this time could be shortened. No doubt there are some rather difficult questions as to details to be settled, but there are a number of very competent persons to settle them, and the interest of the great mass of the people, in every part of the

city, is so great in seeing that full advantage is taken of the opportunity now presented to bring free books almost to the door of every citizen, that we feel assured prompt action will be taken."

Mr. Rives, referring to the extent of the Carnegie offer, expressed doubt as to whether the New York Public Library trustees would include under their direction libraries outside the boroughs of Manhattan and the Bronx. He thought that "it would be very difficult for them to manage libraries in Brooklyn or Queens, and, as there are already excellent library organizations in those boroughs, it might prove better to arrange to have them administer any branch libraries that may be established there. The same is true of Richmond. The New York Public Library under its present organization can, if desired, attend to any new branches that may be established in Manhattan and the Bronx.

"As to the city, we have seen the mayor, and he authorizes us to say that he is most heartily in favor of the plan, and will do all in his power to carry out Mr. Carnegie's views."

There seems to be no question as to the power of the city under the law as it stands at present to accept Mr. Carnegie's offer. The University law of the State of New York provides for library maintenance by taxation, by popular vote, or "by action of a board of estimate or apportionment or other proper authority," and even should this not be sufficiently comprehensive, special legislation on the subject could doubtless be obtained, as in the case of Buffalo. Mayor Van Wyck has expressed himself as entirely in sympathy with the great development assured by Mr. Carnegie's gift, and recommends that the administration of the system be carried on for the boroughs of Manhattan and the Bronx by the New York Public Library, for Brooklyn by the Brooklyn Public Library, for Queens by the Queens Public Library, and for Richmond (Staten Island) by a central public library to be established. The effect of this gift upon the library situation in Brooklyn is also to be considered. Regarding this Prof. F. W. Hooper, a director of the Brooklyn Public Library, said:

"The Brooklyn Public Library has already established 15 branches in buildings rented for the purpose. Brooklyn needs at least 25 branch library buildings. They should be part of a general Brooklyn library system, with a single central library structure, to be erected by the city. Brooklyn is so large and so individual in character that she deserves a library system of her own. The Brooklyn Public Library, together with the Brooklyn Library, should form the basis of an organization of public library interests in Brooklyn, and the Carnegie branch libraries, together with existing libraries which are not directly connected with schools or institutions, should all be under the management of a Brooklyn library board."

## CARNEGIE GIFTS FOR ST. LOUIS AND ELSEWHERE.

SIMULTANEOUSLY with the news of Mr. Carnegie's monumental gift for the New York Public Library, announcement was made that Mr. Carnegie had on March 15 offered to give \$1,000,000 to St. Louis, Mo., for a public library building, provided that the city will contribute the site and appropriate \$150,000 annually for its support. An excellent site is already owned by the Public Library, and it would make a suitable location. Mr. Carnegie desires that half of the money be devoted to the erection of branch libraries throughout the city, and it is estimated that 15 excellent branches can be established for \$500,000.

Just previous to these two gifts, on March 13, Mr. Carnegie placed in trust with the Carnegie Company, of Pittsburg, the sum of \$1,000,000, the income of which is to be devoted to maintaining the libraries established by him in the mining towns of Braddock, Homestead and Duquesne, in the Pittsburgh region, Pennsylvania. In making this gift he said: "I have been giving the interest of \$250,000 to each of these libraries hitherto, and this will give a revenue of \$50,000 hereafter for the three. Braddock Library is doing a great work for the neighborhood, and requires more than Homestead. Homestead, on the other hand, will probably require more for a time than Duquesne, but I leave it to you to distribute the funds from time to time according to the work done or needed."

Further record of Mr. Carnegie's library gifts, mainly during the month of February, will be found elsewhere, in the department of "Gifts and bequests."

## OPENING OF THE NEWARK (N. J.) FREE PUBLIC LIBRARY.

THE beautiful new building of the Newark (N. J.) Free Public Library was opened to the public on the afternoon of March 14, when formal exercises were held, followed by a public reception in the evening. This building, which was erected by the city, at a cost of \$300,000 exclusive of its site, is one of the notable public library buildings of the United States, in its architectural dignity and especially in its practical adaptation to its purposes. Its general plan and characteristics were fully described, with illustrations, in the LIBRARY JOURNAL for February, 1898 (23:58-61), when the building plans were accepted, and though some modifications were later made, these plans were practically carried out.

The opening exercises were brilliant and interesting, and were attended by a large audience, including many library visitors from other cities. Mayor Seymour, of Newark, presided as *ex officio* chairman of the board of trustees, and the exercises opened with

prayer by Rev. L. Shreve Osborne, of Trinity Church. The keys of the library were then presented by the architect, John M. Rankin, to Chairman Duryea of the library building committee, who with a few words of congratulation, presented them in turn to Mayor Seymour. The mayor's address of acceptance was a brief review of the efforts by which the building was secured, an earnest prophecy of the future educational development it assured to the city, and an outline of the special features of the new building and the increased activities that it would create and foster.

Addresses followed by the speakers of the occasion. Hon. Cortlandt Parker spoke on "Books," touching upon libraries as "guest chambers where friends are waiting call," and emphasizing as the three chief ends of a public library:

"First. To supply material, through acquaintance with which men and women learn how to teach and influence others—to advance scholarship; nor only this, but to enable thoughtful men to educate themselves for eminence in art, science, discovery, invention, history, biography, constitutional law, philosophy, natural, mental and moral, astronomy; agriculture; everything which can contribute to the uplifting of humanity, not excluding undenominational religion, that they, in turn, may enlighten the world.

"Second. That it may induce every man and woman, though they eschew any thought of such eminence, to aim at self-elevation, in view of the happiness which elevated character bestows upon its possessor.

"Third. That it may tend to bring up and bring leaders in the state—not politicians—professional or not professional, but statesmen. These are the higher ends for which such institutions as this should be conducted."

Rev. Monsignor Doane gave an address on the influence of books, on character and life, citing many of the classics of literature. He was followed by Herbert Putnam, Librarian of Congress, who delivered the chief address of the day.

Mr. Putnam spoke on the scope and functions of the public library of to-day, laying stress upon the fact that the library must be classed among educational institutions, but that the demands it has to meet are far more varied and exacting than are those laid upon the ordinary school or institution of learning. He said in part:

"In the 1899 report of the Newark Free Library certain statistics are given covering the twelve years of its history. It had accumulated 76,000 volumes, secured 40,000 cardholders, issued over 3,000,000 books to its readers for home use, and expended nearly a half million dollars of the public moneys. These figures, it was added, 'give an idea of the extent of the influence of the library in this community.' An idea no doubt of the activities of the library, but I should be sorry

to think a measure of its 'influence.' For the influence of books, as the influence of art, is in general too subtle and too intangible to be tabulated or made matter of statistics.

"And still it exists; a particular service by the particular book, the influence of the collection as a whole. For a collection of books has a character. Its mere aspect, the atmosphere which envelopes it—but which, in fact, it itself creates—may in themselves be a lesson. Enter a library of Continental Europe and you enter a world apart from the world of business and of present affairs. An atmosphere sedate, serious, dignified; an atmosphere of refinement, an atmosphere of weight and of leisure. Justly, for it is charged with the life—and the death—of five thousand years. Five thousand years are an age not to be hurried; the judgment of five thousand years is deliberate. The reader who invokes it must be content himself to be deliberate. Its very reticence is a lesson. It is the reticence of the past, now dead. That it has lived, and yet died, may itself be the most useful, the most practical lesson.

"In contrast with this austerity, this reluctance, is the aspect of the typical American free library of to-day; vivacity, cheerfulness, a very ostentation of facilities, a willingness almost aggressive. Above all, a lively sense of the present. It is the present which is to be dealt with—attracted, encouraged, informed, stimulated; in particular, attracted and encouraged. We would not willingly spare this spirit, and with it the sympathy for the ordinary need, the hospitable recognition of that which is new and fresh and touches the present nearly. This is the service which awakens, promotes. But there is also the other service of books, which is, to temper and to modulate; and of a library, which is to restrain the over-impetuous acceptance of new fancies and of new doctrines by a reference to the truths that have been tried, by suggestion of an accumulated experience, the deliberate judgment of the past. A library that does this, and every library in proportion as it does this, stands for a conservative influence in the community. This influence also cannot be spared. In a democracy over-urged already with incentives to mere 'progress,' it may be the influence most needed. It also should belong to a library which has chosen for its home a structure of design so serious, so temperate, so dignified, as this.

"Which is not to imply for any public library a function either grim, dogmatic or pedantic. The Smithsonian Institute which exists for the diffusion of knowledge—particularly of scientific knowledge—is to have a children's room, in which the exhibits will not teach the child anything useful, but only 'set him wondering.' Similarly, with a building such as this, equipped for varied service, we may safely promise every appeal

to the fancy and imagination which the printed word and the art of the illustrator, in the hands of skilled attendants, can be made to render."

Dr. James H. Canfield, of Columbia University, gave a short stimulating address on the opportunities opening before libraries in the twentieth century. Frank P. Hill, librarian of the Newark Free Public Library, closed the exercises with an address, in which he spoke of the building as an institution "of the people, for the people, and by the people," and touched upon the harmony of plan and aim that had prevailed between the architects and the library authorities. In the methods of other days, he said, the building was a matter which concerned the architects alone. The library of to-day, however, was planned by those in control of it, so that it might be best suited to its purpose, and then the plans were submitted to the architects. He said that the building was architecturally beautiful, but that its beauty meant more than mere architecture. It was the symbol of its use. The building was merely the storehouse of the treasure. He also referred to the attractive features of the library, speaking of the collection of 250 original drawings loaned by Charles Scribner's Sons, now on exhibition. He also mentioned and described the children's room, the delivery room, the reference rooms and the reading and newspaper rooms, touching briefly on the methods of administration.

In closing Mr. Hill said: "There is one thought to have as men and women trying to elevate the community. Culture by self-education comes by the means offered by the public library, one fountain of intellectual life which cannot be exhausted. I hope for an interest which will make the library a vital force in the community."

After the exercises the audience dispersed about the building to inspect and admire its beauties, and throughout the evening it was thronged with interested visitors. The library was open for public use on the following day. The task of removing the 75,000 volumes from the old building to the new had been in process for a week before the opening, and had been successfully carried out. For this removal several hundred boxes, with handles at the ends, each box just large enough to take a shelf full of books, had been made beforehand, and into these the books were placed, in the order they were taken from the shelves. One set of boxes was filled at the old library, while a second was on its way to the new building in the vans, and attendants at the new building were unpacking and placing on the shelves there the contents of a third set of boxes, so that when the moving was over the books were all in place in the new shelves. From 20 to 30 books were placed in a box, and each van load contained from 60 to 80 boxes.

"LEAD US NOT INTO TEMPTATION:"  
OPEN SHELVES AND PUBLIC  
MORALS.

I SENT a paper to the conference of the American Library Association at Montreal, in which the following sentences occurred: "There should be sympathetic attendants in every children's room to help children and guard the property. Contrivances should also be adopted which will keep them under observation for a considerable time when leaving the room. It would be foolish to establish reform schools for delinquents and at the same time engage in the work of making delinquents."

The statement was made strong so as to call attention to what must be regarded as a real evil.

I have just read the closely-reasoned paper of Isabel Ely Lord, librarian of Bryn Mawr College, in the *LIBRARY JOURNAL* for February, entitled "Open shelves and public morals."

I am struck with Miss Lord's power of analysis, skill in elimination and other features of good argumentation and with her carefulness to be fair, but fear that she has reached a wrong conclusion. One rises from reading her paper with the conviction that she thinks that the responsibility for exposing before children large numbers of books which they would like to own without exercising considerable supervision to check them if they show a disposition to steal them, is quite small and need not be much considered.

I fear that there are many children who are strongly tempted in the presence of interesting books; experience shows this to be the case and, as Miss Lord says, public property is not regarded with the sacredness of private property. Now if children have formed the habit of thieving or are weak and liable to yield to temptation, I think that efforts should be made to keep them from yielding to temptation and help them to reform if the bad habit has been formed.

There should be supervision. A gentle, sympathetic woman can do a great deal of good in helping to strengthen children in right doing, and such a person should be at hand in a children's room. This supervision should be unostentatious; the great body of children need not be aware of its existence. Still when a person inclined to steal looks around (as such a person is sure to do) to see if circumstances are favorable, he should find the eye of an attendant upon him.

Miss Lord would have a library like a school in its attitude towards children.

Is not that the thing which I am pleading for? A very large portion of the time of a good teacher is employed in strengthening good habits and in overcoming bad habits of children. That is the work which I want from an attendant in the children's room.

In a large library an attendant is needed, if for no other reason, to keep the books in

their proper places so that they may be found in the use of the catalogs, and that person can often do the work of supervision. In a small library the person who charges books may be able to exercise supervision. The person who does this work in any children's room can have other light work assigned to her which she can do in considerable amounts.

Not only am I afraid that readers will get from Miss Lord's paper the impression (which I am sure she does not mean to give) that this matter of placing temptation before children and not helping them to overcome it is a small thing, but I am convinced that the remedy which she seems mainly to rely on to prevent stealing is wholly impracticable. Do not watch the children, she seems to say, even unostentatiously, but when you happen to detect an instance of stealing, deal very severely with the offender and give great publicity to the case.

I fear that Miss Lord has had very little experience in bringing library offenders to merited punishment. Suppose it to be perfectly plain that a boy or girl has been stealing and you decide that it is best to have him brought before the police court for punishment. You declare your purpose to treat the case in this way. First his mother comes to you to get him off; you may be obdurate after a painful scene. Then the boy's priest or minister comes to you. He says, perhaps, "It is right in you to threaten the boy and frighten him, but you do not intend, of course, to bring him into court and blight his prospects?" Then a trustee of your library is approached, and you are asked by him if you are not going too far. You may be sure, too, that the community will not sustain you in severe punishment of children, and a public library is dependent on the community for its support. Then again in the case of the small children who frequent children's rooms the punishments adapted to older persons are not desirable.

It is better to use quiet, gentle measures to prevent crime and reform juvenile criminals in library work, than to resort to the severe public punishments advocated by Miss Lord. As I show in my own library and as I have always shown in public utterances, I am in favor of a large amount of freedom in admission to the shelves, but in the interest of having that plan continue in favor I advocate the use of common sense and some expense, if necessary, in preventing scandals which are likely to render the system obnoxious to right-minded persons. Let us then work earnestly to keep from leading little ones into temptation and to deliver them from evil.

SAMUEL S. GREEN,  
*Worcester Public Library.*

THE communication of Mr. Green has pointed out to me a serious piece of carelessness in the paper of mine to which he refers. I did not in the least intend to advocate the

severe punishment of children, the dragging of infants into the police-court. When I said "Leniency is sometimes wiser than punishment" I should have stated clearly that special and lenient methods were always best with children. I certainly meant that. My excuse, which I do not claim to be a justification, is that there were a great many limiting sentences to be put into one paper. I could, however, hardly expect a reader to know that I included children in the first part because I was there dealing with a general principle, and excluded them in the latter because I consider that special methods must be employed in the children's room in the application of principle. I can only say that as regards punishments I was not considering the children.

Having thus publicly confessed my carelessness as to the one fact, I must be allowed to insist on my main contention. Mr. Green's courtesy toward me only makes more evident the difference between his knowledge and experience and my own, yet if I am right in believing that we should all of us have clear reasons to give for the faith that is in us, I cannot change my opinion until my reasons for reaching it are proved false or inconclusive. And I hope Mr. Green will pardon any presumption in what I may say.

"There are many children who are strongly tempted in the presence of interesting books," says Mr. Green. I grant it. And again he says that the assistants in the children's room should be employed "in strengthening good habits and in overcoming bad habits." That is exactly what I am pleading for, and where I take issue with Mr. Green is as to the method. He thinks a woman can be "sympathetic" to the children and still watch them in a surreptitious way. I do not. He thinks that keeping an eye on them will guide them into the paths of virtue. I think the chances are much better if you let children know that you trust them. I repeat the axiom that the only school for the voter is the ballot-box. This does not mean license for the children, but liberty. It does not mean that they are to be turned loose to do as they choose in the room assigned to them; it does mean that the person or persons there to help them must have the attitude of a helper and in so far of a teacher, not that of a spy. I repudiate utterly Mr. Green's implication that a good teacher uses the spy-system in any form. Let him ask his neighbors at Clark University if they approve such an attitude. The library should help children, as it helps men and women, to "grow strong and flourish" mentally and morally. One gains strength of any faculty by using it. Let the children use self-restraint and thereby learn it. Help them in the most effective way you can—and that is by true sympathy which expects good instead of suspecting evil. And children know what one's attitude toward them is.

ISABEL ELY LORD,  
Bryn Mawr College Library.

## THE STATE LIBRARY AND THE STATE.

*From the Report of the New Hampshire State Library, 1898-1900.*

IN the many years of its existence, a state library though it has been, this institution has practically been more a club library for the legal profession. Our point of view as to the purposes of its existence is much broader. Owing a duty to the bench and bar, which must be acknowledged, we also owe, and are attempting to perform, a duty to the citizens outside of the legal profession: to the farmer, to the student of history, to the medical man, to the ecclesiast, to the architect, to the mining, the mechanical, and the sanitary engineer, to the scientist, to the artist, and to the artisan. For it is the library of all, supported by the taxation of the whole state rather than by a divisible portion thereof.

In fact, this duty which we recognize that we owe to the state at large logically suggests a further step in advance in matters pertaining to the administration of the library system of the state. The fact that the public library system, supplemental to the public school system, is now a necessary concomitant of the latter in the proper educational preparation of the citizen for the duties which he owes as such, is already *res adjudicata*. The progressive library laws of this state recognize and enforce this idea. In the efficient administration of our public school system, we have found it necessary to centralize, to establish a bureau having a general supervisory influence over the local schools. Analogously, this system should apply to the public library movement. In short, it is the conviction of the trustees that the state library should bear to the local public libraries the same relation that the state superintendent of public instruction does to the local schools. The sphere for good work is enormous. There should be an officer, a state superintendent of public libraries, connected with the state library, and appointed as the state librarian is appointed, having in charge this important work. He could do a vast amount of good work, among the smaller libraries especially. Like the state superintendent of public instruction, he could go about the state holding library "institutes," counselling and advising the administrative officers of the rural libraries, furnishing information as to books, methods, classification, and other matters of library economy, possibly adjudicating disputes as to library sites, making himself, in short, the guide, philosopher, and friend of every local library. He could edit a state library bulletin, which might take the place of the expensive technical periodicals devoted to library economy, besides serving as a supplement to the printed catalog, and being, as the latter will be, a model to be followed by the local libraries. Of course, the usefulness of such an officer to the large city libraries is somewhat questionable. They, however, are well qual-

ified to take care of themselves generally. But the overwhelming majority of our public libraries are small institutions, without the resources to employ the services of a professional librarian. These are the ones which now suffer from neglect. The flourishing city libraries, with the means at their disposal, can afford to send their librarians or trustees to a distant conference of a library association; the small country library may not because it cannot afford the expense. And it is this struggling rural library which must be content with a non-professional librarian—the very one who needs the benefits derived from the conferences. They do not possess those advantages and that knowledge of the best methods of which their collaborators, the school teachers, enjoy and obtain at their district “institutes.”

This recognition of the natural relation of the state library to the public library must come in time; we trust in New Hampshire first of all. For this grand old commonwealth has ever been a pioneer in the library movement. It is fitting and proper that the state which instituted the first state library, which granted the first act of incorporation for a state library association, which passed the earliest law permitting taxation for library purposes and the first law making such taxation compulsory, the home of the first free public library in the history of education—in brief, the first state to recognize the proper functions and relation of the public library to public education, should be the first to put in operation a system soon to be universally adopted throughout the states, as we believe.

#### PHOTOGRAPHIC EXHIBITS IN PUBLIC LIBRARIES.

*William E. Foster in Photo-Era, February.*

A MODERN public library building lends itself readily to the effective exhibition of photographs and other pictures. As a specific instance, the experience of the Providence Public Library may be cited, though it should be remembered that the conditions here described, are reproduced in one way or another, in the library buildings of other cities.

The new building of the Providence Public Library was opened to the public in March, 1900, and is a very commodious one, containing 27 rooms of various kinds (exclusive of the stack stories and basement rooms), and comprising a total area of more than 11,000 square feet. The pictures are shown in the lecture room, which is a well-lighted room, about 41 x 37 feet, at the eastern end of the second story, and is entered directly from the corridor of the upper hall, through double fly-doors. Of the four walls of this nearly square room, two are provided with book-cases, rising seven feet from the floor, and having a capacity of about 2000 volumes.

These two walls are pierced by seven large windows, which admit the light in a very abundant and very favorable manner, for the other two walls which contain the pictures.

A very effective background for the pictures has been chosen, in a maroon-colored burlap, admirably harmonizing with the mahogany finish of the room. This burlap is tightly stretched and pasted over a board backing, the boards being laid up “three ply,” since it is found that this method very effectually prevents them from warping. The burlap forms a strip about seven feet high from the floor, extending nearly the full length of these two sides of the room—about 70 feet in all. On one of these walls it is capped by a moulded cornice of mahogany, serving as a base for the electric lighting. The suggestion of burlap, for the purpose described, is to be credited to the Boston Public Library in its art room, though the method of applying it is somewhat different in the two libraries. To the Boston Public Library also should be credited the very successful method of hanging the photographs, most of which are mounted, but unframed.

Eight parallel rows of quarter-inch brass rods extend along the entire length of both walls, and the photographs are hung from the rods, by means of the ingenious contrivance called “the bull-dog hook.” There is a uniform distance of six inches between the rods (the lowest one being about three feet from the floor); and this secures the greatest elasticity in arranging and rearranging the space, allotted as it is to pictures which are not always of uniform size. In this way, five pictures are sometimes hung one above another, although the usual number is three. There is scarcely less elasticity and economy of space in the horizontal arrangement, for the small brass sockets which hold out the rods at a distance of about half an inch from the wall, and which occur at intervals of about six feet, present not the slightest interruption to the picture-books, which slide, either between them or over them. The “bull-dog” hook, as is well known, is a small nickel-plated hook, the upper part being curved, and passing over the rod, while the lower part clutches the top edge of the photograph, at a distance of about one inch below the rod, after the manner of a clothespin.

The artificial lighting of the room is scarcely less satisfactory than the natural lighting. It is chiefly by groups of electric lights near the ceiling, but reinforced, where needed, by a series of curving brackets, at frequent intervals, projecting over the cornice, just above the pictures, as well as over some of the book-cases. This cornice projects a little more than eight inches from the wall, while the tip of the electric light projects 17 inches. In order to render the arrangement of the pictures more effective, by classifying and labelling them, a narrow frieze (about an

inch and a half in width) has been provided just above the pictures, for inserting labels or descriptive signs.

The average length of time for which each exhibit has been shown is three weeks; and a dozen have thus been provided during the past 10 months. The photographs have included loan collections on Rome, Florence, Venice, Amsterdam, Alaska, the White Mountains, the Alps and a notable collection on the islands of the Pacific Ocean. In the intervals between these loans opportunity has been taken to show some of the treasures of the art collection belonging to the library itself, including reproductions from photographs of Colonial architecture, antique pottery, textiles and lace. . . .

Each exhibit has been carefully announced to the public, by bulletin-boards in the halls and on the outside of the building, and also in the columns of the daily newspapers. As the library has a regular weekly department in each of these papers, the exhibits are of course mentioned there from time to time, but in several instances, in addition to this, special articles describing the photographs have been prepared and published. The exhibit is invariably one which comprises not only the views but also "the literature of the subject"; and the books occupy the shelves adjacent to the collection of views, with lists of references, both printed and written, and can be taken out by any reader who wishes. In a conspicuous place, near the entrance, are posted the maps of the region which is illustrated.

As is indicated by the name which it bears, this is a lecture room, as well as an exhibition room; and it is accordingly supplied with seats for an audience of more than one hundred (the seats being movable chairs which can be rearranged or taken away entirely), and also a platform for the speaker, an adjustable bookstand for large folios, and all necessary apparatus for showing lantern-slides. The educational value of exhibits like these is very great, not only when used in connection with a study club, or class, but when showing geographical or art subjects which have an intimate connection with the school studies. In the work of the library, the art courses of the Rhode Island School of Design are closely followed; and the lace and textile illustrations above referred to were exhibited as a part of this co-operative work.

Such a room as this may well be the chief place in the building for exhibiting and caring for pictures, yet it should not be the only place. Collections of photographs, as the permanent property of the library, should be classified, stored and consulted in the art library. Framed photographs may also be collected to be circulated like books. In the work of the children's library, photographs and other pictures are constantly available for use; and no one can have failed to notice that the interest in amateur photography is

every year becoming more prevalent among young people. Among the especially interesting sights in the children's library at Providence, during the past few months, has been an exhibit of home-made cameras, made by boys, together with some of the photographs taken with them.

### THE PUBLIC LIBRARY OF TO-DAY.

*From the 18th (1900) Report of the Dover Public Library.*

THE people's library of to-day is a broad educator, and as such, it goes outside the field occupied by the public school or the church. Here every student may come; here the school-master, the preacher, the professor, the public speaker, the writer and editor. Here is material aid for all persons called upon to impart knowledge to others, or influence the thinkings and opinions of the public. But this is not all. It reaches and benefits many who are too old to attend school. It is effectual where other influences falter, and helps those who are compelled to devote the hours of daylight to labor for the support of themselves and those who depend upon them. It has placed in the hands of thousands of toilers, not only books which solace the intervals of labor, but those which put new meanings in the toil and new life in the toiler by disclosing its principles; facilitating its improvement; lighting up its relations with other work, and remote workers. As an educator the public library has come to occupy a field peculiarly its own, and its worth cannot be overestimated. It makes knowledge democratic and for the multitude. It is bringing about an openness of mind, and is infusing sweetness, strength and good sense into common life.

### BOOK POSTAGE FOR LIBRARY BOOKS.

THE United States Post-Office Department, through the Third Assistant Postmaster General, has made public a ruling which admits to book postage rates library books containing written marks which are a part of the official records of the library. The ruling holds: "That a shelf number, or a date, or both, and any mark for designation which may reasonably be construed as an 'inscription' in the limited sense of a permanent office record of the library, in this connection, may be added in writing, to library books within the interpretation of the word 'inscription,' which is underscored in the above quotation, without subjecting such books, when passing in the mails, to the letter rate of postage." This decision, which is important to all libraries sending books through the mails, was secured largely through the efforts of Dr. J. H. Canfield, of Columbia University Library, J. M. Whitney, of the Boston Public Library, and others interested.

## WHAT IS THE PUBLIC LIBRARY FOR? LIBRARIES IN CANADIAN LUMBER CAMPS.

\*F. M. Crunden in *The Library*, January, 1901.

WELL, what is the purpose of all human activity: What is the object of all man's toil and endeavor? What has been achieved by human labor through countless centuries? The individual aims at personal happiness; but unconsciously he works for the development of character. In lowly life he fights for a livelihood: in higher stations he contests for a career: in all ranks the last and highest outcome is character. Society struggles blindly along the upward path of evolution. Consciousness of humanity is a recent inchoation, an embryo of late creation. Its development, with all the beneficent results therein promised depends on popular education—not on the ascent of the favored few to loftier heights, but on the lifting up of the great mass of humanity to an understanding of the significance of life, individual and social.

For this work there is no such effective agency as the public library. What the varied activities of the world are unconsciously and indirectly doing, the public library is directly and consciously hastening. Through it the pages of history teach to the present—to all who have the making of the future—the lessons of the past. It brings the ignorant into contact with the sage; its biographies of saints and heroes fire the youthful mind with a lofty ambition, a noble enthusiasm; its silent, but eloquent, teachers accompany their thousands of pupils into the privacy of their chambers and talk to them on the most sacred subjects and in their most susceptible moments, and instill into their minds and hearts high ideals and pure sentiments that could find entrance at no other time and through no other channel.

This is the work of civilization. And we librarians should congratulate ourselves that we are thus engaged in the highest work that falls to the lot of man to do. How shall we do it? How shall we be true to our opportunities? By devising or adopting the best charging system, by perfecting our catalogs, by securing beautiful buildings? Yes, these things we must do; but we should never forget that these are but means to an end—and not the most important means. The mechanics of librarianship must not be allowed to usurp the place of its spirit. Methods count for less than culture; and the qualities essential to the highest success are enthusiasm, sympathy, tact, and self-devotion. A board and librarian possessing these characteristics will soon adopt or develop good methods, and, within financial limitations, will achieve the end and aim of a public library—the intellectual advancement and the moral betterment of the community. The public library also promotes material prosperity; but that, again, is only a means to an end, the end and object of all human endeavor—a higher social order and a purer, happier people.

"LIBRARY extension in Ontario: travelling libraries and reading camps" is the title of a small pamphlet issued for Alfred Fitzpatrick, of Nairn Centre, Ontario, Canada. It is devoted to an account of, and appeal for, the work undertaken by Mr. Fitzpatrick and others interested, of establishing reading camps and developing a system of travelling libraries among the stations of the great lumber companies in the province of Ontario.

The movement began in September, 1900, when application was made to the Little Current Public Library, in the center of a lumbering region, requesting that that library be permitted to send small branch libraries to lumber camps in its vicinity. The library board agreed to the suggestion, and circulars were forwarded to the leading lumber firms of the province, with the recommendation "that a travelling library commission be appointed and a sum of money be appropriated by the Ontario government with which to purchase books, and that in the meantime, to assist in meeting present needs, all public library boards be allowed to send small collections of books into the camps." The proposal met with general approval, and the Department of Education has given its support to the work, which has so far been mainly experimental and is looked upon only as a step toward a provincial system of travelling libraries to be conducted through the Department of Education.

As a beginning camp libraries were established in three lumber camps, to which small collections of French and English books were sent from the Nairn Centre Public Library; for another camp one of the McGill University travelling libraries were secured. "Several weekly and daily papers, including *La Presse*, one of the leading dailies in the French language, have been subscribed for the exclusive use of the reading shanties. Many illustrated magazines have been received from friends. One-syllable editions of 'Robinson Crusoe,' 'Swiss family Robinson,' and 'Pilgrim's progress' are being given to those who cannot read, and they are being urged to improve their spare moments and ask help from the nearest neighbor. If the funds will warrant it prizes will be offered for the men who, being unable to read or write the English language, will in the course of the winter acquire either art. Branch libraries are also being circulated in a few camps where there are no reading rooms. In this way nearly 600 men in this vicinity will have the advantage of a good public library."

Mr. Fitzpatrick dwells upon the great value of this phase of "library extension," in the monotony and narrow interests of the lumberman's life; and prints extracts from many letters expressive of interest and sympathy. The pamphlet also includes views of the reading shanties already established.

## ONTARIO (CAN.) LIBRARY ASSOCIATION.

THE first meeting of the Ontario Library Association will be held in Toronto, Monday and Tuesday, April 8 and 9. The program will contain, among others, the following papers and addresses: Chairman's address, James Bain, Jr., Toronto Public Library; Canadian literature, a Poetry, C. C. James, Deputy Minister of Agriculture for Ontario; *b* History, H. H. Langton, University of Toronto Library; *c* Fiction, "Seranus" (Mrs. S. Frances Harrison); Travelling libraries, Prof. A. B. MacCallum, Canadian Institute, Toronto. Further announcements will be made later by the secretary, E. A. Hardy, Public Library, Lindsay, Ont.

## ORGANIZATION OF LIBRARY OF CONGRESS, 1901-2.

THE legislative, executive and judicial appropriations bill passed by Congress immediately prior to the close of the recent session makes provision for the administration of the Library of Congress for the fiscal year ending June 30, 1902, as outlined in the estimates submitted by the Librarian of Congress. The force is increased by 26 new positions, of which 21 are in the Catalogue Division. They are as follows: one assistant at \$1800, one assistant at \$1500, one assistant at \$1400, one assistant at \$1200, three assistants at \$1000 each, two assistants at \$800 each, six assistants at \$720 each, two assistants at \$600 each, four assistants at \$480 each. In the Copyright Office provision is made for four additional clerks, two at \$1400 each and two at \$800 each, and in the Law Library one extra assistant at \$1200 is provided for evening service. Most of these new positions will probably be filled by promotion, or by assignment of persons who have been doing temporary work, so that the list as given does not indicate precisely the salaries and positions to be filled by original appointment. The increase of force granted in the Catalogue Division is six less than was asked in the librarian's estimate, the reduction being made in the higher-salaried positions.

In general the appropriations are the same as last year, no new departments being created and no special increases made in salaries. For the purchase of books \$60,000 is provided, instead of the \$50,000 allotted last year, and the appropriation for exchanges of public documents is raised to \$1800 instead of the former \$1680. For "miscellaneous and contingent expenses" \$7300 is regarded as sufficient, as against \$8500 for the year preceding.

The provision for the opening of the Library of Congress on Sundays from 2 to 10 p.m. failed of passage, and is not included in the bill. This was presented as an amendment to the measure, on behalf of the District, and called for an extra appropriation of \$12,000.

## A LIST OF "BEST NOVELS."

THE Springfield (Mass.) City Library has prepared a list of "One hundred of the best novels," for distribution among readers. It is accompanied by the following introduction:

"This is a list of one hundred of the best novels. It does not profess to be a list of the hundred novels which are the best among all ever written. Such lists have been often made. One in the *World* almanac for 1890 was the result of much voting by the readers of the *World*. It was interesting, but would not please you any better than this one. The same can be said of the list compiled by an eminent literary authority in the same almanac for 1895. The excellence of a novel, like that of any other work of art, is very much a matter of personal taste. The novels in this list are all good. You will not find it easy to name another hundred as good. Most of them are pleasant to read. Problem stories, morbid stories, distressing analytical studies, tearfully sentimental stories have for the most part been purposely omitted, tho' thereby some of the strongest of novels were rejected. Novels in foreign languages lose so much in translation that not many can well be admitted into a list which is confined to books in English. One who has not read a good part of the books in this list, or has not read something from most of the authors represented in it, has much to learn about the pleasures of novel reading."

### ONE HUNDRED OF THE BEST NOVELS.

- Allen. Reign of law.
- Austen. Pride and prejudice.
- Sense and sensibility.
- Balzac. Cousin Pons.
- Eugenie Grandet.
- Magic skin.
- Barrie. Sentimental Tommy.
- Tommy and Grizel.
- Besant. All in a garden fair.
- and Rice. Ready-money Mortiboy.
- Black. Princess of Thule.
- Blackmore. Lorna Doone.
- Brontë. Jane Eyre.
- Buchanan. Shadow of the sword.
- Bulwer. Last days of Pompeii.
- Last of the barons.
- My novel.
- Burnett. De Willoughby claim.
- That lass o' Lowries.
- Collins. Moonstone.
- Woman in white.
- Cooper. Deerslayer.
- Pilot.
- Spy.
- Craik. John Halifax, gentleman.
- Crawford. Mr. Isaacs.
- De Foe. Robinson Crusoe.
- Dickens. David Copperfield.
- Nicholas Nickleby.
- Tale of two cities.
- Doyle. The refugees.
- Dumas. Chevalier de Maison Rouge.

Dumas. Count of Monte Cristo.  
 — Three musketeers.  
 — Twenty years after.  
 — Vicomte de Bragolonne.  
 Eliot. Adam Bede.  
 — Middlemarch.  
 — Mill on the Floss.  
 — Romola.  
 — Silas Marner.  
 Frederic. The market place.  
 Gaboriau. Lerouge case.  
 Gaskell. Cranford.  
 Goldsmith. Vicar of Wakefield.  
 Grant. Unleavened bread.  
 Hardy. Far from the madding crowd.  
 — Tess of the d'Urbervilles.  
 — Under the greenwood tree.  
 Hawthorne. House of the seven gables.  
 — Marble faun.  
 — Scarlet letter.  
 Holmes. Elsie Venner.  
 Howells. Modern instance.  
 — Rise of Silas Lapham.  
 Hughes. Tom Brown's school days.  
 Hugo. Man who laughs.  
 — Les miserables.  
 — Toilers of the sea.  
 James. Portrait of a lady.  
 Kingsley. Hereward.  
 — Hypatia.  
 — Westward hol  
 Kipling. Captains courageous.  
 Lever. Charles O'Malley.  
 Lover. Handy Andy.  
 Macdonald. David Elginbrod.  
 Marryat. Peter Simple.  
 Melville. Typee.  
 Meredith. Beauchamp's career.  
 — Diana of the Crossways.  
 — Ordeal of Richard Feverel.  
 Oliphant. Salem chapel.  
 Page. Red Rock.  
 Parker. Seats of the mighty.  
 Reade. Cloister and the hearth.  
 — It is never too late to mend.  
 — Peg Woffington.  
 Sand. Snow man.  
 Scott. Heart of Midlothian.  
 — Kenilworth.  
 — Old Mortality.  
 — Quentin Durward.  
 Stevenson. David Balfour.  
 — Dr. Jekyll and Mr. Hyde.  
 — Kidnapped.  
 — Master of Ballantrae.  
 — Treasure Island.  
 Thackeray. Henry Esmond.  
 — Newcomes.  
 — Pendennis.  
 — Vanity Fair.  
 Tolstoi. Anna Karenina.  
 Trollope. Phineas Finn.  
 Turgenev. Fathers and sons.  
 Twain, Mark. Tom Sawyer.  
 — Huckleberry Finn.  
 Ward. Eleanor.  
 — Marcella.  
 Weyman. Under the red robe.

## American Library Association.

*President:* H. J. Carr, Public Library, Scranton, Pa.

*Secretary:* F. W. Faxon, 108 Glenway st., Dorchester, Mass.

*Treasurer:* G. M. Jones, Public Library, Salem, Mass.

*23d General Meeting:* Waukesha, Wis., July 3, 1901.

A. L. A. PUBLISHING BOARD.

PRINTED CATALOG CARDS.

Printed cards have been issued for the following:

U. S. National Museum reports, 1895-97. 50 c.

— bulletin. \$1.02.

U. S. Bureau of Ethnology reports. \$1.73.  
 Depew, C. M. 100 years of American commerce. \$2.03.

N. Y. State Museum bulletin. 54 c.

Liber scriptorum. \$1.52.

Smithsonian Institution reports. \$6.31.

Smithsonian Institution miscellaneous collections. \$2.40.

American Association for the Advancement of Science. Addresses of the vice-presidents. \$3.49.

American Historical Association papers. \$1.13.

American Historical Association reports. \$3.14.

Old South leaflets. \$1.61.

Shaler, N. S. United States of America. 48 c.

Cards for the following are in preparation:  
 Mass. Historical Society collections.

Smithsonian Institution contributions to knowledge.

U. S. Bureau of Education. Circulars of information.

U. S. Special Consular reports.

## State Library Commissions.

IDAHO LIBRARY COMMISSION. On Feb. 23 the state legislature passed a bill establishing a travelling library system for the state and creating a state library commission. The measure passed the state Senate on Feb. 20 by a unanimous vote, and on the 23d it was acceded to by the House with but one dissenting vote. It was prepared and presented under the auspices of the women's clubs of the state, among which the Women's Columbian Club of Boise was most active in its support. The bill provides for a state library commission of three, two of whom shall be women. The appointment of a secretary is authorized; \$3000 is appropriated for purchase of books for the next two years, and \$3000 for commission expenses and secretary's salary.

IOWA LIBRARY COMMISSION: secretary, Miss Alice S. Tyler, State Library, Des Moines.

The commission has issued the first number

of a periodical bulletin, dated January (16 p. il. O.). It is devoted to record of the work planned for library development in the state, including a paper on aid to readers by Miss Margaret Mann, local items of news, the text of the state library law, short reading lists, and other useful material.

Announcement is made that a summer course in library training will be conducted as a department of the summer session of the Iowa State University, at Iowa City, under the auspices of the state commission. The course will continue for six weeks, from June 17 to July 27. It will be under the direction of Miss Alice S. Tyler, secretary of the commission, and Miss Crawford, of the Dayton (O.) Public Library will give daily lectures on technical subjects. Lectures will also be given by members of the state university faculty, state library commission, and others.

The course is intended especially for librarians who are in charge of small libraries. Those who have had some experience in library work, or wish to prepare for definite positions, will therefore be given preference. If the limit is not reached by these, others may be admitted. The requirements for admission are at least a four years' high school course or its equivalent.

In addition to the regular summer school tuition of \$5, there will be the cost of library material necessary for practice work and the necessary text-books, which will not exceed \$10. Applications should be sent in before May 1, 1901, to Miss Alice S. Tyler, State Library Commission, Des Moines, from whom further information may be secured.

**VERMONT FREE LIBRARY COMMISSION:** Miss Charlotte Gibson, secretary, Fletcher Memorial Library, Ludlow, Vt.

Miss Charlotte Gibson, librarian of the Fletcher Memorial Library, Ludlow, Vt. has been appointed secretary of the Vermont Free Library Commission, succeeding Miss M. L. Titcomb, now in charge of the Washington County Free Library, Hagerstown, Md.

## State Library Associations.

### CONNECTICUT LIBRARY ASSOCIATION.

*President:* Henry M. Whitney, Blackstone Library, Branford.

*Secretary:* Miss Anna Hadley, Ansonia Library.

*Treasurer:* Miss Jennie P. Peck, Silas Bronson Library, Waterbury.

The annual meeting of the Connecticut Library Association was held at Hartford on Feb. 27. There was an unusually good attendance; among visitors from outside the state being J. C. Dana, of the Springfield (Mass.) City Library, with Mrs. Dana; and Miss Medlicott, Miss Ashley and Miss Farrar, of the Springfield library force.

The morning session opened at 10.30 in the

state library, the first paper being on "The Connecticut State Library and some of its treasures," by state librarian Geo. S. Godard. This was a review of the growth of the library, from the appointment of the first state librarian, J. Hammond Trumbull, in 1854, and an outline of the plans now contemplated for making the collection more useful. The special strength of the library is in its collection of English and American law, and "in the matter of the history of English constitutional law, hardly a better collection of original material can be found outside of London, and the university centers of Great Britain." In state publications, even for its own state, the collection is imperfect, though "beginning in 1850, the Connecticut documents, as bound for international exchange, is complete. The Pequot Library at Southport contains one of the best collections of Connecticut publications to be found." Mr. Godard added: "The archives of the state, as is well known, are not confined to state records and the various manuscript volumes in the office of the secretary of state. There is a great quantity of papers upon various matters which have been accumulating since the settlement of the colony. About 40,000 of these, mostly before 1790, which were by the authority of the General Assembly pasted into large folio volumes, have been deposited in the library. These 122, containing so many thousands of documents, together with many similar papers unmounted and unarranged pertaining to the history of the state, to the history of every town and nearly every ancient family of the state, are now stored in numerous wooden cupboards in the library. Of all the treasures of the state, these manuscript archives are most precious."

"Editions of Connecticut laws" was the subject of a paper by Albert C. Bates, of the Connecticut Historical Society, who described chronologically and bibliographically methods of printing and distribution. "Methods of evaluating children's books in fiction and science" were treated in a joint paper by Mrs. Evelyn Lane and Miss Ida Farrar, of the Springfield City Library, who described the efforts made in this direction in the Springfield library.

The afternoon session opened at two o'clock in the Hartford Public Library. The first topic was "Library hours and vacations," introduced by Charles D. Hine, of the state library commission, who gave comparative statistics from 72 libraries on these points as a basis for discussion. His figures showed that the average number of hours a week for an assistant in a large library is 45. In the discussion, Miss Anna G. Rockwell, of New Britain, made a strong plea for no longer hours than these, saying that a librarian in order to be worth anything must have time to grow and to read outside library hours, to belong to clubs and to have recreation of one kind or another.

"Mounted pictures and picture bulletins" were described by Miss Grace Child, of the Hartford Public Library, who gave some suggestions for the collecting, mounting, classifying, and display of such pictures. Her talk was illustrated by an exhibit of such material, shown in the library rooms.

The following officers were elected: President, Henry M. Whitney, Blackstone Library, Branford; vice-presidents, George S. Godard, State Library, Mary E. Lyman, Middlefield, George M. Carrington, Winsted, Alena Owen, Suffield, Alvarado Howard, Stafford Springs; secretary, Anna Hadley, Ansonia Library; treasurer, Jennie P. Peck, Silas Bronson Library, Waterbury.

#### ILLINOIS STATE LIBRARY ASSOCIATION.

*President:* A. H. Hopkins, John Crerar Library.

*Secretary:* Miss Eleanor Roper, John Crerar Library.

*Treasurer:* Miss Anna Hoover, Public Library, Galesburg.

The sixth annual meeting of the Illinois State Library Association was held in Lincoln, Feb. 21-23, 1901. The association was most hospitably received by the residents of Lincoln, and on Thursday evening the members of the women's club gave a reception in honor of the visiting librarians. The room was prettily decorated with potted plants, and a collection of posters from Champaign, Albany, and some of the public libraries in the state formed quite an attractive feature of the decorations.

The Hon. S. A. Foley, president of the Lincoln Library board, made the address of welcome, thanking the association for meeting at Lincoln and extending a most cordial welcome in the name of the library, the woman's club, and the mayor. This was followed by the president's address. Mr. Willcox chose as his subject "The public library, an extension course to the public school," in which he showed the great necessity for the education of all classes and the very small per cent. of children who ever go through the high school, ending their school days either through wilfulness or necessity at a very early age. He dwelt upon the inestimable good the library might do for the former in keeping them out of mischief and the benefit it could undoubtedly be to the latter in helping to continue the education which was but started at the public school, but which family circumstances made impossible to continue there. He said it was this necessity, deeply felt, of giving all the children, the poor equally with the rich, good, inspiring books to read, that gave us the Illinois free public library law in 1872. He dwelt upon the steady advance of civilization and how necessary it is to keep in touch with the new doctrines and new move-

ments, and that the public library is the source of all this knowledge.

Friday morning the first thing on the program was a Library Institute conducted by Miss Eleanor Roper. It was intended only for beginners. As the time was limited it was impossible to do much more than touch upon each subject, but samples filled out to illustrate the most approved methods in ordering, accessioning, cataloging, shelf listing, etc., were handed around. There was a general discussion and the questions asked showed the necessity for just such work. In connection with the institute Miss Louise Booth, of Peoria, explained the details of the Browne charging system as in use at the Peoria Public Library.

At 10 o'clock the regular meeting was called to order by the president, who suggested that the question of dues be discussed at this time instead of later, as called for in the program. It was decided by the association that, because of the small income and because of the inconvenience of sending 50 cents, the dues be raised to one dollar. The president then appointed the following committees: Committee on nominations, M. E. Ahern, chairman, Mrs. Alice G. Evans, Ange V. Milner, Ida M. Webster, and J. E. Durham; committee on resolutions, Mrs. Resor, Mrs. C. F. Kimball, M. B. Lindsay, Evva L. Moore, E. B. Wales.

Preparatory to the report of the committee on library legislation and the discussion to follow, Katharine L. Sharp presented a paper on "The condition of libraries in Illinois." Every kind of library and library work was reported upon. The library clubs and societies, library schools and training classes, lecture courses, college libraries, travelling libraries, large Chicago libraries, commercial circulating libraries, and the work being done by each, were all thoroughly treated. After listing the gifts and bequests she said that during the life of the association, 1896-1900, over \$500,000 had been given to libraries of Illinois in gifts. She showed a map of the state so marked that the libraries in the different counties could be seen. This showed 32 entire counties with no library whatever, eight with only college or university library, and six with only a subscription library. Miss Sharp closed by saying she thought these conditions showed the necessity for a library commission in the state.

This was followed by a report of the committee on legislation. Mr. Willcox reported that the committee appointed to co-operate with the Farmers' Institute, federation of women's clubs, and the committee from the state teachers' association had not been able to have any meeting as a committee, but the individual members had been consulted. Mr. Barbour, of Rockford, of the state teachers' association, wanted a section added in regard to woman suffrage and 25 legal voters instead of 50, necessary for a petition to the

town clerk. The women's clubs reported that they were in hearty accord with the bill. The Champaign draft, prepared by the library association, with a few alterations, was drawn up and put into the hands of Mr. Putnam in the Senate and Mr. McCulloch in the House. Mr. Putnam wrote that the Senate seemed to feel the rural districts were better served by the Farmers' Institute than by a commission.

Following the report Mr. Hostetter's paper on "Farmers' Institute travelling libraries" was read by the secretary, Mr. Hostetter being unable to be present, as the Farmers' Institute was holding its annual meeting at this time. He reported that during the year 1900 these libraries had increased from 21 to 41 and that there was a large number of applications for libraries waiting to be supplied. He explained that the community securing the use of the library pays the express charges from Springfield and return and is entitled to keep the library six months and that the application for a library must be signed by at least five responsible citizens, endorsed by the president and secretary of the county farmers' institute. He thought the close relations between the county farmers' institutes, who are familiar with the conditions and needs of the people of their separate counties, and the Illinois Farmers' Institute, whose secretary has charge of the travelling libraries, makes it possible to place the libraries to the very best advantage, and he said they had done so much for the higher education of the farmer and his family that the Illinois Farmers' Institute intended to ask the present legislature for an appropriation of \$2500 for the maintenance of this fine library system.

Mrs. C. F. Kimball, reference librarian of the Withers Library, Bloomington, and a member of the federation of women's clubs, followed with a paper on the "Attitude of women's clubs towards library work," in which she said there was a very general interest taken by the clubs of the state in the commission bill. She showed how close the relations were between the library and the women's club, in many instances the former being a result of the latter. She told of the work done by the state federation of women's clubs in promoting travelling libraries and of the co-operation with the Illinois state library school, which is to be the medium of circulation for the federation's travelling libraries during the coming year.

At the end of Mrs. Kimball's paper there was a long discussion in regard to the three distinct bills which were to come before the legislature and of some means of combining and compromising so as to have but one. The meeting, however, adjourned without anything definite being decided or agreed upon. The general opinion seemed to be that matters would have to stand as they are,

each one doing all he could to influence the representative from his district.

The afternoon session was devoted to the subject of library administration and was opened by a paper on "Co-operative cataloging" sent by C. W. Andrews, who was unable to be present because of a committee meeting in Chicago.

Mr. Andrews said that the co-operative cataloging scheme now only needs the necessary number of subscribers before becoming a reality and he expressed his regret that the scheme had not been accepted as generally as the committee were led to expect from the enthusiastic reception of its outline at Montreal last June. About 50 replies, nearly all favorable, to the circulars sent out, have been received, which is a little more than half the support necessary.

The advantages of the plan, in Mr. Andrews' estimation, are economy, considering the high grade of work, the fulness of entry and amount of analysis and the inclusion of the cards; the fact that the cards are printed instead of written, giving greater legibility, uniformity, absolute fidelity in copies, greater care necessarily taken in preparation and the possibility of obtaining as many copies as are wanted at a slight additional cost. He then showed in how many different ways these extra cards are used in the John Crerar Library; *e. g.*, for continuations list, binding list, periodical list, in making up bulletins, official catalog, etc.

Mr. Andrews did not contemplate that any catalogers would lose their positions through this new method, for the books must still be examined and subject headings assigned, all books preceding 1901 must still be cataloged, and analytical work can be extended. In other words, the effect of this plan will not be to deprive catalogers of their work but to substitute more of the intellectual for the mechanical, putting preparation of bulletins, class lists, etc., in place of copying of title page.

But on the other hand the small library receiving only 200 books a year, Mr. Andrews thought, would probably be outside the profitable field of the movement, while those receiving 500, or less if largely non-fiction, should be within it. The paper closed by saying that if this succeeded the prospects were bright for treating foreign books in the same way.

Miss Evva L. Moore, of Scoville Institute, Oak Park, followed with a paper on "The proper distribution of labor in a small library." She recommended that the librarian devote her mornings to meeting the assistants, answering the mail, getting up reference lists, glancing over the new periodicals, and superintending the administrative part of the work, leaving the afternoons free for visiting the schools, helping the teachers, meeting the

public and lending an ever ready and helpful hand to the children. The details and mechanical work should be as simple as possible but accurate, and should be looked after by the assistants.

The rotation method with the assistant was discouraged, as it was thought the public become accustomed to a certain person and object to a constant change there. In case the assistant should be absent the librarian could fill the breach, thus coming in touch with the work as it was being done.

In closing, Miss Moore said the librarian herself must keep up to the mark, if she insisted upon accuracy, neatness, courtesy and promptness in the other members of the staff.

The discussion which followed was led by Helen P. Bennett, of the Mattoon Public Library. Miss Moore was asked if the members of the training class gave their time for nothing, to which she replied that the class covered nine months, and every day each member of the class gave the library four hours, and at the end of the nine months they gave a full month in addition. Being questioned, Miss Moore said that she found time for her class from 8.15 to 9 every morning, and that the requirements for admission were high school graduates or the equivalent. Mr. Willcox feared that by so many training classes the market would become flooded with applicants for positions, but was assured that many went into it simply for the pleasure of what they could get out of it, and that at the end of the course felt amply repaid by the added intelligence with which they could pursue any line of study.

Mrs. Kate Henderson, of Joliet, failed to appear, so that the next paper presented was on "Organization by correspondence," by Zella F. Adams, of Evanston. Miss Adams, who gives all her instruction and help by means of correspondence, told what satisfactory results she had had and explained how it was possible to give to the librarian, ambitious to use modern methods and to do the work that others are doing, but who has not had the advantages of technical training, or the librarian fortunate enough to have been able to employ the services of a trained librarian but who finds it difficult to continue the work without further instruction, the necessary information for the proper administration of the library. The first step, Miss Adams said, is to know the tools and provide the needed supplies and reference books, then leading them by easy stages from the more simple records to the more complex. In cataloging, books presenting the fewest possible difficulties must be chosen. More difficult works may be attempted as proficiency is acquired.

At the conclusion of this paper, Anna E. Felt, trustee of the Galena Public Library, presented a paper on "Reserve force in a small public library." In assigning the topic

the idea in the minds of the committee was in reference to extra assistants to be called upon if needed, but Miss Felt showed that the reserve force applied to books, building and trustees as well as assistants. Miss Felt said, in part, that "the strength of an institution depends largely upon its reserve force, available when necessary. The public library is a business institution and should be conducted along business lines, great care being taken to guard its weakest parts. If the library has but one book on a given subject, and that is taken out, then the library is bankrupt, so far as that subject is concerned, for the time being. The same holds true in regard to each division of the library. The board of directors should be harmonious and ready and willing to act. No matter how small the library there should be an efficient staff, for what becomes of that public library taken care of or looked after by one solitary librarian, when said librarian falls on a piece of orange peel, sheet of ice, or is hit by a falling timber? The library is bankrupt."

A study class, open to all desiring to learn modern library science, was recommended as a means for furnishing workers for the library whenever extra help was needed. As the tax in the smaller towns is not sufficient to warrant large salaries, it was thought the leisure class, many of whom are anxious to spend their time in a profitable way, might be called upon for assistance.

This was followed by a general discussion led by Josephine E. Durham, of Danville.

Miss Felt was asked how she managed her training class and if she had any difficulty in getting her assistants to work for nothing, and if the apprentice help could be depended upon at the particular time that it was wanted, to which she replied that often they came into the library and offered to stay and let the librarian go off for the afternoon.

Mr. Willcox wanted to have an expression of opinion in regard to the library's taking *Puck* and *Judge*. The general opinion seemed to be that it was better not to take them. That the influence on the boys was bad; that they should be taught patriotism and respect. Some, however, thought the pictures valuable as political history; as one is Republican and the other Democrat the opinion prevailed that if one was taken the other should also be in the library.

Mrs. Evans, the A. L. A. representative for Illinois, made some announcements in regard to the meeting at Waukesha and a plea for Illinois librarians to attend. After listening to her remarks, all felt that it was not only a duty to attend but that all who did so would derive a great deal of pleasure therefrom. Mr. Faxon, secretary of the A. L. A., followed with some remarks on the advantages to be derived by attending the meeting. He had just come from Waukesha and seemed much pleased with the attractiveness of the hotel

which is large enough to accommodate all. He impressed the fact that this is to be a western meeting and that it was the duty of the west to have as large an attendance as possible. He said the post-conference had not yet been decided, but that a trip down the Mississippi seemed the most attractive at present.

Miss Ahern then announced that the National Educational Association would meet this year at Detroit, July 10, and extended a cordial invitation to all teachers and librarians to attend.

Miss Ahern for the committee on nomination of officers then presented the following names: President, A. H. Hopkins, John Crerar Library; First vice-president, Anna E. Felt, Galena Public Library; Second vice-president, Mrs. C. F. Kimball, Withers Public Library, Bloomington; Secretary, Eleanor Roper, John Crerar Library; Treasurer, Anna Hoover, Public Library, Galesburg.

On motion the secretary was instructed to cast one ballot for these names, and they were declared elected.

Friday evening the members of the association and the people of Lincoln had the privilege of listening to the Rev. Jenkin Lloyd Jones, of Chicago, who delivered an address on "Francis Parkman, the great American story teller." Previous to his address the committee on resolutions submitted its report, which was accepted and passed.

In the name of the association President Willcox thanked Mr. Jones for his able and most interesting address, and the association then adjourned. ELEANOR ROPER, *Secretary*.

#### JOINT MEETING PENNSYLVANIA-NEW JERSEY LIBRARY ASSOCIATIONS.

The fifth joint meeting of the Pennsylvania Library Club and the New Jersey Library Association will be held at Atlantic City, Friday to Monday, March 22-25, 1901. Members of other library clubs and friends in adjacent states are cordially invited to attend. The first session will be held on Friday evening at 8.30.

#### TRAVELLING ARRANGEMENTS.

The Central Railroad of New Jersey has been selected as the official route for the New Jersey and New York section, the Reading Road serving those delegates who leave from Philadelphia. The advantage to members in using the Central Railroad is that a stop-over is permitted at Lakewood either on the going or returning trip, and it has been found that many members will take advantage of this privilege.

Railroad rates are as follows:

New York to Atlantic City and return, \$4.75.

Newark to Atlantic City and return, \$4.75.

Philadelphia to Atlantic City and return, \$1.75.

Excursion tickets good to return within 15 days.

Tickets from New York are good to stop over at Lakewood or Philadelphia within limit.

Those desiring to stop over at Philadelphia on the return trip should have their tickets exchanged by the ticket agent of the Reading Railroad at Atlantic City.

The best train to reach Atlantic City is the one leaving via Central Railroad of New Jersey as follows:

Leave New York, South Ferry, 3.35 p.m.

Leave New York, Liberty street, 3.40 p.m.

Leave Newark, 3.15 p.m.

Arrive Atlantic City, 6.48 p.m.

Special car for the exclusive use of members will be attached to this train if a sufficient number indicate intention of going.

From Philadelphia trains leave by the Reading route as follows:

Leave Philadelphia, 4 p.m.

Leave Camden, 4.10 p.m.

Arrive Atlantic City, 5.20 p.m.

#### HOTEL ARRANGEMENTS.

The Grand Atlantic Hotel offers the greatest advantages to members and will again serve as headquarters.

The following special rates have been made to members of the associations:

Friday to Monday, or any other three days, \$2.25 per day.

One week, \$15.

One day, \$2.50 per day.

Part of day at regular rates.

The arrangements made contemplate remaining over Sunday. It is hoped that a large number will take advantage of this special opportunity.

Those intending to be present are asked to notify L. E. Hewitt, secretary Pennsylvania Library Club, room 600, City Hall, Philadelphia, if members of the Pennsylvania Association; or Miss C. W. Hunt, secretary New Jersey Library Association, Free Public Library, Newark, N. J., if members of the latter association.

#### MAINE LIBRARY ASSOCIATION.

*President:* Mrs. Mary H. Curran, Public Library, Bangor.

*Secretary:* G. T. Little, Bowdoin College Library, Brunswick.

*Treasurer:* Miss Alice Furbish, Public Library, Portland.

Advantage was taken of the meeting of librarians of eastern Maine at the University of Maine, Orono, on Jan. 24, to call a meeting of the Maine Library Association for the same time and place, as a meeting of that association had not been held for several years. The following officers for 1901 were elected: President, Mrs. Mary H. Curran, Bangor Public Library; vice-presidents, Ralph K. Jones, University of Maine Library, and Miss Annie Prescott, Auburn Public Library; treasurer, Miss Alice C. Furbish, Portland Public Library; secretary, George T. Little, Bowdoin College Library, Brunswick.

It was voted to submit the following amendment for consideration at a meeting to be held during the summer: "It shall be the policy of the association to encourage the establishment of local library clubs, the members of which shall be entitled to attend and take part in the annual meetings of the association, whenever held."

*NEW HAMPSHIRE LIBRARY ASSOCIATION.*

*President:* Miss Grace Blanchard, Public Library, Concord.

*Secretary:* Herbert W. Denio, State Library, Concord.

*Treasurer:* Miss Bessie I. Parker, Public Library, Dover.

The annual meeting of the New Hampshire Library Association was held in Dover on January 30. The morning session was devoted to the election of officers and the transaction of other business. This included the merging into the state association of the membership and funds of the Cocheco Club, established as a library organization in 1891, the action being taken by vote of members of that club present at the meeting.

In the afternoon, Miss Garland and her assistants were At Home at the public library and the visiting librarians there studied the admirably managed departments, refreshing themselves from time to time at a tempting table.

It was as profitable a meeting as it was a pleasant one, and the departure of trains alone brought about an adjournment.

*NEW YORK LIBRARY ASSOCIATION.*

*President:* H. L. Elmendorf, Buffalo Public Library.

*Secretary:* Miss M. E. Hazeltine, James Prendergast Free Library, Jamestown.

*Treasurer:* E. W. Gaillard, Webster Free Library, East Side House, New York City.

The association has issued an attractive announcement of its "Annual library week," to be held at Lake Placid, Sept. 28 to Oct. 5, 1901. The circular is a small oblong pamphlet, setting forth the many attractions of Lake Placid as a meeting place, with several characteristic illustrations. The plan for this "library week," to be a permanent annual institution, was adopted at the autumn meeting of 1900, when it proved thoroughly successful. The general plan of the 1900 meeting will be followed this year, the Placid Club house being headquarters, and an informal program being arranged. A few formal meetings will be held, there will be no specially prepared papers, "unless the development of some subject seems to demand a closely arranged logical statement as a basis for discussion; but topics will be carefully selected and leaders assigned who will be prepared to begin the theme and round out the discussion."

All library workers in New York and other states are invited to save this week from their summer vacation, or reserve it as an additional vacation outing, and join the "library week" gathering.

## Library Clubs.

*LIBRARY CLUB OF BUFFALO.*

*President:* H. L. Elmendorf, Public Library.

*Secretary-Treasurer:* Miss Ella M. Edwards, Buffalo Historical Society.

The Library Club of Buffalo met on Wednesday, Feb. 20, in the rooms of the Buffalo Historical Society, President Elmendorf in the chair. A letter was read from Miss Beal, of the Boston Children's Aid Society, giving some account of the methods pursued and results attained in the home libraries of that city. This was followed by the regular report of Miss Campbell, chairman of the committee on home libraries of the Library Club of Buffalo. She reported progress. The fourth library had that day been installed in the home of a poor woman, who would give to its care her only afternoon at home during the week.

The club was then addressed by Dr. Selim H. Peabody, superintendent of liberal arts of the Pan-American Exposition, who spoke of the objects, aim and methods of his department.

ELLA M. EDWARDS.

*CHICAGO LIBRARY CLUB.*

*President:* W. B. Wickersham, Public Library.

*Secretary:* Miss Margaret Zimmerman, John Crerar Library.

*Treasurer:* C. A. Torrey, Chicago University Library.

A regular meeting of the Chicago Library Club was held on Thursday evening Feb. 14.

The important feature of the business meeting was reports from committees. Mr. C. W. Andrews, chairman of the committee on the union list of periodicals, reported that all proof with revisions to date was in the printer's hands and that before long the list will be published and ready for distribution. Mr. Andrews also informed the club that the committee on administration of the John Crerar Library has decided to publish annually a supplement to this list. This will render the union list of so much more permanent value that it is greatly hoped that the edition of the main list will be increased to 1000 instead of 500 as originally planned.

The committee on libraries in the schools submitted the following report, which was duly accepted, and it was voted that the executive committee send copies of the report to the Public Library board and the Board of Education with the urgent request that they take favorable action in regard to the matter:

"The committee to whom was referred the question of a more intimate connection between the public library and the public school system in Chicago have conferred with the librarian of the public library and the superintendent of the public schools.

"The public school and the library are now recognized in many of our cities as being co-

ordinate branches of the educational system of our country, and branches of the public library have been established in the schools in many cities and children's rooms have been opened in the public library, while no special work for the children has been done in Chicago.

"The committee would therefore suggest that the Board of Education be requested to set apart a room in one or more of the school buildings to be selected by the said board of education, for the use of the public library, in the establishment of branch libraries. The said board of education to furnish the heating, lighting, and janitor service required. The Public Library board to furnish the books, furniture and attendants and manage the library. These branch libraries to be kept open longer than the schools are kept open. While these libraries are primarily for the use of the children in the public schools, they shall be for the free use of the public, the same as any other branch of the public library.

"The committee would further recommend that there be opened in the public library a department intended for the use of the children, this department to be under the charge of some person competent to deal with children, one who can interest children and who understands their needs. This department to be equipped with books and furniture suitable to children.

"The committee would recommend that the librarian on receipt of the request have prepared lists of books suitable for children on such subjects as may be required in connection with the work of the schools."

RUTHERFORD P. HAYES, *Chairman*,  
H. T. SUDDUTH,  
IRENE WARREN.

The program of the evening opened with a paper on "State supervision of public libraries," C. A. Torrey. This was followed by a "Cataloging symposium," Chairman A. H. Hopkins, which was made up of short papers on problems and interesting points in cataloging and were given as follows:

"A cataloguer's lament," Miss Skeer of Lewis Institute; "Annotation of catalog cards," Miss Moore of Scoville Institute; "Spelling of surnames in a genealogical index," Miss McIlvaine of the Newberry Library; "The catalog in a normal school library," Miss Simpson of the Chicago Institute.

An interesting informal discussion followed each paper and the regular time of adjournment was reached before the two remaining papers by Miss Hawley and Miss Sawyer could be read.

#### BIBLIOGRAPHICAL SOCIETY OF CHICAGO.

*President:* Camillo von Klenze, University of Chicago.

*Secretary:* A. G. S. Josephson, John Crerar Library.

*Treasurer:* Carl B. Roden, Chicago Public Library.

A meeting of the society was held on Feb. 7, in the John Crerar Library. In the ab-

sence of Mr. Hild, chairman of the publication committee, the secretary reported that the first number of the society's "Contributions to bibliography" was in the hands of the printer, and that each member of the society in good standing would receive a copy free of charge. The committee recommended that the second number of these "Contributions" be accepted, a "Bibliography of general and national bibliographies," by W. S. Merrill, of the Newberry Library. This report was accepted.

Miss Mabel McIlvaine read a paper on "The indexing of bibliographical periodicals." Her attention had been drawn to the need of such an index through her efforts to keep track of articles on bookbinding and relative arts. The fact that special periodicals were not included as a rule in the annual indexes to periodical literature was much to be regretted, and it was time that something be done for just these special, technical periodicals. The speaker commented on the slow issue of the French index, the clumsy references of the German, and the too broad classification in the lists in *Zeitschrift für Bücherfreunde*. The most ideal in conception of all indexes was the printed catalog cards for articles in current periodicals and society publications issued by the American Library Association Publishing Board. But these cards gave few references to articles on bibliography because no bibliographical periodicals were indexed. The speaker ended with a rapid survey of the most important periodicals to be indexed.

In the discussion which followed, Mr. Andrews spoke of the co-operative indexing of current periodicals carried out under the auspices of the A. L. A. Publishing Board, and expressed as his opinion that the Board might be willing to include bibliographical periodicals if a strong recommendation to that effect were received from this society. The matter was referred to the council with a request to report at the next meeting.

The following new members were elected: Mr. James H. Eckels and Dr. Charles R. Mann, Chicago, and Mr. Henry E. Legler, Milwaukee.

AKSEL G. S. JOSEPHSON, *Secretary*.

#### EASTERN MAINE LIBRARY CLUB.

*President:* Ralph K. Jones, University of Maine, Orono.

*Secretary-Treasurer:* J. H. Winchester, Stewart Free Library, Corinna.

A meeting of librarians was held at the University of Maine, Orono, on Thursday and Friday, Jan. 24-25, at which a permanent organization, called the Eastern Maine Library Club, was formed. The constitution adopted is modelled after those of the Massachusetts clubs. Meetings are to be held three or four times a year, and one of them is to be in connection with the Maine Library Association.

Papers were presented by Prof. G: T.

Little, librarian of Bowdoin College, on library co-operation; Mr. J. H. Winchester, librarian of the Stewart Free Library, Corinna, on the town library, and President A. W. Harris of the University of Maine, on the library and the public. Each paper was followed by a discussion, and the meeting was interesting and profitable to those who were present. In addition to the sessions of the club on Thursday afternoon and Friday morning, a reception in honor of the visiting librarians was given on Thursday evening by Mr. and Mrs. R. K. Jones, and on Friday afternoon visits were made to the library of the Bangor Theological Seminary and to the Bangor Public Library.

The officers chosen were as follows: President, Ralph K. Jones, University of Maine Library, Orono; vice-president, Miss E. M. Pond, Belfast Free Library; secretary and treasurer, J. H. Winchester, Stewart Free Library, Corinna.

#### LIBRARY ASSOCIATION OF WASHINGTON CITY.

*President:* F. A. Crandall, Office of Documents.

*Secretary:* Hugh Williams, Library of Congress.

*Treasurer:* F. E. Woodward, 11th and F sts., N. W.

The 53d regular meeting of the Library Association of Washington City was held at the Columbian University, Wednesday evening, Feb. 13, with the newly elected president, Mr. F. A. Crandall, in the chair.

The executive committee reported the election to membership of Miss Caroline Mytinger and Miss Nannie D. Barnes, of the Navy Department Library; Miss Sophie Nussbaum, of the Bureau of Education Library; Mr. M. L. Jacobson, of the Bureau of Statistics Library; Miss Hester Coddington, Miss Gertrude Shawhan, Miss Julia Gregory, Miss E. A. Runner, Miss Frances Thompson, Mr. F. W. Ashley and Mr. J. Lebovitz of the Library of Congress.

A program committee was appointed by the president, consisting of the following officers of the association: The two vice-presidents, Miss Josephine A. Clark and Mr. Henderson Presnell, and the executive committee, Miss Mary A. Hartwell, Mr. Charles Martel and Mr. Edward L. Burchard. Mr. Presnell will act as chairman, and Miss Clark as secretary.

The first paper of the evening was by Mr. Steingrímur Stefánsson, entitled "The ethics of the Volsungs." From the saga of the Volsungs, the typical heroic family of the Viking aristocracy of Scandinavia, he deduced the ethical ideals of the race, showing that they were a land-conquering warrior people with positive ethics. He showed that these characteristics predominated to-day in the Anglo-Saxons as exemplified in the foreign policies of Great Britain and the United States. The Volsungs were compared with

the patriarchs of the Bible, with the heroes of Homer and of the Celtic traditions, and with Nietzsche's conception of the Uebermensch, etc.

The second paper was by Mrs. N. N. McCullough on "An illustrated catalog." The catalog consisted of the transcription of well-known book titles into hieroglyphics, thus making of each title a kind of "rebus." These transcribed titles did not illustrate the contents of the books. The material used is cardboard, about the size of a magazine page for each title, the illustrations for the titles being cut from newspapers, magazines, etc. Numerous examples of the catalog were distributed among the members of the association for inspection.

Miss M. A. Gilkey's paper, "Nineteenth century library progress," was a résumé of Mr. R. R. Bowker's article, "Libraries and the century in America," in the LIBRARY JOURNAL for Jan., and Mr. C. A. Cutter's "The development of public libraries" in the New York *Evening Post* for Jan. 12, 1901.

The president then announced that the "question box," a new feature of the association, was ready for questions. He also appointed a committee of the whole association as a social committee.

There were 75 members present.

HUGH WILLIAMS, *Secretary.*

## Library Schools and Training Classes.

### NEW YORK STATE LIBRARY SCHOOL.

#### LECTURES AND NOTES.

Herbert Putnam gave a whole afternoon to the school Feb. 25, speaking on Copyright and the Library of Congress. The lectures gave us an unusual appetite for our coming visit to that library which has developed so wonderfully under Mr. Putnam's administration.

Feb. 27 the afternoon lecture was postponed till another day and all the students listened to Mark Twain's inimitable speech on Osteopathy in the Assembly chamber.

Washington's birthday was celebrated by a dance.

SALOME CUTLER FAIRCHILD.

#### 14TH ANNUAL REPORT.

The 14th report of the Library School, for the year ending Sept. 30, 1900, appears as Bulletin 55 of the New York State Library, dated January, 1901 (University of State of New York, Library School 8, p. 335-366. O. 5 c.). Much of the information given in this report has previously appeared in these columns, through the notes furnished by Mrs. Fairchild, so that only the main statistical features call for present comment. The class of 1900 numbered in all 42 persons (11 seniors), representing 13 states, New York and Massachusetts leading with 14 and 8, respec-

tively. Of the 42 students 35 held college degrees and five had done some college work. It is pointed out that "the proportion of college graduates in each class is constantly increasing," and that of 31 students in the class of 1901 only one has had no college training. The bibliographies and theses chosen by the class are listed, and lists are given of the students of 1900, including the summer course, and of the changes in position made during the year by graduates and members of all the classes from 1888. The report includes record of the annual visit to libraries, the library schools re-union, meeting of the graduates' association, etc., and of the work of the year, including the preparation of the Paris A. L. A. exhibit, picture bulletin and book annotation work, and the routine of the summer course.

PRATT INSTITUTE LIBRARY SCHOOL.

LECTURES BEFORE THE LIBRARY SCHOOL.

Mr. Herbert Putnam, Librarian of Congress, visited the school on Feb. 26. He spoke to the students on the subject of "Copyright."

Other lectures will be given as follows:

- April 2, 3, 5, 16, 17 at 11 a. m., and April 18, at 8 p. m., by Mr. W. R. Eastman, state inspector of libraries, on "Library architecture."  
 April 24 and 26, May 1 and 3, at 11 a. m., by Mr. G. W. Cole, on the "History of libraries."  
 May 7, 9, 14 and 16, at 11 a. m., by Mr. G. H. Baker, lately librarian of Columbia University, on "Book-buying: 1. Building up a library. 2. Auction sales. 3. 2d-hand and sale catalogs. 4. 2d-hand dealers, at home and abroad."

SUBJECTS FOR THESES.

The following subjects for theses have been selected by students of the historical course, second year:

- History of printing on Long Island, with a list of books published by the earliest presses. Mary F. Isom.  
 Private-presses and printing-clubs in the U. S., with a bibliography of the Marion Press. Lucy W. Perry.  
 Indexes and their value, with examples of various kinds of indexes, and a list of important books needing indexes. Leslie Merritt.

Subjects for theses selected by students of the children's librarian's course, second year:

- The relative value of practical work in a special course for children's librarians. Louise Mears.  
 The requirements of a card catalog and a finding list designed for the use of children. Laura M. Sikes.  
 Reference-work for children and some of its possibilities. Elizabeth C. Stevens.  
 Story-telling and reading aloud in the children's library. Bertha O. Trube.

IOWA SUMMER LIBRARY COURSE.

The Iowa State University will conduct this year a six weeks' course in library training, under the auspices of the state library commission. Fuller details of the course are noted elsewhere (*see* p. 130).

UNIVERSITY OF ILLINOIS STATE LIBRARY SCHOOL.

COURSE IN GOVERNMENT DOCUMENTS.

The library of this university, being a depository for the publications issued by the U. S. government, furnishes an excellent laboratory for the course offered in the study of government documents.

The publications are carefully considered, both for their value as reference books and for the correct methods of cataloging. As an introduction to the course, a brief sketch is given of the organization and general duties of the executive departments. The methods of reporting the work carried on by these departments, which reports are made by the officials of each bureau or division, are pointed out and serve to show that a government document may appear in as many editions as there are superior officers above the one by whom the report is made. The growth of the work of these departments and the transfer of certain portions of it to new and independent departments is traced as the course develops, and the work of each executive department is studied. For example, it is most interesting to note the development of the work in agriculture undertaken by the government. This was first carried on in connection with the work of the Patent Office, a subdivision of the State Department, being transferred from this department to that of the Interior upon its organization in 1849. Prior to 1862 the reports of the work in agriculture formed a part of the report of the Commissioner of Patents, but in 1862 the work became so large a part of the Patent Office duties that a separate department was established and the work carried on under the direction of the Commissioner of Agriculture. In 1889 the department became an executive department, and its director was made a cabinet officer. Changes in form as well as author have taken place in these reports. Since 1894 the reports have been issued in two parts, part 2 being the Year-book of the Department of Agriculture.

Where, how and by whom the U. S. publications may be obtained is next considered. The reports of the Superintendent of Documents are used as text-books in the study of the distribution and sale of the documents, and the printing bill of 1895 is studied and its important points noted.

Among the most important duties assigned by this printing bill of 1895 to the Superintendent of Documents is the preparation of certain indexes and catalogs. These, together with the check list and the catalogs of Ames

and Poore, are the most important aids to be obtained in the study of the documents.

The following indexes and catalogs are used, and the points especially noted are the scope of each, the arrangement, and the extent to which each duplicates or supplements the other:

1. Descriptive catalog of government publications, 1774-1881, compiled by B. P. Poore.
2. Comprehensive index of the publications of the 51st and 52d Congresses, 1889-93, compiled by J. G. Ames.
3. Check list of public documents issued by the Superintendent of Documents, 1895.
4. Catalog of the public documents issued by the Superintendent of Documents, issued at the close of each session of Congress, 1893-97. (3 v. now issued.)
5. Index to the subjects of the documents and reports, issued by the Superintendent of Documents at the end of each session of Congress since 1895.
6. Monthly catalog of public documents, 1895-date.

The arrangement of the Congressional documents is explained at the time the indexes are studied. The classification, paging, indexing, binding and numbering are quite complicated and must be understood before they can be used to advantage. For example, it is a help to know that before 1895 each series of the Congressional documents of every Congress and session was indexed, and the entire index for the whole series was bound in each volume of that series. After 1895 the indexes for each series were omitted from the volumes, combined into one alphabetical list and issued in one handy volume as the document or consolidated index. Especially important are these indexes in the documents themselves between the years 1881 and 1889, as the catalog compiled by B. P. Poore indexes material between 1774 and 1881 and the catalog compiled by J. G. Ames does not index material before 1889; thus it is necessary to consult the indexes in the documents for the period between.

The handbooks of Congress are considered as they furnish valuable information about the various publications which are studied later. The House manual, Senate manual, Official register, and Congressional directory are the publications to which special attention is given. The Congressional directory is not only valuable from the reference side, but contains under the heading "Departmental duties" valuable notes for the cataloger.

Other text-books used are Cutter's "Rules for a dictionary catalog" and Linderfelt's "Eclectic card catalog rules." From these the students compile the special rules bearing upon the treatment of government publications and to these rules are added such rules as can be formulated when working with documents and which are contained in no code.

Documents are selected for examination first, because of their reference value, and secondly, to illustrate some principle of cataloging. The cataloging of government documents differs but slightly from the cataloging of other publications. The difficulties which the cataloger has to meet all pertain to the history, source, frequency and character of the document, and if the methods of publication are understood, the cataloging is simple.

Students become familiar with the publications and reprints of the early Congresses. The "American state papers" and "Annals of Congress" are compared and contents carefully noted. The early volumes of Richardson's "Messages and papers of the Presidents" are also studied in this connection. Supplementing the "Annals of Congress" are the "Register of debates," *Congressional Globe* and *Congressional Record*. The tracing of a bill as debated in Congress, referred to committees, and reported back to Senate or House is traced by each student and helps to fix the importance of the series of reports.

The department publications are too numerous to be considered entire. A selection is made of the most important of these which may serve as types for future work. The Labor reports and bulletins are valuable from the reference side, and serve to illustrate the cataloging of the publications of a bureau which has subsequently become a department. The report of the Commissioner of Patents, containing an index to the *Official Gazette* and "Specifications of patents" has gone through several changes and serves to illustrate the cataloging of a government periodical.

No department has done more to make its publications accessible than the Department of Agriculture. The catalog cards now being issued by the library of the department, which index the Year-book and the Farmers' bulletins, are especially valuable. The experimental work of this department may be traced to the passage of the Morrill act establishing land grant colleges, and has developed until now the Office of Experiment Stations is the center of experimental work carried on by every state. The card index issued by this office indexes the reports and bulletins of the state experiment stations and is very valuable. Besides the card indexes to this material are the indexes to the annual reports of the Commissioner, synoptical index of the reports of the Statistician, 1863-94, and the very valuable check-list to the publications of the department, compiled by Miss Hasse, covering the years 1841-95.

In connection with the study of this department, each student compiled a bibliography on Asparagus.

The publications of the present Geological Survey and the history of the early explorations undertaken by the government are studied. The "Reports of explorations printed

in the documents of the U. S. Government," compiled by Miss Hasse, was found very valuable in this work, and special mention may be made of Bulletin 100 of the Geological Survey, because of its excellent subject index to the publications of the Survey to 1893.

Important monographs of the surveys, as well as of other departments, are called to the attention of the students, examples of these being such works as "Art and industry in the U. S.," published by the Bureau of Education, and the Herschell report on the coinage of silver in India, 1893.

The contents of the statutes at large and the subject of treaties are discussed, and such publications as "The history and digest of the international arbitrations to which the U. S. has been a party," compiled by J. B. Moore, and "Treaties and conventions concluded between the U. S. of America and other powers since July 4, 1776," are examined.

Other publications studied are those of the Treasury Department, Census Office, Bureau of American Republics, and the Smithsonian Institution. The documents now being issued from the War Department are very valuable because of the information concerning our new possessions which they contain.

Practical reference problems are given as each new subject is considered. The following are given as a sample:

1. Where will be found President McKinley's message to Congress in which he recommends the promotion of Hobson in the navy?
2. Find the project submitted to the British government by Monroe and Pinkney respecting the impressment of American seamen.
3. What is the Red line map?
4. Where can be found an accurate description of the Mergenthaler linotype machine?
5. Where can a map of Illinois be found showing glacial boundary?
6. What was the production of copper in California in 1898?
7. Was v. 4 of the "Contributions to North American ethnology" published in the Congressional set?
8. When was the name of the Ornithology and Mammalogy division changed?
9. Find the debates in the House on the Lodge immigration bill.

MARGARET MANN,

Senior Instructor, U. of I. St. Lib. Sch.

*LIBRARY TRAINING AT THE UNIVERSITY OF MONTANA.*

A course in library training has been added to the curriculum of the University of Montana at Missoula, under the direction of Mr. J. F. Davies, expert librarian of the state institutions. The main features of the course, as outlined in Mr. Davies' recent report, are noted elsewhere,

## Reviews.

CARNEGIE LIBRARY OF PITTSBURGH. Graded and annotated catalogue of books for the use of the city schools. [Pittsburgh,] 1900. 317 p. O. 50 c.

This, it seems safe to say, is the most interesting and suggestive catalog of its kind that has yet appeared; and it is striking evidence of the remarkable advance made within the last few years toward the most helpful and permanent relations between the public library and the public schools. There can be no question that the ample supply of such books as are listed in this catalog in all the school-rooms of a city must have a strong influence upon the character of children, developing intelligence and imparting refinement. One notes not only the literary quality of many of the books, but the careful choice of good and attractive editions. The Caldecott picture books, the Hawthorne wonder stories with Crane's illustrations, the fine illustrated editions of Andersen, and the "Arabian nights," the Lang fairy books—it is through such books as these that children in the primary and grammar grades are to be brought to a knowledge of and desire for books. If it is possible to impart the love of reading—and on this point there is question—this, one must feel, is the way to set about it; and whether that be accomplished or not, such work must have an educational influence of no little power.

The plan upon which the catalog was prepared is described in the preface. It is arranged by school grades, from the first, or primary, to the ninth, by which the high school is designated. Each grade list is divided into a few broad classes, two only (Nature and Literature) being used for the first grade; and for all books annotations are given in full in every grade. This last feature means much duplication and has added greatly to the size of the catalog, many books, as Æsop, Lear, and Stevenson's "Child's garden," being repeated in at least two successive grades; but it is regarded as desirable in enabling teachers to use each grade list as complete in itself without necessity of referring elsewhere. No specific "literature" division is made, but an asterisk indicates all books that possess permanent literary value. Practically every book listed is annotated, and these notes show an admirable standard of aim and execution. They are compactly descriptive, and at the same time interesting, and in many instances really illuminative. This is largely owing to the excellent plan of making the annotations, when possible, quotations from some critical source. Thus, for "The vicar of Wakefield," we have Walter Scott's characterization, from his "Life of Goldsmith," and Andrew Lang, Ruskin, Higginson, Brander Matthews, Charles Dudley Warner, and the critical reviews are drawn upon for similar notes,

These annotations are in the minority, but they show how much better results may be obtained in this line by discriminating selection than by wholesale manufacture. The original annotations are on the whole superior to the average, emphasizing essential points, and sympathetic in tone. There is perhaps a tendency to forget that even in book annotation "the adjective is the enemy of the substantive," and now and then an ineffective note, as in the entry on Andersen, which says only "One cannot describe the charm of Andersen's children's stories. They must speak for themselves. The edition is a most beautiful and sumptuous one, with more than 400 illustrations."

The catalog is the product of careful co-operative work between the library and school authorities. It was prepared with the aid of the Principals' Association of the city, and the original lists in the various classes were drawn up by nine sub-committees, each dealing with a special subject, whose work was carried on under the direction of the general committee appointed by the Principals' Association. The lists submitted by the several committees were later revised by the library authorities, this work being done by Miss Frances Jenkins Olcott, chief of the children's department, to whom was given full power of rejection and substitution of titles. The annotations were compiled or written by Miss Marion Knight, of the library staff.

The fact that this catalog is not intended to furnish supplementary reading as a part of school routine is a marked advantage. Its aim is, thus, to supply good books that shall delight and instruct the children, and that shall go directly to the homes through the schools. While the influence of such books, regarded as collateral reading, can hardly fail to result in more intelligent study, their greatest value lies in the opportunity given for the development of character, through the teacher's knowledge of the child. It is interesting to note, in this connection, that during the last year the circulation from the school collection exceeded 31,000 volumes.

Of the selection of books made for these lists, taken as a whole, there can be only commendation. Further work in this direction will probably improve upon what has been done here, but this is a remarkable advance over most previous efforts in this line. We may question the disproportionate weight given to American history, noting that of 140 books in History and Biography, listed for the seventh grade, 89 are wholly on American subjects; but we must rejoice at the inclusion of so much of the best literature, and give a word of special praise for the breadth and value of the selection made for the high school grade. The catalog should be of great practical helpfulness in the wide field of library work with children and with schools, and all interested in this movement owe a debt of appreciation to the Carnegie Library of Pittsburgh for a most valuable and suggestive piece of work.

H. E. H.

#### JESUIT RELATIONS AND ALLIED DOCUMENTS:

Travels and explorations of the Jesuit missionaries in New France, 1610-1791; ed. by Reuben Gold Thwaites, secretary of the State Historical Society of Wisconsin. v. 71: Lower Canada, Illinois, 1759-1791; miscellaneous data. Cleveland, The Burrows Bros., 1901. 404 p. O.

This final volume in the remarkable series of the "Jesuit relations" is of special importance in its presentation of the bibliography of the subject. In each of the three score and ten volumes bibliographical notes have been a notable and most valuable feature, but in concluding the work we are given a full record of the collateral sources from which information has been secured and to which reference was had in the preparation of the series. This "list of authorities cited or consulted" covers nearly 150 pages, and is practically an exhaustive bibliography of the general subject, including many related topics. The list is alphabetical by authors, giving full entries, with data as to date and place of publication, publisher, size, and when necessary brief biographical note. It includes considerable manuscript material, notably of Jesuit records preserved only in this form, and much that is rare and valuable in state archives and contemporary documents and publications. Much care seems to have been exercised in tracing authors' names and in perfecting the bibliographical record, and the only criticism of the list that suggests itself is regarding the omission of a note for the more important works, giving clue to libraries in which copies are accessible. This is done for many of the archives and manuscripts, but the extension of the plan to at least the more noteworthy general publications would probably have been welcomed by many historical students. The list is classed in a few broad divisions—Bibliography, Archival reports, Jesuitica (not published in the series); American Indians (with seven divisions and various subdivisions); History (General and Special, with regional subdivisions); Periodicals and transactions; Biography; Exploration and travel; Topography and statistics; Natural science (with subject divisions); Dictionaries, grammars, and cyclopædias; Maps; Atlases and cartography. Such a conspectus of the materials of history, as tested in actual experience, cannot fail to be a valuable addition to historical bibliography, and this survey of the field makes an admirable and fitting conclusion to this monumental work, so broadly conceived and so successfully carried out.

WYER, James Ingersoll. A bibliography of the study and teaching of history. Washington. Government Printing Office, 1900. 53 p. O.

This bibliographical study, by the librarian of the University of Nebraska, prepared originally for the Committee of Seven on Teach-

ing History in Schools, is now issued separately and also as a part of the report of the American Historical Association for 1899. The works listed include both books and magazine articles which are classified under the following heads: Philosophy of history, Methodology of history, Educational value of history, Place in curriculum, Methods of study and teaching. The last heading is further subdivided into seven classes.

The range taken in the bibliography is wider than the subject-matter would seem at first glance to indicate. Works bearing remotely on the subjects mentioned, and even single chapters of books, are noted with painstaking fidelity. There are about 600 entries, the major part being magazine articles. The references to French and German works are extended and should prove of assistance to American librarians.

There might be much criticism of the selection under the first head, but the compiler has forestalled hostile attacks by his frank admissions in his short introduction. As a whole the selections are excellent, and the bibliography in the main seems reasonably full. There are a few notes scattered throughout the collection of titles. Some of these consist merely of a single phrase, others of a quotation from the preface of the book cited, and a few are bibliographical directions of a useful sort. It would seem a pity that one so well qualified to comment on the contents of the books as is the compiler should not have done so more frequently in this list.

W: W. B.

GÖTEBORGS STADSBIBLIOTEK. Festskrift med anledning af den nya biblioteksbyggnadens invigning den 6 Oktober 1900 of L. Wahlin. Wald, Zachrissons Boktryckeri, Göteborg, 1900. 50 p. 4 il. 3 ground plans.

In my review of Dr. Steenberg's "Folkebogsamlinger" in L. J., November, 1900, I said that the author's statement that the public library of Göteborg contains 7730 vols. was "a surprising error. The library really contains over 80,000 vols. and includes the library of the Göteborg university." As a matter of fact, Göteborg has two public libraries, Göteborgs stads folkbibliotek, to which Dr. Steenberg referred, and Göteborgs stadsbibliotek, created by the union of the old Museum library, founded in 1861, and the library of the university, which was organized in 1890. The book that I now have before me is a history of the growth of the library, and a description of the new building, by the present librarian, Dr. L. Wahlin. It is a pleasant evidence of the public spirit and liberality of the wealthy citizens of the second city of Sweden, and also of the munificence of the city authorities who have done all in their power to aid the growth of the institution. The library includes a great number of private libraries, purchased mostly by friends of the library, in some cases by pub-

lic funds. Among these libraries the following may be specially mentioned: Professor Carl Sävæ's library, mainly in Scandinavian philology, 6000 vols.; Professor E. Löfstedt's library in classical philology and archaeology; 70,000 duplicates from the Upsala University library; the library of the farmer, and former member of the Riksdag, Lars Maussion, in Trauemala, containing 25,000 vols. and pamphlets in early and recent Swedish literature; the remainder of the library of King Karl XV., after the state institutions had selected what they needed. The city of Göteborg received at one time a large donation, the interest of which was to be used for the furtherance of intellectual interests. The interest is partly used to increase the main fund, and it seems that for some time at least the accumulation of several years are paid out at certain intervals. From this donation, "Renströmska fonden," the library received in 1871 10,000 kr., in 1879 25,000 kr., from 1891 on 3000-5000 kr. a year. These donations were mostly used for the purchase of books and for their cataloging. In 1894 the library received from "Renströmska fonden" in all 350,000 kr., namely 200,000 kr. as a building fund, 50,000 kr. for purchase of books, and 100,000 kr. as a general library fund. The annual income of the library is from the museum about 4000 kr., from the university 4000 kr., from the city treasury 4000 kr., from "Renströmska fonden" 5000 kr., interest of its library fund 1500 kr., etc., a total of some 19,000 kr. This was expended in 1899 in the following way: salaries, 6500 kr.; books, 5400 kr.; binding, 1000 kr.; sundry expenses and supplies, 1800 kr.; rent, 4300 kr.

The new building is estimated to hold 300,000 vols., and is arranged on the stack system. The first floor contains delivery room, reading rooms and administration rooms; the two upper floors are arranged into four stacks. The main reading room has individual tables for some 40 readers, and there is a smaller reading room with large tables surrounded by spacious arm chairs for the use of special students. This room is also used as a meeting room by the trustees and for scientific societies.

I cannot leave the subject under review without quoting from the closing paragraphs of the author:

"The object which a public library in Göteborg has to fulfil has been formulated by the former librarian, Warburg, by saying that the library must meet, first, the *scientific man's* needs of scientific and literary material for his researches; second, the *practical man's* need of enlightenment in various questions; thirdly, the *knowledge-seeking public's* need of instructive and entertaining reading. This program has been strictly adhered to, and it is not to be regarded as a deviation when the administration, as the library developed, has found it necessary to restrict the lending of Swedish prose fiction to such

cases when the loan was asked for scientific purposes. The fact that the consolidation with the university library has given certain branches a more scientific stamp ought not to trench upon the more popular part of the library's activity. The American 'public libraries' show best how a library can unite a public and civic function with a special and scientific one."

Of course, the presence of another particularly popular library in the city has enabled the "Göteborgs stadsbibliotek" to retain its high scholarly standard, without losing entirely out of sight the function of instructive entertainment. AKSEL G. S. JOSEPHSON.

## Library Economy and History.

### GENERAL.

The *Library Association Record* for January opens its third year with a few words of editorial prospect upon the new century; its leading articles are "Lectures under the public libraries acts," by C. W. Kimmins, and "Art galleries in relation to public libraries," by A. G. Temple. The February number has an interesting non-technical article on "The literary associations of Bath," by C. T. Macaulay.

### LOCAL.

*Albion, N. Y. Swan L.* The first anniversary of the opening of the library was observed on Feb. 7 with a public reception, at which gifts of books or money were presented to the library. As a result 106 volumes and \$35.25 in cash were received.

*Boston P. L.* The Boston Public Library has inaugurated a second annual series of free public lectures, to be delivered weekly, beginning March 11. The lectures are devoted to methods of municipal administration in general and as illustrated by the history of principal cities, and the lecturers include A. Lawrence Lowell, George L. Fox, E. Emer-ton, Kuno Francke, W. T. Sedgwick and F. G. Peabody.

*Buffalo (N. Y.) P. L.* (4th rpt., 1900.) Added 21,627; total 165,960. Issued, home use 981,235 (fict. 67%), of which 695,587 were issued from the main library; ref. use, from stack only, 37,266. Borrowers' cards in use 65,803. Receipts \$91,186.42; expenses \$90,557.39.

The total circulation of the library shows an increase of 10½% over the previous year, and the year is regarded as one of "healthy growth and increased usefulness." The work of the various departments is set forth compactly, and the report gives an excellent presentation of the many activities of a large city library.

From the open shelf department 19,064 books were issued 268,508 times, an average

of 14 readings for every volume. Special collections of books for children going from the children's room to the main library were prepared and largely used, and attention was called to single books of high character by home-made book posters. In the children's room there were in all 8181 volumes, and the circulation reached 100,496. Here Saturday morning readings were given as a means of awakening interest in good books.

The facilities of distribution maintained by the library are many and varied. Thirty schools are supplied with 407 separate classroom libraries, containing 20,346 books, which were issued for home use 194,045 times. "The principal of one of the schools on the east side, where fully 75% of the parents are foreign born, stated that beyond any doubt the moral tone of his district has been changed for the better since his school has had books from the public library." There were sent out 108 travelling libraries, containing 3131 volumes, received by high and grammar school classes, private and parochial schools, clubs, missions, settlements, Sunday-schools, factories, home library centers, fire and police stations. "The books placed in the fire houses have, in some cases, become neighborhood libraries, under the care and responsibility of the captains." From 7 delivery stations there were circulated 46,748 v., but though these stations are at present indispensable they are "the most expensive and least satisfactory work we do. This is simply because the work is all done at arm's length." There are also two small branches, regarded as simply beginnings in this line, which had respectively a circulation of 10,146 and 7365 v. Of these Mr. Elmendorf says:

"I repeat and emphasize my remarks of last year, that the great need of the library is branches. In this large city the distances from the library, and the time and the car-fare expense to get there, are, for many who need and would enjoy it, absolutely prohibitive. I am convinced that each of four branches located in favorable parts of the city at a distance from the library would circulate an average of 10,000 books a month each. This would, to a certain extent, relieve the congestion at the main library, would greatly increase the usefulness of the library by enabling the assistants to meet the wants of the borrower in dealing personally with him at the branch. There is no difficulty about the books themselves. The library has, or can provide out of its regular income, suitable books for branch equipment. The difficulty is with providing proper buildings and furniture. I renew my recommendation of a year ago that the board provide quarters for branches, even if in rented buildings, and vigorously push this most important project."

*Cambridge (Mass.) P. L.* (43d rpt. — year ending Nov. 30, 1900.) Added 4251; total 59,018. Issued 179,355, of which 42,807 were

drawn through schools and local stations (fict. incl. juv. .717%). No. cardholders 26,200. Receipts \$19,000; expenses \$18,998.62.

Mr. Gifford regrets the abandonment of the plan for establishing the East Cambridge branch in a suitable and attractive building, and expresses himself in strong approval of the establishment of more branches. "Delivery stations meet a certain need, but, even under the best conditions, there is a distinct limit to the services that can be rendered through them." Additional stack room is greatly needed, and it is recommended that the existing age limit of 13 years—though practically nominal—be formally abolished.

There has been an increase in circulation, the number of books sent to schools showing a gain of nearly 20 per cent. The report contains some excellent illustrations of the library.

*Chicago. Newberry L.* (Rpt., 1900.) Added 4060, 1207 pm.; total 161,715, 65,384 pm. Special accessions of the year are briefly noted. There were 76,341 visitors (51,294 men), who consulted 126,612 volumes. The library has now 1260 periodicals on file, of which 459 are medical. The chief gain in extent of use has been in the departments of medicine and history.

*Chicago (Ill.) P. L.* Dr. W. A. Kuflewski, chairman of a special committee appointed by the library board to consider the advisability of sterilizing the books in the library for the purpose of preventing possible spread of disease, reported to the trustees at a meeting on Feb. 18, recommending that some system be adopted for freeing at regular intervals the pages of the volumes from bacilli. He exhibited several glass tubes filled with germs taken from the pages of library books examined and stated that the 50 books examined by him during the investigation were found to be more or less infected. He advised that a system of sterilizing the volumes by the dry process be adopted. The board instructed the special committee to continue its investigation.

*Cincinnati (O.) P. L.* It is proposed to establish a department for the blind at the library, for the use of all residents of Hamilton County.

*Columbus (O.) P. School L.* (24th rpt.—year ending Aug. 31, 1900.) Added 6310; total 43,565. Issued, from circulating dept. 168,302; lib. use 237,888. "The practice of limiting the issue of fiction to children to one volume per week during the school year, but placing no restrictions whatever on the other classes of books, or on such as would aid them in their school work, as adopted last year, proved so satisfactory that it was continued this year also." New registration 2136; total cards in use, 18,653. Receipts and expenses \$4149.59.

This report will be read with interest by all librarians interested in developing the

school use of books. One of the special departments of the library is that devoted to supplementary reading, and containing 14,812 volumes, which are used in all school grades in connection with school work. The use of books from the various school buildings, for home reading and reference, gains constantly in amount and value. A special need of the library, however, is a separate children's room, and for this Mr. Hensel presents a strong plea. He concludes:

"The success of the public library depends upon its circulation (the service books render), in which quality instead of quantity should be the criterion. The quality as well as the quantity of the library's circulation depends upon the intelligence of the community in which the library is situated. And this intelligence, in its turn, depends upon the educational system adopted by the community, of which system the public school is the foundation. So that, in the end, the success of the library depends upon the public schools. The better the system of the public schools, the greater the success of the library. Our branch libraries furnish ample evidence in support of this fact. It follows, then, that the best investment the library can make is to give the public schools all the aid and assistance in its power."

*Connellsville, Pa. Carnegie L.* Plans are being considered for the \$50,000 library building given to Connellsville by Andrew Carnegie.

*Derby, Ct.* The book fund, being raised by popular subscription for the public library to be given to Derby by Col. and Mrs. Holton Wood, had reached the sum of \$17,000 by Feb. 16. Of this amount \$5000 was contributed by Col. and Mrs. Wood, and the remainder was given by interested citizens. Nearly \$75 was given by the public school children. The Derby Reading Circle voted to contribute to the library its collection of nearly 900 volumes.

*Des Moines (Ia.) P. L.* (9th rpt.—year ending Dec. 31, 1900.) Added 1657; total 27,426. Issued, home use 127,412 (fict. 57.69%; juv. 24.45%); ref. use 25,762; 684 v. have been issued to teachers for use in school work. New borrowers 2025; total registration 13,638.

During the past six months a duplicate collection of popular books has been maintained, from which volumes are issued at a charge of five cents per week. This collection contains 48 volumes, which have been issued 802 times; it has proved "one of the most popular features that the library has ever had."

The books issued for teachers' use is but "a fraction of the work the library should be doing for the schools," and Miss McLoney recommends "that a collection of books, from 30 to 50 volumes, be placed in at least one room of each school building," to be kept from one to three months. The placing of

similar libraries in workshops and factories is also suggested.

Re-registration of borrowers, to be reported at two-year intervals, is recommended. Increased book purchases are also seriously needed, if the library is to give satisfactory service.

*Dover (N. H.) P. L.* (18th rpt.—year ending Dec. 31, 1900.) Added 1327; total 26,124. Issued, home use 68,381 (fict. 43%; juv. fict. 23%; periodicals 10%); reading room attendance 24,296. New registration 395; total registration 9523. Receipts \$3957.73; expenses \$3949.23.

A new departure was made in the publication of a quarterly bulletin for free distribution; this has proved most satisfactory and will now replace the yearly supplement to the catalog. Picture work was also undertaken, with the mounting of the picture collection gathered during several years from periodicals and like material. Thus a collection of over 500 pictures was secured, which are in active demand by study clubs. Sets have also been prepared for the schools, arranged in duplicates of 20. "So that a school using for example the Washington set will be equipped with 20 copies each of his portrait, birthplace, home and burial-place, thus making it possible for all the pupils to study the same picture at the same time." Miss Garland refers to the large development of general library work with children, which will be practicable whenever larger facilities are secured.

*Dubuque (Ia.) P. L.* The library directors at a meeting on Feb. 20 decided that the new library building should be known as the Carnegie-Stout Free Library, in honor of the gift of the building from Andrew Carnegie and the site from Mr. Stout.

*Eau Claire (Wis.) P. L.* (Rpt.—year ending June 30, 1900.) Added 1443; total 10,619. Issued, home use, 54,234 (fict. 22,256; juv. fict. 18,892.) Total registration 6033. Receipts \$3784.46; expenses \$3740.95.

"The library has been constantly and most profitably used by very many children during the past year. Many of the children are actively interested in the library league organized two years ago. The executive board, which consists of two members from each ward, has been the portion of the league which has received the special attention of the librarian during the year. It is hardly practical to often bring together all the members of the league, but it has been possible and pleasant to meet the members of the executive board and explain to them the uses of catalog and classification and to talk with them about books."

*Frankfort (N. Y.) F. L.* The library was formally opened on the evening of Feb. 16, with a public reception held in the new library rooms. It contains about 1200 volumes, of which 500 were gifts. The library was es-

tablished through the efforts of the local Fortnightly Club, and its management is now transferred to the Library Association, membership in which is open to persons over 16 years of age on payment of \$1 per year. It is open three afternoons and two evenings of each week.

*Glenolden, Pa.* About a year since an effort was made to develop a free library in Glenolden, which contains about 850 residents. Application was made to the Pennsylvania State Library Commission and a travelling library was granted for the use of the residents and the extension of the library work. Mr. E. H. Bonsall, burgess of the town, has sought to extend public interest in the library by providing a series of free lectures in the hall above the library room. On Feb. 15 Mr. Thomson of the Free Library of Philadelphia gave a lecture on the "Life and works of Charles Dickens," illustrating it with about 50 stereopticon views of some of the leading characters of Dickens's novels. The attendance at these lectures has steadily increased and such work as this is a very material help in creating the habit of reading, so that the library workers are much encouraged by the steady development of interest in their work.

*Hackensack (N. J.) P. L.* The new library building, given by former State Senator Johnson, will it is thought be completed in May, when it will be transferred to the city. In order to receive title to the property, it is necessary that a board of trustees be appointed under the public library act of the state, passed in 1890. This remains inoperative unless assented to by a majority of the legal voters of the town at an election, when the question of its adoption shall be determined. The act will be submitted to such vote at the spring election on March 12.

*Harvard Univ. L., Cambridge, Mass.* (Rpt., 1899-1900.) Added 29,788; total, 576,950. Use of books 87,427, of which 63,712 were lent, excluding 13,460 drawn for over-night use of Harvard Hall reading room; 320 persons received cards of admission to the stacks, which were used 6898 times. Of the 3363 students, 2176 are recorded as taking books from the library; to Radcliffe College 1125 books were lent for the use of 121 borrowers; 475 volumes were sent, on request, to libraries and scholars in distant parts of the country; "this number is somewhat larger than in any previous year, but no instance of loss or injury has occurred, and it is thought that the convenience of college officers and of scholars in Cambridge has not been interfered with by the temporary withdrawal of these volumes."

As usual, this interesting report should be read in full by librarians of large collections, as the various points covered can hardly be brought out in a brief notice. Mr. Lane gives attention to various expedients possible by which the need of increased space may be

met. Among them are the transfer to special departments of all books relating to the specialties of those departments, which would at once inaugurate "a well developed departmental library system and would commit the library to an entirely different policy from what it has pursued hitherto"; or the thinning out and storing away of certain classes of little-used books and the dead portions of such other classes as are most crowded.

One of the most interesting incidents of the year was the preparation of an historical collection illustrating the life of the college at the present day. This was secured by obtaining from the officers of the university and a selected number of undergraduates careful personal records of their daily life for a given month (March), the 70 journals thus received being deposited, with some 150 admirable photographs, in a strong chest and sealed, with the condition that it remain unopened for 60 years, except as, after 25 years, individual records may be needed for biographical reference.

The theft of a large number of book plates, cut out from the volumes in which they belonged, was discovered in February, and in March Dr. Charles E. Cameron, of Boston, was arrested for the offence. Sentence was suspended, in view of the restitution of most of the 220 plates stolen.

Especially notable is the gift of the fine Riant collection, dealing with literature of the Latin East, the Crusades, and allied subjects, presented by J. Randolph and Archibald Cary Coolidge, and regarded as "probably the most valuable collection of books that the library has ever received, with the possible exception of the Ebeling library of American history received in 1818 from Israel Thorndike." Indeed the general record of gifts for the period is remarkable for interest and extent.

The record of the work and problems of the catalog department is suggestive, and from the ordering department the suggestion is repeated that "each year a special appropriation be given to cover some neglected topics," and that "an appropriation be made each year for Current events, none of the present appropriations being properly chargeable with such books, many of which the library ought to buy. Under this head would come, for example, the books we have bought within the last few years on the Spanish-American war; on the Dreyfus case; on the Transvaal; and now on China."

*Lowell (Mass.) P. L.* On Feb. 13 the mayor appointed Mrs. Rowena Hildreth Palmer a member of the board of library trustees, succeeding Philip J. Farley, resigned. Mrs. Palmer is the first woman ever appointed on this body.

*Los Angeles (Cal.) P. L.* (12th rpt.—year ending Nov. 30, 1900.) Added 9836; total 60,000. Issued, home use 392,022 (fict. 200,326; juv. fict. 49,401); lib. use 217,616.

New registration 7074; re-registration continued during year; total "live" cards not stated. Receipts \$39,405.20; expenses \$26,976.52.

A well arranged report, presenting clearly the various activities of the library. The record of circulation of fiction, however, shows a slight discrepancy, the number of books circulated being stated in the report proper as 200,095, though all the tabulated statistics give the issue of adult fiction as 200,326 and juvenile fiction as 49,401. The fiction percentage is stated as 33.69, this being based upon total issue of books, for home and library use; the fiction percentage for home use, however, given in the tabulated statistics, is 55.75% for adult and 13.75% for juvenile fiction. The circulation as a whole shows a considerable increase over the preceding year—33,124 in home use and 49,929 in library use. Since June 1, 1900, magazines in the reading room were made freely accessible, and no statistics of their use were kept. The change of fiction numbers to the Cutter and Sanborn symbols has been carried through; and much time was given to completing new fiction catalogs, printed and on cards. In the school and juvenile department there are 7311 v., from which the combined circulation from the library and through the schools has been 140,112. More books on pedagogy are needed.

The first delivery station established in September, 1900, is regarded as a successful experiment, and the librarian recommends that the system be extended. The plan of sending books to the fire stations of the city has also been adopted, partly as an experiment.

The 13th training class conducted by the library began work Nov. 5. The rules regarding the class had been revised during the year and the date for its formation is now fixed annually for the first Monday of November. The class is limited to six, a number that is sufficient to supply the library with needed attendants. "The need of a training school for librarians on this coast is most evident from the number of applications we have for admission to this class. With our present limited room we can consider nothing more than the training of our own assistants, and consequently are forced to refuse admission to all outsiders.

*Martinsburg (W. Va.) P. L.* Added 324; total 2070. Total registration of borrowers 1143. Issued 15,142. Receipts \$23.48; expenses \$23.

The receiving of government publications has been discontinued, owing to lack of shelving room.

*Nebraska State Normal School, Peru.* The library of the Nebraska State Normal School, embracing about 15,000 volumes, is being classified, cataloged and generally reorganized by Miss Emma V. Shearer, of the staff

of the University of Nebraska Library, who will spend some five or six months at the work. This library is one of the oldest in the state, and is fourth in size among Nebraska libraries, but until now has never been classified, and no catalog of any kind has ever been issued for it.

*New Jersey travelling libraries.* The budget submitted by State Librarian Buchanan to the appropriations committee of the legislature calls for only \$500 for the state travelling libraries, being half the amount required last year. It is stated that this sum will meet all necessities of the system, as the demand for the libraries is falling off rather than increasing.

*New York City. Mercantile L. Assoc.* (80th rpt., 1900.) Added 5885; total 263,217. Issued, home use 173,696 (Eng. fict. 56.60%); ref. use 41,163. New members 990; total membership 4978, showing a net loss in membership of 163. Receipts \$25,564.14; expenses \$25,038.09.

*New York P. L. — Astor, Lenox, and Tilden Foundations.* The merging of the New York Free Circulating Library into the New York Public Library was assured at a special meeting of the members of the former organization, held Feb. 19. More than two-thirds of the members cast their votes by proxy in favor of the agreement, so that its adoption was merely a formality. The agreement of consolidation was filed at the office of the secretary of state, at Albany, on Feb. 3. It creates a new corporation, retaining the name "New York Public Library — Astor, Lenox, and Tilden Foundations," and with the former trustees continued in office as its governing body, and it provides that the property and assets of the parties thereto shall pass to the control of the corporation created, but the new corporation shall not be prevented from disposing of any property at any time of which it may be possessed.

On Feb. 7 a bill was introduced into the legislature by Assemblyman Gherardi Davis, which provides for the amalgamation of all the public libraries of New York City. It amends the library consolidation act of 1895 and places in one system the entire New York public library system. The following statement is made concerning the bill:

"The existing act has particular reference to large corporations, such as the Astor and Tilden libraries, and under it the public library was created. There are several small libraries with one single station, and not a large amount of capital, which desire in some way to consolidate, and it is hardly possible to go through the elaborate form again when each of these library corporations comes in. It is therefore proposed to simplify the business and pass an act to permit these small libraries to transfer their property to the New York Public Library and thereupon to cease their corporate existence." The bill intro-

duced makes simple provisions by which any of these library corporations "may turn over its property to the Public Library, preserving its contracts and making the Public Library liable for all its debts to the amount of assets received, and when this is done give up its charter and obtain the assent of its members either informally upon a paper which is acknowledged or formally by a meeting, and thus simplify the method of consolidation.

"The act is based upon the act known as chapter 101 of the laws of 1891, by which the trustees of the College of Physicians and Surgeons were authorized and empowered to transfer all their property to the trustees of Columbia College upon such terms, conditions and limitations as might be agreed upon between the two institutions. This act was passed when the College of Physicians and Surgeons proposed to join Columbia College, which they since have done, and their property was simply transferred and their charter given up. This is proposed to be done with the smaller libraries, and if any small library desires to transfer its property to the Public Library, this act is to permit them to do so, and to simplify the means by which it can be done." The bill passed the Senate on Feb. 26.

The library has received the gift of a large and valuable collection of Japanese engravings from Charles Stewart Smith, of New York. Among the artists represented are Hokusai, Suzuki Harunobu, Gakutei Sakao-ka, Utamaro, Koriusai and Hokkei. There are 344 pictures by the first of these and 295 by the second, and lesser numbers by the others. The chromo-xylographs include some special series, a dozen representing the operations of agriculture, while there are 52 portraits of Japanese authors. The collection will be exhibited in the Lenox building after March 20.

*New York City. Y. M. C. A. L. Railroad Branch.* (Rpt., 1900; in *Railroad Men*, Feb. 1901, p. 221-2.) Added 760; total 9273. Issued 16,080 (fict. 6990), being a gain of 11% over the previous year. 5889 v. were drawn at associations and other stations along the railway line, and 134 v. were circulated from two travelling libraries. The total number of readers was 1337. There are 130 periodicals on file in the reading room.

*North Adams (Mass.) P. L.* (5th rpt. — year ending Dec. 1, 1900.) Added 1807; total 17,942. Issued, home use 73,962 (fict. 49.8%; juv. fict. 25.8%). New registration 1561; total registration 5911 (children's cards 1184). Receipts \$6289.97; expenses \$6289.98.

The report contains plans of the first and second floors of the Houghton Memorial Building, and describes the children's room opened in October, and previously noted in these columns (L. J., Dec., 1900, p. 762). Two promising enterprises are the reorganization of the Blackinton library (now included with-

in the city limits) as a branch of the public library, and the establishment of what is practically a library substation in one of the more distant school buildings. "While the total number of books circulated was 7563 more than the number issued last year, the per cent. of adult fiction was only 49.8 as compared with 54.7 of last year. The greatest gain was in the children's reading, which rose from 27.8% to 32%. The number of French books drawn was more than doubled. During the summer five vacation books were issued on a card, a privilege greatly appreciated."

In the work with children a reading class modelled upon that of the Springfield Library has been conducted with much success. The age limit was abolished in July. The reference use of the library is greatly increasing, and systematic work with the schools is carried on with the aid of teachers. The special needs noted are more books, especially children's books and French and Italian books, and a good music collection.

*North Carolina State L., Raleigh.* (Rpt., two years ending Nov. 30, 1900.) Added 2532; total not stated. A much-needed improvement has been reclassification on the D. C. and the adoption of card cataloging. It is recommended that a separate reading room for negroes be established.

*Northwestern University L., Evanston, Ill.* (Rpt. — year ending April 30, 1900; in President's rpt., p. 64-7.) Added 2899, pm. 1827; total 43,182, pm. 27,000. Recorded use 12,938. The special needs of the library are noted, as additional shelving, an assistant cataloger, recataloging and reclassification. Of the latter need Miss Ambrose says: "It is impossible to overstate its imperativeness and the desirability of action in regard to it at as early a time as practicable."

*Passaic (N. J.) F. P. L.* (13th rpt., 1900.) Added 1038; total 8930. Issued, home use 63,902 (fict. 24,972; pm. 22,491). Attendance at reading rooms 82,081. Receipts \$3526.71; expenses \$2782.31.

Perhaps the year's most important work is that recorded for the children's department and the Dundee branch, in the heart of one of the mill districts. "The free access to the shelves in the children's department has resulted in the loss of 20 books." At the Dundee branch the 1210 books have been read 22,248 times, or 18 times for every book. The opening of the children's room at this branch "has proved to be an unqualified success, both as to the increased demand for more and better books, and in its effects upon the manners, morals, and personal appearance of the readers"; of adult readers the number is double that of the previous year, and the effort to keep them supplied with books has been a serious drain upon the main library. Unfortunately the work in this region is now at a standstill, owing to lack of funds. It had been carried on through the year on a

gift of \$2000 made by a friend whose identity was not made public, and with the exhaustion of this sum there remain no means of continuing the work. The trustees express a strong hope that "a way will be provided."

"David Harum," "Richard Carvel" and "Janice Meredith" have had the widest circulation, the first named book having been issued at the main library 331 times."

Small libraries of 50 books each have been sent to and from various public schools, where they have proved welcome and useful.

*Philadelphia, Mercantile L.* The annual election of officers of the library association, held Feb. 19, resulted in victory for the body of stockholders favoring the policy of developing the library on essentially its present lines and securing a new building. The prospects seem, therefore, unfavorable to any consolidation with the Free Library of Philadelphia, as has been at different times suggested.

*Portland (Ore.) L. Assoc.* (Rpt., 1900.) Added, general 1427; Wilson bequest 8891; total 37,682. Issued 57,895 (fict. and juv. 77.4%); attendance 73,793. Total membership 1151, of which 552 are "student memberships" at a reduced rate of \$1 yearly. Receipts \$3738.49; expenses \$4051.78, leaving a deficit of \$313.29, which is offset by a surplus of \$431.86 from the previous year. The indebtedness of the association has been reduced to \$3347.85.

The chief event of the year was the bequest of the private library of the late John Wilson, of Portland, accompanied by a sum of \$2500, the income of which is to be used for library maintenance. Mr. Wilson's library of nearly 9000 volumes was rich in art works and examples of early printing, and the work of cataloging and making it accessible to the public was provided for by the private subscription of \$1100 by the directors. Another important gift was the donation of \$25,050 from the three daughters of the late Henry Failing, which was devoted to cancelling the bulk of the indebtedness of the association; thus practically relieving the association from interest charges for the first time since the erection of its building.

Among incidents of the year were the adoption of a "reserve" system, with notification by post card; the adoption of the Browne charging system; and the reissue of the periodical bulletin, *Our library*. The provision of "student memberships," made about two years ago, has been so largely availed of that it has "become a serious problem to deal with," resulting in great overcrowding in rush hours and vacation days. It is therefore recommended that separate rooms for students and children should be provided under the charge of special attendants.

*Rome, N. Y. Jervis L.* The librarian, Miss Beach, has been granted leave of absence for six months, owing to ill health, and

Miss Eugenia Stevens, assistant librarian, has been designated as acting librarian during that period.

*Princeton (N. J.) University L.* The library made its first venture in publishing in January with the issue of a handsome volume of the "Journal and Letters" of Philip Vickers Fithian, 1767-1774, edited by John Rogers Williams, and published by the library for the Princeton Historical Association.

*Seattle (Wash.) P. L.* The library is now established in temporary quarters in the old building of the University of Seattle. It occupies a large, light room on the ground floor. Shelving has been installed and all books are being reclassified while lists have also been prepared of the books on hand and those destroyed in the recent fire.

*Sioux Falls, S. D.* The city council on Feb. 11 voted unanimously to accept the offer of \$25,000 for a library building, made by Andrew Carnegie. At least \$2500 is guaranteed yearly for maintenance.

*South Dakota, Library commission bill.* A bill providing for the creation of a state library board of three members was killed in the state legislature on Feb. 8. In the discussion of the proposed measure one member moved to amend the title to "A bill to provide employment for idle people." The bill as presented provided that the library board should consist of the state superintendent of education, the secretary of the State Historical Society, and the librarian of the State University, its duties being to give advice and encouragement as to public library development and to prepare lists of books for purchase by libraries. No appropriation and no salaries were asked for.

*U. S. Naval Academy L., Annapolis.* The library of the Naval Academy has been transferred from the building it has occupied since 1866 to temporary quarters in a building in another part of the academy grounds. The plan for rebuilding the Naval Academy includes a new library building, and the law authorizing the appropriation of the funds requires the transformation of the library into a residence for the superintendent of the academy. Fortunately a convenient building was available, so the shelves were transferred and set up in the alcove plan, and on Jan. 2 the actual removal of the books began, and continued for four days, the books being put in order on the shelves. Then came a wait of a week to allow the workmen to finish and get out of the building. On Jan. 15 the moving of the books was again taken up and was completed on Jan. 21. 42,000 books were moved without interrupting the routine work of the library for a day. At one time only about 500 books were available for the users of the library, but at no time were the doors closed.

*University of Montana L., Missoula.* (Rpts., 1899-1900; in President's rpt., p. 12.) The contents of the library are given as 6114 bound v., 320 unbound v., and 6000 pamphlets; there are 67 periodicals on file.

Mr. J. F. Davies, formerly librarian of the Butte Public Library, and now expert librarian of the university, gives a suggestive outline of the purposes of a university library, and the means essential to their accomplishment. Such a library is designed, 1, to encourage familiarity with books on the part of students; 2, to give information to students and faculty; 3, to impart to students a working knowledge of bibliographic aids. It should possess a thorough card catalog, by authors and subjects, and full records of the character and condition of its collection; and its officers should give such practical instruction in library methods as may be necessary, individually or as a course of study.

In accordance with this latter requirement Mr. Davies has undertaken the instruction of a class in library economy. The course consists of two hours a week of recitation and five hours a week of laboratory work for five months; it is a general elective, open to students who are registered for a full college course and thus candidates for a degree. He writes: "I am strongly emphasizing the fact that the course is designed as a part of the educational drill rather than as a help in obtaining library positions. In the present state of Montana politics this latter inducement cannot be honestly held out. Yet I feel that the conducting of even one class of this sort will be a strong influence toward securing the right public sentiment on the subject." The class is to be restricted in size, so that individual work with each student may be practicable, nor will admission be granted to students "whose education would be so limited as to prevent them from receiving full value from the work."

*University of Nebraska L., Lincoln.* (Rpt. — two years ending Nov. 1, 1900.) No statistics are included in this brief report, but the total contents of the library are referred to as 45,000 volumes. All students are given free access to the books, and the loss of books "is no larger than in some similar institutions where books may be used only under restrictions" Mr. Wyer gives special attention to the departmental system, "early formed and constantly maintained" for special departments, and notes the following points in administrative policy that have been particularly emphasized:

"1. A tendency to multiply departmental libraries unduly even in closely related subjects has been met by the consolidation of the collections on Horticulture, Agriculture, Animal husbandry, Animal pathology, and the Experiment station library. The libraries of the departments of Mathematics and the three Engineering departments have been similarly

united, and to them might well be added part of the Astronomical library now inadequately housed in an unsafe building. The union of the libraries of the biological departments, of course in charge of a competent attendant, seems desirable whenever funds will allow and when these departments shall be permanently settled in ample quarters.

"2. All books, periodicals and publications of learned societies which are of so general a scientific nature that they cannot justly be assigned to any one department shall be kept at the central library.

"3. Adequate shelving shall be a charge upon each department wherever there is kept a departmental library.

"4. The library board has ruled that when department libraries become larger than is needed or desired by the department concerned, any books indicated by the head of such department may be transferred to the central library."

*Wisconsin travelling libraries.* The library committee of the Wisconsin State Federation of Women's Clubs has issued an appeal to the clubs of the state for contributions toward a special travelling reference library, intended for use among the women's study classes in the state. The federation has now six such libraries in active circulation among the clubs, but it is desired to greatly enlarge the present equipment.

*Worcester (Mass.) P. L.* The first of a series of public lectures, upon subjects connected with books, was given in the library art rooms on the afternoon of March 5. It was by E. Harlow Russell, principal of the State Normal School, and dealt with educational books of special value to teachers.

*Yale University L., New Haven, Ct.* (Rpt.—January, 1899-July, 1900.) This is the first publication in separate form of the librarian's report; the length of the period covered is owing to the change of date from the calendar year to the financial year of the university, beginning Aug. 1, to which the report has been conformed. The additions for the period are given as 12,235 v. purchased and 10,275 v. given, and 20,150 pamphlets. The total extent of the collection is not stated. Most important among the accessions was the private library of the late Professor Marsh, of about 5000 v. and 10,000 pamphlets, and especially strong on paleontology. Other important book purchases or gifts are briefly described.

The number of books borrowed from the library during 12 months, not counting overnight issue of reserved books, reached a little over 43,000. The general reference and reading room use has shown "a very manifest increase." The present building, it is pointed out, will soon prove unequal to the growth of the library, which now averages about 13,000 v. yearly. A suitable cataloging room in particular is greatly needed.

## Gifts and Bequests.

*Akron, O.* Colonel George T. Perkins, president of the Goodrich Rubber Company, has offered to erect a building for the public library, provided the city will furnish a site. It is understood the building will cost no less than \$50,000.

*Brooklyn (N. Y.) L.* The Brooklyn Library will receive a share in the estate of the late James H. Bell, of Brooklyn. Mr. Bell's will provides that his estate, which is valued at about \$1,000,000, shall be divided into 75 parts, of which 16 are bequeathed to the Brooklyn Library. Mr. Bell a few years since presented to that library his rich private library, maintained separately as the Bell collection, and his later collection, numbering about 2000 volumes, is bequeathed to the same institution.

*Elwood (Ind.) P. L.* The library has received through the local women's club the gift of \$1000 from President Reid, of the American Tin Plate Co., of New York.

*Grand Rapids (Mich.) P. L.* Grand Rapids is now confronted by the offer of two fine library buildings. In addition to the offer of Andrew Carnegie, on Feb. 14, Martin A. Ryerson, of Chicago, a few days later offered to erect a library building for Grand Rapids, his native town, at a cost of \$150,000, on conditions similar to those named by Mr. Carnegie, *i. e.*, the provision of a site and guarantee of yearly maintenance. The offer was at once accepted by the mayor, and it is not yet known what the result of this double offer will be.

### CARNEGIE LIBRARY GIFTS.

During the month from Feb. 4 to March 4 Andrew Carnegie has made gifts for public library buildings to 23 towns, aggregating a total of \$1,005,000. The record of these gifts is as follows, the conditions, unless otherwise stated, being the usual ones imposed by Mr. Carnegie, that the city furnish a site and guarantee a yearly maintenance fund of at least 10 per cent. of the sum given:

*Centralia, Ill.* Feb. 16. \$15,000.

Yearly maintenance fund of \$2000 required.

*Cumberland, Md.* Feb. 19. \$25,000.

*Decatur, Ill.* Feb. 8. \$60,000.

City already appropriates \$6000 for library maintenance.

*Easton, Pa.* Feb. 13. \$50,000.

*Fresno, Cal.* \$30,000.

Accepted by city council Feb. 18.

*Galesburg, Ill.* Feb. 17. \$50,000.

Accepted Feb. 18. City already appropriates \$6000 for library maintenance.

*Grand Rapids, Mich.* Feb. 14. \$100,000.

Accepted by city council Feb. 18. See also Ryerson gift to Grand Rapids, noted elsewhere.

*Green Bay, Wis.* Feb. 17. \$20,000.

Yearly maintenance fund of \$2500 required.

*Jackson, Tenn.* Feb. 27. \$25,000.

*Jacksonville, Ill.* Feb. 8. \$40,000.

*Lincoln, Ill.* Feb. 12. \$25,000.

*Mankato, Minn.* Feb. 6. \$40,000.

Accepted Feb. 15.

*Marion, Ind.* Feb. 20. \$50,000.

A site was purchased some time ago, and the offer was promptly accepted.

*Montgomery, Ala.* Feb. 16. \$50,000.

Accepted March 7.

*Mount Vernon, N. Y.* Feb. 20. \$35,000.

*Port Jervis, N. Y.* Feb. 22. \$20,000.

\$3000 yearly required.

*Richmond, Va.* March 1. \$100,000.

*St. Cloud, Minn.* Feb. 17. \$25,000.

*Sault Ste. Marie, Mich.* Feb. 15. \$25,000.

Yearly maintenance fund of \$3000 required. Accepted Feb. 18.

*Schenectady, N. Y.* Feb. 15. \$50,000.

Conditions imposed had been previously met at a council meeting on Feb. 11, when \$5000 a year for library maintenance was provisionally appropriated in the hope of securing a Carnegie gift. A site is already under consideration at a probable cost of \$14,000.

*South Omaha, Neb.* Feb. 23. \$60,000.

Offer made anonymously, through Representative D. H. Mercer, from Washington.

*Springfield, Ill.* Feb. 14. \$60,000.

On Feb. 15 the city council passed an ordinance appropriating \$10,000 annually in the hope that the gift might be raised to \$100,000. The appropriation is made conditional upon such gift. It is proposed that the library shall be known as the "Lincoln-Carnegie Memorial Library," "in honor of our immortal Lincoln and in grateful acknowledgment of the benefaction of its founder."

*Tacoma, Wash.* Feb. 7. \$50,000.

Accepted, with proviso that maintenance guarantee will be raised to \$7500 if Mr. Carnegie will increase his gift to \$75,000. A site has already been selected which it is proposed to purchase from the previously existing library fund.

In addition to these gifts, Mr. Carnegie also presented \$500 to the Arthur Winter Memorial Library, of Staten Island Academy, St. George, S. I. No conditions were attached.

## Librarians.

BORDEN, Miss Fanny, B.L.S. N. Y. State Library School, class of 1900, has been appointed assistant librarian at Bryn Mawr College Library, in place of Miss Julia A. Hopkins, resigned.

BOWERMAN, George Franklin, has been elected librarian of the Wilmington (Del.) Institute Free Library, and will begin his work there about March 15. Mr. Bowerman was graduated from the New York State Library School in 1895 (B.L.S.). His library experience has included a year as reference librarian of the Reynolds Library, Rochester, N. Y., and reference and other work in the New York State Library. In May, 1898, he joined the editorial staff of the *New York Tribune*, being biographical and educational editor, as well as office librarian. Since July, 1900, he has been engaged in editorial work in the office of the "International year book" (Dodd, Mead & Co.).

EGLÉ, Dr. William Henry, for 12 years state librarian of Pennsylvania, died at his home in Harrisburg, Pa., on Feb. 19. Dr. Eglé was born in Harrisburg in 1830, and was graduated from the University of Pennsylvania in 1859. He was editor of two papers in Harrisburg in 1853, and in 1862 was made surgeon of the 96th Pennsylvania Volunteers. Later he was an examiner of pensions, and for 20 years he was prison physician. In 1887 he was appointed state librarian, an office which he held until January, 1899, when he was succeeded by Dr. George E. Reed. He was prominent in state medical, historical, Revolutionary and Masonic circles, and was a member of many learned societies and founder of the Pennsylvania German Society. He was the author of an elaborate history of Pennsylvania, and editor of the Pennsylvania archives; and had done much historical research work, especially regarding the services of Pennsylvanians during the Revolution.

ESTABROOK, Charles, for 24 years librarian of the Newburgh (N. Y.) Free Library, died at his home in Newburgh on Feb. 23. Mr. Estabrook was born in Rochester in 1823, and removed to Newburgh in early youth. He was appointed in charge of the Newburgh Library in 1877, the year of its establishment in its present building. He was prominent in local Masonic circles, and was greatly interested in local history.

HAYS, Miss Alice V. B., has been appointed assistant librarian of the Washington County Free Library, Hagerstown, Md. Miss Hays formerly had charge of the Public Library of San Luis Obispo, Cal.

HOPKINS, Miss Julia A., of the New York State Library School, 1895-96, assistant librarian at Bryn Mawr College Library, has taken a position as first assistant in the catalog department of the Carnegie Library, Pittsburgh.

## Cataloging and Classification.

BOWDOIN COLLEGE L., *Brunswick, Me.* Bibliographical contributions, no. 10: A list of the periodicals regularly received in Bowdoin College Library. Brunswick, 1901. p. 363-376. O.

This list should be useful to other libraries in the selection of periodicals, as it represents "wants that have been definitely felt during the last 20 years," and each item included has been tested by use and experience. In the prefatory note it is stated that the present list is a development from a subscription list of 18 magazines, made 18 years ago. Of these original items, or of the subsequent additions to the list, hardly one has been discontinued, but none — save in the case of a few gifts — have been admitted without urgent appeal from some "earnest or influential advocate." The list now contains 345 publications, of which 162 are gifts, secured at an annual cost of \$652.77. It is divided into three groups: A, General periodicals (174); B, Serial publications (135); C, Annuals (36).

BROOKLINE, (*Mass.*) P. L. Catalogue of English prose fiction, January, 1901. Part 1, authors; part 2, Titles. Brookline, 1901. 4+343 p. D.

An attractive compact catalog, well printed and easily handled, though perhaps slightly bulky for its size. It is a revision of the catalog of 1895, including the 2126 titles added since that date, and omitting most of the historical notes, which are given in a special separate list. Juvenile books are distinguished by the usual "j" prefixed to call number. Like its predecessor, the catalog will be useful in other libraries as a good working model in its special field.

— List of books in the school reference collection. February 1, 1901. 36 p. D.

A well-arranged classed list, indicating for each title the grade to which it is adapted. There are brief descriptive annotations, and the list is prefaced by a concise statement of the purpose and privileges of the school reference collection.

THE BROOKLYN (*N. Y.*) P. L. has begun the publication of a monthly *Bulletin*, of which the first number appears for February. It is published directly by the library and contains no advertisements, being devoted to record of accessions, special lists, and general library notes.

CHURCH LIBRARY ASSOCIATION. Catalogue of books recommended by the Church Library Association for Sunday-school and parish libraries. Cambridge, Mass., 1900. 4+110 p. S.

This is a consolidation and revision of all

previous lists, which it replaces; it also takes the place of the usual annual list for the year 1899. It evidences the usual careful work done by the Church Library Association in its work of examining and recommending books suited for Episcopal church libraries, and it should be extremely helpful to public libraries in the selection of children's books or of collections for use in Sunday-schools. It is in two main divisions: "Books which bear directly upon church life, history or doctrine," classed under Religious, General, Fiction and Juvenile; and "Books recommended, but not distinctively church books," classed under a wider variety of subjects.

HARVARD UNIVERSITY L. Supplement to index to subject catalog. Cambridge, Mass., 1900. 31 p. 8°. 75 c.

This index contains all the additional topics inserted in the library catalog and all corrections made in the "Index" from the time of its issue in 1891 down to the summer of 1900. The original index is now out of print.

KANSAS CITY (*Mo.*) P. L. Quarterly. v. 1, no. 1, January, 1901. 26 p. O.

A well printed bulletin, to be devoted to record of accessions and library notes. This first number contains a report of the organization meeting of the Missouri State Library Association and an 18 p. "Supplement to printed catalog."

THE NEW YORK P. L. *Bulletin* for February contains several special lists of unusual local interest and value. These are: "Check list of works relating to the financial and commercial history, etc., of the city of New York," "List of maps and atlases of New York city," and "List of guide books to New York city."

NOURSE, H. S. *Lancastriana*: I., A supplement to The early records and military annals of Lancaster, Mass. Lancaster [Town Library], 1900. 45 p. O. \$1.

The work to which this is a supplement appeared in 1884, and was a valuable contribution to the local history of Lancaster for the period ending 1725. To this the present supplement adds material of interest, mainly in the form of historical notes. There is a careful index.

LOS ANGELES (*Cal.*) P. L. List of novels and tales in the English language. 2d ed. November, 1900. 238 p. O. 10 c.

An author-and-title list, with occasional annotations, followed by a title list of short stories.

NATIONAL CONGRESS OF MOTHERS, Committee on literature. A list of books for children; classified and graded, with a few sugges-

tions as to children's reading. Phila., Geo. F. Lasher, [1900.] 32 p. T. 10 c.

— Suggestive books for mothers. [Phila., Geo. F. Lasher,] 1900. 24 p. T. 5 c.

Two suggestive short lists, with some good hints on choice of books. Prices are given.

The OSTERHOUT (*Wilkes-Barré, Pa.*) L. *News-Letter* for February contains a good classed reading list on the Victorian era.

The SALEM (*Mass.*) P. L. *Bulletin* for February devotes its special reading lists to Gardening, The nineteenth century, and The greatest books of the century.

SPRINGFIELD (*Mass.*) CITY L. A list of interesting books. Springfield, 1901. 11 p. D.

An attractive list of 275 books, old and new in the field of *belles lettres*, with a sprinkling of travel and science. It is offered simply "as a suggestion of the good things in the Springfield City Library, and as something that the general reader may find occasionally helpful."

UNITED STATES CATALOG. Books in print, 1899; ed. by George F. Danforth and Marion E. Potter. Minneapolis, H. W. Wilson, [1900.] c. 7+755+361 p. Q. \$12.50.

Y. M. C. A. L. RAILROAD BRANCH, *New York City*. Subject-supplement catalogue of books. January, 1901. 10 p. O.

A. D. C. class index, including books added since the issue of the catalog, in 1899, and intended to be pasted in as an appendix.

#### FULL NAMES.

*The following are supplied by Catalogue Division, Library of Congress:*

Benham, William George (The laws of scientific hand reading . . .);  
 Bennett, Edwin Clark (Musket and sword);  
 Brittain, Marion Luther (History and methods of Sunday-school work . . .);  
 Burke, Bridget Ellen (The McBride literature and art books. Bk. 1.);  
 Clark, Walter Augustus (Under the stars and bars);  
 Clark, William Livingston, and Marshall, William Lawrence (A treatise on the law of crime. 2 v.);  
 Congdon, Ernest Arnold (Laboratory instructions in general chemistry);  
 Eddy, Arthur Jerome (The law of combinations . . . 2 v.);  
 Fletcher, John Joseph Kilpin (The sign of the cross in Madagascar . . .);  
 Freeman, Harry Campbell (A brief history of Butte, Montana . . .);  
 Frizell, Joseph Palmer (Water-power . . .);  
 Gillespie, Frederick Richard (Sabbath evening talks);  
 Griffith, George Francis Xavier, is the *tr.* of Fouard, Constant, *Abbé* (The last years of Saint Pauli . . .);

Hamilton, John Taylor (A history of the church known as the Moravian church);  
 Hastings, William Granger (The development of law as illustrated by the decisions relating to police power of the state);

Hawley, Thomas De Riemer (How to reason infallibly);

Hollis, Ira Nelson (The frigate "Constitution" . . .);

Holman, Emily Elizabeth (Picturesque summer cottages);

Hopkins, Corydon Benjamin (Wayside flowers);

Houser, James Alfred (How to be a beautiful woman);

Keightley, Archibald, and Keightley, Julia Wharton Lewis (Ver-Planck) (The recovery of health . . .);

Ley, John Cole (Fifty-two years in Florida);

Mackin, Mrs. Marie (The mystery of the Marbletons . . .);

Morey, William Carey (Outlines of Roman history);

Nichols, Edward West (Differential and integral calculus . . .);

Quayle, William Alfred (A hero and some other folk);

Rocheleau, William Francis (Great American industries. 3d book, Manufactures);

Rodkinson, Michael Lewy, *tr.* (New edition of the Babylonian Talmud . . .);

Runyan, Nicholas Patterson (A Quaker scout);

Smith, Madison Roswell, and Guthrie, Ben Eli, *repts.* (Cases determined by the St. Louis and the Kansas City courts of appeals of the state of Missouri . . . v. 81);

Taylor, John Madison, and Wells, William Hughes (Manual of the diseases of children . . .);

Taylor, William Alexander (Ohio in Congress . . .);

Wright, John Westley (A text-book of ophthalmology);

Wright, William Henry (The great bread trust).

---

## Bibliography.

---

AMERICAN BIBLIOGRAPHICAL REPERTORY. The plan for an American bibliography on cards which Mr. A. Josephson submitted to the Bibliographical Society of Chicago at the January meeting of that society has previously been submitted to the Co-operation Committee of the A. L. A. and to the Bibliographical Committee of the American Historical Association. The former committee reported at Montreal that it hoped that the general plans for co-operative cataloging for American libraries might pave the way for the realization of the project. The council of the American Historical Association could not at present consider the subject at all.

The BIBLIOGRAPHICAL SOCIETY OF CHICAGO announces as its first "Contribution to bibliog-

raphy," to be published in March, "Bibliographies of bibliographies; chronologically arranged, with occasional notes and an index, by Askel G. S. Josephson, cataloger at the John Crerar Library, Chicago." The list will contain nearly 50 pages and 500 copies will be printed on antique finish deckle edge paper, 24 x 16 cm., letterpress 15 x 10 cm. Members of the society are entitled to one copy each free of charge; 300 copies will be put on sale through the treasurer at the price of 50 cents net. Address Carl B. Roden, Treasurer, Public Library, Chicago, Ill.

CHILD STUDY. Chamberlain, Alexander F.

The child: a study in the evolution of man. N. Y., Scribner, 1900. 12+498 p. il. 12°. (Contemporary science series.) \$1.50.

An anthropological study of the child. The bibliography contains 696 titles.

COLERIDGE, S. T. Shepherd, R. H. Bibliography of Coleridge; rev. and corrected by Col. W. F. Prideaux. London, F. Hollings, 1901. 8°. 5s., net.

DOMESTIC ECONOMY. University of the State of New York. N. Y. State Library, bulletin 53, January, 1901. Bibliography 22: Bibliography of domestic economy in English; by Robert Kendall Shaw. Albany, 1901. p. 31-170. O. 15 c.

Classified according to the tentative scheme proposed for this subject for the seventh (20th century) edition of the Decimal classification, which is printed as prefatory to the bibliography. The list is comprehensive, not selective, its aim being to include all books in this field published in English between 1850 and 1899. Analytic and magazine references are excluded, and no special effort has been made to go beyond current material in listing periodicals. Books that have been personally examined are indicated with an asterisk for those of special merit, call numbers are given for volumes in the New York State Library, and when practicable the library location of other books is noted. There is a 22-page index.

FOLK-LORE. Rhys, John. Celtic folk-lore: Welsh and Manx. Oxford, Clarendon Press, 1901. 2 v. 46+400; 401-718 p. 8°. Volume I contains a 22-page bibliography.

INTERNATIONAL LIBRARY CONGRESS, Paris. The Proceedings of the International Congress of Librarians, held in Paris in connection with the Exposition of 1900, are announced for publication in April, in one octavo volume. It will include the 30 addresses read at the several sessions. The price is 15 fr.; to subscribers, 12 fr. 50.

LANCASTER, Mass. Nourse, H. S. Lancastriana: II., A bibliography; compiled for

the Public Library. Lancaster, 1901. 46 p. O. \$1.

Arranged alphabetically by author, and by places for purely local material. The bulk of the material is to be found in the Lancaster library, entries not accessible there being indicated by an asterisk. The list is a useful addition to local bibliography, and evinces careful and thorough work.

RICHARDSON, Samuel. Thomson, Clara Linklater. Samuel Richardson: a biographical and critical study. London, Horace Marshall & Son, 1900. 8+308 p. 8°. Contains a 10-page bibliography.

SANITARY CHEMISTRY. Richards, Ellen H., and Woodman, Alpheus G. Air, water and food from a sanitary standpoint. N. Y., John Wiley & Sons, 1900. 226 p. 8°. Contains a selected bibliography of five pages.

SCOTLAND. Terry, Charles Sanford, ed. The rising of 1745, with a bibliography of Jacobite history, 1689-1788. London, David Nutt, 1900. 15+322 p. 16°. (Scottish history from contemporary writers, no. 3.)

The bibliography of Jacobite history, with annotations, extends from page 227 to page 322. It is arranged under the following heads: Contemporary materials, Contemporary materials still in manuscript or incompletely edited, Non-contemporary works, Newspapers of the Jacobite period, Contemporary maps and plans illustrating the Jacobite risings.

SOMERSET, Duke of. Pollard, A. F. England under Protector Somerset: an essay. London, Kegan Paul, Trench, Trübner & Co., Ltd., 1900. 12+362 p. 12°. An appendix of 13 pages contains a descriptive catalog of materials for, and works on, the history of Somerset's protectorate.

STEEL WORKS. Brearley, Harry. A bibliography of steel works analysis. Part 7: Chromium. (*In Chemical News*, Jan. 25, Feb. 1, Feb. 8, 1901, 83:38-40.)

SURREY, Eng. Malden, Henry Elliot. A history of Surrey. London, Elliot Stock, 1900. 8+321 p. 8°. (Popular county histories.)

Pages 310-318 give a critical account of "some books on Surrey."

TRUSTS. Bullock, Charles J. Trust literature: a survey and a criticism. (*In Quarterly Journal of Economics*, Feb., 1901, 15:167-217.)

Deals with recent literature on trusts, nearly all writings published before 1897 being excluded.

## BOOK DEPARTMENT

ON account of a large increase in the volume of business which we are now doing with the libraries of the country we have decided to establish a special LIBRARY DEPARTMENT in order to make our services more efficient. We invite you to take advantage of our facilities.

We have the largest miscellaneous book stock in the United States, embracing the publications of the various publishers, and assure you that our facilities for the proper handling of our correspondent's orders are of the best. We promise you the most careful attention and prompt dispatch on all business entrusted to us.

Would be pleased to receive from you a list of books on which you desire quotations, and, when possible, will be pleased to have you visit us and make use of the facilities of our store and library department in making a selection of books.

Very truly,

THE AMERICAN NEWS COMPANY,  
39-41 CHAMBERS STREET, NEW YORK.

BENJAMIN FRANKLIN STEVENS.

HENRY JOHN BROWN.

**B. F. STEVENS & BROWN,**  
 American Library and Literary Agents,  
 4 TRAFALGAR SQUARE, CHARING CROSS, LONDON.

**T**HIS Agency was established in 1864 for supplying American Public Libraries, Institutions, and Book Collectors, with English and Continental Books, Manuscripts, Drawings, Philosophical Apparatus, etc., at the lowest London prices.

Special attention is paid to the selection and purchase of rare old books and manuscripts. Auction sales are carefully watched and good knowledge kept of the stocks of the old Book-sellers of Europe.

Lists of Desiderata have the best attention and Librarians are respectfully requested to test the value of the Agency by sending trial orders on by submitting lists for Estimates for goods to be delivered, either free in London or New York, as desired.

Auction Catalogues when printed in advance and Catalogues issued by Publishers and Second-hand Booksellers are mailed to Customers when desired.

Large shipments are sent by cheapest and quickest route, or as ordered. Small shipments are made weekly through our New York Agency, at a minimum of expense and trouble to purchasers, or single books are sent by mail on receipt of order.

Special attention is given to Bindings in all styles.

Periodicals are supplied either direct by mail from London or by mail from New York Agency at lowest rates for prompt and efficient service. Send for Lists.

Payments may be made either direct to London or in U. S. Currency through our New York Agency.

*Just Ready. 100 Copies Printed for Subscribers Only.*

**B. F. STEVENS'S**

**Facsimile of the Unpublished British Headquarters Coloured  
 Manuscript Map of New York and Environs  
 (1782)**

Reproduced from the Original Drawing in the War Office, London.  
 24 sheets. Scale, 6½ inches to a mile. 10 feet by 4 feet. . . .

The successive British Commanders-in-Chief in America, Generals Sir William Howe, Sir Henry Clinton, and Sir Guy Carleton, during their respective occupations of New York and Environs in the Revolution, caused this manuscript plan from time to time to be kept up.

The plan extends from below Guanias Bay to the Heights of Spikendevil, a distance of about eighteen or nineteen miles. It shows the Fortifications, Defences, Topography, Streets, Roads, etc., of the whole of the Island of New York with the Harbor, Islands, Water Ways, and River Frontages on the Hudson and East Rivers, the Military Works on Long Island including Brooklyn, the Works in Paulus Hook and parts of the Jersey Shore. It has a copious Table of References to various works (British and American), some of them with notes as to the time of their construction or destruction.

The Original Drawing, ten feet by four feet, is on a scale of about six and a half inches to a mile. It is handsomely reproduced for subscribers only, in careful facsimile on 24 sheets which can be joined up and mounted like the original as a Wall Map or mounted on linen if desired. It will be issued either mounted on linen to fold in book form with leather (slip) case, 13 x 10 inches, or the 24 sheets (22 x 15 inches each), will be supplied in a portfolio.

No more than 100 copies have been printed and the engravings were erased as each sheet was printed off.

A few extra copies of sheet 8 have been printed so that it can be sent as a specimen on application from intending subscribers.

**Prices to Subscribers**

- Mounted on linen to fold in book form with leather (slip) case. . . \$30 net.
- Unmounted, on 24 sheets in portfolio. . . . . \$25 net.

The above prices include delivery to any Public Library or Institute in the United States or Canada, but private subscribers must also pay the duty.

# CEDRIC CHIVERS,

Portway, Bath, England.

BOOKSELLER { Library Books,  
Reference Books,  
Belles-Lettres.      AND      BOOKBINDER { Duro-Flexile,  
Vellucent,  
Reliure de Luxe.

*“Buy Your Popular Books and Your Costly Books  
in Duro-Flexile Binding.”*

I OBTAIN books from the publishers in sheets and bind them “ONCE FOR ALL.” This binding lasts longer than the leaves of the book, and the leaves of the book are preserved and their life immeasurably lengthened by this binding. Librarians cannot persuade publishers to print special editions for them, but I supply books specially bound for them.

If the paper is bad I sew and forward the book so that the leaves are subject to no strain and are indeed strengthened in the folds. If the paper is very stout I sew the book and forward it in a special manner adapted to the thickness of the paper, in other words I adapt Duro-Flexile binding to both good and bad paper with the results that the utmost service and the longest possible life are obtained for both.

No binding in the world is adapted to the varied qualities of the paper as is Duro-Flexile.

The service obtained from a book of bad paper when supplied bound in this way will surprise you.

A papier maché box and a steel safe are not hinged in the same way. Thin tough paper and thick spongy paper also require very different treatment, and with Duro-Flexile they get it.

**TIGHT BACKS** are used for books of a thickness and quality of paper best suited for such treatment.

**LOOSE BACKS** are given where such are better suited.

My bookbinding is in short adapted in its every detail, both of material and method, to the requirements of a Public Library Book.

500 Public Librarians in all parts of the English speaking world buy these books.

## POPULAR BOOKS AND COSTLY BOOKS

bought of me, bound from the quires, give 50% more service.

# HENRY MALKAN,

*Library Department.*

---

In overhauling our stock we find some books published within the last year or so, which we wish to close out at prices that will appeal very forcibly to the economical librarians. These books are not shop-worn or damaged in any way, but are in perfect condition just as they came from the publishers. The range of Literature covered is very wide but naturally fiction predominates and there is scarcely a work of this kind that we cannot furnish at prices heretofore unequalled. Our facilities for filling orders are unsurpassed and we can pick out of stock more books on the average library order than any other house in the business.

We are noted for the promptness with which we make shipments and complete manner in which we fill orders. The fact that a book happens to be published in an out-of-the-way place, never causes us to give such a report as, "publishers out of," "cannot get in New York," or any other of the stereotyped excuses. We go direct to the publishers and get the book. So far as prices are concerned, we defy competition; and would like very much to have estimates submitted to us for quotations.

HENRY MALKAN,  
No. 1 William Street,  
67 Stone Street,  
New York City.

**WE INVITE** the attention of Librarians to

of Standard and Recent Books, a list of which we have prepared and will send on request.

*From the long experience which our Library Department has had in supplying the requirements of Public, University, College, School, and Club Libraries, we are in a position to fill orders with unusual promptness and satisfaction to patrons.*

Besides carrying an immense stock of General Literature and of Technical and Scientific Works, we have exceptional facilities for supplying Foreign and Rare Books, and in this connection we would remind librarians that foreign books for public libraries are imported free of charge.

*Inquiries by mail promptly answered.*

**LIBRARY DEPARTMENT, A. C. McCLURG & CO., Chicago.**

## A SPECIAL OFFER TO LIBRARIES

**A** YEAR ago we published an authoritative biography of Sir Arthur Sullivan, and the book had a good sale through the retail trade. We

### SIR ARTHUR SULLIVAN

By ARTHUR LAWRENCE.

His Life Story, with letters, reminiscences, and many illustrations. 8vo, cloth, gilt, \$3.50; to libraries, \$2.00.

This is the authorized biography of the great composer. It was prepared under his personal supervision, and revised by him in proof before his death. The volume, fully illustrated as it is, with letters, portraits, and musical scores, is an ideal reference work for a library. The Gilbert and Sullivan operas have such a firm place on the stage of our time, that a close acquaintance with one of their authors cannot fail to appeal to a large part of the public.

were disappointed, however, by the fact that it was not purchased more generally by the libraries. The work is acknowledged by those who have seen it to be a definitive life of the great composer, and we were assured that it deserved a place in all libraries. We infer that librarians do not know the work sufficiently well to justify themselves in ordering it, and we are therefore willing to send the book on approval, and if accepted to sell it at a *reduced price*.

To introduce the book, we will send on request a copy to any library, subject to return if unsatisfactory. We will pay carriage both ways, and will make the *special price* \$2.00.

**HERBERT S. STONE & COMPANY**

NOW READY.**Annual American Catalogue,  
1900.**

THE ANNUAL AMERICAN CATALOGUE for 1900, contains :

- (1) Directory of American Publishers issuing books in 1900.
- (2) Full-title Record, with descriptive notes, in author alphabet, of all books recorded in THE PUBLISHERS' WEEKLY, 1900.
- (3) Author-, title-, and subject-index to same, in one alphabet.
- (4) Publishers' annual lists for 1900.

This volume forms the **FIRST ANNUAL SUPPLEMENT** to the **AMERICAN CATALOGUE**, 1895-1900.

**One volume, 600 pages, octavo, half leather, \$3.50; in sheets, \$3.00.**

The edition, as usual, is a limited one. The volumes for 1890 to 1893 are all out of print, and orders for those of 1894 to 1899, to ensure supply, should be promptly filed. THE ANNUAL ENGLISH CATALOGUE, for which we have the American market, now includes full title entries, after the manner of the American volume, instead of the previous abbreviated entries. It will be furnished at \$1.50 paper, or bound with the American in one volume, half leather, at \$5.00, net.

Address the **OFFICE OF THE PUBLISHERS' WEEKLY,**  
P. O. Box 943. 298 Broadway, New York

NEARLY READY.**The Annual Literary Index, 1900**

Including Periodicals, American and English; Essays, Book-Chapters, etc.; with Author-Index, Bibliographies, Necrology, and Index to Dates of Principal Events. Edited by W. I. FLETCHER and R. R. BOWKER, with the co-operation of members of the American Library Association and of the *Library Journal* staff.

THE ANNUAL LITERARY INDEX complements the "Annual American Catalogue" of books, published each year, by indexing (1) articles in periodicals published during the year of its issue; (2) essays and book-chapters in composite books; (3) authors of periodical articles and essays; (4) special bibliographies; (5) authors deceased; (6) dates of principal events during the year. The two volumes together make a complete record of the literary product of the year.

"Of great value to all who would keep advised of the topics and writers in the periodical literature of the day."—*Universalist Quarterly*.

"Good indexing could no further go."—*The Nation*.

**One vol., cloth, \$3.50, net.**

**LIBRARY AGENTS.**

**M**ESSRS. PUTNAM have peculiar facilities for handling all library business intelligently and to the best advantage of their customers.

Their Branch House in London (through which they receive English orders for American books) enables them to supply, promptly, English books, without the commission usually paid by American dealers.

Their extensive miscellaneous and retail business makes it practicable to buy all books at the lowest prices, to carry a large stock of standard books in every department of literature, and to keep in touch with the current publications of the day. Their business experience covers more than half a century.

## The Baker & Taylor Company

**I**NVITES librarians to visit its new quarters, 33-37 East 17th Street (Union Square North), running through the block to 18th Street and containing 18,000 square feet of floor space devoted to the display of books.

For over fifty years we have been buying and selling books in wholesale quantities and have maintained a Library Department organized to meet the special demands of library business, great and small.

Our wholesale buying enables us to quote prices of interest to the business librarian.

As a help for small libraries we issue a classified catalog of a Standard Library of 2500 approved volumes arranged in classes. Each title is sold separately but a lump price is also made on the complete library. Our twice-a-year clearance sales and the catalogs descriptive of them are well and favorably known to alert librarians.

When lists are sent to us for prices we give itemized quotations based on editions selected with reference to library use. Catalogs, bargain lists, etc., sent on request.

**THE BAKER & TAYLOR CO., Wholesale Booksellers, New York**

**Magazines.** I will undertake to supply any

magazine or review published, at a price per copy depending upon its market value, or the cost of finding same, if not on hand.

I have considerably over 500,000 magazines in stock, and the assortment is as varied as the production of the periodical press for the last one hundred years. A Business-like query with list of wants will be met by a prompt and business-like reply.

# EDW. G. ALLEN'S

## London Agency for American Libraries

28 HENRIETTA ST., COVENT GARDEN, LONDON.

### Special Notice to Librarians.

Mr. E. G. ALLEN desires to lay before you the advantages of using this Agency for procuring English and Foreign Books, Magazines, Periodicals, etc., and for General Library Work in Great Britain.

Long existing relations with the Booksellers and Publishers of the United Kingdom enable him to execute orders of any magnitude promptly and economically. All important books collated before delivery.

Specialty is made of the finding of Out of Print Books. His success in this department is unrivalled, possessing unique means of search, by which he is able to supply scarce books expeditiously and at moderate prices.

A good selection of Second-hand Dealers' Catalogues is sent to clients by every mail, and no commission charged on orders from them.

New Books supplied on the most advantageous terms, and the Full Trade Discount allowed off the published price.

Auction Catalogues Mailed, Sales Attended, and Commissions Executed with Care and Judgment.

Defects of Rare Books Reproduced in Facsimile.

Long Sets of Scientific and Other Periodicals Supplied. Imperfect Sets Completed.

Large consignments sent by fast steamers at through rates. Small orders can be sent by mail or by express system at low charges.

Special note is kept of all continuations of serials, which are forwarded immediately on publication.

Bookbinding in every style, Cheap and durable for library use. Dilapidated old binding skilfully repaired. Pamphlet binding at specially cheap rates.

Should you at present be without the services of a London Agency, MR. ALLEN would be pleased to answer any inquiries. All orders receive his personal attention, and with an experience of forty years in library business, and the thorough equipment of his agency, he believes himself capable of meeting every library requirement in a satisfactory manner.

**References permitted to first-class Libraries.**

**Special terms for large orders.**

**FOUNDED IN 1856.**

THE  
**Remington**

## Standard Typewriter

**Has demonstrated its superiority for all kinds of Library Work**

For **CARD INDEXING** it greatly excels the pen. It is more convenient and easy to operate, and its work is far neater, more rapid and more legible.

The **REMINGTON** is strong, simple, and durable. It never fails at critical moments. It can always be depended upon to do the highest grade of work.

Among the libraries in which the Remington Typewriter is now in successful use for card indexing are the following:

Library of Congress and Public Library at Washington; Pratt Institute, Brooklyn Library, Cooper Union Library, Library of Columbia University and Lenox Library in New York; Free Library and Library of the Philosophical Society in Philadelphia; Public Library, Newberry Library and Field Columbian Museum in Chicago; Wisconsin State Historical Library and the Library of the University of Wisconsin at Madison; Library of the Rhode Island Historical Society in Providence; McGill University Library at Montreal; Howard Library at New Orleans; State Libraries at Harrisburg, Pa., and Columbia, Mo.; and the Free Public Libraries at Minneapolis, Minn., St. Louis, Mo., Jefferson City, Mo., Milwaukee, Wis., Denver, Col., New Orleans, La., Allegheny, Pa., London, Ont., Newark, N. Y., New Haven, Conn., Jackson, Mich., Grand Rapids, Mich., Muskegon, Mich., Erie, Pa., Bradford, Pa., Warren, Pa., Westfield, N. Y., Gloversville, N. Y., Cedar Rapids, Ia., Grinnell, Ia., Iowa City, Ia., Beverley, Mass., Nahant, Mass., Springfield, Mass., and a number of other cities.

*Send for special pamphlet giving specimens of card work*

**Wyckoff, Seamans & Benedict**

327 Broadway, New York.

# HENRY MALKAN,

## *Library Department.*

---

We have just completed negotiations concerning the purchase of a very large consignment of desirable books, and embrace this opportunity of notifying Librarians. We hope to have the lot classified and ready for inspection in about two weeks. There are a lot of very choice and rare specimens of the bookbinder's art, as well as a great number of works especially adapted—as regards character of the work and binding—for Library use. We have purchased this lot of books at a figure that enables us to make prices on them that will prove very tempting to Librarians. An early call is respectfully suggested, as we feel confident that this lot will last but a very short time considering the character and condition of the books and our prices. We still maintain a good lead in furnishing all the current works at the very best discount, and may mention that we are now filling an order of Ten Thousand Volumes for what is probably one of the most prominent Libraries in the country, and anticipate receiving another order of about the same magnitude in the near future. We mention these facts for the purpose of letting Librarians who have not dealt with us know that we are in a position to fill any order no matter how diverse the character of the books may be and as regards our prices and service we will prove by any order entrusted to us that they cannot be equalled.

# THE LIBRARY JOURNAL

VOL. 26.

APRIL, 1901.

No. 4

IN the great broadening and deepening of educational work within the past generation, the library has taken an increasing part, and the historical sketch of the progress of co-operation between the library and the school, printed in this School Number of the LIBRARY JOURNAL, shows how these two factors in education have been more and more closely associated in the past few years. To-day the teacher is a librarian as a guide to books, and the librarian a teacher; that is to say, the best people in each of these two callings are adopting the ideas and methods of their colleagues of the other side in the mutual work. The children's room in the modern library has become one of its most important features, and in many libraries this is supplemented by class rooms or study rooms to which much actual school work may be transplanted. Not the least of the good results of this system should be that practical knowledge of classification, which is one of the first elements of mental training and becomes one of the best features of the well-equipped mind. Children should learn not to be overwhelmed with the mass of books, but to select wisely, and this should be true with regard to books of recreation, the ordinary "juveniles," as well as books of information. More and more the attention of the teacher is being focussed, and rightly, on the bettering the standard of children's reading by leading the young reader to choose for himself the "best" books, instead of the weak or worse stuff that has so often done service as "children's reading." Miss Stevens' account of her talks with high school pupils illustrates one of the useful methods for accomplishing such results.

IN this library development a new function has been evolved. As the mechanical or routine side of the teacher's work must be supplemented in the "born teacher" by the inspirational, so there is need in the library of something more than the machinery which produces a given book for a stated demand.

The book has come to be thought of as the second thing; the man or woman who is to use the book is the first consideration. The "library friend" is, perhaps, the best name that can be given to this new person, who is an evolution from the "information desk" of the previous stage. In this development the Pratt Institute Library has been actively interested, but the article elsewhere only tells half the story of the large success that the writer has made of this post. Of another phase of this work the travelling library is a representative, when selected with reference to the wants of a local community and made to supply in outlying villages, away from the facilities of cities, the needs of farming or factory communities. In Wisconsin, New York, and other states much has been done in these directions, and more recently the work carried on in New Jersey from the Madison Public Library offers a good illustration of this method. Now comes a suggestion that the same friendly help should be applied to the librarian as to the community, through a travelling librarian, who can at once inform and inspire those occupying the outposts of the profession, as it were, without the training or opportunities which their more favored fellow-workers enjoy. The school must always be more widely distributed than the library, as an institution, and it is largely through schools and by the help of teachers that this kind of work should reach its final and full development.

THE plans outlined by the American Publishers' Association, recently organized by the leading publishing houses throughout the country, have a direct bearing in one respect upon library interests. In the general demoralization of book prices libraries have, as a rule, got very nearly the same discounts from published prices as booksellers themselves. The publishers' plan, based on methods now adopted in England and Germany, proposes a reduction in the published prices practically of about 20 per cent. on new copy-

right books (fiction being for the present excepted) and the maintenance of prices to the book-buying public on this net basis. Libraries are to be the only exception to this rule, and it is proposed that their discount should be limited to 10 per cent. Doubtless this plan will evoke general discussion and no little opposition among libraries, and the committee on program has done well to make the question a subject to be discussed at the Waukesha conference of the American Library Association. The publishers claim that a book store is as essential as a library to the intellectual well-being of a community, and that book stores are becoming impossible under the present demoralization of prices, which leaves the laborer nothing for his hire, if his labor is put into selling books over the book store counter. Mr. Dewey, on the other hand, has presented the view that the library is the natural book store, and should itself receive and fill orders for book-buyers among its local constituency. The library profession will be keenly interested in the working out of the problem thus presented.

#### GUERNSEY'S "LEGAL BIBLIOGRAPHY."

THE book about which Mr. Josephson asks in the LIBRARY JOURNAL for March does exist, and is a reprint, but not of the catalog which he mentions.

The catalog of the New York Law Institute Library was published in 1874, and reviewed by Mr. Guernsey in the *Albany Law Journal*. This review was later reprinted in pamphlet form, and probably furnished the title in question.

#### THE TRAVELLING LIBRARIAN.

IN this day of travelling libraries, it seems but a step to the travelling librarian. By which I mean not a librarian who shall travel round the country as the itinerant binder does, but one who shall have the charge of several of the poorer of our country libraries and go from town to town in a given order. Here in New England we have, as is often said, a public library in nearly every town. Some of these libraries are housed in beautiful buildings and most of them are fairly well stocked with standard books, but — and here is my point — very few have the means with which to properly care for what they already possess or to buy new books.

Many can afford to pay so little for a librarian that they have to be satisfied with very little in return. For instance, in the town of C., the librarian, a hard-working and pains-taking woman, of no library experience or training whatever, receives but \$25 a year for her services. In consequence the library is open one day of the week for three hours only; there is no reading room, and it could be open only during those three hours if there were. Mrs. X., the librarian, has the care of the books, of course (some four thousand, I believe), and the building, there being no janitor. Equally, of course, her methods are of the most primitive, order is conspicuous for its absence, catalog, accessions-book and shelf-list unknown; ownership of a book is proved by the librarian remembering it, unless it was one of the original lot, which was cataloged after a fashion. The charging system is unique and only understood by Mrs. X., who did not explain it to me.

Adjoining this town, and within easy driving distance even in inclement weather, are two other other towns in which similar conditions prevail. In all three there is the same demand for more hours in which the library shall be open; more help in selection of books and looking up of subjects; a chance to read the current periodicals, etc. Yet in none of them is there the least chance of raising a sufficient sum to pay a regular librarian for his entire time. In C. I asked if the townspeople would be satisfied to have the library open two days in the week from one p.m. to nine, with half an hour off for supper. That seemed to be enough for years to come, so I went on with my calculation with this result. Why not one librarian for the three towns? \$780 would seem a great deal for one town to pay, but divided between the three would be a very different matter, and should be enough to secure the services of a person of some training, who could give two days a week to each town. In this way, it seems to me, our country people could get, at a moderate cost, a greater satisfaction out of the libraries of which they are already so proud as buildings. The work for the librarian would not be much more than in one library, open every day; the board would probably be reasonable, and, in many cases, the towns would be willing to stand the expense of transporting their librarian from one to another, so that a moderate salary would be more in the end than a better one in a larger town or city. And more than this, would be the gratification of being of real assistance to the best of our people in districts where such help is almost unknown.

This, then, is my idea of a travelling librarian; merely a suggestion that I should like to see carried out at least far enough to prove its practicability.

## CO-OPERATION BETWEEN LIBRARIES AND SCHOOLS: AN HISTORICAL SKETCH.\*

BY JOSEPHINE A. RATHBONE, *Pratt Institute Free Library, Brooklyn, N. Y.*

THE year 1876 is usually taken as the starting-point of what we call the "modern library movement." In it the LIBRARY JOURNAL was born, the American Library Association was founded, the great Government report on libraries issued, and in that year we find recorded the first suggestion of the good to be derived from a possible co-operation between libraries and schools. The discovery of this possibility was made not by a librarian or a teacher but by a man to whose wisdom and insight the country owes much besides, Charles Francis Adams, Jr. In an address before the teachers of Quincy, Mass., printed in the LIBRARY JOURNAL, vol. 1, p. 437, Mr. Adams says—calling attention to the danger of teaching children how to read without giving them at the same time a love for good reading: "I do not know that what I am about to suggest has been attempted anywhere, but I feel great confidence that it would succeed. Having started the child by means of what we call a common school course, the process of further self-education is to begin. The great means is through books, through much reading of books. But we teach children to read; we do not teach them *how* to read. That, the one all-important thing, the great connecting link between school education and self education, between means and end—that one link we make no effort to supply. As long as we do not make an effort to supply it, our school system in its result is, and will remain, miserably deficient. For now, be it remembered, the child of the poorest man in Quincy has an access as free as the son of a millionaire or the student of Harvard College to what is, for practical general use, a perfect library. Yet, though the school and the library stand on our main street side by side, there is, so to speak, no bridge leading from the one to the other."

To the building of this bridge Mr. Adams contributed in very large measure. Until 1879 the indexes of the LIBRARY JOURNAL

throw no light on the subject, though doubtless work was done and thought expended upon it. At the conference of the American Library Association in Boston, 1879, the reading of children was discussed and Mr. Foster, of Providence, read a paper on "The school and the library, their mutual relations"—the purpose of the article being "to cite some of the reasons why co-operation between the school and the library is desirable and necessary." Effective co-operation, he says, presupposes three things: mutual understanding, mutual acquaintance, and mutual action.

The need felt by the teacher was voiced at this same meeting by R. C. Metcalf, Master of Wells School, Boston, in an article on "Reading in the public schools." "Having indicated how I would cultivate the taste and direct the choice of the pupil," Mr. Metcalf says, "it only remains to suggest how, in my opinion, the public library can be made a great public benefit, rather than what it too frequently is, a great public nuisance. So long as our pupils are allowed free access to a public library without direction as to choice, either by parent, teacher, or librarian, we can look for no good results." Again, complaining of the distance between schools and the library and the lack of branch libraries, he says: "Some plan must be devised whereby the principal or teacher can draw from the library such books as his pupils may need and deliver them at his desk whenever the school work suggests their use." This meeting, at which for the first time librarians and teachers were brought together to compare needs and opportunities, had doubtless very great influence.

The first record which gives the result of actual experience in carrying on this work is found in a paper read by Mr. S. S. Green, librarian of the Worcester Public Library, at a meeting of the American Social Science Association in 1880. Mr. Green tells of a conference between the superintendent of the public schools, a member of the school com-

\* Read before the Long Island Library Club, Feb. 7, 1901.

mittee, who was also a member of the board of directors of the public library, the principal of the normal school, and the librarian of the public library, in the fall of 1879. These gentlemen decided that the school studies could be made more interesting and profitable by the aid of the library and proceeded to consider practical means by which this result could be accomplished. Geography was selected as the first subject of the experiment; the teachers of the 7th, 8th, and 9th grades were addressed by the librarian who set forth the plan and asked them to select a country they would like to have illustrated in this way. A meeting was then held at the library when the librarian explained to the teachers of these grades the use that could be made of a group of books of travel in connection with the geography of the country selected. The librarian then asked them to keep him informed from time to time of the countries to be studied that he might keep books on hand suitable for school use. The work was started at once; the library issued two kinds of cards, one for the benefit of teachers themselves, the other to be used by the teachers for the benefit of the scholars, six books (a number that seems to have been adopted by libraries as a standard) to be taken out on the former and twelve on the latter. The teachers were also invited to bring their classes to the library from time to time for the purpose of seeing large collections of books, pictures, and other objects bearing on some subject they were studying. This article, setting forth the methods actually used and found successful, stimulated other libraries to attempt the same kind of work. By 1882 the movement was under headway; reports appear in the *LIBRARY JOURNAL* from Indianapolis, Middletown, Ct., Chicago, Buffalo, Cincinnati; in 1883, Milwaukee, and Gloversville, N. Y., report of their work. The preparation of catalogs of children's books, visits of teachers and classes to the library for talks about books, and the issue of books for use in the school-room are the means of co-operation reported on at this time. Mr. Green gives detailed reports in the *JOURNAL* both for 1882 and 1883 of the growth of the work in Worcester. Among the methods used, beside those spoken of in his article of 1880, is the connection formed with the high school. Squads of ten

boys and girls who were studying Greek and Roman history were sent to the library during school hours to look at the books, pictures, etc., illustrative of Greek and Roman antiquities, the scholars being required to write descriptions of the objects seen. The librarian met the scholars personally and took the occasion to see that they were using the books properly, showing them the use of indexes, tables of contents, page headings, etc. Bulletins of new books were sent to the schools and a copy of the library catalog placed in each room.

In 1885 a report was made to the American Library Association on the work with schools done by libraries throughout the country. Reports were received from 75 libraries, 37 of which reported that official connection had been made with the schools, special privileges being granted teachers and pupils and direct efforts made to add interest to the school work. Miss Hannah P. James, the compiler, sums up the possibilities suggested by the report:

1. That the librarian should confer with the teachers to convince them of his desire and ability to help them.
2. That teachers should be allowed to take any suitable books for use in school work.
3. That teachers be supplied with applications to distribute to pupils.
4. Teachers should be induced to inform the librarian as to the courses of study to be pursued, that lists of useful and interesting books be made for use of school.
5. Such lists to be printed and distributed or posted in school.
6. Lists of juvenile books arranged in attractive general courses to be posted in library and printed in the papers.
7. Collections of wholesome books to be sent to class-rooms.

In 1887 Mr. Green reports that he had placed in four of the higher grades of the schools libraries of about 100 volumes. This experiment was tried in Milwaukee in 1888 with marked success. A report from Cleveland in 1891 records the success of the experiment of placing small libraries of about 50 volumes in 61 school-rooms. The books were simply charged to the teacher, one of the library assistants visiting each room once a month to check up the books. The books were issued to the pupils for home reading.

The teachers were enthusiastic over the value of the experiment and unanimous in their desire for its continuance.

The subject was given a prominent place at the meeting of the Library Association at Chicago in 1893. It is gratifying to note the growing sentiment in favor of doing away with restrictions and allowing the teachers as many books as they may need.

In 1894 Miss Stearns, then of the Milwaukee Public Library, made a report before the A. L. A. on children's reading that has had far-reaching results. Questions touching all points connected with children's reading were sent to 195 libraries and replies received from 145. The points especially emphasized were the advisability of abolishing the age limit for children, the limitations on the number of books loaned to teachers, the desirability of circulating pictures as well as books to the schools, and—of greatest moment to librarians—the subject of a special room for children and an attendant who should have the supervision over their reading. It would be hard to overestimate the effect of this suggestive, stimulating paper. From it may be dated the general establishment of children's rooms, of courses for the training of children's librarians in two of the leading library schools, and a growing interest in and study of children's books, all of which has done much toward preparing librarians for the more intelligent performance of their share of the co-operative work with the schools.

Turning for a moment to the other side, what has been done by the schools in the direction of promoting closer relations with libraries? Looking through the volumes of *Education* I find up to 1889 only one mention of the subject, and that a casual reference, in an article on the Quincy methods, to the assistance rendered by the library in making out a list of books for the schools.

In 1889 a school superintendent suggested, in an article on the teaching of literature, that the teachers take their classes to the library periodically and that they borrow books from the library for use in the classrooms. In the same volume, however, is an extract from an article by Mr. Melvil Dewey in *Library Notes* for June, 1888, on "Libraries as related to the educational work of the state," which was accompanied by the edi-

torial suggestion that the article would repay reading by any thoughtful reader.

In 1880 Mr. Charles Francis Adams read a paper before the National Educational Association on "School superintendency," in which—speaking of the Quincy schools—he says: "We try now to treat the child throughout as a moral, reasoning being, and not as an automaton, and so we begin with Froebel's method and end with the public library. They are both factors in our Quincy common schools now, only the library is far the more important factor of the two."

The first paper distinctly on the subject of the library and the school was presented before the association in 1887 by Mr. Thomas J. Morgan, principal of the state normal school of Providence, R. I. It dealt chiefly with the necessity of teaching the pupil how to use books, indexes, references, etc., noting in passing that in Providence, Worcester, and other cities sets of books can be taken from the public library for school use.

In 1888 it is noted in an article on directing pupils' reading that "the school or city library, be it large or small, if rightly used will prove an incalculable benefit." Talks about books by competent guides and carefully prepared lists are mentioned as among the possible means by which benefit may be derived.

The first complete presentation of the subject before the association was in 1892 when Mr. Brett, librarian of the Cleveland Public Library, read a paper on "The relations of the public library to public schools." After a brief historic summary and description of work done in Worcester, Milwaukee, and other libraries, he gives in detail the work of his own library, which work had its beginning in a remark made by one of the supervising principals on the marked superiority in general information shown by the pupils of a school situated near the library over those of another far away, which she felt could be accounted for only by the fact of their use of the library. This led to the sending of a few books to some of the more distant schools, in order to place books in the hands of children who could not reach the library, but the plan was so successful and developed so many unexpected advantages that Mr. Brett declared himself in favor of using

this method of placing books in the hands of pupils even if the school-house stood next door to the library.

In the *Educational Journal* for November, 1894, appeared an article by Dr. Peckham on the work with schools done by the Milwaukee Library. This attracted great attention in the school world and did as much perhaps as any one thing to awaken an interest in the subject on the part of teachers throughout the country. The library received scores of letters asking for particulars about the work.

In 1896 an important step was taken by the National Educational Association. A petition requesting the establishment of a Library Department was presented by Melvil Dewey and was unanimously adopted. It was stated that its field "should cover fully school and pedagogic libraries but that its great work should be the practical recognition that education is no longer for youth and for a limited course in a school, but that it is really a matter for adults as well as youth, for life not for the course, to be carried on at home as well as in the school. . . . This means that education must be carried on by means of reading and that, if the libraries are to furnish the books and give all necessary help in their proper field, the schools must furnish the readers."

The American Library Association in the same year appointed a committee to co-operate with the Library Department of the Educational Association.

In 1897 a committee of teachers and librarians was formed to report on the relations of public libraries to the public schools, to indicate methods of co-operation by which the usefulness of both may be increased. In 1898 the committee made a preliminary report. The practical nature of its work may be shown by the list of subjects reported for investigation:

To make a careful examination of the relations now existing.

To pursue this examination in such a way, through circulars and through the columns of the educational and library papers, as to inform the greatest number of people of what is now being done.

To examine with care such questions as:

How to induce librarians to acquaint themselves with the needs of the school-room and

teachers to make themselves familiar with the possibilities of public libraries.

How to encourage normal schools to give more instruction in the use of books and libraries.

How to induce high schools, colleges, and universities to establish "schools of the book."

How to promote the introduction of school-room libraries.

How to induce more public libraries to open special departments for children and teachers.

How to increase the interest of parents in the reading of their children.

How to make more accessible for parents and teachers select and annotated lists of books for the young and how to promote their use.

How to promote close relations through meetings and otherwise between teachers, parents, and librarians.

How to arrive at conclusions of value in regard to the treatment of young people as far as reading is concerned, during the adolescent period.

How to convey to school boards and teachers in remote districts a sense of their needs in the way of good books well used, and information as to how such books can best be secured.

The committee made a thorough investigation of the situation along these lines and a full report was presented at the annual meeting of the National Educational Association in 1899. This report which is published by the association in pamphlet form touches upon every aspect of co-operative work, includes graded lists for supplemental reading and school use, analyzes the work now being done in various centers, and contains much practical advice both for librarian and teacher.

Thus these two great factors of our educational system have been brought together and the bridge suggested by Mr. Adams 25 years ago has been made fast to its moorings on either side. To the librarian's knowledge of the book is joined the teacher's knowledge of the child and from this combination there must result a power working for good, the force of which cannot be estimated.

We will consider briefly one or two concrete examples of work as carried on to-day. One of the most important evidences of co-operation is the recent publication by the

Carnegie Library of Pittsburgh of a "Graded and annotated catalog of books in the Carnegie Library of Pittsburgh for the use of the city schools." In 1899 the librarian, Mr. Anderson, addressed the school principals to urge a more systematic organization of the work of the library with the schools. A committee was appointed to co-operate with the librarian and his assistants in the selection of a list of books suited to the different grades supplemental to the ordinary textbooks. The following subjects were selected: Nature, Geography, History, Language, General literature, Art, Kindergarten, Pedagogy, and High school reading. A sub-committee was formed to cover each subject. The list is divided into grades and by subject under each grade. Each entry is annotated and repeated in full under each grade to which it is assigned, and the work concludes with an author and title index, the grade or grades being indicated by figures. This catalog will be of use not only to the teachers of Pittsburgh but to librarians and teachers the country over. Prefacing the list is a letter from the Superintendent of Public Instruction, Samuel Andrews, saying, in part: "The accompanying catalog is, in my opinion, a most important school document. So far as I know it is something unique. It is gratifying to me, first, as indicating the harmony existing between the library authorities and the school principals in their mutual efforts for the education of the people; second, by reason of the evidence, manifest on every page, of the conscientious censorship exercised in its preparation. I feel confident that it will be a means of vitalizing the entire work of the schools, of awakening among the pupils that enthusiasm for good reading which is the highest guarantee of true culture, good habits, and genuine character."

In Buffalo the work of sending libraries and pictures to the schools has been carried on for about three years. The librarian gives as his experience that the most difficult problem is fitting the books to the proper grades in the schools. Each school, each class, must be studied with the teacher's help before intelligent assignment of books can be made. For example, children in the poorer districts and children of foreign-born parents need much simpler books than children in cor-

responding grades with different home surroundings.

A quotation from the annual report of the assistant in charge of the work at the Buffalo library will give a better idea than any description could of some results of this effort:

"From the principals who are all interested and, I believe, all in hearty sympathy with the movement, from the teachers and, better still, from the children themselves we have received many assurances that they are not only satisfied with the service but that the results are going to be all that we expect and more. The principal of an east side school, where fully 75 % of the parents are foreign born, has stated that beyond any doubt the moral tone of his district has been marvelously changed for the better in the last three years."

The school circulation alone in Buffalo last year was 194,045 volumes, and of this the librarian, Mr. Elmendorf, writes: "It is the best work the library is doing, and the federation, not the union, of the public school and the public library seems the most important step in modern democratic education."

A still further step has been taken by the Webster Free Library, connected with the East Side House, of New York, in the direction of supplying the schools with illustrative material to intensify the interest in school work; collections of specimens, geological, zoological, to illustrate nature work, anatomical models, historical relics, and collections of objects intended to make real to the children the life, manners, and customs of the countries about which they are studying. Of this work one teacher wrote recently: "The girls told me last term that until they had seen your Mexican exhibit they had an idea that Mexico was a wilderness; and South America!—well, it was a land of savages and wild beasts."

This work suggests that the next advance in educational expansion must be in the direction of co-operation with the museum. If to the library and the school, which, working together, shall awaken and feed a love of reading, is added the museum with its power to vivify and make real that which is read, the result shall be an education that shall enrich, widen, and uplift the life of succeeding generations.

## THE OUTCOME OF THE PICTURE BULLETIN.

BY EDWIN WHITE GAILLARD, *Webster Free Library, New York.*

THE old question, "Shall books be illustrated?" may be answered in somewhat the same way that the new one, "Shall libraries be illustrated?" is beginning to receive a reply.

No one questions the value of illustrating some parts of some books. Volumes of history, science, and the arts naturally increase greatly in value when well illustrated. Fiction and drama increase in interest. What would Dante's vision, some of Dickens' books, or even "Trilby" be without the illustrations? The two-volume illustrated edition of "Eleanor" is in far greater demand than is the pictureless edition in one volume.

The history of co-operative work with the schools shows that teachers must be made to understand, and must make the children interested in, books and the library. The library must provide books not only technical, but also bright, up-to-date volumes of fiction and travel adapted to the needs of the individual teacher and their classes. In a city library work of this kind, if done properly, will require not only a children's room, but a whole department, with a trained and conscientious staff. Selecting books, printing lists, and keeping teachers informed of the contents of the library in the subjects being taught is no small undertaking.

In the library of which I have charge only three grades of the public schools have been provided with special reading lists and collections of books. The result has been far greater than was expected. This part of our work is only such as is done in many progressive libraries, and while extremely interesting in detail, it is neither new or radical enough to require a second setting forth in this issue of the JOURNAL. All readers of the LIBRARY JOURNAL are familiar with the history of school and library co-operative work. Miss Rathbone, in her address before the Long Island Library Club, has put this history into available shape.

Unconsciously librarians have, by the means of special picture bulletins, been preparing themselves for a greater development in what we call the "modern library movement." This greater development is the extension of these

picture bulletins, and it can be used to advantage in connection with school work.

About a year ago our library undertook to post a picture bulletin for a grade which was at the time studying the history and geography of Mexico. This bulletin was at first illustrated in the usual manner with magazine and Perry pictures. Later, with large colored photographs, and finally with picturesque bits of costume, household utensils, Indian feather pictures, linen drawn work, stamps, coins, a large physical map, sundry curios, and a collection of native products. These native products were coffee, rubber, cocoanut-fibre, cocoa, sugar and various minerals, all in different conditions of production and preparation for the market. At the same time, for another grade, were provided anatomical models, geological and zoological specimens and historical relics. Instead of posting pictures of minerals, the actual specimens were placed on a nearby shelf. In this way it has been the endeavor to illustrate the work of the entire eight grades of the grammar department. However, the immediate growth throughout the entire library resulting from this work has been such that, up to the present, time has only been found to provide for the three upper grades for which the reading lists and collections of books were made. The children hear and learn about subjects in school and come to the library for books and other sources of information.

A Russian exhibit has just closed. Some of the pictures in this exhibit were loaned by Messrs. Charles Scribner's Sons, and some by the Century Company, others were purchased in Paris and in Detroit. The French and Detroit pictures were, when mounted, about the size of the "Standard dictionary" page, and cost about seven cents each. The peculiar color processes made these pictures very attractive. In addition to pictures, which occupied an entire side of a room, were show cases and tables which contained many curious pieces of costume, samovars, lacquered woodware, spoons, jars, bowls, cups and candlesticks, books, maps, coins and paper money, silverware, lithographed

religious pictures, flags, etc. This collection was borrowed from many different people at a great expenditure of time and work, but with very little money outlay.

The Russian collection was made simply to illustrate the subject for about thirty classes that, at the time, had the Russian empire as a part of their studies. Three classes were required to use it as the subject for compositions. Many teachers and over 1200 pupils examined the curious and picturesque things. At one time every book about Russia in the library — history, biography, fiction and travel — was in circulation.

The American Revolution will be the next subject for illustrating in this practical manner. Already old muskets, footstoves, kettles, books, a flax wheel, loom, hand-woven sheet, household utensils, etc., are beginning to be collected.

Teachers say that work of this kind is a real help to themselves as well as to their pupils. Of the 617 teachers in this immediate neighborhood 285 have used this library in some way, and of this number about 137 systematically borrow books for themselves, or endorse application blanks for their pupils, or both. Indeed, not less than 2300 boys and girls have within the past year drawn books upon the recommendation of their teachers.

Librarians all know that there is a constant demand for books about trees, flowers, seeds, minerals and other natural history subjects. In this library collections are in the process of formation which will illustrate the books of natural science. Between the books, which are, of course, "open shelf," the collections will be placed. Just after the bird division, for example, some of the shelves have been enclosed in glass. On these shelves have been placed a collection of birds, nests, and of eggs. Just before these shelves, in proper decimal classification order, will be placed books and specimens of reptiles. This collection will contain types and also specimens of those reptiles which are found in this locality. Rocks, minerals, seeds, leaves, barks and grasses are now being collected, to be placed beside the books which they help illustrate.

In this library it is the custom to lend objects of interest to teachers to be used in connection with the class-room work. The Public Library of Buffalo has a large collec-

tion of pictures which are arranged by subject, and are loaned in envelopes of fifty pictures each to the class rooms. In the same way the Webster Free Library at this writing has in actual use in school rooms two sets of those minerals which the classes are obliged to study — a tellurian, a planetary, four anatomical models, plaster casts and wall charts of historic ornament and design of the Egyptian, Grecian, Roman and Gothic periods; and specimens of coffee and cocoanut mounted on cards, showing the various stages of development and the usages to which they are put.

The result of this work has been a very marked increase in the interest of the teachers in the library and its work, and in the circulation, especially of books of travel, natural science and historical juvenile fiction.

It would be difficult to speak too warmly of the way in which the principals and teachers give their time and advice to this work. The cordial spirit shown is a constant incentive to a better standard on the part of the library.

The question of the value of this work cannot be raised. How far, to what extent it should be carried, is indeed a difficult matter to decide. In time it is possible that a great museum and a great library may be so interwoven that it will be difficult to decide whether the museum has a library or the library a museum. The New York Zoological Society recently directed that books of natural history be placed in the various houses in the new zoological park in the Borough of the Bronx, and made available for the use of the public. It is the beginning, and it shows the tendency. To what extent should collections of specimens be made by a library; or, in other words, how far should a library extend its picture bulletins and illustrate its books?

The proposition then, "Shall libraries be illustrated?" will receive much the same answer as though the question were about books. "Some libraries, and some parts of libraries" the answer will be. The individual needs and conditions must be considered for each. In a children's room, or in that portion of a library which has to deal with schools, a most valuable and stimulating adjunct will be a "Department of Practical Illustration."

## METHODS OF EVALUATING CHILDREN'S BOOKS.\*

BY EVELYN N. LANE, AND IDA F. FARRAR, *Springfield (Mass.) City Library.*

THE foundation of children's reading is already well laid in the choice of books which have stood the test of time and which are universally recognized as literature—what we are pleased to call standard literature. It is no great task for an experienced reader of books and children to compile a list of standard juvenile literature; such lists, and good ones too, are in print, and are available as aids and time-savers. But the feeling grows among teachers and librarians that *all* the books offered to the young by a public library should be of the best quality, and so the problem of appraisal becomes a serious one.

When the juvenile list of the Springfield Library was revised about two years ago, the new list was issued as tentative rather than final; its compilers consulted the published lists of other libraries, relying somewhat also upon their own experience, and the result was a list of about 225 authors represented by 800 titles. This has been found to work fairly well, but as the books wear out the question arises: Shall they in all cases be replaced? And the answer is No. In a few instances where the books have obstinately refused to circulate, we are confronted by another question: Shall they be allowed to remain upon the shelves? This time the answer is a conditional No. Then there are all the new books printed every week, each one guaranteed to be exactly suited to juvenile minds and morals; which of them shall we buy?

In connection with a series of conferences for parents and teachers on "The government of the child," conducted in Springfield by Dr. Dawson, of the Bible Normal College, an effort has been made by the Springfield Library to get at certain facts relating to stories and story-books, to find, if possible, exactly what elements tend to make a tale popular, and then to determine whether those elements produce a healthful effect upon the young mind. Books for the purpose have been furnished by the library, and most of these books,

though not all of them, have been selected from what we may call the "doubtful worn-out" and the "don't circulate" classes. After a careful reading, a syllabus, prepared in outline by Dr. Dawson, has been filled out and returned to the library. These analyses and criticisms are very helpful, and show what might be accomplished by a well organized reading committee.

Among the children, a vote for the most popular author would elect either Henty or Tomlinson. Eight boys who read both Henty and Tomlinson were asked to tell why they liked each. Six liked Tomlinson because they liked history; one, because he liked to read about "them old times;" one because he liked to see "how we whipped the British." Three liked Henty because they liked history, and five because they liked fighting. From a psychological standpoint the results of even this simple experiment are significant. But whatever may be the moral effect of Henty's writings one thing must be admitted: in the long run both he and Tomlinson, more than any other popular juvenile authors, make for intelligence.

Besides the Dawson syllabus, the library makes use of appraisal blanks to be filled out by volunteer readers who feel interested in the work. The reason for recommending or not recommending the book is given, and usually some comment is added.

As the attendant in charge of the juvenile department goes over the shelves day after day she soon learns which of the *books* do not circulate and which of the *authors* may be said not to circulate. "The one I know the best of all" by Mrs. Burnett belongs to the former, and Mrs. Ewing and W. H. G. Kingston are examples of the latter. Investigation points to the conclusion that Mrs. Burnett's single book and Mrs. Ewing's writings as a whole, belong to that class of adult fiction that is written about children, but is not specially adapted to children, while the verdict of Dr. Dawson's reader would influence us toward dropping Kingston. Of course the discovery that a book is wrongly listed as juvenile implies the correction of the error.

\* Read before Connecticut Library Association, Hartford, Feb. 27, 1901.

Lily Wesselhoef wrote a book, a little nature story, that was commended and with some justice, by Louisa M. Alcott. Then Lily Wesselhoef wrote other stories, some of which did not deserve anybody's commendation, but, probably on the strength of "Sparrow the tramp," they are on the juvenile shelves. They have little merit as nature stories, and are slangy and trashy. They are examples of what will not be replaced.

Last year about 40 new titles were added, and the number for this year will probably not exceed that. At present nearly all the new books are appraised by one person. The appraisal blanks are filled out, with whatever comment is necessary to show especial excellence or the reverse, and then filed for consideration by the librarian.

The following half dozen selections show some of the results of this system:

Niemann, August. The Boer boy.

Boer history previous to the present war presented in an impartial and interesting way. This, with Stratemeyer's "Between Boer and Briton" (already in the library), would form a complete juvenile Boer history in fiction form. Added to juvenile list.

Garland, Hamlin. Boy life on the prairie.

A book about boys—for grown-ups. Added to the library, but not to juvenile list.

Raymond, Evelyn. Reels and spindles.

Story of a good but self-sufficient young girl whose mastery of financial and moral problems ranges from the sale of her pet burro (without the consent or knowledge of her parents), to the conception of costly philanthropic schemes to be carried out by a selfish, but finally repentant, rich elderly cousin, won over, of course, through the heroine's influence. Exceedingly improbable and sometimes tiresome. Rejected.

Brooks, E. S. A godson of Lafayette.

This is the story of Eleazer Williams and his western empire. A well-written account of an interesting episode in our country's history that is not generally known to boys and girls, being the sequel, in a way, to "The peasant and the prince," which is read in our schools. Added to juvenile list.

Blanchard, A. E. Her very best.

In two parts. (1) A pleasant, wholesome story adapted to girls from 14 to 18. (2) A love story. Objection has been made to love stories by mothers of girls who use our library. Such parents would have good reason to object to this. Rejected.

Dillingham, F. B. A Christmas-tree scholar.

A book of short stories, one for every holiday in the year, that children from eight to 15 will read by themselves and enjoy. It is

also suitable for reading aloud in the circle of young people and grown-ups. Added to juvenile list.

In this work of evaluation a thoughtful reader will find or miss something, in every book, that cannot be expressed in the answers to any set of questions that may be formulated for her guidance. There is a sum total that must be reckoned up in another way. When a tale is described by terms "modern," "historical," "cheering," "humorous," "tame," "strong," "exciting," "silly," "good English," "poor English," etc., the idea of the actual scope of the story is a very vague one. Consider those well-known and well-read juvenile series, the "Prudy" and "Doty Dimple," and the "Pepper" books, excepting, perhaps, the first of the Pepper books, "Five little Peppers." Applying the formulated question test, both can be truthfully described as cheery stories written for boys and girls from 7 to 12; but when that is said, there still remains that obstinate sum total already alluded to, which is just this: what contribution do these books offer to the life of the child who reads them? It is unfortunate that any author should employ, for children's use, anything but pure English. The teacher who toils to impress correct forms of speech upon her pupils, as well as the intelligent mother who struggles with the same task at home, must feel that such reading is detrimental, besides imposing useless labor upon the child who can read the best forms but slowly. In this respect, however, the Prudy books must be admitted to be vastly superior to the Peppers. In "Joel Pepper," the last of that series, the minister's wife and the doctor (who figure only incidentally), are the only people who can be said to speak English at all, while the Prudy books give us about what might be reasonably expected from little folks. The best that can be said of the Pepper books is that the Peppers were cheerful in spite of their poverty. Polly does enlist our sympathies, but the younger children, Joel particularly, are self-willed and often disobedient. On at least every other page we read "Joel began to scream"—and usually it is all for nothing. He is never really compelled to obey anybody. The author's style, too, if that term is allowed in such a connection, is marked by an inconsequence that appears also in some of her more pretentious writings.

What is the contribution of the Pepper books to any child's life?

The Prudy stories are simple but they are not weak. The Parlin children are good little somebodies — though not too good to be natural, and when tempests arise, threatening the well being and safety of the family ship, there is always a firm hand at the helm to guide the bark into some quiet harbor. The children are never allowed *in command*. If consideration for the rights of others, loving gentleness and forbearance mean anything in child-training, what do the Prudy books contribute?

As the result of our experience with the revised list, it seems probable that in future many duplicates of whatever proves to be valuable will be bought, and that the variety of titles will be proportionally lessened. This work is done for children under high school age. The term children is so elastic that, at times in reading of children's books, one is forced to stop short in order to get one's bearings. "Dream days," "The golden age," "Les misérables," "Adam Bede," "Mill on the Floss," "Henry Esmond," are a few of the many that are mentioned. They seem rather beyond the appreciation of a child, or even of the average young person in his early teens, if for no other reason than that they so far transcend, not his understanding, but his experience.

While no fixed principles can be laid down in evaluating juvenile fiction it may be said in a general way that we look for moral tone, and at least a fair literary style and, in the case of historical fiction, truth as to facts. In books on science we look for truth first and if that be lacking the better the style the more pernicious the book. As few librarians are specialists in the line of science it stands to reason that they must secure the advice of people who know more than they do.

In the Springfield Library two years ago we carefully classified children's books and after we had put into the juvenile department all the books which had been there in a general way before, we went to the shelves of adult literature and selected those which were written for young people — sometimes, I fear I must say, written down to young people. Some of these were books which had appealed to some of us when we were children, such as those of Arabella Buckley and Agnes

Giberne. These books we tried to circulate by all legitimate means, laying them out on tables, calling attention to interesting facts in them — all to no purpose. Finally in desperation we selected those which had never gone out and those which had circulated but very few times, and we held a conference over them, consigning a few to oblivion, cutting a few up for the pictures and putting a few back with the adult books as useful for teachers.

A few months since, in developing the idea of appraisal by a specialist we asked Miss Fannie Stebbins, supervisor of science in the schools of Springfield, to look over our juvenile science and pass judgment, which she did somewhat reluctantly, since it must needs be a hasty judgment. Out of about 250 which she looked over it is significant that there were only 20 which she approved unqualifiedly.

As in the case of most scientists she demands absolute truth as to facts. I will name one or two books which fell under the ban, as concrete examples serve to make points clear. In the first place scientific truths of 30 or 50 years ago are not scientific truths of to-day, so that an old book of scientific lore is worth little excepting as history. Hooker's "Child's book of nature" was published in 1867 and make such statements as these: "The root is the plant's stomach . . . there are mouths in the roots," both of which are untrue. "The food of plants is in the ground and the plants take it up"; leaving wholly out of account the food of the carbon dioxide of the air. J. G. Wood is regarded as too technical to be useful, and many of the books in the series known as Appleton's "Home reading books" come under condemnation as being padded, the amount of surplus matter almost hiding the facts. The style of book where Uncle Paul takes James and John out to walk and instruction is carried on in dialogue fashion all the way is hardly one to attract children.

Books in science, as in some other classes, are not the sort that children seek after but rather need to be introduced to. There are a few, such as "Black beauty," "Beautiful Joe," "Strike at Shane's," "Wild animals I have known," "World of the great forest," and the bird books, which will always be sought for, but the majority of them need to be brought to the child's attention. The best field for circulating these books we have found to be the

school room library. The books in such a library are few in number, and the teacher can take time to read a page or two here and there, which is oftentimes sufficient to awaken the child's interest.

We are coming more and more to agree

with the great Russian that there are really very few great books in the world, that if we can discover these by means of specialists and then buy plenty of copies we shall in large measure have solved our difficulties, in science and fiction and all other classes as well.

### THE LIBRARY FRIEND.

BY WINIFRED L. TAYLOR, *Pratt Institute Free Library, Brooklyn, N. Y.*

"THE library friend" is the term that seems best to apply to that member of the modern library's staff whose work is a development of the service ordinarily rendered through the "information desk." Information-desk service as usually conceived, it is not; for the library friend deals with the tendencies, tastes, and aspirations of readers as much as if not more than with the definite question and answer respecting facts. The office indeed may be regarded as finding its first expression in the circulating libraries maintained by subscription in many of the smaller cities twenty-five years and more ago, when the free public library of to-day was comparatively rare. In those libraries every subscriber knew the librarian, and the librarian was personally acquainted with every book on the shelves. To bring the books and readers into congenial relationship was the business and usually the pleasure of the librarian. The personal element was the heart from which the circulation of the books radiated—if the presiding personality lacked vitality and enthusiasm the library was a failure.

With the era of the democratic free libraries, with their more rapid growth, with their doors open to men, women and children of all classes, the human element, the personal relation of librarian to the reader suffered a gradual eclipse, until, in some libraries most perfectly developed on the technical side, the personal equation vanished altogether. The library became a great machine, into which a number was dropped, and out of which a book was dropped like corn from the hopper. We all know how formidable this mechanism is to those unaccustomed to modern library methods. To the uninitiated the card catalog is an abomination, an unsolved problem, a delusion and a snare. The boy who is interested in athletics, fumbling over the card catalog in Micawber-like fashion, hits upon the title "Morning and even-

ing exercises"; he straightway hands in the number, thinking he has found a prize. It is discouraging and depressing when the machine shoots out to him a volume of devotional compilations. He has tried his luck and it has failed, and as he was reminded only last week that a book cannot be exchanged the same day on which it is drawn out he retires with "Morning and evening exercises," a sadder, but not a wiser boy. It is in accord, therefore, with the process of library evolution that a closer personal relation between reader and librarian should be developed through some such medium as is here outlined under the designation "the library friend."

One of the library problems just now is this: given on the one side 100,000 books and on the other 50,000 people. How is each individual to be brought into contact with the particular book that he wants. Where open shelves are practicable a great advantage—to the discriminating reader, an inestimable advantage, is gained; but the majority of libraries have not room to throw any department open to the public; and even among open shelves the person whose judgment of books is wholly untrained often misses what he is looking for.

The assistance given by the reference room is invaluable. There no one goes away unsatisfied; but the reference room reaches only those in pursuit of a definite subject. Beyond its range is the drifting, aimless reader, the searcher after something he knows not what. The dull, the diffident, the beginners in the use of libraries, those who read purely for amusement and those who want the new books—new spelled with a capital n and book with a small b—old persons, those whose eyesight is defective and whose glasses strike the card catalog at the wrong angle, foreigners who use English with difficulty and diffidence—all these

gather together in the delivery room at once, and efficient as the assistants may be—and sometimes they effect miracles—it is impossible for them to give the different individuals the help each one needs. In the libraries where the human element is most withdrawn the case of these people is hard.

To bring the personal relation again into the library and to develop it with the growth of the needs of the public, with this end in view, a number of libraries have introduced the information desk. By common consent, perhaps in the eternal fitness of things, this position so far seems to have been relegated to woman.

"She is a reading lady, and far gone in the pleasures of friendship." So wrote Sir Roger de Coverley of the object of his affections, and no one could more felicitously describe two of the qualifications for the one presiding at the information desk. A reading lady she must be; and it is no less important that she be far gone in friendship for the public. To study their needs; to be receptive as wax to their impress, and responsive with heart and soul as well as with mind. This all around sympathetic power is the fundamental requisite of true service in this position. She may be a person of many words or of few; a good listener she must be. Success depends less upon temperament or gifts than upon an attitude of inward receptivity and outgoing friendliness—the attitude that radiates a home-like atmosphere and insensibly sets the stranger at ease. Emerson quaintly described certain faces as "decorated with invitation." This style of decoration will be permanently in fashion in this position if the invitation from the heart is a magnet strong enough to draw within its circle those who are in need of help. It is most necessary, also, that a certain poise be preserved. To be ready but not over anxious to assist; to be responsive but not intrusive; to be suggestive but never insistent; to recommend books without forcing one's own literary tastes or standards upon others; while helping new comers, to seek to make them independent in their use of the library instead of leading them to rely on some one else to do the work and use all the judgment for them, all this requires a nice adjustment of balances. And it is well to have on hand the tact which is the art of lessening social friction, and the sense of humor so invaluable as a lubricator in human relations.

When any one comes to the information desk with a grievance, irritated, if not angry, to be met with simple good nature, and not to be taken too seriously, and yet to find instant readiness to adjust the cause of annoyance if possible, soon dissipates the feeling of antagonism or injury. Such encounters ought not to tax one's patience. They sometimes turn out to be rather interesting.

Nor need stupidity tax one's patience. What more pathetic than the isolation of one who is slow to perceive and to grasp? It is a terrible handicap. To rescue the dull from their dullness should be the first impulse, and shallow is the sympathy that does not reach out to such instinctively. It is not enough to be able to unlock the resources of the library; one needs to be able also to unlock the resources of the individual.

People come to libraries from all sorts of homes. To the man or woman living in the midst of ugly and sordid surroundings, where the days are crowded with drudgery, the weekly visit to the library becomes a social event; it is a lift into a fresh atmosphere, into another plane of life. A passing greeting from the information desk gives a sense of welcome and of relationship to the reading public. Five or ten minutes of cordial contact, a brief conversation with one unrelated to their world of worries, is a refreshing experience. To be recognized as a thinking, reading being, with opinions about books, instead of a human machine for cooking, scrubbing and sewing, or money-getting, puts new life into one.

But this social side of the work of the information desk must rest on the solid foundation of practical qualifications. One must possess the knowledge of a wide range of books, the power of concentration on the one person or the one subject in hand, and the mental alertness that perceives when another person is waiting. The more perfect the understanding of the system of classification of the books and of all the technical side of library work, the more effective will be the service at the information desk. There the resources of the library should be at command, and should be reached rapidly and accurately. When any imaginable or unimaginable question may be asked at any moment, from "May I use your pencil?" up through the whole range of history, art, literature, politics, science or religion, one must

know the ground thoroughly in order to meet these demands. Topics requiring special research are passed on to the reference room, but the inquirer should be put on the right track when he wants but a single book from the delivery room.

The new-comer must be instructed in intelligent use of the catalogs and helped towards self-reliance from the start. The young people must be assisted in making out their first lists, and these lists should represent a variety of authors, in order that the author who pleases can be followed up independently through the card catalogs. A well-selected first list for boys or girls should place at their command a range of 50, 60, or 100 books. It is surprising how few writers are known to the average boy or girl who comes to the public library for fiction. The field of the boy is often bounded by Alger, Ellis, Optic and Henty, while the girls may know only Sophie May and Miss Alcott. Beyond are unknown seas. One of the early developments at the information desk will be carefully-selected lists of books for boys and girls. They grow under one's hand as the young people in turn recommend additions. This sense of co-operation wins the confidence of those who are quick to suspect and ward off any lurking desire for their improvement on the part of the library. Notwithstanding that the starting point must always be the taste and inclination of the reader, it is a simple matter to keep the pressure in the right direction. Carefully-selected fiction lists for older readers also meet a want. Such lists do not include the works of the standard, voluminous writers known to every one. Into them are gathered some of the old favorites of a generation ago, or later novels which may have happened to miss fame and yet possess an abiding charm and the indispensable element of interest. There are hundreds of such books, perennially delightful, novels just now submerged under the continually rising tide of new fiction. It is a piece of pure good fortune for the reader who turns in despair from the pursuit of "David Harum," "Eben Holden," or "Janice Meredith," to find a fresh range of unheard-of novels of equal or more than equal interest. This enlargement of their circle of congenial authors is welcomed with very grateful appreciation. A list of good short stories is another resource, and one of cheer-

ful books for invalids; stories that are neither morbid nor tragic. Young working men who can come to the library only at evening are glad of assistance in selecting books related to their work, and they are quick to respond to any evidence of sympathetic interest in their pursuit. Young girls employed during the day who wish to make up for the lack of opportunities in school are eager and grateful for advice in outlining courses of reading and study; those studying music are glad of guidance into the more interesting pathways of musical literature, or it may be the amateur in some branch of art who reveals a cherished ambition in the hope of obtaining help in this direction, and delightfully friendly relations spring into being while these various lists are under way.

Often the chance encounter, the mere passing remark, brings the happy inspiration as to just the right books, as when one catches a glimpse of a deep enthusiasm for nature surviving in the breast of a man through 50 years spent between city walls. To introduce him to Richard Jefferies, most intense, nearest to nature's spirit, and least known of nature's lovers, is to enrich the remaining years of this man's life.

All who go to the library go as seekers. Some are seeking merely entertainment, others are searching for knowledge, but many are struggling with the deep problems that beset us all, perhaps in moral or spiritual darkness, and looking only for light. If one's heart is with the people, nothing so quickens perception as sympathy. One notes the trend of the reading of the individual, and often what he is seeking is intuitively divined. Perhaps the simple remark, "If you can tell me just what you want I may be able to find it for you," results in a frank statement of the difficulty, or an outburst of sudden confidence is given from that impulse that makes it often easier to confide in a stranger than in a relative. And it counts for a good deal just then if the one at the information desk knows what writer has felt and thought most deeply and has written most clearly and helpfully on that subject. Few are the needs of the human heart or mind that are really beyond the reach of help from books—books in which we find the reflection of our every mood, the expression of our inmost aspiration, the conservation of the feeling, the experience and the wisdom of the race.

## FRANCIS PARKMAN ON PUBLIC EDUCATION.

*From Farnham's Life of Parkman.*

PARADOXICAL as it may seem, the diffusion of education and intelligence is at present acting against the free development of the highest education and intelligence. Many have hoped and still hope that by giving a partial teaching to great numbers of persons, a stimulus would be applied to the best minds among them, and a thirst for knowledge awakened which would lead to high results; but thus far these results have not equalled the expectation. There has been a vast expenditure of brick and mortar for educational purposes, and what is more to the purpose, many excellent and faithful teachers of both sexes have labored diligently in their vocation; but the system of competitive cramming in our public schools has not borne fruits on which we have much cause to congratulate ourselves. It has produced an immense number of readers; but what thinkers are to be found may be said to exist in spite of it. The public school has put money in abundance in the pockets of the dealers in sensation stories, sensation newspapers, and all the swarm of trivial, sickly, and rascally literature. . . .

The public taste is very exacting, and it offers great and tempting rewards to those who please it. . . . That which please it pays so much better in money and notoriety, and is so much cheaper of production, than the better article which does not please it, that the temptation to accept light work and high wages in place of hard work and low wages is difficult to resist. Nothing but a deep love of truth or of art can stand unmoved against it. In our literary markets, educated tastes are completely outridden by uneducated or half-educated tastes, and the commodity is debased accordingly. Thus, the editor of a magazine may be a man of taste and talents; but his interests as a man of letters and his interests as a man of business are not the same. "Why don't you make your magazine what it ought to be?" we once asked a well-known editor. "Because," he replied, "if we did we should lose four-fifths of our circulation." A noted preacher not long ago confessed to us that the temptation to give his audience the sort of preaching which they liked to hear, instead of that which it was best that they should hear, was almost irresistible.

The amount of what we have been saying is, that the public which demands a second-rate article is so enormously large in comparison with the public which demands a first-rate article that it impairs the quality of literary production, and exercises an influence adverse to the growth of intellectual eminence. Now, what is the remedy? It seems to us to be two-fold. First, to direct popular education, not to stuffing the mind

with crude aggregations of imperfect knowledge, but rather to the development of its powers of observation, comparison, analysis, and reasoning; to strengthening and instructing its moral sense, and leading it to self-knowledge and consequent modesty. All this, no doubt, is vastly more difficult and far less showy in its results than the present system of competitive cramming, and requires in its teachers a high degree of good sense and sound instruction. The other remedy consists in a powerful re-enforcement of the higher education, and the consequent development of a class of persons, whether rich or poor, so well instructed and so numerous as to hold their ground against charlatanry, and propagate sound and healthy thought through the community. He who gives or bequeaths money to a well-established and wisely-conducted university confers a blessing which radiates through all the ranks of society. He does a service eminently practical, and constitutes himself the patron of the highest and best utilitarianism.

## BEST 50 BOOKS OF 1900 FOR A VILLAGE LIBRARY.

THE following list gives the result of the annual vote upon the books of the preceding year made by librarians under the direction of the New York State Library. It is based on the list of 500 of the leading books of 1900, prepared by the state library, and sent out to librarians to obtain an expression of opinion respecting the best 50 books to be added to a village library. A fuller annotated list of the best books of 1900 will soon be issued by the New York State Library. The books are ranked according to the number of votes received:

RANK.	VOTES.
1. Johnston, Mary. To have and to hold. . . . .	137
2. Thompson, Ernest Seton-. Biography of a grizzly. . . . .	131
3. Bacheller, I. A. Eben Holden. . . . .	127
4. Stedman, E. C., ed. An American anthology, 1787-1899. . . . .	126
5. Thompson, Maurice. Alice of Old Vincennes. . . . .	121
6. Ward, Mrs. M. A. Eleanor. . . . .	108
7. Allen, J. L. Reign of law. . . . .	106
8. Barrie, J. M. Tommy and Grizel. . . . .	98
9. Howells, W. D. Literary friends and acquaintance. . . . .	97
10. Crawford, F. M. In the palace of the king. . . . .	95
11. Fiske, John. Mississippi Valley in Civil War. . . . .	89
12. Tarkington, Booth. Monsieur Beaucaire. . . . .	87
13. Burroughs, John. Squirrels and other fur bearers. . . . .	85

RANK.	VOTES.
14. Wendell, Barrett. Literary history of America.....	84
15. Iles, George. Flame, electricity, and the camera.....	78
16. Keeler, H. L. Our native trees and how to identify them.....	76
17. Earle, Mrs. A. M. Stage-coach and tavern days.....	74
18. Hewlett, M. H. Life and death of Richard Yea-and-Nay.....	72
19. Eggleston, Edward. Transit of civilization from England to America in the 17th century.....	64
20. Scidmore, E. R. China the long-lived empire.....	63
21. Hillis, N. D. Influence of Christ in modern life.....	62
22. Allen, A. V. G. Life and letters of Phillips Brooks.....	61
23. Brooks, E. S. Century book of the American colonies.....	60
24. Morley, John. Oliver Cromwell... Dunne, F. P., ("Martin Dooley.") Mr. Dooley's philosophy.....	59
Grant, Robert. Unleavened bread...	59
27. Davis, R. H. With both armies in South Africa.....	58
Spofford, A. R. Book for all readers.	58
29. Thompson, Mrs. G. G. Seton. A woman tenderfoot.....	57
30. Huxley, Leonard. Life and letters of Thomas Henry Huxley.....	55

"LIBRARY DAY" IN THE FREE PUBLIC LIBRARY, CEDAR RAPIDS, IA.

WHEN we had decided to have a "library day" the question arose, What shall we do? We asked our friends and neighbors, as people always ask who intend to follow their own devices, and after a few weeks of planning this is what happened Jan. 31, 1901:

Invitations had been sent to teachers, clubs, city council and school board, to individuals who were specially interested in the library, and to many who should be but were not. We invited them to come to an afternoon session, when we would tell them something about library work and what it should mean to them; for the evening we promised an illustrated reception, when the library trustees and staff would explain the use of the library by object lessons.

This year we are particularly anxious to create a greater interest in the schools, so the central thought in the afternoon program was what the library could do for the teachers and pupils.

The first talk on "The library and the community" was a story of the day's work. The idea that a librarian does fancy work and reads novels has not entirely died out, and this address was to show that she has a few other things to occupy her time. Miss For-dyce, one of Iowa's brilliant teachers, gave the second address, "Library methods in the school." Coming from a teacher who knows both the library and the school sides of our work, her plea for co-operation of schools and library and broader methods of work in the school room carried great weight and converted many an unbeliever.

Miss Alice Tyler, secretary of the Iowa Library Commission, ended the program with a most interesting account of the state work, and so we were carried from our own little library to this broader field, and were shown how our community might become a strong factor in the greater work of sending literature to the rural districts and villages near us. The state commission has been working but four months, and already a wonderful impetus has been given to library development in Iowa.

After the addresses the audience visited the library, which was in gala dress. An exhibit of original drawings from Scribner's Sons covered the walls, every department of work was shown in bulletin or other forms, but this being a teachers' gathering the children's room proved the most attractive.

A bulletin told what the library would do for the teachers. The children's library course was explained by the children's librarian, and exhibits of books, bulletins and other work done by the children could be examined. There was a collection of books that would be of special interest to the teachers.

The Library Club could speak for itself with lists of books and questions for research.

In the evening many of the busy professional men came to see us, some for the first time. Their comments were most amusing: "You call this a public library? Why, it's just like being at home, so cosy and comfortable, and you do all this for people? We've read about it in the papers, but we did not quite believe it."

"Library day" meant a different thing to each guest, but to each it showed that the library was for him all that he would allow it to be, and that if the rooms lacked much that an ideal library should have it was only the lack of money and not of the good will of the board of trustees or the library staff.

HARRIETTE McCRORY.

### GUIDING LIGHT READING IN HIGH SCHOOLS.

THE subject of directing the light reading of high school pupils toward better books in fiction and in literature was presented by Miss Romiett Stevens, of Pratt Institute High School, Brooklyn, at the April meeting of the Long Island Library School. Miss Stevens said, in part:

The attempt to guide, even in a slight degree, the light reading of a class of boys and girls of many types and individualities, offers an interesting problem, one that would be impossible of solution if it were not for the generous assistance we receive from the library. There are many conditions to meet. Some children come to us from homes of culture, where their reading matter has been most judiciously selected; others come from homes where books are a luxury, and others still from homes where books are carelessly selected."

During the early part of the year, as soon as pupils and instructor become acquainted so that mutual confidence is established, a joint "book-talk" is held. The outcome of this free expression of opinion on a subject upon which every one has much to say would be a revelation to one that did not know what to expect. One girl will be reading "Les Misérables" while another will still be under the spell of the "Elsie" books. At such a talk one lad remarked: "The Henty books are all right. I've read every book Henty ever wrote." "Have you read anything else?" "No; I don't like anything else." Another said: "I hadn't read a book this year till last week a boy lent me one of Laura Jean Libbey's, and I thought it was a little silly." Most girls of this period have read and re-read "Louise Olcott," and then because they have found nothing satisfactory to take her place they read and re-read her books. Then they plunge wildly into books by Stanley Weyman, Hall Caine, Anthony Hope and Marion Crawford.

In a class of 80 boys and girls a canvass was made to ascertain how many were famil-

iar with certain standard books. The results were as follows:

	READ BY.
Howard Pyle's "Robin Hood".....	9
Howard Pyle's "Men of iron".....	6
Stevenson's "Treasure Island".....	16
Ruskin's "King of the Golden River".....	19
Kipling's "Jungle books".....	20

Of Scott's stories "The talisman" had been read by 9, "Ivanhoe" by 30, "Kenilworth" by 6.

As a general thing, when a boy or girl reads a trashy book it is because he does not know of the better one. These same children who have done so little reading in their lives read with evident enjoyment the classics that supplement the Greek history they study. Good short stories will, if appreciated, pave the way to more mature reading and keener appreciation of the masterpieces. "For the boy who does not read, or for the one who devours daily portions of Henty, I like to serve up bits of Seton-Thompson's animal stories, especially 'Johnny' or 'Lobo.' Seton-Thompson has been a powerful antidote to literary desuetude in scores of cases. For the boy that likes detective stories written by authors whose names are not known in the library I like to substitute 'Treasure Island,' 'The adventures of Captain Horn,' 'Captains courageous.' I never knew a girl that did not have her E. P. Roe ideals shattered by a reading of Kate Douglas Wiggin's 'Cathedral courtship' or Kipling's 'Brushwood boy.' The boy that wants funny things, and candidly doubts your ability to produce anything as good as 'Peck's bad boy,' will have his confidence in you and your world of books largely increased when you have introduced him to Ruth McEnery Stuart's 'Sonny' or to 'Uncle Remus.'"

Miss Stevens said that as a result of these informal "book talks" teachers and pupils together prepared lists of books they would recommend to others for thorough enjoyment. "It requires some tact to keep the list from books that are undoubtedly poor, but we compromise in some way." Books so chosen and recommended for pupils' reading are supplied by the library, being placed on special shelves to which pupils have direct access. "We consider ourselves very fortunate in having this generous co-operation of the library. Without it we could do almost nothing." The list prepared for the current school year included George Eliot's "Romola" and "Silas Marner," Kate Douglas Wiggin, Kipling, Hopkinson Smith, Barrie, Eber's "Egyptian princess" and "Emperor," Seton-Thompson, Howard Pyle, several of William Black's novels, Frank Stockton, Howell's "Altruria" and "A chance acquaintance," "Paul and Virginia," "Lorna Doone," "Prue and I," several of Stevenson's books, Morris's "News from nowhere," Mrs. Stuart's "Sonny," Grahame's "Golden age" and "Dream days," "When knighthood was in flower" and "Peter Sterling."

## COUNTY LIBRARIES—OHIO AND WISCONSIN.

IN the LIBRARY JOURNAL for February you refer to the opening of the Brumback Library at Van Wert, Ohio, and speak of it as being the first to extend library privileges to a whole county. I wish to correct this. Cincinnati, in addition to having a large population within her city limits, has a very large suburban population residing outside the limits of the school district of the city (not co-extensive with the limits of the city) but within Hamilton county. This suburban population is engaged in business in the city and pays a city tax upon its business. By reason of the fact that the free use of the library was limited to the residents of the school district of Cincinnati, these county residents had no use of the same. The late librarian, Mr. A. W. Whelpley, in the early '90s recommended that the free use of the library be extended to all such residents of the county. It remained, however, for the law of April 21, 1898 (93 O. L. 191) to accomplish the desired end. It went even further for it extended the free use of the privileges of the library to all residents of the county regardless of their being taxpayers. Thus immediately after the passage of the act the treasures of the Public Library of Cincinnati, nearly 250,000 volumes, were subject to the free use of the residents of the county, and they at once availed themselves of the privilege. In consideration of this extension the board of trustees of the library was given power to make a levy upon all the taxable property of the county—the proceeds of which were to be placed in the county treasury, the fund to be known as the library fund of the county and to be under the exclusive control of the trustees. The law required the trustees to establish and maintain branch libraries and delivery stations throughout the county. The delivery station system was put into operation June 10, 1899. At the present time there are 40 stations in successful operation. In addition to these stations we have 13 travelling libraries in portions of the county not easily accessible from the stations. The circulation for 1900 through the stations was 179,541. The number of registered borrowers through the stations to the present time is over 7500.

Bearing in mind the dates given above, please note the following: The law which made it possible for the county commissioners of Van Wert county to accept the notable and noble gift of Mr. Brumback was not passed until April 26, 1898 (93 O. L. 355). The contract with the commissioners was executed July 30 of the same year. The building was completed and dedicated January 1, 1901, and the county residents first had the use of the library January 28, 1901. From these dates it appears that the residents of Hamilton county had library privileges

nearly three years before those of Van Wert county. The idea was put forth some years prior to the passage of the law, as I have shown.

In looking over the library field and the work in the interest of libraries we find that this county extension idea was unique and wholly new. If there are any others of like character, I should be pleased to be advised of same. The Hagerstown, Md. library, I believe, is one other.

We think here in Cincinnati that we are the first to occupy the field. The Van Wert law was undoubtedly close upon us—being but five days later—but those five days give a precedence we do not care to lose, and particularly in view of the fact that our county extension was in actual practice for nearly three years under our law before the Van Wert law became effective. To accomplish the end we had to become divorced from the board of education of the school district, which had always controlled the library funds, and it was no easy task. We were defeated in an effort made in 1892, but in 1898, adding this county extension feature, were successful. A city board could not levy a tax upon the county duplicate and so the power of making the levy was vested in the trustees of the library, and they were given exclusive control of the fund realized from the levy. Thus the complete control of the library passed to the trustees and with it the county extension idea became a possibility and later an actuality.

We shall claim precedence in idea and practice until confronted with better evidence than is now in hand of the fact that we were not the first to conceive the idea and to put into practice the extension of library privileges to the rural districts.

W. T. PORTER,

*Trustee Public Library of Cincinnati.*

IN the LIBRARY JOURNAL for February it was pointed out editorially that the public libraries of Cincinnati, in Ohio and St. Joseph, in Missouri, among others, had for some time past extended their privileges within the county as well as within city limits, but Mr. Porter's full statement of the plan carried on at Cincinnati brings out details of great interest.

The following communication presents the other side of the question:

TO THE EDITOR OF THE LIBRARY JOURNAL:

Mr. W. T. Porter, of Cincinnati, from the tenor of his letter in the present issue of THE LIBRARY JOURNAL, is fully convinced that the Cincinnati Library enjoys the distinction of priority in the matter of inaugurating the county library movement. Feeling equally certain that the Brumback Library of Van Wert county is justly entitled to this honor, I will briefly consider the matter from my view point.

To begin with what might be considered a paradoxical statement, I will say that I am

forced to the conclusion that I consider it difficult to understand how the Cincinnati Library can fairly lay claim to the name county library, if we take that phrase in the strict sense. Granting, however, that it is a county library, let me briefly consider the act that created it a county library as well as the act that created the Brumback Library of Van Wert county a county library. That these two acts may be the more easily compared, I will place the principal items in the history of each side by side:

Library Bill of the Cincinnati Library. House Bill No. 753. In the House. April 1, 1898. Introduced. April 15, 1898. Passed. In the Senate. April 15, 1898. Introduced. April 21, 1898. Passed.	Library Bill of Brumback Library of Van Wert county. Senate Bill No. 435. In the Senate. March 25, 1898. Introduced. April 14, 1898. Passed. In the House. April 15, 1898. Introduced. April 26, 1898. Passed.
---	--

We thus see that the bill of the Brumback Library of Van Wert county was introduced first, and passed the senate before the bill of the Cincinnati Library passed either the senate or the house. In this connection I should like to add that the bill of the Brumback Library of Van Wert county was published four or five of Ohio's leading papers nearly two months before the bill of the Cincinnati Library was introduced in the Ohio legislature. On Feb. 13, 1898, Mr. Porter might have read the bill and a lengthy account of the library itself in *The Commercial-Tribune*, of Cincinnati. I have given a brief history of the two bills. Let me next say a word regarding their contents. Again I will place my facts side by side.

Bill of the Cincinnati Library. 1. Called a <i>special</i> act, since it applies practically only to the Cincinnati Library. 2. Tax levied on the county, not by county officials, but by trustees of the library. 3. Phrase "county library" does not appear in the bill.	Bill of The Brumback Library of Van Wert county. 1. Called a <i>general</i> act, since it applies to all Ohio's counties. 2. Tax levied on the county by county officials (commissioners). 3. Phrase "county library" does appear in the bill.
---	---

From the preceding facts we see that, strictly speaking, the Cincinnati act does not create a county library. It simply extends the privileges of the Cincinnati Library to Hamilton county. The fact is, the Cincinnati Library is more like the libraries in several of our larger cities, which have elaborate systems of branch libraries than a county library in a county with a rural population, since the corporate limits of Cincinnati are almost co-extensive with the lines of Ham-

ilton county. Furthermore, if the Cincinnati Library is a county library in the strict sense of the phrase, why did the Ohio legislature pass two county library bills in the same month? Legislators sometimes do strange things, still they would scarcely be guilty of passing two bills of the same character. The bill of the Brumback Library of Van Wert county was introduced first, and being a bill that applies to all of Ohio's 88 counties, *what was the object of introducing the Cincinnati bill a week later, if its purpose were to create a county library?* The fact is the Cincinnati Library is no more than a city library that extends its privileges to county residents.

What Mr. Porter says regarding the Cincinnati Library having been put into operation first is all true. The Brumback Library of Van Wert county, which was an ideal years before Mr. Whelpley recommended the extending of the privileges of the Cincinnati Library to Hamilton county had to be built after the passage of its act. The Cincinnati Library was already built. The only claim made by the Brumback Library of Van Wert county is that it was the first to inaugurate the county library movement.

Respecting the *modus operandi* of the Brumback Library of Van Wert county, I will only say in this connection that practically all the towns of Van Wert county have branch libraries, that all these branch libraries have a travelling library system characteristic of themselves, and that the branch libraries are in constant and direct communication with the central library in the matter of securing books. Any resident of Van Wert county—and every resident is within easy reach of the central library or one of its branches—can obtain books anywhere in the county, although cards are issued only by the central library. The library being a county library in a county with a rural population, the library board feel it their duty to equalize so far as possible the opportunities of all entitled to the privileges of the library, and consequently give especial attention to the part of the work which concerns the home of the farmer.

E. I. ANTRIM, *Van Wert, O.*

In this connection it is interesting to note that the Wisconsin legislature has just passed a bill authorizing the establishment of county libraries, including travelling libraries for counties, to be directed by a county "board of libraries," whose members shall serve without compensation. This board may appoint a supervising librarian at a salary not to exceed \$50 per year, exclusive of travelling expenses; and in addition to administration of travelling libraries for the county, it may maintain county public libraries if established by the county. For county travelling library purposes, an appropriation of \$500 for the first year and \$200 for

each succeeding year may be made by the county. Immediately after passage of this act, the county board of Winnebago decided to accept its provisions, a gift of 15 travelling libraries was promptly secured through the efforts of the originator of the bill, P. V. Lawson, president of the Fox River Valley Library Association; and the county voted to appropriate \$500 for new travelling libraries, and to engage a supervising librarian. Winnebago county has three public libraries, at Neenah, Menasha, and Oshkosh—the two latter being free to farmers in the neighboring townships. As the strictly rural population of the county does not exceed 18,000 all the farmers will soon have library privileges, as the state library commission will supplement the work of the county as far as is necessary to secure that end. Mr. Hutchins points out that the section of the new law authorizing the establishment of permanent county libraries "is practically a copy of the Ohio law under which the Brumback Library in Van Wert county is established." He adds, "We have had for a number of years four libraries in the state which are free to all the people of their respective counties, and two of them served people of their counties not only from their central libraries, but by means of travelling libraries. We have no libraries in the state, however, which are supported by taxation of the people of the counties as is that in Van Wert county."

#### LIBRARY LEGISLATION IN WASHINGTON.

A GENERAL library law for the state of Washington has just been enacted, based mainly on the law of New York. It provides that by a majority vote at any election "any city, village, town, school district or other body authorized to levy and collect taxes, or by vote of its common council any city" may establish and maintain a free public library, such election to be held on petition of 25 taxpayers. By a like vote money may be granted toward the support of libraries not owned by the public, "but maintained for its welfare and free use," provided such libraries are inspected by the state library commission and registered as maintaining a proper standard, and that the amount granted yearly on the basis of circulation shall not exceed 10 cents for each volume of certified circulation. Provision is made for election of library trustees, five in number, unless otherwise decided by vote, who shall, in cities, be appointed by the mayor, with consent of the city council. "No person shall be ineligible as a trustee by reason of sex." It is also specified that in cities the city superintendent or principal of schools shall be ex-officio a member of the board of trustees. The duties of trustees are defined, and requirement of reports, etc., is made. Library privileges may also be extended

throughout a county, on proper arrangement for compensation with county authorities. Provision is made for transfer of association or similar libraries to the control and support of any free public library; and the commission is given authority to take action in the case of libraries aided by state money, which are improperly administered, either by suspending or removing trustees, or other measures. The duties of the commission shall include supply of all state publications to libraries of the state, lending books to public libraries or communities making proper application, giving aid and advice as to library establishment, equipment and maintenance, selecting or furnishing books for libraries so desiring instead of giving aid in money, and making proper apportionment of the fund for public library aid appropriated by the legislature. Libraries established under the act may be abolished only by a majority vote at a regular annual election, ratified by a majority vote at the next annual election. Its provisions apply equally to combined libraries and museums.

ROBERT CROSSMAN INGRAHAM,  
1827-1901.

THE death of Robert C. Ingraham, librarian of the New Bedford Free Public Library, has brought to an end a notable career in American librarianship. Mr. Ingraham was born in New Bedford Feb. 11, 1827, and died March 3, 1901, in the city where he had spent his life. In 1852, the year of the establishment of the public library of Boston, the New Bedford library was instituted. Mr. Ingraham was chosen librarian, and thereupon took up the work to which he gave nearly a half century. The library was opened to the public March 3, 1853, and it was on the 48th anniversary of this day that Mr. Ingraham died.

The library in New Bedford had as a nucleus about 5500 volumes which had belonged to a moribund shareholders' library; now it has more than 72,000, and it is the largest library in southeastern Massachusetts. The strength and good proportions of the present collection are due to Mr. Ingraham's scholarship, unsparing labor, and discernment of local needs. To cite an example, the department of Quaker literature is particularly rich, and will prove of ever-increasing value to a city of which the early history is closely connected with that of the Society of Friends.

Much of Mr. Ingraham's work as a librarian was done while there was no expectation of the wonderful development which recent years have witnessed in the entire library world. When he began his duties a librarian was regarded as little more than a conservator of books, and the influence of a public library in advancing general education was something which experience had yet to teach. The simple aims, however, which

from the outset Mr. Ingraham kept steadily in view must always be essential; for he sought to employ every possible resource for building up his library and making it of the utmost helpfulness.

In 1858 the New Bedford Library published, in octavo form, an excellent dictionary catalog, which was widely used at the time. This catalog was followed by two supplements, issued respectively in 1869 and 1876. The supplements were similar in plan to the original volume, while at the same time the increased revenues of the library permitted the printing of a greater amount of analytical matter. Mr. Ingraham compiled entirely the three catalogs mentioned, and much of the work was done while he had little or no assistance in the daily management of the library. During more than 30 years of the library's history no one else cataloged a book that was added to its shelves.

Mr. Ingraham kept in touch with the changes in methods of library administration, and was not prevented by what might have been a pardonable conservatism from adopting those which his good judgment approved. No better instance of this could be given than his decision to abandon the old "fixed location" system of the early day for a modern method of classification. Mr. Ingraham recognized that the growth of the library rendered a change imperative, and he was not influenced by the fact that the consequent shifting about of the entire library meant for him the giving up of a habit, fixed by more than 30 years of usage, of being able to lay his hand at will on any book upon his shelves, with no thought of consulting a catalog.

The community which Mr. Ingraham served for so many years knew him chiefly as a man of retiring disposition and of simple tastes, who was the final court of appeal for information of all kinds. Yet the real extent of his acquirements was known to comparatively few people. The lack in his youth of the educational advantages that would naturally have been welcome served only to confirm an inclination for solitary study; and for many years he was a hard student during almost every available hour. He possessed an intimate knowledge of his library, due to omnivorous reading and a marvellous memory, as well as to the fact that he had selected and cataloged most of the books on the shelves. Mr. Ingraham's knowledge of bibliography was of unusual extent and accuracy, and he possessed that highly desirable qualification of a librarian which consists of a great fund of information relating to the history of the community in which he lives. It is not so well known that until failing health forbade the use of a microscope Mr. Ingraham had for many years given spare hours (one marvels that he found any) to botanical study, and had few equals in his knowledge of mosses and liverworts.

Mr. Ingraham devoted his life, with no thought of self-interest, to the institution entrusted to him in his youth. His erudition was always at the disposal of everybody who sought his assistance, and his genuine, simple modesty rendered him absolutely incapable of knowing the value of the help he afforded. He felt a personal obligation to make his library respond to every demand, and when this was accomplished he cared for no other reward.

And yet, by those who had the privilege of knowing Robert Ingraham well, his acquirements and his professional mastery will be less frequently recalled than the straightforward simplicity and modesty of his character and his inflexible integrity. The kindly acts and generous deeds with which his life was filled were never made known when he could conceal them. He met every misfortune without complaint, and he has finished the work of a long life with no duty neglected.

WILLIAM L. R. GIFFORD,  
Cambridge, Mass.

An editorial tribute to Mr. Ingraham's memory appeared in the New Bedford *Evening Standard* of March 4, which bears striking witness to the influence and value of Mr. Ingraham's service to his community. In conclusion the writer says:

"Since Mr. Ingraham became the librarian of the New Bedford Library ideals and methods of library work have undergone radical changes. We do not think the first promoters of the public library themselves comprehended exactly what they were launching. Whatever the profession may have been, the library was essentially an institution for the select few, who desired to frequent a place where the quiet of the books was rivalled by the quiet of the readers. The library was a place in which to keep books; the librarian's office was to keep them. What a library could do in stimulating the intellectual life of a whole community, and in affording the best recreation of books, was only dimly foreseen—if foreseen at all; and sometimes we think it is not understood even yet. But there has been a wonderful advance, and in his way Mr. Ingraham has been an efficient agent of that advance. If our readers will pardon a personal allusion as an illustration, we may call to mind an evening long ago when a boy, half afraid to speak in the awe-inspiring quietude of that old library room, whispered to Mr. Ingraham his wish for a good authority on rhetoric. Somehow or other the librarian had always before stood in his mind as an unapproachable and austere person—a grim sentinel over untouchable rows of book shelves. Instead he found in that evening all the resources of the library and the librarian at his command, and it was then and there revealed what a free public library meant."

BI-STATE LIBRARY MEETING, ATLANTIC CITY, N. J., MARCH 22-23.

THE fifth annual joint meeting of the Pennsylvania Library Club and the New Jersey Library Association was held at Atlantic City, March 22-23, 1901. It was one of the most successful of these spring meetings yet held, bringing together nearly 200 delegates, while in addition to the formal program meetings were held by the Executive Board of the American Library Association (all members except the treasurer being present) the A. L. A. Publishing Board, and the special committee on catalog rules for printed cards, and the organization of a state library association for Pennsylvania—the Keystone State Library Association—was effected.

The first session was held on the evening of Friday, March 22, in the assembly room of the Grand Atlantic Hotel which served as headquarters, as in previous years. It was called to order at 8.45 by Dr. E. C. Richardson, president of the New Jersey Library Association, who acted as chairman. An address of welcome was made by Mayor F. P. Stoy, who stated that the movement for a free public library in Atlantic City had been fairly launched and there was practically no question that at the next general election its establishment would be assured. "The library of the Women's Research Club," which will become the nucleus of the local public library was described by Miss Thompson, one of its officers, who spoke of the earnest efforts made to improve and enlarge the collection and work for the development of a local library sentiment. A cordial invitation was extended to visit the library, of which many of the delegates later availed themselves.

"Music in public libraries" was the first paper on the program, to be presented by Prof. Constantin von Sternberg, of Philadelphia. Prof. Sternberg was absent, owing to illness, but a letter from him was read by Mr. John Thomson, in which some phases of the subject were touched upon. He urged that in forming a music collection in a public library great stress should be laid upon "a large number of acknowledged good works on musical history, and still greater stress on works on the æsthetics of music. I should advise to carefully avoid the spending of great sums of money on autograph manuscripts. While they are very interesting, they are not necessities. They add to the dignity of a musical library and to its authoritativeness, but both of these qualities should be acquired first, before steps are taken to support them." It was thought undesirable to include in such collections "the so-called text-book on theory, harmony, etc. Such books each student should possess and call his own." On the other hand great stress should be laid on scores of orchestral music of the secular as well as the ecclesiastical character. "These should be full scores, how-

ever, and such should also be those of the classical and modern orchestral works. The mere hearing of orchestral music is not sufficient to educate musicians. They must be enabled to look it up in the score, how this and that tone color or tone effect was produced by the author. A judicious selection of scores comprising the standard symphonies, operas and oratorios, would therefore be the greatest desideratum for the musical portion of the public library."

"The recataloging of the Library of the University of Pennsylvania" was described by Miss Susan Randall, in charge of that work, in an interesting paper, especially full in its statistical record of the various processes involved. At the close of Miss Randall's paper Miss Mary P. Farr was called upon to tell of her work in the recataloging of the Pennsylvania State Library at Harrisburg. Miss Farr said that the state library was supposed to contain about 100,000 volumes, though no definite record was available. It was required that the reclassification and cataloging of this collection be completed in six weeks. It was carried through in the time allotted, with the aid of a force of about 50 untrained assistants, but she felt that the results were far from being satisfactory. Mr. Bowker, Dr. Richardson, Mr. Montgomery, Mr. Putnam and Mr. Ranck spoke briefly of the completed card catalog as inspected by them at Harrisburg, and agreed that a vote of thanks was due to Miss Farr and her untrained assistants, pointing out that it was now possible to go to the state library and get the book wanted, whereas in the days before this catalog it was impossible to get a book unless the librarian happened to be in the library.

The last paper of the evening was by Miss Bertha Wildman, of Madison, N. J., on "How to reach outlying villages." She told with grace and earnestness of the efforts made by the Madison Public Library to bring books to the use of nearby rural neighborhoods, and of the great pleasure and happiness they had brought to many households. "In the three short months since we started this work," said Miss Wildman, "we already have found many of the people eager to take the books and feel that they too with the Madison people have an equal interest in the circulation of the library. The three districts which we have taken are of widely different characters and in each case before I could make out a list of books which would be suitable to the likes and tastes of the people I found it necessary to make a personal study of the make-up of the places. Our plan is to send out a case of 50 books at a time, making the limit of circulation two months." The three villages to which books are sent were described. One of these is "a small farming community about four miles from the railroad. Here there are almost no young people and very few small boys and girls. As soon as they grow up they drift

away to larger towns and there is no one to take their places. The ones who need the rest and recreation most and whom I have desired to reach are the women. Hardly a treat ever comes in their monotonous lives and they have reached out eagerly for our help. As a rule those who come to get books say that they are too tired when night comes to read anything but fiction so I have sent them stories in abundance. Outside of fiction the histories we sent have been taken out more than anything else."

The second session opened at 11.40 on Saturday morning, the earlier part of the morning having been given to special committee and board meetings and to the organization meeting of the Keystone State Library Association. Dr. Morris Jastrow, jr., president of the Pennsylvania Library Club, presided. Mr. Faxon, secretary of the A. L. A., spoke briefly of the Waukesha conference in July and urged a large attendance. Dr. Jastrow introduced the first paper with some remarks on pamphlets, telling the story of an older librarian who objected to women librarians because they could not swear at pamphlets; although, said the chairman, perhaps he had not in mind the new woman. He alluded to the receipt at the University of Pennsylvania, of a large collection of medical pamphlets, most of which duplicated some already in the library, and suggested an exchange bureau, which should not be a commercial enterprise but maintained under the control of librarians. Miss Charlotte Martins, of Princeton, then read her paper on "Intricacies of binding," in which she brought out points of interest regarding choice of binding material, and dealt especially with the puzzles and perplexities of volumes of foreign periodicals, society transactions, and similar publications. A discussion followed, in which Dr. Richardson spoke of mnemonic devices in binding, and suggested the selection of certain colors for certain subjects. L. E. Hewitt stated the system at the Law Library at the City Hall in Philadelphia. A classification of pamphlets was made, and a box given to each sub-division. Pamphlets as they come in are placed respectively in the appropriate box. Such box is placed next after the last bound volume of its class. As a box gets full its contents are taken out and bound. Several years may elapse before a pamphlet is thus bound. In this way pamphlets on allied subjects will be brought more or less together on the shelves as well as in the catalog.

Mr. Stewart Culin, of the Philadelphia Museum of Science and Art, was called on to read a paper which was recorded on the program as dealing with "Chinese games and museums and public libraries." This, he explained was an error, typographic or chirographic, his subject being "The interdependence of public museums and public libraries." He urged the co-operation of such institutions, in order that resort to one might promote acquaintance with the collections of the other, and a more intelligent and perceptive use.

In place of an address by Dr. G. E. Reed, state librarian of Pennsylvania, who was unavoidably absent, Herbert Putnam, librarian of Congress, gave an interesting account of two recent accessions of valuable manuscripts at the Congressional Library. The first was of material relating to Robert Morris, the patriot and financier of the Revolution. It comprises his diary as superintendent of finance, 1781-'84; his official letter-books covering the same period; also his private letter-books for 1794-'98; and finally two volumes of attested copies of proceedings of Congress during the administration of Robert Morris. The whole forms 16 folio volumes. The material has not hitherto been accessible to historians, though summarily described in a pamphlet issued in 1876 by Mr. Homes, then state librarian of New York. The other acquisition was of a copy of the Columbus Codex, so-called, composed of transcripts of the various documents embodying the royal grants to Columbus and other evidences of his titles and privileges. At least four sets of such transcripts were made in 1502 by order of Columbus. Of these two sets exist, one at Genoa and one at Paris. The present copy was purchased by Edward Everett in Florence in 1818, and was continuously in his library until acquired by the Congressional Library from his son, Dr. William Everett, a few weeks ago. For years it had disappeared from the knowledge of the Everett family, and was only rediscovered in 1898 in a locked cupboard of which the key had been lost. The copy is not yet identified as one of the four made by direct order of Columbus, but from a partial examination appears to be, if not one of these four, contemporaneous or nearly so.

The meeting adjourned at one o'clock, and the afternoon was given up to active or passive enjoyment of sea breezes and the famed "board walk." In the evening the final session was opened at 8 o'clock, T. L. Montgomery presiding. The first paper, by John Ashhurst, of the Free Library of Philadelphia, was entitled "Are we taking ourselves too seriously?", and was a delightful presentation of the arguments in favor of fiction, making some keen thrusts at the over-assumption of pedagogical authority and censorship by librarians. Miss A. C. Moore, of Pratt Institute, was to have spoken on "The children's librarian of the new century," but was absent on account of illness. The subject was therefore passed over, and the rest of the evening, until a late hour was given up to an animated discussion of the question "Can co-operative printed catalog cards be made practical for library use?" which is reported elsewhere.

A number of the delegates returned during Sunday, but the majority remained over until Monday morning, and the special committee on catalog rules continued its sessions until Tuesday. In all respects the meeting proved enjoyable and useful, and set a standard of activity and interest that it will not be easy to equal.

## PRINTED CATALOG CARDS.

PLANS for the issue of printed catalog cards, as developed by the A. L. A. Publishing Board, were considered at the recent Bi-State Library Meeting, at Atlantic City, N. J., when the Publishing Board met in connection with its special committee on catalog rules. The original scheme for the issue of these cards by the Publishing Board, through the machinery and facilities of the Library of Congress, it was found necessary to postpone for the present. This was necessary owing to lack of assured support from libraries. The plan as submitted by the Publishing Board had received subscriptions from only 60 libraries, aggregating but three-quarters of the minimum guarantee required, and as the Library of Congress was not yet fully ready to begin printing and the catalog committee required an extension of time for its work, the Board decided to defer the original plan at least until the close of the current year.

An intermediate plan, however, has been adopted, developing and extending the present system of printed catalog cards on a basis which is believed will be immediately acceptable to a larger number of libraries than could be reached by any scheme hitherto put forth.

It is proposed to extend the present printed catalog card service (which last year furnished approximately 1200 titles to about 40 subscribers) to approximately 2000 titles per year, and to invite subscriptions from each library for one complete set of these cards at the price of \$1 per 100, involving a subscription approximately of \$20 for a complete year. As the extended service should be put in operation by June 1, 1901, it is probable that the subscription for the balance of the current year will be for about 1200 titles, or \$12.

Cards will be printed in one style of full author entry only, so arranged as to leave room for subject or other heading above. It will not be practicable to continue supplying cards in varied weights, sizes, edges and punchings, to individual libraries, and cards will be confined to two styles, one of 32 and one of 33 size, of a medium or heavier card and with standard punching. The cards will be sold only to those subscribing for one complete set, and it is hoped that subscriptions will be promptly received from at least 100 libraries. On receipt of the initial card any library may order as many duplicates as it wishes of any title.

The price of duplicate cards will be one cent each, but if more than four duplicates are required of any card additional duplicates will be furnished at one-half cent per card. Cards will be sent to subscribers promptly as issued, and will cover the publications of leading publishers, and probably all books of importance in certain specialties, as American history. It is believed that the 2000 titles will include the greater number of

American books ordered by most libraries, while at the low price proposed the service should be most useful and economical.

The subject of printed catalog cards was given a place on the general program at the Atlantic City conference, and resulted in a most interesting discussion.

Practical advantages in the use of such cards were presented by Anderson H. Hopkins, of John Crerar Library. These were, briefly: The mere fact that they are printed instead of written increases naturally their legibility, their fullness and their accuracy. Cross references as such may be largely, perhaps even wholly, eliminated from our catalogs, their places being taken by added entries instead. Thus there are no vexatious "sees" and "see alsos." Every time you get a reference you also get, without additional cost, all the information to be obtained anywhere in the catalog.

In college and university libraries, or in any library making use of a departmental plan, any department, or laboratory, can easily and cheaply have a catalog for its own use as full as it chooses to make it and arranged in whatever way it finds best suited to its purpose.

Special lists can easily be made up on demand treating topics which are not kept together in the regular library catalog.

The facility with which temporary lists of any desired kind may be made without any writing whatever is not to be overlooked, and it is to be remembered that the list contains full bibliographical details every time. In all kinds of school work this idea of temporary lists is not to be scorned.

Separate catalogs of special collections contained in the library would be only a slight extension of what has been already said.

Subscription lists of periodicals may be kept and revised from year to year without rewriting.

An order list of books issued in parts, or an order list of incomplete works in the library which it is desired to complete, may be easily obtained.

Each library in a city could have a catalog of all the books in all the libraries in the city.

Each city, county or state could have in a central library a catalog of all the books in all the libraries in the district.

The uses already made of printed cards in the John Crerar Library were given as follows:

(1) Added entries are made in the public catalogs much more freely than cross references would be made if the printed cards were not in use.

(2) An official catalog is kept, consisting of one copy of each card.

(3) A complete copy of the catalog, *i. e.*, one copy of each card, is given to each of six libraries in Chicago and its vicinity.

(4) A duplicate catalog is kept of the bibliographical sections.

(5) The list of books in the reading room, which was issued as a bulletin in 1900, is constantly undergoing changes, and is kept up in the card form so that future editions of the bulletin may be issued with little labor.

(6) A list is kept of serial publications, both current and otherwise, *i.e.*, either suspended or dead.

(7) A list of current serial publications is kept, including both periodicals and books issued in parts or volumes, which for convenience we call "continuations." This, of course makes (6) and (7) overlap, but in practice we find it the convenient way for our use.

(8) Special lists are made up to order on particular subjects for individual readers whenever wanted.

(9) Various other files are kept in the charge of different members of the staff, covering subjects of specific value, as, for the cataloging force, lists of bibliographies, indexes, etc.

J. C. M. Hanson, chief of Catalogue Division of the Library of Congress, said:

"It is not my plan to touch on the distribution of catalog cards from a central bureau, or on the question of co-operation. Some doubt has existed as to the feasibility of using printed cards as readily or easily as the manuscript. I shall therefore attempt to show how the former are made to serve the various requirements of a particular catalog, in this case a full dictionary catalog. To illustrate I wish to present for inspection a number of sample cards with the various forms of added headings.

"It has repeatedly been urged in favor of manuscript cards as against printed that the former allows of more variation in form and extent of entry, providing set forms under each particular type of heading. A library preferring full entry under author alone can omit *ad libitum* under subject, editor, translator or secondary title.

"It seems unnecessary to point out the weakness of such an argument, if we consider for a moment the great advantages resulting from finding under all headings under which a particular book may be entered a full description of it.

"As to the superiority of the printed card in economy of stock and space, in legibility, neatness and lasting qualities there can be no discussion.

"A doubt has been expressed as to the feasibility of using analytical entry with the same ease in printed cards as in manuscript. If an edition is printed of the main title, is it also possible to print independent analyticals? To this I may answer, that experience has taught the necessity of restriction in the printing of the latter. In the main, what is called by catalogers 'plain in-analyticals' are better omitted, such titles being generally brought out in the contents of the main entry, a copy of which in case of printed cards will serve as analytical, the heading

being written at the top and the section of title or contents to which it refers being distinguished by underscoring.

"The 'imprint' analytical, on the other hand, which with distinctive title-page and pagination, constitutes a separate entity, should in the main be printed.

"It goes without saying that this restriction has no bearing on titles in magazines or other serial publications. The only way in which these can be brought out is to print them."

The use of printed catalog cards by Harvard College was described by T. Franklin Currier as follows:

"During the past year we have been filing about half of the titles issued in our public card catalog. They comprise the more general serials and those that supply most closely the needs of our central library. We should be able to analyze but few of these titles if the publication of the printed cards did not offer so cheap a way of doing the work.

"The titles not placed in the main catalog are some of the more technical sort, which the specialist who alone needs them easily finds in his own bibliographies. For many of these also we file author cards for the sake of quick reference to an author's works, omitting the subject entry on account of the expense involved in classifying such technical articles with little return in way of added usefulness to the catalog. All of the titles not placed in the main catalog are filed in separate trays accessible to the public, one set arranged alphabetically by authors and another in broad subject groups, as Mathematics, Oriental philology, America, etc., thus making them of some use to the public at very small expense.

"The estimated cost per title for treating the cards in the way mentioned has been as follows:

Subscription to cards (3 cards per title)	
less than.....	\$.03
Sorting and assigning subject headings.....	.045
Filing and rectifying disagreements with the catalogs.....	.015
Total.....	\$.09

"The expense of buying and handling these cards is therefore about nine cents per title. If we were obliged to catalog these titles ourselves it would cost 15 cents a title merely to prepare the 'copy' for the printer, this figure being the result of an estimate on the work that we send in as one of the five contributors of 'copy' for these same cards.

"One class of serials dealt with brings up some questions which will arise in connection with the cards for current books which it is hoped the A. L. A. will soon issue. I refer to the serials like the 'Johns Hopkins studies' and 'Columbia University studies,' in which each number is a monograph with separate title-page, and is treated by us as a

separate work, the set not being kept together. Here the book may come two weeks or more before the cards, but we do not keep it from circulation until they are received. As soon as it comes into the hands of the catalog department a 'yellow slip' is placed in it, signifying that printed cards will be received for it. On this slip are written the necessary directions for treating the cards when they come, as shelf-mark, subject-headings, etc. The book is now put into circulation, and the yellow slip filed away until the cards come, when they are filled out according to the written directions and are ready for the catalog. As a matter of fact the book meanwhile has not been unrepresented by a catalog card. In common with all our books for which we print cards when the book is ready for circulation, a rough temporary slip that has already served its purpose in the ordering department is filed in a tray accessible to the public and marked 'new books.' When the cards come this slip is removed.

"In using these cards we have, of course, sacrificed some uniformity in the catalog, but the small amount of trouble that arises is noticed chiefly by the library staff, not by the public. Other uses have been made of the cards, as to catalog reprints and cuttings from the serials. We also subscribe for one extra set and distribute it among the departments and professors who desire them, while our ordering department finds them of use in notifying it of the publication of parts of sets which our agents have failed to send."

There were numerous criticisms of and objections to the scheme expressed, mainly on the ground of costliness and delay in receipt of cards, among the speakers being Dr. Morris Jastrow, T. L. Montgomery and Miss Susan Randall; while the plans of the Publishing Board were further outlined by W. I. Fletcher, Herbert Putnam, R. R. Bowker, and others.

#### ADVISORY COMMITTEE ON CATALOGING RULES.

THE Advisory Committee on Cataloging Rules appointed by the A. L. A. Publishing Board met at Atlantic City, March 22-26. The full committee, consisting of seven members, was in attendance. The members are: Mr. J. C. M. Hanson, chairman, Mrs. S. C. Fairchild, Miss Nina E. Browne, Mr. C. A. Cutter, Mr. T. Franklin Currier, Mr. Anderson H. Hopkins, Miss Alice B. Kroeger. The committee was appointed by the Publishing Board to recommend the best typography and form for printed cards, and to suggest changes in the existing A. L. A. Rules for the purposes of co-operative cataloging. All the recommendations of the committee will be submitted to the Publishing Board and be referred by them to the A. L. A. Council for final approval.

The first points considered were those relating to typography and form of cards. This was done with the Library of Congress

plan for printed cards in view. It was decided under this plan to recommend the use of 12-point heavy face for heading, ordinary 12-point for title, and 8-point for collation, notes and contents, provided this can be used for the 32 card as well. The series note will follow collation, and both are to be printed on a separate line immediately after the date. A strong recommendation made by Mr. Hopkins to place contents immediately after title, preceding all other notes as well as collation was discussed, but was not approved by the other members, as being too radical a departure from common usage.

In the consideration of the rules, it was voted to act upon the basis that the plan be carried out for the large library of scholarly character, since the small libraries would only gain by full entries, while the large libraries must lose if bibliographical fulness is not given. Small libraries are quite generally granting access to shelves, and it is no longer essential that the card catalog be made simple.

The A. L. A. Rules as given in Cutter's Rules, p. 99-103, were taken as a basis for the discussion. The general opinion of the committee regarding fulness of author's name in the heading was to the effect that for a large library full names were essential in order to distinguish one author from another; but that in case of authors other than English the unused forenames were not so generally needed. Also in English, when an author used only a certain forename it was suggested that this be used and other forenames to be added introduced by *i. e.* (*e. g.*, Harte, Bret, *i. e.*, Francis Bret) or placed in parentheses. The rule in regard to pseudonyms was changed to read: "A pseudonym is to be used instead of the surname when an author habitually uses the pseudonym or is generally known by it. Put both names in the heading. In case of doubt use the real name." As a general thing, the committee agreed in entering books where the average person using a library is apt to look, not to put books under forms of name seldom or never used by the author. Therefore such decisions as: Married women and other persons who have changed their names go under the best known form; Noblemen under their titles, etc.

The subject of corporate entry occupied much of the attention of the committee with the result of bringing the rules into more definite form. The recommendations of the committee, subject to the approval of the A. L. A., will be incorporated in the forthcoming new edition of Cutter's "Rules for a dictionary catalog," and are too lengthy for insertion here.

Size measurement was one of the few points upon which the committee could not come to an agreement. The methods urged were: (a) on the use of the present A. L. A. letter symbol, (b) on the use of the fold symbol to indicate approximate size according to A. L. A. measurements, (c) the exact size in

centimeters. After a thorough discussion of each of the three measurements, it was decided to submit minority reports stating arguments for each method of indicating size of books.

The committee decided to recommend that the practice of giving dates of birth and death of authors be used extensively. Much of the search for authors' names and dates has already been done by various libraries and it was the sentiment of the committee that many of these libraries would co-operate with the Central Bureau and much unnecessary investigation be spared.

While the committee at this meeting decided to recommend changes of many of the disputed points in cataloging, there are still several rules left for further consideration. The idea of the committee has been to revise the A. L. A. Rules so as to incorporate such changes as are likely to have become generally adopted during the past 25 years. The committee decided also to recommend to the Board that a column be set aside in the LIBRARY JOURNAL for settling disputed points; *i. e.*, give definite authoritative statements from the Central Bureau upon the cataloging or classifying of specific books.

The committee has been impressed with the practical agreement of its members upon cataloging rules, upon the willingness to yield on unessential points, and upon the idea that the catalog should be made for the users, not for the cataloger. It is assured that the new edition of Cutter's Rules will agree in all essential details with the changes and recommendations which it is hoped will be adopted for the A. L. A. Rules. It is also understood that a new edition of the Library School Rules is contemplated. If the latter will also in its alterations include as far as practicable the changes that may be made in the A. L. A. Rules, a large step will have been taken towards the much to be desired uniformity in cataloging rules and practice.

ALICE B. KROEGER, *Sec'y Committee.*

#### PLANS OF AMERICAN PUBLISHERS' ASSOCIATION.

THE American Publishers' Association, organized in 1900, has adopted a new system of discounts for all copyrighted books issued after May 1, 1901, which is of interest to librarians in its bearing upon library purchases. This provides for the publication of books at net prices, reduced from prices heretofore prevailing, and the maintenance of the specified retail price, whether sales are made through publishers or dealers. A general discount of 25 per cent. is recommended for dealers exclusively, with provision that libraries "may be allowed a discount of not more than 10 per cent." It is specified that books included in this plan shall be held at net prices for a year after publication.

#### American Library Association.

*President:* H. J. Carr, Public Library, Scranton, Pa.

*Secretary:* F. W. Faxon, 108 Glenway st., Dorchester, Mass.

*Treasurer:* G. M. Jones, Public Library, Salem, Mass.

*23d General Meeting:* Waukesha, Wis., July, 1901.

##### WAUKESHA CONFERENCE.

OUTLINE PROGRAM, JULY 3-16, 1901.

*Wednesday, July 3. Arrival date.*

*Evening (8.30-10).*—Introductory session: Address of welcome and response.

*Thursday, July 4.*

*Morning (9-12).*—Meeting of A. L. A. Council; 12.30, Council's annual breakfast.

*Afternoon (2.30-6).*—Reunions of library associations (state, sectional and local).

*Evening (8-10).*—General session. President's address. Papers: What may be done for libraries. 1, By the city; 2, By the state; 3, By the nation.

*Friday, July 5.*

*Morning (10-12).*—General session. Reports of officers, committees, etc.; Miscellaneous business.

*Afternoon (2-5.30).*—Simultaneous meetings: State Librarians' Association, 1st session; Children's Librarian's Section, 1st session.

*Evening (8-10.30).*—Simultaneous meetings: State Librarians' Association, 2d session; Reunions of library school alumni associations.

*Saturday, July 6.*

*Morning (10-12.30).*—General session. Reports; Miscellaneous business; Special papers, etc.

*Afternoon (2-5.30).*—Simultaneous meetings: Trustees' Section; College and Reference Section; Children's Librarians' Section, 2d session.

*Evening (7.30-8.30).*—Committee meetings: 8.30, Program in charge of Committee on Entertainment.

*Sunday, July 7.* No sessions.\*

*Monday, July 8. Madison day.†*

*Morning.*—Early breakfast and start for Madison (2½ hours).

*Afternoon.*—At Madison. Papers: The public library from the readers' point of view; European and American library characteristics.

*Evening.*—At Waukesha. Informal social evening.

\* Milwaukee is one hour by electric cars from Waukesha, and those in attendance will find much of interest there, especially at the new public library building. This is open daily, but on Sundays from 2-5 p.m. only.

† Madison.—Those desiring to have more than one day in Madison may desire to go there Saturday night and stay over till Monday, returning with the party to Waukesha.

*Tuesday, July 9.*

*Morning (10-12.30).—*General session. Papers: Book copyright; Book importation; Trusteeship of literature; Relationship of publishers, booksellers and libraries.

*Afternoon (2-5.30).—*Simultaneous meetings: Catalog Section; Round Table on the work of state library commissions, including travelling libraries.

*Evening (7.30-10).—*Simultaneous meetings: Council session; Elementary Institute.

*Wednesday, July 10.*

*Morning (10-12.30).—*Round Tables: *a.* The work of state library associations and women's clubs in advancing library interests; *b.* Professional instruction in bibliography.

*Afternoon (2-5.30).—*General session. Election; Reports; Resolutions; Unfinished business.

*Evening.—*Leave Waukesha for: *a.* Visits of library inspection at various points in the state and elsewhere; *b.* To Library Department of the N. E. A. at Detroit, meeting 3 p.m., July 11 and 12; *c.* To Buffalo and Pan-American Exposition and return.

Final adjournment at Waukesha, Tuesday, July 16.

While it is unlikely that this year's conference, being in the middle West will attract as many librarians as did the Montreal meeting of 1900, it is believed that the total attendance will approximate 400. The general character of the program arranged differs from those of previous years, which have usually been mainly devoted to the presentation of technical papers, many of them of an elementary character. This year the general (or public) sessions will be given almost wholly to a broad treatment of library problems—the literary side of the profession being emphasized, while technical matters are relegated to the sectional meetings and "round tables."

The headquarters and meeting place of the association will be the Fountain Spring House, which makes a special rate of \$2.50 or \$2.25 per day, according to whether one or two persons occupy a room.

*Post-conference.* Owing to great distances between points of attraction, a post-conference trip in Wisconsin appeared to be inadvisable. Members from the East will come to Waukesha, all rail, via the New York Central, Michigan Central, and Illinois Central. Returning, they have the option of going either all rail, or by boat to Detroit or Buffalo—if by boat, of course, at extra cost. This will enable those going either by rail or boat, to attend, if desired, both the N. E. A. meeting at Detroit and the great exposition at Buffalo.

#### COMMITTEE APPOINTMENTS.

*Catalog Section:* Miss Agnes Van Valkenburgh, secretary, succeeding J. C. M. Han-

son. Anderson Hopkins, John Crerar Library, is chairman of the section.

*Library training committee:* J. C. Dana, Miss E. G. Browning, Miss E. C. Doren, W. H. Brett, Dr. E. C. Richardson.

#### HANDBOOK, 1901.

A revised edition of the A. L. A. handbook has been prepared under the direction of the secretary, and is now ready for distribution. It gives full record of membership, officers, committees, etc., and lists of library associations, state and local, commissions, schools, and other library agencies. The membership of the A. L. A. is now recorded as 1030. A copy will be sent to each member of the association, and copies may also be had on application to F. W. Faxon, 108 Glenway st., Dorchester, Mass.

### State Library Commissions.

INDIANA STATE LIBRARY COMMISSION: W. E. Henry, secretary, State Library, Indianapolis.

The state legislature has passed an amendment to the library commission bill of February, 1899, by which the commission is granted \$1000 as previously, for clerical and travelling expenses. This is in addition to the sum allowed in the general state library appropriation for "organization and purchase of books for travelling libraries." Miss Merica Hoagland, of Fort Wayne, has been appointed library organizer for the commission. Miss Hoagland was for several years a trustee of the Fort Wayne Public Library, and for the past three years has been engaged in the work of library organization in the state.

MASSACHUSETTS FREE PUBLIC LIBRARY COMMISSION: C. B. Tillinghast, chairman, State Library, Boston.

The 11th annual report of the Massachusetts library commission, just issued, records the fact that there are now but four towns in the state that are without free public libraries. These are in Gayhead, Lakeville, New Marlborough, and Norwell. Their combined population is under 4000, or less than one-seventh of one per cent. of the entire population of the state, and in two of them there are maintained association libraries. [Since the date of this report two of these towns have joined the free library ranks, leaving only Lakeville and Norwell, one of which possesses an association library.] During the year free libraries were established in Hadley and Dracut, and the Nantucket Athenæum was made a free library.

The legislature of 1900 passed a law authorizing the state library commissioners to purchase books to the value of \$100 for the free public libraries of towns whose valuation does not exceed \$600,000, provided that the town properly maintain its library and that the books be distributed by branch libraries or deliveries in parts of the town where such

distribution is needed, and be rendered useful to the teachers and scholars of the public schools. The aid thus authorized will be extended in order of application to towns where it is most needed, and 89 are listed as entitled to the benefit of the act.

The usual classed lists of the libraries of the state are given, with record of gifts and other library news. The commissioners acknowledge valuable aid received in their work from the Women's Education Association, of Boston, which had 35 travelling libraries in operation in 1900, with a circulation double that of the year before. The Library Art Club now has a membership of 88, of which 63 are Massachusetts libraries, and possesses 34 pictorial collections. "Its exhibits have not only given pleasure and instruction to thousands, especially in our country towns, but have induced many to visit and use the free libraries who had never before done so. They have visibly elevated the standard of reading in many a community, and have ministered to refinement and taste."

**MINNESOTA PUBLIC LIBRARY COMMISSION:**  
Miss Gratia Countryman, secretary, Public Library, Minneapolis.

The first biennial report of the commission has been published, covering the work accomplished in 1900, the first year of the commission's existence. The main facts given were previously summarized in these columns at the time of the presentation of the report (L. J., Oct., 1900, p. 640). The work of the commission appears to have been careful and effective, and greatly appreciated by the public reached. The report contains useful data regarding the libraries of the state, with statistics, the text of the state law, and a report on the summer library school conducted in 1899.

**NEBRASKA PUBLIC LIBRARY COMMISSION.** The bill establishing a state library commission, which has been pending for some time in the Nebraska legislature, became a law on March 27. It is drawn upon the usual lines and provides for a commission of five, consisting of one person appointed by the governor for a term of five years, the state librarian, the Superintendent of Public Instruction, the chancellor, and the librarian of the University of Nebraska. A secretary is authorized, who may be elected from outside the membership of the commission, who shall receive a salary and travelling expenses. A travelling library system is to be maintained, and offices for the commission shall be provided at the state university or the state library. An appropriation of \$4000 is made for purchase, equipment, and administration.

**NEW HAMPSHIRE LIBRARY COMMISSION:** A. H. Chase, secretary, State Library, Concord.

The fifth biennial report of the New Hampshire Board of Library Commissioners is

just issued, for the two years ending December 1, 1900. There are now 141 towns in which libraries are maintained under the state library law, 65 towns in which libraries have been established without state aid, 15 towns not having yet taken advantage of the law except to accumulate a library fund, and 12 towns without a free library and voting "inexpedient to establish." The publication of a quarterly bulletin by the commission, begun in 1900, has proved encouraging in many ways, and it will be continued, as a medium for general notes and information, the official report being henceforth limited to matters requiring legislative attention.

Several recommendations are made for developing the library activities of the state. The establishment of a system of travelling libraries is urged; and the legislature is asked to aid the state library association by passing an act authorizing payment by the state of the expense of holding four meetings a year (estimated at not over \$500), these meetings to be held in different sections and one prominent library worker outside the state to be obtained as speaker at each meeting.

The usual statistical tables have been omitted, and their place is taken by a complete alphabetic list of the libraries of the state, with information as to librarian and date of establishment. The report is compact, workmanlike and interesting.

**NEW YORK: PUBLIC LIBRARIES DIVISION,**  
Melvil Dewey, director, State Library, Albany.

The annual report of the Public Libraries Division for the year ending Sept. 30, 1899, is just issued as Bulletin 33 of the Home Education Department, University of the State of New York. It is unfortunate that this report should be so belated, but like its predecessors it is of permanent value as a record of state activity in library development. At the close of the year covered there were 155 libraries reported for the state under university inspection, located in 51 different counties, and containing 534,149 volumes, with a circulation of 2,072,689. 79 libraries are recorded as registered by the university but not included in university institutions; these contain 937,429 v. The whole number of libraries reporting is 985, of which 580 were supported wholly or in part by local taxation, and 431 were free lending libraries. "The total free circulation in the state was 7,395,527, an average of 20,262 or for the year 1135 for each 1000 of population and 373 for each 100 volumes in these libraries. In six years the free circulation or home use of books has been multiplied more than three times, and average use of books provided has increased 37%." Several of the graphic charts demonstrating library development, prepared for the A. L. A. Paris exhibit, are reproduced, and the report contains elaborate statistics on the

growth, character, and use of New York libraries. Library legislation throughout the Union is also summarized, activities of state commissions are tabulated, and there are reports of the New York and national library association meetings. The work of the Public Libraries Division in travelling libraries is constantly developing, and advance has been made in formulating plans for aiding blind readers. Library facilities for farmers are also touched upon, with a suggestion for sending "house libraries" to individual homes on the travelling library principle. As a further development, it is stated that "a large wagon holding 100 or more of these house libraries could be so arranged that a skilful man could drive from house to house, exchange books, spend an hour perhaps with the people in getting a better idea of their interests and of what books would best meet their present wants."

**WASHINGTON STATE LIBRARY COMMISSION:** The Washington State Legislature has recently passed a bill establishing a state library commission. It is modelled upon the usual lines, providing for a body of six persons, *i. e.*, the Superintendent of Public Instruction, president of the state university, president of the Eastern Washington Agricultural College, a member appointed by the state federation of women's clubs, and two members, one of whom must be a woman, to be appointed by the governor. Provision is made for a travelling library system to be maintained by the state under control of the commission.

---

### State Library Associations.

---

#### CONNECTICUT LIBRARY ASSOCIATION.

*President:* H. W. Whitney, Blackstone Memorial Library, Branford.

*Secretary:* Miss Anna Hadley, Ansonia Library, Ansonia.

*Treasurer:* Miss Jennie P. Peck, Silas Bronson Library, Waterbury.

The spring meeting of the association will be held at the Blackstone Library, Branford, on May 21.

#### DISTRICT OF COLUMBIA LIBRARY ASSOCIATION.

*President:* F. A. Crandall, Office of Documents.

*Secretary:* Hugh Williams, Library of Congress.

*Treasurer:* F. E. Woodward, 11th and F sts., N. W.

The fifty-fourth regular meeting of the Library Association of Washington City was held at the Columbian University, Wednesday evening, March 13, 1901, at 8 o'clock.

The first business of the evening was the consideration of the amendment to the constitution, to change the name of the associa-

tion from the Library Association of Washington City to the District of Columbia Library Association. This amendment was adopted.

It was voted that a joint meeting with the New York State Library School be held in April. The arrangements for the meeting were left in the charge of the program committee. As the association will adjourn for the summer in May it was decided that the May meeting be made a social meeting.

The executive committee reported the election to membership of Miss Madeleine B. De Wolfe, Miss Ada Gertrude Chapple, Prof. Roland P. Falkner, and Mr. Charles Harper Walsh, all of the Library of Congress.

The regular program of the evening consisted of the reading of a paper on "State and local bibliography," by Earl G. Swem and the opening of a discussion on "Subject catalogs versus bibliographies," by Mr. W. S. Burns.

Mr. Swem presented the condition of the state bibliography of 20 years ago with that of the present time. The most notable state bibliographies were mentioned. The suggestion was offered that an attempt should be made by those states which have been organized from the original Louisiana Territory, to compile bibliographies or partial bibliographies for the St. Louis Exposition. The paper closed with a statement of the value of state bibliographical work to future national bibliography.

Mr. Burns presented the arguments impartially for and against subject catalogs as opposed to bibliographies, but owing to the lateness of the hour the general discussion did not take place. Mr. Burns was requested to re-open the discussion at a future meeting of the association.

The meeting adjourned at 10 o'clock. There were 60 members present.

HUGH WILLIAMS, *Secretary.*

#### KEYSTONE STATE LIBRARY ASSOCIATION.

*President:* Dr. G. E. Reed, State Library, Harrisburg.

*Secretary-Treasurer:* John Thomson, Free Library, Philadelphia.

In order to meet the needs of persons interested or working in libraries in so large a state as Pennsylvania, it has long been felt that some other arrangement than that now existing ought to be tried. There are two library clubs, one known as the Western Pennsylvania Library Club and the other as the Pennsylvania Library Club, but neither of these were able to do much more than meet the necessities of persons living at Pittsburgh or Philadelphia and their neighborhoods. Correspondence was entered into with various persons in different parts of the state and it was finally decided to hold a conference on the subject at the recent bi-state meeting held at Atlantic City. A large number of Pennsylvania members gathered together and it

was unanimously decided to form a new society entitled the "Keystone State Library Association."

A circular was issued, setting forth these facts, and stating that meetings would be held at least once each year "at some place to be agreed upon, which would be fairly accessible to the majority of the members. It is proposed to hold this annual meeting in October and if a majority of the members shall assent to the suggestion, the first meeting will be held at Harrisburg.

"In order to meet the expenses of postage and stationery, it will be necessary to have a small annual due and this has been fixed at a sum of 50 cents payable on joining the association and afterwards annually on November 1st. The executive committee believe that such an association, when fully established, cannot fail to be of great service in promoting important questions of state library legislation and other like matters upon which it is most desirable to be able to collect the opinions and use the influence of a large number of persons interested in our profession."

The society was organized and it was decided that the president, vice-president and secretary-treasurer with two persons to be nominated by them should be an executive committee and that an annual meeting in October should be held at some place to be agreed upon by that committee. The following officers were appointed:

President, Dr. George Edward Reed, State Librarian, Harrisburg; vice-president, Miss Hannah P. James, Wilkes-Barre; secretary-treasurer, John Thomson, Free Library of Philadelphia.

#### WISCONSIN STATE LIBRARY ASSOCIATION.

*President:* Dr. H. H. Hurd, Chippewa Falls.

*Secretary:* Miss B. M. Brown, Public Library, Eau Claire.

*Treasurer:* Miss Tryphena Mitchell, Vaughn Library, Ashland.

The 11th annual conference of the Wisconsin Library Association, Feb. 21-22, 1901, was held in the library rooms of the Eau Claire Public Library.

The meeting on the evening of the 21st was an informal one, giving an opportunity for the visiting librarians and the townspeople to meet and visit. The library staff was assisted by the members of the Women's Club, and a very interesting evening was spent.

The first session of the meeting was held on the morning of Feb. 22. The report of the secretary was read and approved, and the president, Dr. Hurd, appointed a nominating committee, consisting of Miss Stearns, Miss Elliott, Miss Early and Mrs. Evans.

Miss Julia E. Elliott, of Marinette, read a paper on "School and the library." She said in part: The work of correlating library and

school must be truly one of co-operation. The librarian in spirit must become a teacher in the truest sense of the term, and the teacher a librarian, as we wish the word to be understood. It is not a difficult matter to interest children in books; their small minds are alert and eager for knowledge, for something new, and a mere suggestion will bring them in large numbers to the public library. It is a more complex problem how we shall be certain each child receives, not only a book, but *the* book that is adapted to his comprehension, that is going to be a factor in his mental development, and that is to enrich his heart as well as his mind"

A discussion followed, in which many teachers took part.

The next paper was read by Miss Kelsey, of Menominee. Her subject was "Bulletins in our library." She spoke of the interest and appreciation manifested by the library patrons, gave many interesting and helpful facts about the make-up of bulletins, and spoke of the bulletin as a means of leading children to read history, biography and good stories.

Miss Stearns, of the state library commission, was the next speaker. In her talk, "Some mistakes in starting a library," she stated that there is no more fatal idea than that a library can be run on the power generated from the warmth of enthusiasm. The available assets of its promoters should be something more than great expectations. Paradoxical or contradictory, as it may seem, the form of library that is most likely to live is the free library. The subscription library in this day of the free church and the free school is against the spirit of the age. No free library, organized under the state law, has ever failed. The importance of a wise board of trustees was emphasized. It was a mistake, Miss Stearns believed, to have library boards composed wholly of women. Women, as a rule, have more time, or take more, for the details of library administration, but men are needed to go before councils for appropriations, etc.

In the matter of librarian, the speaker, after naming other qualifications, insisted that one should be chosen that had the "library spirit," which is, in a word, a love of service for others.

The necessity of cheerful rooms, home-like and attractive, was dwelt upon. In the matter of books, experience has proved that it is a serious mistake to depend upon donations in which "Robinson Crusoe" or "Don Quixote" are often the most recently written of the collection. Fresh books, attractive, and a delight to the eye exteriorly, and a joy and refreshment interiorly, are what is needed. A library started on an assured income, in suitable quarters, with wholesome books, in charge of an efficient librarian and interested board of trustees, will prove a veritable source of public happiness and inspiration to any community.

Miss Marvin, of the library commission, then gave a most interesting talk on "The up-to-date librarian." She said that the up-to-date librarian must have, beside her knowledge of books, and her technical training, a business training; she must be, first of all, a practical business woman. For the up-to-date librarian is a woman. She must have tact and must adjust herself to her community, accepting the conditions and making the best of them. She must be a good house-keeper, keeping the books in order, and mended, and the rooms clean and attractive. An up-to-date building has a study-room, a conversation room, and a children's room, with open shelves. The up-to-date library has an annotated catalog.

Miss Bess Kennedy, of Neillsville, read a paper on the Wisconsin summer school of library science. She told what the summer school meant to the librarian, who had had no opportunity to observe library management, and who knew little of library economy. The great value of the summer course to Wisconsin libraries was felt by all present.

The afternoon session was opened by the address of the president, Dr. H. H. Hurd. He spoke on "The relation of the trustee to the library." He felt that the first thing necessary was to choose the librarian, a person of intelligence and business ability. That the librarian must feel that the trustee, at all times, appreciated her wants, and those of her public, the library patrons; but that, before he could agree with the demand, he must feel the pulse of his public, the taxpayers. He summed up the whole matter thus:

First—Make the management of the business of the library business-like. Second—Secure a devoted librarian, commit the executive work of the library to her and await results, secure in your trust that she will do it better than you can. And when the demands and interests of the library reach out for the unattainable, she will submit with what grace she can.

R. G. Thwaites, of Madison, gave an address on the American Library Association. He spoke of the value of its meetings to librarian and assistant, and urged all Wisconsin librarians to attend the Waukesha meeting.

Mr. F. A. Hutchins, of the state library commission, then spoke on the "Extension of public library privileges to rural communities." This was felt by all present to be the keynote of the meeting. That the public library must extend its privileges to farmers is a thought that is growing among librarians.

Mr. Newman, of Chippewa Falls, offered a motion that a committee be appointed by the president to see what could be done to enable the rural route postmen to carry books. The motion was carried. Mr. Newman was appointed chairman, the other members to be given later.

Mr. Hutchins offered the following motion:

"That a committee of five be appointed, to include present president and secretary, to further the project of opening public libraries to county people." The motion was carried, and the following committee was appointed: Mr. Witter, Grand Rapids; Mrs. Edwin Porter, Estella; Miss Julia Elliott, Marinette; Miss Bertha M. Brown, Eau Claire; Dr. H. H. Hurd, Chippewa Falls.

Miss Stella Lucas, of Menominee, spoke on the work of the Dunn county travelling libraries; Mr. Kimball, of California, described the library facilities of his state; Mrs. M. S. Frawley, of Eau Claire, gave an account of the travelling libraries of the Eau Claire Women's Club; and Mrs. Edward Porter, of Estella, spoke of the travelling libraries of Chippewa County.

The former officers were re-elected, as follows: President, Dr. H. H. Hurd, Chippewa Falls; vice-president, Mrs. J. S. Anderson, Manitowoc; secretary, Miss Bertha M. Brown, Eau Claire; treasurer, Miss Tryphena G. Mitchell, Ashland.

An interesting factor of the afternoon session was a five-minute report from the librarians present. Miss Clara F. Baldwin, of the Minnesota commission, was present, and gave a brief account of the year's work in her state.

There was an interesting exhibit of the Educational Book Company, and Mr. Kimball, the representative, was on hand all day to explain and show the books.

BERTHA MOWER BROWN, *Secretary.*

---

## Library Clubs.

---

### *LIBRARY CLUB OF BUFFALO.*

*President:* H. L. Elmendorf, Public Library.

*Secretary-Treasurer:* Miss Ella M. Edwards, Buffalo Historical Society.

The Library Club of Buffalo met on Thursday evening, March 21, in the rooms of the Buffalo Historical Society. In the absence of president and vice-president, the meeting was called to order by the secretary, and the Rev. C. J. Sloan, of the College of the Holy Angels, was requested to preside.

The Rev. Burris A. Jenkins, pastor of the Richmond Avenue Church of Christ, favored the club with a delightful paper, entitled "Some things about fiction." Of fiction in general he said: "The fictitious life is, after all, the truest picture of real life that most of us ever get. We have come to understand that fiction may be truer than fact; that indeed there is a well-defined difference between truth and fact. Good fiction is truth put in such form as to be palatable." Of the utility of the historical novel "I venture the assertion that in our country at least three-fourths of the historical knowledge possessed by the rank and file is due to the reading of

fiction. What most of our people know of Scotch and English history is due to Scott and Bulwer-Lytton, and Jane Porter and Thackeray and Kingsley and the like. What they know of French history is due, not to Guizot, but to Dumas and Hugo. What they know of ancient and oriental history is due to 'Hy-patia,' 'Last days of Pompeii,' 'Quo vadis,' 'Ben-Hur,' and such." But, after all, "the greatest value of fiction in general is its message regarding human life and character. The greatest Teacher of the world talked more about life than He did about anything else. And any one who lifts us up to larger views of life, who gives us a wider outlook at humanity and a surer knowledge of what is in the human heart is a public benefactor. This the novelists, of one sort and another, all try to do. The great novelists are instructors for us in the study of humanity." The only way to study a foreign nation is through its fiction." As Mark Twain says, "There is only one expert who is qualified to examine the souls and life of a people and make a valuable report—the native novelist." Of realism: "After all there must be some exaggeration, even in realism, else the impression is too fleeting"; but "photography can never take the place of idealism in the decorative arts. No more can absolute, unexaggerated realism take the place of soul and idealism in works made with words." Speaking of style, the jerky elliptical style so much in vogue was condemned. "The yearning that we all feel for flowing English is clearly shown, I think, in the wide reading that Mr. James Lane Allen has obtained. The story in his 'Gospel of hemp,' as the *Critic* termed his 'Reign of law,' is nothing, and yet it is more widely read in England than any other American novel of the year. It is the prose that hath done this, and not the novel. The style accomplished it in spite of the story."

ELLA M. EDWARDS, *Secretary*.

#### LONG ISLAND LIBRARY CLUB.

*President:* Miss M. W. Plummer, Pratt Institute Free Library, Brooklyn.

*Secretary:* Miss J. B. Anthony, Packer Collegiate Institute, Brooklyn.

*Treasurer:* Miss Mabel Farr, Adelphi College, Brooklyn.

The April meeting of the Long Island Library Club was held at the Children's Museum of the Brooklyn Institute of Arts and Sciences, 185 Brooklyn Avenue, on April 4, 1901, at 3.30 p.m., Miss M. W. Plummer, the vice-president, occupying the chair.

Despite the inclemency of the weather, between 50 and 60 were present.

It was voted to dispense with the reading of the minutes of the meetings whenever same have been previously published in the LIBRARY JOURNAL.

The committee on co-operation between

libraries and that on co-operation between libraries and schools, reported progress.

It was voted to amend paragraph I. of section VI. of the constitution to read as follows:

"There shall be regular meetings of the club on the first Thursday of each October, December, February, April and May, at such time and place as the executive committee may appoint; the date for any given meeting to be subject to change, if, in the judgment of the executive committee, it should be thought desirable. The regular meeting in April shall be the annual meeting."

Two new members were admitted to the club.

An invitation from the New York State Library Association to join the association as an affiliated club was read. The matter was laid on the table until the next meeting.

The treasurer's report showed a balance in the treasury of \$16.14.

The voting for officers for the coming year resulted in the following elections: president, Miss M. W. Plummer, librarian and director, Pratt Institute Free Library; vice-president, Mr. C. A. Green, librarian, Spicer Memorial Library, Polytechnic Institute; secretary, Miss Julia B. Anthony, librarian, Packer Collegiate Institute; treasurer, Miss Mabel Farr, librarian, Adelphi College.

The following proved to be an unusually interesting program:

The library from the reader's standpoint, Mrs. Harriet T. Comstock; The information desk in a library, Miss Winifred L. Taylor, Pratt Institute Free Library; The public and library methods, Miss Frances B. Hawley, *Publishers' Weekly* Office; Efforts toward guiding the light reading of high school pupils, Miss Romiett Stevens, instructor in English, Pratt Institute High School.

Mrs. Comstock, while giving full credit to libraries in Greater New York and elsewhere for benefits received, in a spirit of friendly criticism made a strong plea for a minimum of "red tape" in procuring books. She thought that libraries should pay such salaries to their reference librarians as would warrant the best possible service in the reference room. She emphasized the need of unfailing courtesy and interest on the part of attendants, added to their knowledge of books. She felt that a cheerful, helpful disposition went far toward making the library a real benefit in the community. She also suggested the betterment of libraries already in existence as a preferable policy to the establishment of countless new ones. The school-room atmosphere of supervision should be done away with as far as possible. She felt that simple uniform methods in all libraries would dispel much of the confusion that exists in the minds of the public as to how to obtain desired information.

The papers by Miss Taylor and Miss Stevens are given elsewhere in this issue.

SUSAN A. HUTCHINSON, *Secretary*.

## NEW YORK LIBRARY CLUB.

*President:* Wilberforce Eames, New York Public Library.

*Secretary, pro tem.:* Miss Elizabeth L. Foote, New York Public Library.

*Treasurer:* Miss Theresa Hitchler, Brooklyn Public Library.

A meeting of the New York Library Club was held on the afternoon of Thursday, March 14, at the Foreign Missions assembly room, in the Presbyterian building, 156 Fifth avenue. About 80 persons were present.

President Eames called the meeting to order at 4.15 p.m., and C. Alex. Nelson reported on the progress of the club handbook, now in preparation. He asked that the committee be authorized to expend a sum not exceeding \$300 in the publication of the handbook, and a motion to that effect was put and carried.

The afternoon program was opened with a paper on "The public and library methods," by Miss Frances B. Hawley, of *The Publishers' Weekly* office. This was a presentation of the public's case against the librarian, as regards minor regulations and practices that are often grievances to the borrower. The requirement of guarantors, suspension as a penalty for losing library cards or neglecting a pending fine, the fact that more than two books cannot usually be taken out at once, limitation of renewal privileges, and the discomfort and lack of privacy in the ordinary library reading room, were among the points of complaint noted; while special emphasis was laid on the need of improvement in the quality of general delivery-desk service, and the desirability of simplicity in catalogs that are intended for public use.

Professor Harry Thurston Peck, of Columbia University, editor of *The Bookman*, followed with an address, for which he gave as his text "The books of the last few years." The most remarkable feature in this connection was the extraordinary sales of popular books. In a single year we had seen half a dozen books circulate up to 400,000 copies apiece. Yet it was a curious fact that these books left no impress upon the popular life; they were read to-day and forgotten to-morrow. In the past when a book reached a circulation approaching such figures as these it was because it made its impress upon the public. "Uncle Tom's cabin" was instanced as such a book, and, in later days, Bellamy's "Looking backward." As reasons for this characteristic of modern literature were noted the great expansion of the reading public, due both to the spread of education and the cheapness of book production. There were two points of view from which these conditions might be viewed—the pessimistic and the optimistic. From the former standpoint one must feel that literary tastes are in a fair way of being vulgarized forever. From the latter one takes courage in believing that the public, like the individual, is attracted first by poor and cheap things, but, having

the power of self-growth, the mind must naturally expand and reach to higher aims in literature as in all else. The speaker inclined to the latter view, and noted, among other encouraging signs, the fact that while the books most widely read last year were not the best, other good books did receive wide recognition. One can never expect the best to be most popular, but there is satisfaction in the fact that such books as Morley's "Cromwell," Hewlett's "Richard Yea-and-Nay," Rosebery's "Napoleon," and Phillips' "Herod" should be welcomed with so wide an appreciation, and that there should be a growing desire for reprints of standard literature. Another encouraging sign is the growth of reading clubs and demand for reading lists. The people recognize existence of standards and want advice. Mr. Peck then spoke of the sources to which the public turned for advice in reading. Here the newspapers came first, and that meant generally that effective advertisements were the greatest factors in popularizing a book. We may tell people to go to the critics for advice, rather than to advertisements, but at the present day we have no critics worthy of the name. A critic should have courage of his convictions, knowledge of literature, sanity and sobriety of judgment and clarity and vigor of style.

Our book reviewers are not critics; they have neither courage nor convictions, nor any of the other qualifications. But the new reading public wouldn't understand the critics if there were a multitude. They turn naturally to the librarian.

Here Prof. Peck struck the keynote of his address. The influence and power of the librarian increases every year. Librarians ought to be fitted above all to be helpful and wise advisers in literature, and their influence ought to make for better reading. As yet this had not been the case, and the speaker referred to the list of "50 best books" of a year or two ago, chosen by the votes of librarians, in which "Who's who in America" was given a rank above Browning and Stevenson. He closed with an appeal to librarians in behalf of lovers of books, urging them to remember how much may be accomplished by taking heed that a library be an educational institution, especially for those who need help they can get from no other source. They may thus help the whole nation's future by establishing a high standard, and the optimistic standpoint will be justified.

"What books should be classed as sociology in a public library?" was the subject of a short talk by Professor Franklin H. Giddings. This was mainly a plea for full cataloging record of books in the broad and complex field of social science, urging the necessity of ample cross references and guides. It is in this branch of study that such a need is most keenly felt, on account of the very varied and specialized subjects that are included in the term sociology. He suggested as a first stage in the classification

of sociological material the grouping of all general treatises and comprehensive studies; population statistics should come next; then studies of thought, or feelings in which two or more human beings are set together and which deal with "the social mind," as distinguished from psychology; next literature dealing with the collective organized activity of human minds, *i.e.*, social organizations, including public order, internal administration, material welfare and conditions, and distribution of wealth. The order suggested is, thus, as follows: General works, population, social mind, social organization, and social welfare. A difficulty to be considered is the fact that the work of many sociological students is historical as well as descriptive, and it is almost impossible to draw a line of demarcation between the sociologist and the historian; but it was pointed out that while the historian studies all shades and variations of the life of the ages the sociologist is confined to the observation of a constant element in history.

The materials that are claimed by both classes of students are mainly those dealing with ethics and with folk-lore, facts to be found in the old epics, in the sacred books, in the early codes of laws. The sociologist must have these, but the historian claims them. It makes no difference how the librarian classes them or shelves them, provided some effort is made to keep all sources for both subjects conveniently apart from the mass of secondary things that are not of common interest to the great body of scholars, and provided, however they are shelved, a cross classification is invariably supplied.

At the close of the meeting the members adjourned to the rooms of the Aldine Association, 111 Fifth avenue, where an informal reception was held. This was followed later by the sixth annual dinner of the club, at which about 150 persons were present. President Wilberforce Eames presided, and the after-dinner speakers included Henry J. Carr, president of the American Library Association; Hon. D. S. Boody, of Brooklyn; Rev. Thomas H. Slicer, Bolton Hall, W. P. Trent, Nathan Haskell Dole, and John H. Crosby.

---

## Library Schools and Training Classes.

---

### *AMHERST SUMMER SCHOOL.*

The summer school of library economy, conducted by W. I. Fletcher, librarian of Amherst College, under the auspices of the Amherst College summer course, will begin its eleventh annual session of five weeks on July 15, continuing to August 16. There are no special requirements for admission to this course, but applicants will be expected to have had a reasonably thorough education and to show some special aptitude for work

among books. The course is especially adapted to provide persons already engaged in library work, but who have had no special training, with the means of improving their work and bringing it into accord with the well recognized standards, qualifying them at the same time for promotion to better positions.

Instruction will be given daily (except Saturday) from 10 to 12 a.m., in the form of practical lectures by Mr. Fletcher, in which the whole field of library work will be gone over. Cutter's catalog rules, and both Cutter's ("Expansive") and Dewey's ("Decimal") classifications, will be studied.

The class will also meet afternoons from two to four o'clock, for practice in various forms of library work, according to the needs of the different pupils. The school is held in rooms in the college library; the library contains 75,000 volumes and its facilities and apparatus are at the disposal of the school.

The fee for the course is \$15; necessary books and material cost about \$2.50. Full information may be had on application to W. I. Fletcher, Amherst, Mass.

### *CHAUTAUQUA SUMMER SCHOOL FOR LIBRARY TRAINING.*

A summer school in library training will be inaugurated this year in connection with the school work of the Chautauqua Assembly. This course will seek to satisfy the growing demands made upon Chautauqua for special training-classes in library science, and will follow the principles and rules which govern the best summer library schools.

Mr. Melvil Dewey, of the New York State Library, will be general director of the school, and will be present for several days during which he will give important lectures. Miss Hazeltine, of the James Prendergast Free Library, Jamestown, N. Y., will serve as resident director. Miss Elizabeth L. Foote, instructor of the training class of the New York Public Library, New York City, will be the head instructor in charge during the entire session (July 11-Aug. 16).

Special lectures will be given during the session by H. L. Elmendorf, of the Buffalo Public Library, W. R. Eastman, N. Y. State Inspector of Libraries, Mrs. S. C. Fairchild, Vice-director, N. Y. State Library School, A. L. Peck, librarian, Gloversville Free Library, Gloversville, N. Y., and others.

The course is designed for librarians of smaller libraries and library assistants who cannot leave their work for the extended courses offered in regular library schools, but who can get leave of absence for a five-weeks' course which will help them to gain a broader conception of their work and an understanding of modern methods. Therefore, only those candidates will be admitted who are already engaged in library work or are under definite appointment to a library position.

Entrance examinations will not be re-

quired, but candidates are expected to have a high school course or its equivalent.

Practical work will be emphasized as a vital part of the course. The management has arranged with the trustees of the James Prendergast Library Association of Jamestown for the use of that library as a place where the class may have actual practice at the loan desk, in the reference department, in preparation of reading lists, selection of books, etc. In the first weeks of the course, the whole class will spend one or two days every week in the Prendergast Library, and later in the course students will alternate in groups for the actual practical experience.

*Fees.*—The tuition fee will be \$15 for the course, to which must be added the regular gate fee of \$5 charged everyone at Chautauqua to cover the cost of an elaborate program of lectures, concerts, entertainments, etc. This will include regular class trips to Jamestown by boat. Ten dollars will probably cover the cost of necessary supplies for text-books, note-books, catalog cards, and various technical fittings to be retained as personal property.

Applications for admission to the school must be made in advance to Miss M. E. Hazeltine, Prendergast Free Library, Jamestown, N. Y.

#### DREXEL INSTITUTE LIBRARY SCHOOL.

The work of the second term included a new feature in the form of debates by the students on questions of library science upon which there may be a wide difference of opinion. Some of these have been: Sunday opening, Size notation, Shall libraries buy only the best books? The topics are assigned some time in advance to certain students who present their arguments *pro* or *con*.

The study of library journals, bulletins, reports, and other news keeps the students informed on current library history and literature. It is too often the case that librarians do not know sufficiently well the literature of their own specialty and by means of this study the students are made to realize the importance of keeping abreast of the times in library affairs by reading regularly the library periodicals, bulletins and reports.

Miss Mary Fornance of the class of '93 recently gave a practical talk on organizing libraries and spoke of the many problems that confront the organizer of small libraries. Another interesting talk was given by Miss Bell Hixson, class of '99, on her work as librarian in the Starr settlement among the children of the poor. An address by Mr. John S. Clark of Boston on "Personal reminiscences of Emerson, Lowell, Longfellow, Whittier and Holmes" was enjoyed by the class.

The presence at the bi-state meeting at Atlantic City of a large number of the present class and many of the graduates of former years, gave opportunity for an informal re-union. At this meeting there were 39 present.

#### PRATT INSTITUTE LIBRARY SCHOOL.

Mr. Charles Welsh, of Boston, an authority on the subject of literature for children, delivered a very interesting lecture on the "History of books for children," before the students of the library school, on Friday, March 22.

#### ANNUAL LIBRARY VISIT.

The spring voyage of discovery in the library world has become an established institution for library classes. The members of the Pratt Institute Library School who returned on March 30 from their visit to New England libraries feel that it is a custom whose value is quite beyond question.

The main points in the itinerary this year were Providence, Boston, and Hartford. The class reached Providence Saturday afternoon and spent the afternoon and evening in the beautiful new public library, where their admiration was especially aroused by the standard library and the delightful and well-equipped children's room. Sunday afternoon they visited Pawtucket and saw both the present and prospective quarters of the library. In spite of a heavy rainstorm the reading-room was thronged with visitors, chiefly men; and when the new building is completed the prospects of great opportunities for work seem assured. On Monday morning the students were introduced to the Providence Athenæum and its precious collection. From there they went to the library of Brown University, where after a useful talk from Mr. Koopman they were shown the library and its chief treasure, the extensive collection of American poetry. After luncheon the class left for Boston, reaching there at about three o'clock.

Of course Conley square is the first objective point of librarians in Boston. For those who had never visited Boston the great public library was a marvel indeed; and for those who were tolerably familiar with the rooms which are generally visited by the public, there was great interest in the parts reserved for the work of the library. On Tuesday morning the class went to Brookline in the midst of a pouring rain. They were repaid by a most interesting morning and felt a particular enthusiasm over the work with schools which is done to so large a degree by this library. After luncheon a visit to the Library Bureau was followed by an hour spent in the Boston Athenæum. A cosy tea in the rooms of the Boston Book Company closed the day.

Wednesday was a day particularly full of events. Arriving at the Cambridge Public Library at ten in the morning, the students first listened to a talk from Mr. Gifford and then under his guidance inspected the library, feeling a special interest in the genealogical room and the large wall cases filled with works by Cambridge authors. From here they walked over to the Harvard library and after a luncheon in Randall Hall, tended through the courtesy of this college, took a special

car for Medford. The quiet and homelike atmosphere of this beautiful library, housed as it is in a fine old mansion, seemed especially welcome to travellers. They returned to Boston sufficiently refreshed to enjoy a delightful dinner at the University Club, as guests of the Library Bureau.

On Thursday the class visited the costly new library at Lynn, in the morning, going on to Salem for luncheon. Friday morning was devoted to sightseeing in Boston; and the middle of the afternoon found the class in Hartford. They were made most welcome by Miss Hewins and given every opportunity to observe personally the varied undertakings of this exceedingly busy public library. Later in the afternoon the students enjoyed a pleasant tea at the home of Miss Esther Owens, formerly of the Library School, class of '99. On Saturday the class again visited the Wadsworth Athenæum, and spent a long time in admiring the fine collection in the Watkinson Library and the treasures in the rooms of the Connecticut Historical Society. At noon a part of the class returned to New York, but the director with five of the students, accepted an invitation to visit the new library at New Britain.

Thus ended an experience that will long be remembered by every member of this class. Such a journey cannot fail to be rich in results that may at present be quite unforeseen. But even now it is clear that it has accomplished three valuable objects. It has aroused in those who hope to be librarians an intense enthusiasm for the best ideals; it has broadened their education by introducing them to great collections gathered in long years of work aided by the best taste and culture; and finally it has filled them with a happy confidence in the friendliness of librarians towards one another. ANNIE K. EMERY.

#### UNIVERSITY OF ILLINOIS STATE LIBRARY SCHOOL.

##### ANNUAL VISIT TO CHICAGO LIBRARIES, APRIL 1-6.

Sixteen seniors began their annual visit to Chicago libraries on April 1, making their headquarters at the Auditorium Annex. In the afternoon, Mr. Hild gave them the freedom of the Chicago Public Library and Mr. Perry kindly devoted his time to the party while the heads of departments explained their special work. Later a visit was paid to A. C. McClurg & Co. In the evening, at the Victoria Hotel, the Illinois State Library School Association tendered a dinner to the visitors, and from seven till ten the time sped pleasantly, and toasts and stories were listened to under the direction of the president, Miss Evva L. Moore. On Tuesday morning, the class visited the Newberry Library where Mr. Cheney detailed Miss McFarland to do the honors. Under her able guidance, the collection of books illustrating early printing, early illustration, and binding were

studied in the museum. All departments were open, but the class was specially interested in the bindery.

After a view of the Virginia library of the McCormick Theological Seminary, a type of pure Greek architecture, the class devoted the rest of the day to the work of the Chicago Institute, and to the allied interests of its librarian, Miss Irene Warren. Miss Warren explained to the students the history and present condition of home libraries, jail libraries, and school libraries in Chicago. A special feature of the Institute work is its collection of 20,000 mounted pictures and over 2000 lantern slides, which are used as freely as the books in class work. A visit was made to the La Salle School near by.

Wednesday morning was spent at the John Crerar Library. Mr. Andrews gave a carefully prepared lecture on printed catalog cards, illustrated by many examples. In addition he explained the sketch plans for the new building which the library hopes to erect on the lake front.

In the afternoon, the H. Parmelee Library Co. showed its bindery, its home delivery department, and its travelling libraries. Next a short visit was paid to the Art Institute. Then the party went to Hull House for a lecture on Bookbinding, by Miss Ellen G. Starr, a pupil of Mr. Cobden-Sanderson. After visiting the public parts of the settlement, the class took supper in the Hull House coffee house.

On Thursday, the morning was spent at Scoville Institute, Oak Park, to see an ideal small library. After showing the various phases of their work, Miss Moore and Miss Lyman spoke of their work with the schools and with the children in their children's room. Miss Lyman is securing very good results by reading aloud to the children at stated times to arouse their interest in certain books.

On returning to the city, the party had luncheon at Lewis Institute as the guests of the library training class, visiting the library and some of the departments later. The next stop was at the Library Bureau, where Mr. Meloney explained the equipment, and Miss Ahern described how *Public Libraries* was made.

On Friday morning a lecture was delivered by Mr. W. Irving Way, on "Modern private printing presses," in his studio in the Fine Arts Building. Mr. Way's choice collection of books, many of them presentation copies, all of them containing autograph letters from author or publisher or printer, and some of them decorated with Mrs. Way's illuminations, were passed freely among the students.

The afternoon was spent at Evanston, where Miss Lindsay and Miss Clarke explained the work of the Public Library, and where Miss Ambrose, Miss Sawyer, and Miss Matteson welcomed the class to the North-

western University Library. During the day a telegram was received from Elgin, 40 miles west of Chicago, cordially inviting the party to visit the Gail Borden Library in that city, but to the regret of all the schedule was not elastic enough to allow accepting the invitation.

On Saturday morning, Mrs. Dixson welcomed the party to the University of Chicago Library, and delivered a lecture on "Departmental libraries," after which the heads of departments explained their work. In the afternoon, two hours were spent at the Field Columbian Museum. As a fitting close to the trip, the class then visited Armour Institute of Technology, the original home of the library school, where Mr. Strohm and Mrs. Beveridge gave a most cordial reception.

Some of the class returned on Saturday evening, but several staid over Monday and Tuesday to work on theses and bibliographies. The class was divided into committees on special subjects, for economy in note-taking and reporting, but students were warned against letting their attention to detail obscure their general view. Former reports were studied beforehand, and these were revised on return, and duplicated for members of the party. This left the class hours free for general discussion, and for oral reports on special features only. The visit was the most successful one ever made by the school, on account of the generosity and courtesy of the library hosts and hostesses, and the most lasting results of the visit are those impressions and inspirations which can neither be written nor spoken.

KATHARINE L. SHARP, *Director.*

### Reviews.

GROSS, Charles. The sources and literature of English history from the earliest times to about 1485. New York, Longmans, Green & Co., 1900. 20-618 p. net, \$5.

Seldom does any work of reference so completely justify in its contents the expectations raised by its title as does Prof. Gross's volume. The fruit of ten years' work in the lecture-room at Harvard and of unremitting toil in preparation, it should immediately prove its usefulness and practical worth. No library of any size can long afford to remain without a copy, and it is practicable only to mention here its main features by way of introduction to the careful study which librarians will undoubtedly give the work.

The bibliographical details to be noted are: (1) The books are not only arranged alphabetically under classes, but each book is given a separate number. The total number of titles is 3234. This method, as is well known, is of great assistance in promoting quick reference. (2) Titles are not given in full in each instance, nor is the number of pages

mentioned when it exceeds 100. (3) The author has used the asterisk to mark books of especial value. He has not limited himself to this alone, but has given us an exceptional example of curt, pointed and valuable annotation. Not all the books listed are annotated, but in the latter part of the book which deals with the modern writers on the larger portion of the subject the works which escape a criticism or a summary are not numerous. Prof. Gross seems particularly happy in this work of characterization, while his cross-references should prove very helpful.

A particularly useful feature of this book consists in the introductions to the various chapters. In these the author defines and limits the subject, notes the main sources, and points out the best treatises. These introductions alone would have great value, and for the student should prove the most useful part of the book.

The classification of the subject is minute and thorough. The full and well-made index amply atones for any difficulties which the numerous sub-divisions of the classification might otherwise produce. Only a study of the book itself can show the extent to which the author has carried his researches in the sources and the thoroughness with which he has cataloged his results.

The work is divided into four parts. The first gives the bibliography of "general authorities," including introductory subjects, auxiliaries to historical study (philology, chronology, palæography, biography, numismatics, etc.), the archives, printed collections of sources, and modern writers. The chapters on the archives and printed collections should be of especial assistance to librarians.

The second part is devoted to Celtic, Roman and Germanic origins. The third part covers the Anglo-Saxon period. Here the author has gone into particulars and listed original and later work with a wealth of detail surpassed only by his fourth part. This part includes the period from 1066 to about 1485 and occupies more than a third of the book. Both parts three and four are divided into "original sources" and "modern writers."

Four appendixes and the index complete the book. The appendixes contain (1) a list giving the number and volume of the parliamentary reports in which the reports of the deputy keeper of the public records from 1840-1897 are printed; (2) a similar key to the reports and appendixes of the Historical MSS. Commission; (3) an index to the titles of the Rolls Series; (4) a chronological table of the principal original sources mentioned in the book.

It is a matter for congratulation that a work so sorely needed and so admirably done should have been produced by an American scholar. A second volume bringing the bibliography nearer our own times will be eagerly awaited.

WM. W. BISHOP.

JOSEPHSON, Aksel G. S. Bibliographies of bibliographies chronologically arranged, with occasional notes and an index. Chicago, 1901. 45 p. O. (Bibliographical Society of Chicago. Contributions to bibliography, 1).

If the quality and character of the later publications of this new society are indicated by this initial number, they will be heartily welcomed by the library craft. Judging from Mr. Josephson's painstaking and useful work the members of the society expect to devote themselves to practical rather than to the ornamental bibliography so much affected abroad.

With all the reviewing of the century which has been indulged in during the last few months it was fitting that there should be a rounding up of bibliographical literature. That is accomplished in this work — for out of a total of 156 titles enumerated only eight are put down to the credit of the seventeenth and eighteenth centuries. Of these early lists of bibliographies the first recorded is that of Père Labbe, Paris, 1664; while two others of the four of that century are later editions and no. 4, compiled by Antonio Teisserio in 1686, is founded on Labbe's work. The first item of the eighteenth century, dated 1705, is a second edition of Teisserio. Three more names make up the record of that century, and all these bibliographers wrote in Latin until Francesco Tosselli (1783), who used Italian. Peignot's "Répertoire," published in 1812, is the first work described that has anything but an historic interest. Two years later came Horne's "Introduction to the study of bibliography." Glancing over the pages the celebrated name of Petzholdt is often met with (17 times, to be exact), but it was in 1866 that his most famous work "Bibliotheca bibliographica" was published. That book, Mr. Josephson says, "is the result of 25 years of research, is the first attempt at a complete and systematic bibliography of bibliographies, and is to this day the most complete record of bibliographical work up to the year of its publication." Pomer's "Handy-book about books" (1870) is dismissed as "of no value whatever," and Vallée's "Bibliographie des bibliographies" (1887) is classed as of slight value in spite of the vast material it contains. In the brief but illuminating and judicious notes appended to most of the entries special praise is given to Whitney's "Bibliographies of special subjects" and to Growoll's "Booksellers' library," while Langlois's "Instruments bibliographiques," 1896 ("Manuel de bibliographie historique"), is thought to be "the most practically useful bibliography of bibliographies yet published."

Not only are the celebrated and standard works in this field enumerated, but analyticals from many sources have been brought out. These include references to cyclopedias and

many periodicals, general and technical. Among periodicals examined were the *Neuer Anzeiger der Bibliographie und Bibliothekswissenschaft*, *Polybiblion*, *LIBRARY JOURNAL*, *Publishers' Weekly*, *Bookseller*, *Library Chronicle* and the *Centralblatt für Bibliothekswesen*. The compiler has personally examined about two-thirds of the titles cataloged. Of those seen he gives the actual measurements of the letter-press in centimeters; of others the popular form notations are given. With the aid of a very full author and subject index this little list supplies an excellent key to sources of information not elsewhere so readily found.

Except for the mental wrench that it would give the reader, the compiler might have called his list a "Bibliography of bibliographies." One shudders to look forward, however, to the time when, years hence, there shall be many books of the scope of this one, and a title will have to be devised for the list which shall enumerate them. Will it come to this: "A bibliography of bibliographies of bibliographies of bibliographies?" G: F. B.

## Library Economy and History.

### GENERAL.

AIKIN, W. F. A unique library plan. (*In American Agriculturist*, March 16, 1901. 67:420) ½ col.

Describes a system of county libraries for the school teachers and the people in general of Hodgeman county, Kansas, inaugurated by the county superintendent.

CARR, Mrs. H. J. How the librarian may make the Sunday-school library of most use to the school. 8 p. D.

This little address privately printed after presentation before a Sunday-school gathering, touches practically upon the use and management of Sunday-school libraries, and gives useful hints for reaching varied classes of readers.

ILES, GEORGE. Trustworthy guides to books. (*In The World's Work*, April, p. 585-7.)

A compact statement of the work done for the "appraisal of literature" through the American Library Association, with a special note of the forthcoming Larned "Guide to the literature of American history."

OUR PUBLIC LIBRARIES. (*In the Dial*, Feb. 1, 1901. 30:65-66).

"We have no intention of going into prophecy at this time, but we will venture one prediction, to the effect that the next marked development of library activity will be found in the schools and that books will be brought to bear upon the studies of young

people to an extent, and with beneficial results, of which few educators now dream."

SCOTT, W. A cheap library post; with American and foreign correspondence, editorials and information respecting an effort to secure such a post in the United States and Canada in 1899-1900 and continued. Cambridge, Mass., 1901. 32 p.

A full statement of the efforts made to secure reduced postal rates for library books, through the New England Education League.

ZIMMERN, ALICE. Girls' book lists. (*In Leisure Hour* Feb. 1901, p. 333-337.)

The article is based on a series of questions submitted to several hundred school-girls with reference to their favorite books. The books that received most votes were as a rule available in cheap editions, which goes to show that the taste of popularity is dependent on price, for price may restrict the distribution of a book. "Perhaps the best method of deciding whether taste is improving would be to preserve some of the book lists (*i. e.* of books read, not merely contemplated) of each generation, and let posterity pronounce judgment. I do not think the law of progress will prove to have broken down."

#### LOCAL.

*Albany (N. Y.) Y. M. A. L.* On March 25 the Pruyne Library building, erected as a memorial to the late John V. L. Pruyne by his daughter, Mrs. Rice, and her family, was formally transferred to the trustees of the library association.

*Amherst College L.* (Rpt., 1899-1900; in *Quarterly bulletin*, Jan. 1901.) Added 2715, of which 1313 were purchased; total 79,492; recorded circulation 9017, a gain of about 12%, the largest on record.

Among the incidents of the year were the welcome introduction of electric light into the stacks, and the beginning of work upon recopying the card catalog, due to adoption of a standard size card. This change was owing to the desire to use the co-operative printed catalog cards. Reference is made to the loss of books from stack and reading-room. This amounts to about 30 volumes a year, at least one-half being from books in the reading-room. Mr. Fletcher adds: "Fortunately most of the losses are of small and inexpensive books and they are not seriously felt. I am not of the opinion that they constitute a reason for restricting the free access to the library which has been allowed, especially as it is doubtful whether such restriction could be made useful in preventing the losses."

*Belfast (Me.) F. L.* (13th rpt. — year ending March 4, 1901.) Added 927, of which 490 were gifts; total 10,377. Issued, home

use 22,987; to schools, 400 (fict. 12,712; juv. 4075.) New registration 246; total registration 1507. Receipts \$2182.89; expenses 1888.70.

The use of an extra non-fiction card was adopted during the year. Miss Pond suggests that library privileges be extended "to the more distant parts of our city, that following the methods of many Maine libraries smaller than our own, we arrange a system of delivery stations, perhaps in the country schools, and thus widen our influence for good."

*Bradford (Pa.) Carnegie L.* The report of the librarian, Robert S. Fletcher, for the five months beginning Oct. 1, 1900, is printed in the local press. It is necessarily largely a record of preparatory work, previous to the opening of the new library building, which it is hoped may be ready for occupancy by the first of May. This preparatory work was the more onerous from the fact that it dealt with the amalgamation of two collections — the Bradford Library Association and the Bradford Public Library which was a development of the public school library — into the newly created Carnegie Library. All the books were to be reclassified and recataloged on uniform lines, and 1389 v. were sent to Buffalo for rebinding. In all 4210 v. were accessioned, classified and cataloged during the five months covered, leaving about 1000 v. of fiction unfinished. A dictionary card catalog has been made of the books as cataloged. No purchases of books have been made for over a year, owing to lack of funds, and money for this purpose is greatly needed.

The report of the directors deals mainly with the organization of the new library. The approximate cost of the building is given as \$25,000, which is defrayed by Mr. Andrew Carnegie. "The library is organized upon the following basis: The Bradford Library Association had its own building and lot of the estimated value of \$6000, also about 2750 volumes, but no sufficient revenue to buy new books. The city school district had the power under the act of 1895 and its supplement to co-operate and devote for the purpose its library revenue of one mill on the dollar of the city valuation. It had also about 3800 volumes. The city had a vacant lot suitable for a library site, also certain power to co-operate under the law. Mr. Andrew Carnegie offered the sum of \$25,000 for the cost of the building.

"The acceptance of the offer was rendered possible by a union between the Bradford Library Association, the city school district and the city of Bradford, whereby the city gave the vacant lot, the school district turned over its books, library furniture and revenue to be derived from the library tax, and the Bradford Library Association donated its books and its real estate, or the rent from it until it can be advantageously sold.

"By the terms of the union, each branch

was to be equally represented in the management, and according nine managers were chosen; three by the mayor, three by the school controllers and three by the directors of the Bradford Library Association." The organization of the board was effected on March 7, 1900, and on Sept. 12, Mr. R. S. Fletcher was elected librarian. "It is estimated that the current revenues from taxes, rent and fines will be sufficient for the payment of current expenses and afford an annual sum with which to replenish the library. But we need a present addition to the old stock of books for which no means are provided. We need also a small fund for specimens of art and for literary and historical relics."

*Brooklyn, N. Y., Library Consolidation.* Various overtures toward a general consolidation of library interests in Brooklyn, looking to a great public library system, as in New York, have been made since the announcement of the Carnegie library gifts for Greater New York. The Brooklyn Library directors on March 18 appointed a special committee of five to consider and report upon what steps should be taken to bring the Brooklyn Library into the largest service in connection with a general system. Authority was also given to the committee to confer with the representatives of other libraries and the municipal authorities. The committee, as appointed, is composed of William A. White, president of the Brooklyn Library; Alexander E. Orr, James McKeen, R. R. Bowker, and Henry W. Maxwell.

A similar committee was also appointed by the directors of the Brooklyn Public Library, and the officers of the Long Island Historical Society have given consideration to the same question. On April 2 a joint conference of representatives of these three institutions was held at the Brooklyn Library. President White of the Brooklyn Library, acted as chairman, and there was a very general informal discussion of the main details involved. While no definite course of action was outlined, it is thought that consolidation of the three institutions will ultimately result. Another meeting will be held after further consultation with the New York Public Library authorities as to the disposition to be made of the Carnegie library fund.

*Brooklyn (N. Y.) P. L.* On March 19 the board of directors elected as librarian F. P. Hill of the Newark Free Public Library, whose appointment is fully noted elsewhere. The place of assistant librarian is still left vacant, Mrs. Mary Craigie whose term in that position expired in February, being still in charge of the travelling library department; and it is understood that this post will be filled on recommendation from the librarian.

*Burlington, (Vt.) Fletcher F. L.* (27th rpt. —year ending Dec. 31, 1900.) Added 640;

total 26,759. Issued, home use 49,433, of which 36,864 were fiction and juvenile. New cards issued 552.

The records show a decrease in the use of the library, both in circulation and in membership cards issued.

It is pointed out that with every year the unsuitability of the building used to store the library books increases, and attention is again called to "the awkward, inconvenient entrance and stairs, the shabby library room, shelves so placed as not to be well lighted at any time, the gradual injury to the books, the danger from fire, the heavy reference books that must be piled up or kept in double rows on the shelves, the reading room which is no reading room but a long desk crowded at many hours of the day and always noisy."

*Chattanooga, Tenn.* On March 15 a meeting was held of the special committee of the city council appointed to consider Andrew Carnegie's offer of \$50,000 for a library building. The committee recommended the acceptance of the gift and the passage of an ordinance, already drafted, establishing a free public library and providing for the levy of a specific tax "to realize the sum of \$5000 to be used in the support and maintenance of said free public library and reading room for the period of one year," the city thereafter to make "suitable provision" for its support.

The Chamber of Commerce several weeks previously had submitted to the city council the draft of an ordinance making the present local library association the nucleus of the new public library, but giving representation on its board to three persons appointed by the mayor and aldermen, and providing for an annual tax levy sufficient to realize \$5000. The officers of the Chattanooga Library Association are in sympathy with the plan, and anxious to transfer their collection to the proposed Carnegie Library. The city council has not yet taken action on either ordinance submitted to it.

*Chicago, Creer L.* Arrangements are now being made by which the library will secure a fine building site on the lake front. On March 18 the Chicago City Council unanimously passed an ordinance authorizing the library to use for this purpose the block bounded by Madison and Monroe streets, the Illinois Central tracks and Michigan avenue. The ordinance requires the building to be erected within six years, on the condition of the forfeiture of the grant. The consent of property-owners who have a right to object to buildings being located on the Lake Front park must be obtained before the building is begun.

A bill authorizing the establishment of the library on the lake front and the erection of a building there was introduced in the state legislature, where it was passed on March 28. It was signed by the governor on March 29. The measure becomes operative July 1.

*Chicago (Ill.) P. L.* The investigations regarding transmission of disease germs through books, conducted by a special committee of the board, have resulted in a decision that no danger existed and that a general system of disinfection was unnecessary.

*Connecticut State L. Hartford.* Rpt.—year ending Sept. 30, 1900.) This is the first report of G. S. Godard, who became state librarian in November, 1900, succeeding the late C. J. Hoadly, and is believed to be the first report made since May, 1856. No record of the present contents of the library can be given, owing to the fact that books "are stored in four different rooms often with two or more rows upon a shelf or in heaps, and the fact that no accession numbers have been maintained." An historical summary of the library is given, with special mention of its collections in law, Colonial reports, and state records. Improvements recommended include the classification and cataloging of the collection, the issue of a quarterly bulletin, installation of new shelving, and special efforts toward the collection of Connecticut historical material. The increase of the appropriation for purchase of books, at present \$1000, is also most necessary. Mr. Godard's report seems to mark a most useful beginning of activity and efficiency, and his plans should result to the great advantage of the library and its users.

*Covington (Ky.) P. L.* The library was formally opened to the public on the evening of March 12, in its newly equipped temporary quarters.

*Detroit (Mich.) P. L.* (36th rpt., 1900.) Added 11,578; total 165,794. Issued, home use 487,843, of which 366,762 were drawn from the central library and 121,081 from the school library (fict. 53.37%; juv. fict. 21.09%); lib. use 569,569 v., 243,946 periodicals. New registration 1618; total card holders 31,946. Receipts \$90,514.84; expenses \$52,556.78.

The opening of three branch libraries was the most important event of the year. These were established in three high school buildings without rental, heating or similar expense to the library. The Hurlbut Library, in Waterworks Park has also been made a delivery station for the Public Library.

The use of the library by children is constantly growing, and the children's room has proved entirely inadequate; its transfer to one of the larger rooms of the building is being considered. The library has also taken up with vigor the development of a comprehensive Michigan collection, which shall be a bibliography of the state. A gift of nearly 2000 books and pamphlets in this field was received from Mr. Herbert Bowen, of the library board, and it is planned to publish the catalog of this collection as a Michigan bibliography.

Most important has been the movement for

a new library building, though it is estimated that at least five years will be consumed before the project is carried through.

*East St. Louis (Ill.) P. L.* Four delivery stations were established in February, the first deliveries being made on the 15th of that month. Great interest had been shown from the beginning by the public in the proposition to establish a delivery system, and the large use that has already been made of the stations proves that they were needed. The library has further extended its influence and usefulness by the purchase of thirty-three sets of graded supplementary reading for the use of the schools. These sets have been selected by a committee consisting of the librarian, the superintendent of schools, and two members of the library board, and will shortly be put into circulation. They will be added to as there is a demand for other sets.

*Fitchburg (Mass.) P. L.* (Rpt.—year ending Nov. 30, 1900.) Added 1675; total 37,566. Issued, home use 71,555. Receipts \$9273.23; expenses \$9143.31.

This report is rather vague in its presentation of facts. The statistics of circulation include in one table reading room, teachers' and Sunday use, with issue in special classes, so that percentages or comparison in home and other use are difficult to arrive at. Regarding borrowers, it is stated that a re-registration was begun in June, 1900, and that "over 2000 cards have been exchanged"; a more correct estimate is promised for another year.

The most successful undertaking of the year was the establishment of a children's room, which has been largely attended and has proved a great relief to the reading and reference rooms. Several exhibits have been held through the Library Art Club. A delivery station has been established in West Fitchburg.

*Indiana library legislation.* In addition to granting increased appropriation to the state library commission, as noted elsewhere, the Indiana legislature has recently passed several bills affecting library interests. These include an act drawn to fit conditions in Jeffersonville, which authorizes township boards "to levy a tax for the increase or maintenance of libraries established by private donation to the extent of \$1000 or more," and permits also a special building tax to be levied annually for three years successively; a measure extending the authority of school commissioners to issue bonds for the erection of library and school buildings, as granted in the act of February, 1891, to all cities of 15,000 or more inhabitants; and a bill "for the establishment, increase and maintenance of public libraries in cities and incorporated towns."

*Lancaster (Mass.) Town L.* (38th rpt.—year ending March, 1901.) Added 781; total 30,224. Issued, home use 13,685 (fict. incl. juv. 56%). New registration 134; to-

tal registration 809. Receipts and expenses \$1890.17.

There were held 12 art exhibits, of which eight were received from the Library Art Club; nearly 400 pictures were circulated among the children for home use. It is pointed out that the population of Lancaster is but 2478, and that the circulation is 5.6 books per inhabitant; in this direction the year's record shows a marked gain. A much-needed reclassification of the library was carried on through the year, without interference with public use of the collection. Books are sent to eighty schools removed from the center of the town, and in this way 1944 v. have been circulated among 242 pupils, the percentage of fiction being only 41.

Appended to the report is a catalog of accessions from March 1, 1900.

*Missouri Library legislation.* On March 8 Governor Dockery signed the bill recently passed by the legislature which authorizes cities and towns to vote a two-mill tax to maintain free public libraries. The importance of this bill comes from the public libraries recently offered by Andrew Carnegie to many places in the state.

*Montgomery, Ala.* On March 7 at a special meeting of the city council it was voted to accept the offer of the Montgomery Library Association to transfer its collection to the city for free public library purposes; and after the completion of the new \$50,000 Carnegie library building, to appropriate annually \$5000 for the support of said library, which shall be administered and controlled by the Montgomery Library Association.

*New Britain (Ct.) Institute L.* At a special town meeting, held on March 4, a resolution was passed appropriating \$4000 for the Institute, payable in quarterly payments of \$1000 each, beginning July 1. The library is to be free and the directors required to make an annual report to the town.

*New Brunswick, N. J.* Because James Neilson, a member of the public library board successfully opposed a plan to ask Andrew Carnegie for a library building he was hanged in effigy before the library building on the night of March 18. Mr. Neilson's opposition to making the request was based on the conviction that the city should erect a library building from its own funds.

*New Jersey State L., Trenton.* (Rpt., 1900.) Added 2915; total 55,012. This is the largest record of accessions heretofore reported. "The need of a new catalog is continually felt," but special aid from the legislature must be had before this can be undertaken. A report on the travelling libraries conducted from the state library is included. In all 42 such libraries are in operation, at an expense for the year of \$2215. These libraries contained on Nov. 1, 1900, 2440 v., of which 527 were contributed

by women's clubs of the state. These were sent to 36 places, from all of which applications had been received some time previously. Appended to the report is a subject list (p. 13-71) of "New Jersey books and pamphlets in the state library."

*New York City. Mechanics' Institute L. (Gen. Soc. Mech. and Tradesmen.)* H. W. Parker, librarian, reports that during his first year of administration, much progress has been made toward the reclassification of the library and its development. The library force has been reorganized and an average daily circulation of 460 has been reached. Two trained catalogers have been engaged, with the result that the general recataloging has been well advanced and a complete record of the books in art and architecture has been made ready for the typewriters. It is hoped that by November next the reference department will be reorganized and ready for public use.

*New York P. L.* Mr. Carnegie's great offer of \$5,200,000 to establish 65 branch library buildings in Greater New York has echoed back and forth in the local press throughout the month. There is a considerable element of disapproval, most effectively expressed in an editorial in the *New York Sun* for March 19, based on the "heavy financial burdens" acceptance of the offer will impose upon the city, and pointing out that "Mr. Carnegie proposes a new plan of public expenditure towards which he offers to pay merely a part of the original cost of a library plant which must be supported by great and permanent public expenditure."

Arrangements for the acceptance of the gift are well advanced. A cable message of thanks from Mayor Van Wyck was sent to Mr. Carnegie who replied "Delighted and grateful for opportunity to serve New York." An enabling act, permitting the city to accept the Carnegie gift, was introduced in the state legislature on March 25, after approval by the governor. It authorizes the city to "receive any moneys, sites, buildings, books, or property of any description, appropriate for library purposes, which may be donated, devised, or bequeathed by any person. In connection therewith the city, acting through the Park Board, with the consent of the Board of Estimate and Apportionment, may enter into any agreement with such donors or his representatives, affecting such bequests or devices as may be proposed or imposed concerning the same, and with the said New York Public Library, Astor, Lenox, and Tilden foundations, or its successors." The city is further authorized "upon resolution of the Board of Estimate and Apportionment, to acquire the sites to any extension for a public library system which may be rendered necessary." For meeting the expenses of acquiring such sites, the controller "when duly authorized by the Board of Estimate and Apportionment, shall issue corporate stock

to such amounts as may be necessary from time to time." The bill passed the Assembly on April 5.

The library *Bulletin* for March gives the February statistics of the new circulating department (formerly the New York Free Circulating Library), and the full correspondence, previously printed in the *JOURNAL*, between Mr. Carnegie, Dr. Billings, and the library and civic authorities.

Beginning Monday, March 25, there was placed on exhibition in the print galleries of the Lenox building the collection of Japanese engravings and chromo-xylographs formed by Capt. Brinkley of the *Japan Mail* and presented to the library by Charles Stewart Smith. To these are added original drawings in water-color and pen-and-ink by Japanese artists, loaned by Mr. Smith. The prints cover mainly the period 1750 to 1850, and include work by the most important men of the period—Hokusai, Suzuki Harunobu, Korusai, Utamaro, Toyokuni, Gakutei Sakaoka, Hokkei, etc. Beside the color prints there are also hand-colored woodcuts and uncolored ones. Special series that should be noted are Hokusai's "Hundred views of Fujiyama," Katsukawa's "Mirror of beauties," and a set of 12 representing the operations of sericulture.

*New York State L., Albany.* (82d rpt.—year ending Sept. 30, '99.) This report appears, with imprint date of 1901, 18 months after the close of the period it deals with, so that some of the information that it presents has been previously recorded in these columns. The accessions for the year 1899 are given as 29,760; total 405,170, of which 230,459 are in the state library proper, 50,988 are in travelling libraries, and 123,723 are duplicates.

The report is extensive and of varied interest, touching suggestively upon the several departments and special collections, work for blind readers, and discussing at some length the question of printed catalog cards. The need of a library building is emphasized. Financial statistics and record of administrative force are given in detail in appendixes. The expenditures of the year were \$126,984.06, of which \$29,566.93 were spent for books. The Home Education Department required expenditures of \$50,000, and the total salary expense, including this department, amounted to \$51,195.62.

Mr. Dewey concludes: "Each year we find the pressure both for more room, a larger staff to meet the reasonable demands made on us, and for more books, because more books are printed than ever before, and people insist as never before on having what they wish and need, and will not be put off with some substitute printed perhaps years before the book they really want to see. Experience has proved that it pays to assist readers in a way not thought of a generation ago, and the patrons of the state library naturally demand such assistance."

*Pasadena (Cal.) P. L.* (Rpt.—year ending March 1, 1901; in library *Bulletin*, March.) Added 2378; total 16,699. Issued, home use, 91,939; library use 52,307. New registration 1416; total registration 10,040, of which about one-third probably represents the active membership.

There has been an increase of 6777 in the home use of books, the greatest gain being 4546, in juvenile literature. Fiction percentage is given as 49 per cent; general literature, including magazines, which average 730 per month, as 32 per cent.; and juvenile books as 19 per cent.

The changes made in the arrangements and facilities of the library by the alterations completed in September, 1900, are noted, and there are some interesting illustrations of the various new departments. The reference room is consulted by an average of 700 readers per month, and the attractive new children's room has had an average attendance of 1000 readers per month and has issued over 6800 books.

*Pennsylvania State College.* The Pennsylvania legislature has passed a bill accepting the offer of Andrew Carnegie, made in 1899, of \$100,000 for a new library building, and providing that the state appropriate \$10,000 annually for the library's maintenance, as required by Mr. Carnegie.

*Philadelphia Mercantile L.* (78th rpt., 1900.) Added 2995; total 189,046. Issued, 67,435; attendance 244,759. The use of books in the building is estimated at 34,000 v. for the year. Receipts \$13,992.47; expenses \$13,932.31.

*Randolph, Mass. Turner F. L.* Dr. Farnham sends an interesting report on the condition and activities of the library, which reached the 25th anniversary of its opening on March 22 of the present year. Additions to the library for the past year amounted to 832, bringing the present total up to nearly 16,000 v. The total circulation for 1900 was 20,172. "The population of the town is about 4000 persons, and our library ranks as number nine among the libraries of Massachusetts in regard to comparative circulation." Of the books added during the past year 300 volumes were of French literature. A generous list of German books is also being prepared.

A room known as "the annex" has been equipped for a lecture and exhibit department. Here the various literary clubs and societies of the town may meet, and the resources of the library will be placed at their service. Teachers may bring their classes for reference use; and special public exhibitions will be made on subjects of interest. The library staff consists of the librarian and two assistants, an extra assistant having been appointed last year. The library is open on Wednesday and Saturday afternoons from 3 to 5.30, and on every weekday evening from 7 to 9. An in-

novation in the card catalog was made about two years ago, and has been since continued. This is the practice of having a picture of each author represented pasted upon a catalog card and placed at the beginning of that author's record in the catalog. Dr. Farnham says: "My purpose in so doing is to make every one consulting the catalog familiar with the books of an author as well as with the printed page. I believe one can come into closer touch and a happier relationship with writers after studying their facial characteristics."

*Richmond, Va.* Mr. Carnegie's offer of \$100,000 for a public library building, made on March 1, has been a subject of much public discussion, especially regarding the required appropriation of \$10,000 yearly by the city for maintenance. Various methods of meeting this requirement have been suggested, among them being an offer from the Richmond Passenger and Power Co. to contribute \$10,000 annually for this purpose for five years. This offer, however, was declined by the Chamber of Commerce, on the ground that it was "unwise for a public enterprise to be maintained by any person or persons now enjoying public franchise."

A meeting of the finance committee of the city council was held on March 25, and voted to recommend to the council the acceptance of Mr. Carnegie's offer. The matter will come up before the council on April 19.

*St. Louis (Mo.) Mercantile L.* (55th rpt. — year ending Dec. 31, 1900.) Added 6605; total 119,485; expended for books, periodicals and binding \$10,980.15. Issued, home use, 103,161 (fict. incl. juv. 65.98%); attendance 170,483. New membership 341; total membership 3473. Receipts \$51,711.51; expenses \$44,741.72.

Mr. Kephart presents concisely the need of enlargement of the building, and recommends the addition of another story. He also touches upon the necessity of weeding out from the collection obsolete or duplicate books, of making a complete inventory, and of a full correction and revision of the card catalog. Mention is made of the "International catalogue of scientific literature" and the A. L. A. plan for printed catalog cards, to both of which the library has become a subscriber.

*St. Louis (Mo.) P. L.* The gift of \$1,000,000 from Andrew Carnegie for buildings for St. Louis's public library system has resulted in large plans for future development. It is probable that the board will make arrangements for the construction of the principal library building on the property owned by the board, on Olive street, between 17th and 18th. The indebtedness on the present site will be liquidated by means to be decided upon by the board, and then the way will be cleared for realizing upon the donation of Mr. Carnegie for the construction of the main

library building. The construction of the auxiliary library buildings will be entered upon as occasion demands. One of the conditions imposed by Mr. Carnegie was that the city increase its yearly library appropriation to \$150,000. Of the entire sum given, \$500,000 are to be used for the construction of a main library building, in a central location, and \$500,000 for auxiliary library buildings, all sites to be furnished from other sources free from incumbrances.

In discussing the gift, Mr. Crunden is quoted as saying: "The \$500,000 for auxiliary libraries will build at least 10 handsome library buildings in different parts of the city. We have 40 delivery stations now, where books are delivered to and collected from patrons. The auxiliary libraries will do away with a large number, if not quite all, of these delivery stations. It will result in giving a library for ten different sections of the city, and will give each section a local pride and interest in the institutions. The cost for books will be increased as each of the auxiliary libraries will necessarily be complete in itself. There will be a librarian and assistants for each building, but each will be a public building and will be a central point of interest for each locality."

*Salem (Mass.) P. L.* (12th rpt., 1900.) Added 2145; total 40,223. Issued, home use, 115,306 (fict. 77.6 per cent.); attendance ref. room 10,004. New registration 898; total registration (Sept. 14, 1899–Nov. 30, 1900) 4297. Receipts \$18,732.02; expenses \$11,275.36. The building fund now amounts to \$6348.13.

The statistics of circulation show a total loss of 2-2-3 per cent.; but there has been a loss of 9 per cent. in fiction circulation and a gain of 30 per cent. in non-fiction. The circulation of non-fiction is constantly gaining, there having been a gain of 57 per cent. in this class since 1898. "The adoption of the two-card system probably accounts for much of this increase," but special study classes and the open shelf department (about 1000 v.) are also responsible for this result.

The need of enlargement is again emphasized, especially for a children's room and better reference facilities. "Readers should have table room, elbow room, good light, and fresh air, in order to do good work."

*Springfield (Mass.) City L.* The library has decided to establish a branch library in the post-office for the benefit of the clerks and carriers.

The question of a house-to-house delivery of books has also been considered, a small weekly payment being made for this privilege. Mr. Dana is quoted as saying:

"Inquiries are often made at public libraries, and ours is no exception in this matter, if books cannot be delivered from the library to the home. No public libraries deliver books. The nearest approach that has been

made to it is found in the branch library and delivery station.

"A weekly house-to-house delivery of books from the library could be maintained at a very moderate expense by the patrons served. If a few hundred families would agree to pay, say five cents per week, for the delivery at the door of as many books as each household is entitled to, and the return of those borrowed the previous week, a delivery system could be maintained, without expense to the library. This would be of great advantage to the library itself. It would prove particularly convenient to the outlying districts. Many people now pay twice the amount suggested in car fares in one visit to the library.

"The lack of a full-printed catalog may seem to stand in the way of the carrying out of this system, but as a matter of fact, most people either wish a recent book simply for general reading, or wish books along some special line. Lists of recent books are found in bulletins issued every month. The same is true, in a measure, of books in special departments, and a request from any household for the best two, three or half dozen books on any given topic, person, place, trade or profession would in most cases bring the material desired.

"A delivery system such as that indicated would make the library more willing to lend its more expensive books, of which it has large numbers. Books delivered by the special express could receive more care in transit than they are likely to get if taken, in all kinds of weather, to and fro through the town by the individual as he walks or travels in the street cars.

"An expression of opinion in regard to this system of book delivery is very much desired."

*University of California, Berkeley.* The library has extended its privileges to persons not members of the university. The condition of such use is that each application must be countersigned by two members of the faculty and be accompanied by a deposit of \$10 in the office of the secretary of the university. The deposit, less charges for damages and fines, is returnable to the depositor when he no longer wishes to use the library. The privileges lapse at the end of each fiscal year, but may be renewed upon application to the librarian.

*Westfield (Mass.) Athenaeum L.* (Rpt. — year ending Feb. 1, 1901.) Added 670; total 18,209. Issued, home use, 39,367. New registration 676; total registration 2803.

Classification and general organization of the library have filled most of the year. Picture exhibitions have been held through the Library Art Club, a delivery station has been opened, and the publication of a monthly bulletin was begun in July.

*Wilmington (Del.) Institute F. L.* A corner of the main library room has recently

been set apart as a children's department, and plans for making it attractive and useful are being developed by the librarian, Mr. Bowerman.

#### FOREIGN.

*Manchester, Eng. John Rylands L.* During the first year of the library's service, ended Dec. 30, 1900, a total of 1797 readers' tickets were issued, and over 27,000 visitors were recorded for the 92 afternoons on which the library was open for public inspection. There were 3305 v. added to the collection at a cost of nearly £2000 and 316 volumes were received as gifts. A steadily growing use was reported, especially during the latter part of the year. In the earlier months the use of the library "was very slight, owing to the erroneous impression which had got abroad that the library was to be a museum of literary and bibliographical curiosities; that the modern side of literature would not be represented; that it was intended for the exclusive use of the bibliographical specialist and ripe scholar, and that, in consequence, it would be surrounded by all sorts of barriers to keep out the ordinary reader who could not offer 'specialist' qualifications to be admitted as a reader."

### Gifts and Bequests.

*Albion College, Mich.* A gift of \$10,000 was made to Albion College on March 19 by Mrs. Gassett, of Albion. It is to be devoted to a library building as a memorial to Mrs. Gassett's daughter, and it is hoped it may be completed by September next.

*Ann Arbor, Mich. Ladies' L. Assoc.* By the will of the late Mrs. L. M. Palmer the association receives a legacy of \$3000.

*Caldwell, Lake George, N. Y.* By the will of the late Mrs. Marietta C. Hay, of Tarrytown, N. Y., the Dewitt C. Hay Library Association of Caldwell, established in memory of her husband, will receive 100 shares of American Bank Note Company stock, 35 shares of Chicago, Milwaukee and St. Paul Railroad stock, and \$2000 in Duluth and Iron Range Railroad stock, in trust, to be held by the library association forever, the interest and income to be devoted to the purchase of new books, pictures and objects of art.

*Derry, N. H.* By the will of the late Benjamin Adams, of Derry, that town will receive a legacy of \$10,000, for the erection of a suitable building to be known and designated as the Benjamin Adams Memorial Building, said building to contain a public hall for the accommodation of the public, and suitable rooms for the keeping of the town public library, and rooms for the use of the town for the transaction of the town's business, and to contain ample fire-proof vaults for the safe keeping of the records of the town. It is stipulated that the building shall be erected within two years after the testator's death.

*Fairhaven (Mass.) Millicent L.* The library has received from Henry H. Rogers the gift of the Fairhaven waterworks, valued at \$100,000, and producing an annual income of about \$8000. The library was given to the town of Fairhaven in January, 1893, by the children of Mr. Rogers in memory of their sister, Millicent G. Rogers, who died in Fairhaven in the summer of 1890.

*Greene, N. Y.* William H. and James H. Moore, founders of the Diamond Match Co., of Chicago, have given \$30,000 for a public library building to Greene, their native village, and have expressed their intention of endowing the library when it is established.

*Kensington (Cal.) L. Assoc.* The gift of \$10,000 has been received from S. A. Galpin, of California, to be devoted to a new library building.

*Muskegon, Mich. Hackley P. L.* On May 25, 1888, Mr. C. H. Hackley, of Muskegon, gave \$100,000 for a public library building, asking only to be assured that the library and reading rooms so established should be forever maintained as a public library in the city of Muskegon. After the plan for the present building was adopted it was plain that its cost would exceed the amount of the bequest, thereupon Mr. Hackley increased the amount by an additional gift of \$25,000. This sum, \$125,000, built and equipped a model library building that has served as a pattern for a number of libraries since built. On April 16, 1891, Mr. Hackley permanently provided for the maintenance of the library by an endowment of \$75,000. From time to time he has placed in the library fine editions of standard works, and in many other ways has shown a personal interest in the institution. For sometime it has been evident that the capacity of the bookroom had been overestimated, and upon Mr. Hackley becoming aware of the fact he immediately proposed to build an addition that should provide shelf room for 100,000 volumes. The architects estimate the cost of this addition at \$25,000, and Mr. Hackley has notified the board of trustees that he will provide this sum. The plans for the addition are very complete, and provide for a two-story stack room with steel stacks and glass floor and a bindery in the basement. The total amount of Mr. Hackley's gifts to the city of Muskegon for library purposes is \$225,000.

*Napa, Cal.* On March 14 George E. Goodman, of Napa, announced his intention of erecting a free public library building for Napa at a cost of from \$15,000 to \$20,000.

*Watertown, N. Y.* Miss Emma Flower Taylor, of Watertown, daughter of the late Governor Roswell P. Flower, has offered to give to the city of Watertown \$60,000 for a public library providing the city will contribute \$5000 a year to maintain it.

## CARNEGIE LIBRARY GIFTS.

*Aberdeen, S. D.* March 11. \$15,000.

The city already appropriates \$1000 a year for library maintenance. Mr. Carnegie requests that the library be called after his friend, Alexander Mitchell. Accepted March 20.

*Atchison, Kan.* March 19. \$25,000.

Refused, owing to maintenance requirement.

*Atlanta (Ga.) Carnegie L.* On March 12 an additional gift of \$20,000 was made by Andrew Carnegie for furnishing and equipment of the new library building. This brings Mr. Carnegie's total gifts to Atlanta up to \$150,000.

*Canton, O.* March 12. \$50,000.

*Carbondale, Pa.* March 10. \$25,000.

*Catskill, N. Y.* March 18. \$20,000.

*Cedar Rapids, Ia.* March 1. \$50,000.

*Charlotte, N. C.* March 12. \$20,000.

Yearly maintenance fund of \$2500 required. Accepted March 24.

*Clinton, Mass.* March 13. \$25,000.

Accepted March 30.

*Cohoes, N. Y.* March 9. \$25,000.

*Crawfordsville, Ind.* March 15. \$25,000.

*Davenport, Ia.* March 8. Previous gift of \$50,000 raised to \$75,000; accepted by city council March 20.

*Easton, Pa.* The offer of \$50,000 for a public library building, made by Andrew Carnegie on Feb. 16, was refused on March 14 by a vote of 13 to 10 by the Easton school board. The refusal was owing to disinclination to add half a mill to the tax rate of the school district for a library maintenance fund of \$5000 annually, as required by Mr. Carnegie.

*Elkhart, Ind.* March 7. \$30,000.

The yearly maintenance fund of \$3500 required was pledged in advance by the city council.

*Fort Scott, Kan.* March 17. \$15,000.

Yearly maintenance fund of \$2500 required.

*Fort Wayne, Ind.* March 14. \$75,000.

*Freeport, Ill.* March 10. \$30,000.

*Gloversville, N. Y.* March 8. \$25,000.

The city already appropriates \$3000 for library maintenance.

*Grand Rapids, Mich.* The offer of Andrew Carnegie to give \$100,000 for a library building was withdrawn on March 1, in favor of the almost simultaneous offer of Martin Ryerson, formerly of Grand Rapids, to give \$150,000 for a like purpose. Mr. Carnegie's

message withdrawing his offer was as follows: "Your fellow-citizen is entitled to the great privilege; congratulate him for me. My offer is withdrawn."

*Greenville, O.* March 10. \$15,000.

Yearly maintenance fund of \$2000 required. The city already appropriates \$1000 annually for library support, and has a site secured. Accepted March 18.

*Hempstead, L. I.* March 12. \$25,000.

*Iron Mountain, Mich.* March 12. \$15,000.

*Ishpeming, Mich.* March 12. \$20,000.

*Jackson, Mich.* March 14. \$70,000.

The city already appropriates \$7000 yearly for library support.

*Jackson, Tenn.* Mr. Carnegie's gift of \$25,000 for a library building has been raised to \$30,000. It was accepted on March 19, when the city council voted to appropriate \$3000 annually for maintenance.

*Janesville, Wis.* March 9. \$30,000.

Accepted March 19, when the city council voted a yearly maintenance fund of \$3500.

*Johnstown, N. Y.* March 7. \$20,000.

Yearly maintenance fund of \$2500 required.

*Kewanee, Ill.* March 16. \$50,000.

*Lawrence, Kan.* March 9. \$25,000.

*Madison, Ind.* March 7. \$20,000.

*Montclair, N. J.* March 13. \$30,000.

*Muncie, Ind.* March 8. \$50,000.

Accepted by city council, March 11.

*New Castle, Pa.* March 9. \$30,000.

If the yearly maintenance fund is made \$4000, the gift for the building will be raised to \$40,000.

*New Rochelle, N. Y.* March 14. \$25,000.

A yearly maintenance fund of \$4000 is required.

*Niagara Falls, N. Y.* March 8. \$50,000.

A yearly maintenance fund of \$7000 is required.

*Norfolk, Va.* March 11. \$50,000.

*Ottawa, Canada.* March 11. \$100,000.

*Perth Amboy, N. J.* March 12. \$20,000.

A site has been given for the building by J. C. McCoy, of Perth Amboy, and Adolph Lewisohn has offered \$1000 to buy books when needed. The city already appropriates \$1200 yearly for library maintenance.

*Peru, Ind.* March 10. \$25,000.

The city already appropriates \$2700 annually for library maintenance.

*Phoenixville, Pa.* March 12. \$20,000.

*Portland, Ind.* March 16. \$15,000.

*Rockford, Ill.* March 7. \$60,000.

A yearly maintenance fund of "not less than \$8000" is required. The library was established in 1872, and its yearly appropriation for this year is \$7000. In previous years it has been \$8000 and \$9000.

*St. Joseph, Mo.* South St. Joseph. March 8. \$25,000.

*San Jose, Cal.* March 8. \$50,000.

A bill authorizing the city to secure a suitable library site was promptly introduced in the legislature on March 11, and passed in a few hours.

*Sault Ste. Marie, Mich.* March 18. \$5000 additional to previous gift of \$25,000.

*Sharon, Pa.* March 11. \$25,000.

*Sheboygan, Wis.* March 8. \$25,000.

The city already appropriates \$2400 annually for library maintenance.

*Springfield, Ill.* March 8. Previous gift of \$60,000 raised to \$75,000.

It has been decided that the new library building shall be known as the Lincoln Library. The first intention was to call it the "Lincoln-Carnegie Memorial Library." This was objected to by Mr. Carnegie, who said that he did not deem his or any man's name worthy to be linked with that of Lincoln; and the word "Memorial" was dropped as superfluous, "as Lincoln needs no memorial."

*Superior, Wis.* March 8. \$50,000.

The city appropriated \$5500 for library maintenance for 1901.

*Vancouver, B. C.* March 7. \$50,000.

*Wabash, Ind.* March 10. \$20,000. Accepted by city council March 11.

*Washington, Ind.* March 11. \$15,000.

*Waukegan, Ill.* March 10. \$25,000.

The city already appropriates \$2000 for library maintenance. Accepted March 19.

*Wheeling, W. Va.* March 20. \$75,000.

The state legislature recently authorized the library board to issue bonds for a library site.

*Windsor, Ontario, Can.* March 12. \$20,000.

Yearly maintenance fund of \$2500 required. The city already appropriates \$2000 yearly for library purposes. The library was opened to the public in December, 1894.

*Yonkers, N. Y.* March 11. \$50,000.

A bill was promptly introduced in and passed by the state legislature authorizing the city of Yonkers to provide a site for its Carnegie library building.

In addition to these gifts Mr. Carnegie also gave \$1000 toward a public library building for Oyster Bay, L. I., where a building fund of \$5000 had been raised by local subscription. No conditions were attached.

## Librarians.

ADAMS, Miss Harriet A., for 20 years librarian of the Somerville (Mass.) Public Library, from which position she retired in 1893, died on March 20, at her home in Somerville, aged 70 years.

BATES, Frank, formerly professor of history and political economy at Alfred College, N. Y., has been appointed state librarian of Rhode Island. The office is a new one, created during the present session of the legislature, and it carries a salary of \$1000 a year.

CUMMINGS, Miss Alice T., has been appointed assistant librarian of the Hartford (Ct.) Public Library. She has been on the library staff since its organization in 1892, has taken summer library courses in Amherst and Albany, and has held the position of cataloger since 1894.

FARR, Miss Mary P., has gone to the library of the College of Physicians, Philadelphia, to carry through the revision of its catalog. Miss Farr has taken up as a specialty the work of library organization, in which she has had much experience.

HEDGE, Frederick H., for 27 years librarian of the Lawrence (Mass.) Public Library, has resigned that office, and will retire from active professional work. Mr. Hedge was born in West Cambridge, Mass., June 30, 1831, and was graduated with honors from Harvard in 1851. His library experience began in 1855, when he was appointed assistant librarian of the Providence Athenæum, a post he held for 14 years. From 1869 until 1872 he was librarian of the Massachusetts Historical Association, and in 1874 he was elected to take charge of the Lawrence Public Library, which under his direction has grown from 6000 volumes to its present collection of 50,000 v. He has been a member of the American Library Association since 1879. Mr. Hedge's resignation will take effect June 1, and he then expects to take up his residence in Brookline, Mass.

HILL, Frank Pierce, librarian of the Newark (N. J.) Free Public Library, was on March 19 unanimously elected librarian of the Brooklyn (N. Y.) Public Library, succeeding Arthur E. Bostwick, resigned. Mr. Hill's name was selected by the committee on librarian, and was presented with strong recommendations from that committee to the board of directors. Mr. Hill was never a candidate for the place, and the nomination came to him entirely unsought. It was accepted only on condition that hearty co-operation between directors and librarian be assured, and that the annual election of librarian be abolished at the beginning of the next board year, the term of office being made "during the pleasure of the board of directors." Mr. Hill will receive a salary of \$5500 for the first year, to be made \$6000 thereafter. Mr. Hill's library experience covers a

period of 20 years, beginning in 1881 when, two years after his graduation from Dartmouth College, he was elected librarian of the Lowell (Mass.) Public Library, which he brought to an excellent condition of efficiency. In 1884 the New Jersey library law was passed and in 1885 Mr. Hill was called to Paterson, the first city of the state to take advantage of the act, where under his direction the Paterson Public Library was established and organized. His successful work led to a call to Salem, Mass., in 1888, when the Salem Public Library was organized; and in the autumn of 1889 Mr. Hill accepted the position as librarian of the Free Public Library of Newark, N. J., which he has since held. At Newark Mr. Hill developed the public library practically from its first small beginning to its present place in the first rank of large city libraries. His work was crowned only a month ago, when the beautiful library building, erected at a cost of \$400,000, for which he had worked and planned for the past three years, was formally dedicated to the public service. It would seem only fair that anyone who had carried through so successful an enterprise should have at least the satisfaction of enjoying its results; but the call to Brooklyn takes Mr. Hill from Newark just as his work there attains full fruition. In Brooklyn he will find before him a great field for organization and development, with the broadest possibilities, and as it is understood that the librarian will have full administrative authority, his executive power and proved capacities give assurance of his fitness to handle the situation and to build up for Brooklyn an adequate and worthy public library system. Mr. Hill will take up his new duties as soon as arrangements will permit his leaving Newark.

ISOM, Miss Mary F., Pratt Institute Library School, class of 1900 and 1901, historical course, has been engaged to catalog the Wilson collection, recently bequeathed to the Portland (Ore.) Library Association. Miss Isom expects to begin work about May 1.

KINGMAN, Miss Helene A., a graduate of the Drexel Institute Library School, has been engaged by the Trenton (N. J.) Public Library, to assist in the classification, cataloging, and preparation of a printed finding list.

MARX, Miss Bertha, of the N. Y. State Library School, 1898-99, has been appointed librarian of the Sheboygan (Wis.) Public Library in place of Miss Bertha E. Ram-bauer, resigned.

TITUS, Miss Mary V., Pratt Institute Library School, class of '97, has been engaged to catalog the Van Wickle Memorial Library, Lafayette College, Easton, Pa.

TOBITT, Miss Edith, librarian of the Omaha (Neb.) Public Library, has been granted three months' leave of absence taking effect May 1. Most of this time will be spent in travel in Europe.

## Cataloging and Classification.

FISK FREE AND PUBLIC LIBRARY OF NEW ORLEANS. Catalogue. January, 1900. 8+208 p. O.

A. D. C. classed list, prefaced by an historical sketch of the library. It is a title-aline list, two columns to the page, printed by linotype. The general effect is somewhat crude, but it is none the less surprising that so full a catalog should have been produced in an edition of 10,000 copies at a cost of \$366.

The NEW YORK P. L. *Bulletin* for March contains a full and valuable "check list of works relating to the history of the city of New York." The list covers 31 pages and is arranged in a few broad classes, with entries in chronological order.

The SALEM (Mass.) P. L. *Bulletin* for March contains special reading lists on Lowell, the reign of Queen Victoria, and Verdi.

The WALTHAM (Mass.) P. L. *Bulletin* for March contains special lists on Patriots' day, April 19, the Pan-American Exposition, and Verdi.

WORCESTER (Mass.) F. P. L. Classified list of books added to the circulating department, January 1, 1896 to July 1, 1900. [Worcester, 1901.] 162 p. l. O.

A well made D. C. finding list; juvenile books are appended in a separate classed list.

— Juvenile books, 1896-1900. 44 p. T.

A neat little classed list giving in separate form the list appended to the main catalog.

### FULL NAMES.

The following are supplied by Catalogue Division, Library of Congress.

- Abrams, Bernard Adolph (Fibel für schüler nichtdeutscher abkunft);  
 Ayers, Edward Augustus (Physical diagnosis in obstetrics);  
 Clark, Allen Culling (Thomas Law);  
 Crozier, Robert Haskins (Golden rule);  
 Davis, Edward Parker (Obstetric and gynecologic nursing);  
 Delanoy, Mary Frances Hanford (Serious complications);  
 Edwards, Daniel Abraham (Quiz book on constitutional law);  
 Fuller, George Albion (Wisdom of the ages);  
 Gabriel, Mgrditch Simbad, tr. of Roger, G. Henri (Introduction to the study of medicine);  
 Gillman, Nathaniel Isaiah (Circumstantial affection);  
 Hammon, Louis Lougee (A treatise on chattel mortgages for Wisconsin);  
 Hammond, Charles Lyman (About the Bible);  
 Hanna, Charles Augustus (Ohio valley genealogies);  
 Hargett, Joseph Bryant (New discoveries in palmistry);

## Bibliography.

ADVERTISING. Sherman, Sidney A. Advertising in the United States. (*In Quarterly Publications of the American Statistical Association*, Dec., 1900. 7:119-162.)

The article is followed by a bibliography of 64 titles, 59 of them being of articles in magazines.

ALLEGANY COUNTY, Md. Maryland geological survey: Allegany County. Baltimore: The Johns Hopkins Press, 1900. 323 p 4°.

Pages 69-85 contain a bibliography of references to the geology and economic resources of Allegany county, b. Cleophas C. O'Harra.

ARCHAEOLOGY. Gomme, G., comp. Index of archæological papers published in 1899. 55 p.

Issued as an appendix to *Folk-Lore*, March, 1901, v. 12, no. 1.

BAGDAD. Le Strange, G. Bagdad during the Abbasid Caliphate, from contemporary Arabic and Persian sources. Oxford: Clarendon Press, 1900. 31+381 p. 8°.

Contains a 4-page bibliography.

BUDDHISM. Aiken, C. F. The dhamma of Gotama the Buddha and the gospel of Jesus the Christ: a critical inquiry into the alleged relations of Buddhism with primitive Christianity. Boston: Marlier & Co., Ltd., 1900. 17+348 p. 12°.

Contains a classified bibliography, pages 325-344.

*Le Courier des Bibliothèques*, of which no 2, for February, has recently appeared, is published by H. Welter, Paris, and combines the features of a sales catalog with those of a general library periodical. The intention is to make two distinct divisions, one devoted to bibliography and library economy which may be bound up in yearly volumes, the other being given to sales catalogs and similar announcement. The first part is printed in smaller type, and will generally cover from 16 to 32 pages. In the February number there appear the opening address of M. Delisle, delivered at the Paris International Library Congress, of 1900, and extracts from the addresses of H. Martin and F. Funck-Brentano, dealing respectively with a central library for newspapers, and the use of critical bibliographies, which were also delivered at the Paris Congress. In addition there are a variety of bibliographical and general notes on library affairs. The periodical will appear each month, and the subscription price is 4 fr. per year.

FISH. A list of books relating to fish, fishing, and fisheries, to supplement the "Bibliotheca piscatoria," of T. Westwood and T.

Satchell, published in 1883. London, Sampson Low, Marston & Co., 1901. 24 p. 1. O. 1s. net.

Interleaved with writing paper for additions and notes. An author list, two columns to the page with fairly full entries and data as to publisher, price, date, etc. It includes publications issued between 1883 and 1900, and some older books not mentioned in the "Bibliotheca piscatoria." It is a full and interesting contribution to the subject.

KEOGH, Andrew. Some general bibliographical works of value to the student of English. [New Haven, Ct.] Yale University, 1901. 28 p. D.

This is a classed descriptive summary of bibliographical works of reference, printed with alternate pages left blank for additions or notes. It was prepared in connection with a lecture on bibliography delivered before the English Club of Yale University; and includes in addition to general English and continental works mention of indexes to periodicals, theses, etc., and bibliographies of selected topics.

LAW. *Bibliographie systematique du droit international privé*, 1900: livres et articles publiés en Europe et en Amérique pendant l'année, 1900. (*In Journal du Droit International Privé*, nos. 11-12 [Nov.-Dec.], 1900.)

The bibliography covers p. 1039-1088 of this number of the *Journal*; it includes 611 titles, arranged alphabetically by authors in seven general classes.

MEDICINE. Packard, Francis Randolph. The history of medicine in the United States: facts and documents relating to the history of medical science in this country, from the earliest English colonization to the year 1800; with a supplementary chapter on the discovery of anæsthesia. Philadelphia, J. B. Lippincott Co., 1901. 542 p. il. 8°.

There is a chapter (p. 429-451) on "Pre-revolutionary medical bibliography," and a list of authorities (p. 520-525). The first medical work published in the United States was at Boston in 1677. It is a broadside by the Rev. Dr. Thomas Thacher, headed as follows: "Brief rule to guide the common people of New England how to order themselves and theirs in the small pocks, or measles."

MEMORY. Colegrove, F. W. *Memory: an inductive study*. New York, Henry Holt & Co., 1900. 11+369 p. 12°.

Contains a bibliography of nine pages.

POTT'S DISEASE. Taylor, R. Tunstall. *Hyperextension as an essential in the correction*

of the deformity of Pott's disease, with the presentation of original methods. (*In Bulletin*, Johns Hopkins Hospital, Feb., 1901. 12:32-38) il.

The article is followed by a "recent bibliography" of nearly 200 references.

RUTGERS COLLEGE. Osborn, G: A. A bibliography of Rutgers College, June 30, 1900. New Brunswick, N. J., Rutgers College, [1901.] 12 p. O.

A classed list, arranged by publications, ranging from general charters and laws to issues of special societies and fraternities. Entries are chronological in each class.

JACQUES ROSENTHAL, second-hand bookseller of Munich, Bavaria, has two important sales catalogs, one dealing with manuscripts, fine old bindings, maps, and rare books, the other devoted to "Incunabula typographica," and both possessing marked bibliographical and antiquarian interest.

---

### Anonyms and Pseudonyms.

---

"*Father Tom and the Pope*." There is frequently question as to the authorship of "Father Tom and the Pope," originally published anonymously. In the St. Louis Public Library catalog it has been attributed to John Fisher Murray; but I recently learned, from a friend who knew the author, that it was written by Sir Samuel Ferguson. A full statement regarding it may be found in the "Life of Sir Samuel Ferguson" by his wife, published in two volumes a few years ago. F. M. CRUNDEN.

ST. LOUIS, MO., }  
PUBLIC LIBRARY. }

W. Scott King, pseud. of Rev. W. Kingscote Greenland, author of "Heavens of brass," and numerous magazine stories.—*London Lit. World*, Feb. 15.

The following are supplied by Catalogue Division, Library of Congress:

Anderson, Richmond, is the author of "Erasmus Bodkin, of Frog Point, U. S. A., in gay Paree."

Leisher, J. J., is the author of "The decline and fall of Samuel Sawbones, M.D."

Sum Quod Sum, pseud for Anderson, James N. "I am that I am."

Muir, Law, pseud. for Granger, Robert. "A woman's revenge."

Niall, Mical ui, pseud. for Moroney, P. J. "A conspiracy of yesterday."

Renniks De Dnarrah is pseud. for Skinner, Harry and Skinner, ed. "The latest."

# THE AMERICAN NEWS COMPANY

## BOOK DEPARTMENT

ON account of a large increase in the volume of business which we are now doing with the libraries of the country we have decided to establish a special LIBRARY DEPARTMENT in order to make our services more efficient. We invite you to take advantage of our facilities.

We have the largest miscellaneous book stock in the United States, embracing the publications of the various publishers, and assure you that our facilities for the proper handling of our correspondent's orders are of the best. We promise you the most careful attention and prompt dispatch on all business entrusted to us.

Would be pleased to receive from you a list of books on which you desire quotations, and, when possible, will be pleased to have you visit us and make use of the facilities of our store and library department in making a selection of books.

Very truly,

THE AMERICAN NEWS COMPANY,  
39-41 CHAMBERS STREET, NEW YORK.

BENJAMIN FRANKLIN STEVENS.

HENRY JOHN BROWN.

# B. F. STEVENS & BROWN,

American Library and Literary Agents,  
4 TRAFALGAR SQUARE, CHARING CROSS, LONDON.

THIS Agency was established in 1864 for supplying American Public Libraries, Institutions, and Book Collectors, with English and Continental Books, Manuscripts, Drawings, Philological Apparatus, etc., at the lowest London prices.

Special attention is paid to the selection and purchase of rare old books and manuscripts. Auction sales are carefully watched and good knowledge kept of the stocks of the old Booksellers of Europe.

Lists of Desiderata have the best attention and Librarians are respectfully requested to test the value of the Agency by sending trial orders on by submitting lists for Estimates for goods to be delivered, either free in London or New York, as desired.

Auction Catalogues when printed in advance and Catalogues issued by Publishers and Second-hand Booksellers are mailed to Customers when desired.

Large shipments are sent by cheapest and quickest route, or as ordered. Small shipments are made weekly through our New York Agency, at a minimum of expense and trouble to purchasers, or single books are sent by mail on receipt of order.

Special attention is given to Bindings in all styles.

Periodicals are supplied either direct by mail from London or by mail from New York Agency at lowest rates for prompt and efficient service. Send for Lists.

Payments may be made either direct to London or in U. S. Currency through our New York Agency.

*Just Ready. 100 Copies Printed for Subscribers Only.*

## B. F. STEVENS'S

### Facsimile of the Unpublished British Headquarters Coloured Manuscript Map of New York and Environs (1782)

Reproduced from the Original Drawing in the War Office, London.

24 sheets. Scale, 6½ inches to a mile. 10 feet by 4 feet. . . . .

The successive British Commanders-in-Chief in America, Generals Sir William Howe, Sir Henry Clinton, and Sir Guy Carleton, during their respective occupations of New York and Environs in the Revolution, caused this manuscript plan from time to time to be kept up.

The plan extends from below Guanans Bay to the Heights of Spikendevil, a distance of about eighteen or nineteen miles. It shows the Fortifications, Defences, Topography, Streets, Roads, etc., of the whole of the Island of New York with the Harbor, Islands, Water Ways, and River Frontages on the Hudson and East Rivers, the Military Works on Long Island including Brooklyn, the Works in Paulus Hook and parts of the Jersey Shore. It has a copious Table of References to various works (British and American), some of them with notes as to the time of their construction or destruction.

The Original Drawing, ten feet by four feet, is on a scale of about six and a half inches to a mile. It is handsomely reproduced for subscribers only, in careful facsimile on 24 sheets which can be joined up and mounted like the original as a Wall Map or mounted on linen if desired. It will be issued either mounted on linen to fold in book form with leather (slip) case, 13 x 10 inches, or the 24 sheets (22 x 15 inches each), will be supplied in a portfolio.

No more than 100 copies have been printed and the engravings were erased as each sheet was printed off.

A few extra copies of sheet 8 have been printed so that it can be sent as a specimen on application from intending subscribers.

#### Prices to Subscribers

Mounted on linen to fold in book form with leather (slip) case. . . . . **\$30 net.**

Unmounted, on 24 sheets in portfolio. . . . . **\$25 net.**

The above prices include delivery to any Public Library or Institute in the United States or Canada, but private subscribers must also pay the duty.

**B. F. STEVENS & BROWN, 4 Trafalgar Square, Charing Cross, London, W. C.**

BOOKSELLER { Library Books,  
Reference Books,  
Belles-Lettres.      AND      BOOKBINDER { Duro-Flexile,  
Vellucent,  
Reliure de Luxe.

*“Buy Your Popular Books and Your Costly Books  
in Duro-Flexile Binding.”*

I OBTAIN books from the publishers in sheets and bind them “ONCE FOR ALL.” This binding lasts longer than the leaves of the book, and the leaves of the book are preserved and their life immeasurably lengthened by this binding. Librarians cannot persuade publishers to print special editions for them, but I supply books specially bound for them.

If the paper is bad I sew and forward the book so that the leaves are subject to no strain and are indeed strengthened in the folds. If the paper is very stout I sew the book and forward it in a special manner adapted to the thickness of the paper, in other words I adapt Duro-Flexile binding to both good and bad paper with the results that the utmost service and the longest possible life are obtained for both.

No binding in the world is adapted to the varied qualities of the paper as is Duro-Flexile.

The service obtained from a book of bad paper when supplied bound in this way will surprise you.

A papier maché box and a steel safe are not hinged in the same way. Thin tough paper and thick spongy paper also require very different treatment, and with Duro-Flexile they get it.

**TIGHT BACKS** are used for books of a thickness and quality of paper best suited for such treatment.

**LOOSE BACKS** are given where such are better suited.

My bookbinding is in short adapted in its every detail, both of material and method, to the requirements of a Public Library Book.

500 Public Librarians in all parts of the English speaking world buy these books.

## POPULAR BOOKS AND COSTLY BOOKS

bought of me, bound from the quires, give 50% more service.

### NEW LIST OF BOOKS FOR SCHOOL LIBRARIES.

In compiling this list a careful selection of books suitable for educational purposes has been made. The collection represents but a small proportion of the publications and importations of CHARLES SCRIBNER'S SONS.

The characteristic of the books is authoritative and latest information regarding a subject, presented in a concise and attractive manner.

In many cases the views and conclusions of the various writers upon a subject are set forth, critically and comparatively estimated in the light of recent research. Bibliographies are also appended.

Such books acquaint the student with the great names of literature, their special treatment of a subject, and lead to intelligent reading in later years.

## A HINT FOR LIBRARIANS

is contained in the following from the editorial columns of *The Parthenon*, the literary organ of Marshall College, West Virginia, under the heading

### PUBLIC SCHOOL LIBRARIES

“Where can we buy our books to the best advantage’ is an inquiry we have met many times from teachers in the county institutes. Marshall College once bought all her books of an Eastern firm, but within the last six months our attention was directed to the catalogue of A. C. McCLURG & CO., CHICAGO. We at once noticed the superiority of this company’s catalogue over all the others as to the number and variety of books and wrote them for their discount sheet, which we found much better than any other we had examined and we at once sent them a mail order of over \$300, which was in every way satisfactory, especially as to prices and promptness.” We will gladly send on application our descriptive list of selected books suitable for school libraries.

LIBRARY DEPARTMENT

**A. C. McCLURG & CO., = CHICAGO**

## BOOKS OF NATURE

*Useful and Beautiful Works That Appeal to All Lovers of Flowers, Trees and Ferns.*

### A GUIDE TO THE WILD FLOWERS

By ALICE LOUNSBERRY. Illustrated by Mrs. Ellis Rowan. 64 beautiful full-page COLORED plates, showing 79 different plants, and 100 black-and-white plates showing 103 plants, together with 34 diagrams. Better illustrated than any similar book.

Contains descriptions of nearly 500 plants,—many more than any similar book.

Mrs. Rowan is the world's greatest painter of wild flowers.

Dr. Nathaniel L. Britton, Director of the New York Botanical Garden, Emeritus Professor of Botany, Columbia University, has made suggestions for the scientific part of the text and has written an Introduction.

Size  $5\frac{1}{4} \times 7\frac{1}{8}$  inches. Cover designed by Miss Amy Richards. Cloth, . . . . . \$2.50 net.  
Field edition, full leather, . . . . . 3.50 net.

### A GUIDE TO THE TREES

64 beautiful colored plates, 100 full-page black-and-white plates, 64 engravings of entire trees, and 55 diagrams, etc.

The only popular work with colored plates of trees. Contains descriptions of nearly 200 trees and a number of shrubs.

Mrs. Rowan's drawings are from the trees and plants in or near their homes, and while artistic and beautiful, are technically correct. Dr. Britton, has written an introduction.

Size  $5\frac{1}{4} \times 7\frac{1}{8}$  inches, cloth, . . . . . \$2.50 net.  
Field edition, full leather, gilt edges, . . . . . 3.50 net

### SOUTHERN WILD FLOWERS and TREES

Together with Shrubs, Vines and Various Forms of Growth Found Through the Mountains, the Middle District and the Low Country of the South.

The first work to cover this extensive field.

Upwards of 1000 flowers are included, with a key simply constructed, by which they may be located.

There are 16 colored plates, which show the beauty of the remarkable Southern Flora, and 144 full-page engravings from pen-and-ink drawings, which aid greatly in their identification. Many of the plants pictured are very rare—never having been engraved before.

There are also 16 engravings from wash drawings, through the book, showing scenes in which this remarkable flora is found, with interesting incidents concerning them recorded.

Quarto, cloth, . . . . . \$3.50 net.

### OUR FERNS IN THEIR HAUNTS

*A Guide to All the Native Species.*

By WILLARD NELSON CLUTE, author of "The Flora of the Upper Susquehanna," editor of the Fern Bulletin, and former Assistant of the New York Botanical Garden.

With over 200 illustrations, many of them colored, by W. W. Stilson.

Contains descriptions of all the species east of the Rocky Mountains and north of the Gulf States, newly described from the actual specimens.

The author is an acknowledged authority on matters relating to ferns. He is the founder and first president of the only American society for their study.

8vo, cloth, . . . . . \$2.00 net.

*For sale by all booksellers or sent post-paid.  
Send for descriptive circulars.*

*A Monthly Catalogue of Second-Hand Books ("Sotheran's Price-Current of Literature,") post free.*

140 Strand, W. C., and 37 Piccadilly, W.: London.

*Telegraphic Address: BOOKMEN, LONDON. Codes: UNICODE and A B C.*

## The Baker & Taylor Company

INVITES librarians to visit its new quarters, 33-37 East 17th Street (Union Square North), running through the block to 18th Street and containing 18,000 square feet of floor space devoted to the display of books. For over fifty years we have been buying and selling books in wholesale quantities and have maintained a Library Department organized to meet the special demands of library business, great and small.

Our wholesale buying enables us to quote prices of interest to the business librarian.

As a help for small libraries we issue a classified catalog of a Standard Library of 2500 approved volumes arranged in classes. Each title is sold separately but a lump price is also made on the complete library. Our twice-a-year clearance sales and the catalogs descriptive of them are well and favorably known to alert librarians.

When lists are sent to us for prices we give itemized quotations based on editions selected with reference to library use. Catalogs, bargain lists, etc., sent on request.

**THE BAKER & TAYLOR CO., Wholesale Booksellers, New York**

## “American Catalogue” Record.

\* \* \*

**1876 VOLUME (Author-Title).** Out of print and very scarce. Last copies (two vols.) sold at \$55.00.

**1876 VOLUME (Subject).** 58 copies remaining. Price, \$12.50 sheets; \$15.00 A. L. A. half-leather. Price to be raised to \$15.00 sheets and \$17.50 A. L. A. half-leather for last 50 copies.

**1876-84 VOLUME.** Out of print and scarce. Last copies sold at \$25.00.

# EDW. G. ALLEN'S

## London Agency for American Libraries

28 HENRIETTA ST., COVENT GARDEN, LONDON.

### Special Notice to Librarians.

Mr. E. G. ALLEN desires to lay before you the advantages of using this Agency for procuring English and Foreign Books, Magazines, Periodicals, etc., and for General Library Work in Great Britain.

Long existing relations with the Booksellers and Publishers of the United Kingdom enable him to execute orders of any magnitude promptly and economically. All important books collated before delivery.

Specialty is made of the finding of Out of Print Books. His success in this department is unrivalled, possessing unique means of search, by which he is able to supply scarce books expeditiously and at moderate prices.

A good selection of Second-hand Dealers' Catalogues is sent to clients by every mail, and no commission charged on orders from them.

New Books supplied on the most advantageous terms, and the Full Trade Discount allowed off the published price.

Auction Catalogues Mailed, Sales Attended, and Commissions Executed with Care and Judgment.

Defects of Rare Books Reproduced in Facsimile.

Long Sets of Scientific and Other Periodicals Supplied. Imperfect Sets Completed.

Large consignments sent by fast steamers at through rates. Small orders can be sent by mail or by express system at low charges.

Special note is kept of all continuations of serials, which are forwarded immediately on publication.

Bookbinding in every style, Cheap and durable for library use. Dilapidated old binding skilfully repaired. Pamphlet binding at specially cheap rates.

Should you at present be without the services of a London Agency, MR. ALLEN would be pleased to answer any inquiries. All orders receive his personal attention, and with an experience of forty years in library business, and the thorough equipment of his agency, he believes himself capable of meeting every library requirement in a satisfactory manner.

**References permitted to first-class Libraries.**

**Special terms for large orders.**

# THE LIBRARY JOURNAL

VOL. 26.

MAY, 1901.

No. 5

It is a pleasure to welcome to the ranks of American library workers so vigorous and promising a body as the Library Association of Ontario, whose first general meeting, held in Toronto in Easter week, is reported elsewhere. Its formation marks the beginning of organized library effort in Canada, and its influence should before long be felt beyond the limits of the mother province. Ontario, indeed, is *par excellence* the "library province" of the Dominion, and in many directions it is coming in touch with the aims and methods of the new library movement. The government has long granted recognition and support to public libraries, but government aid at its best is scanty, and general public appreciation of the place of the public library as an educational and civic influence is still to be awakened. It is towards such an awakening that the new library association should before all bend its energies, by enlisting the best elements in the community in the library cause, by the mutual discussion of problems and methods, and by keeping alight enthusiasm for the best standards and ideals. The stimulation of local pride in the public library of a city or town is a surer and more effective aid to its development and its usefulness than state aid can ever be, however generously or wisely administered. There is a wide field for such work before Canadian librarians, and the organized effort now begun should bring forth abundant fruits.

---

THE cost of administering a public library is always one of the most vital of questions. It is now peculiarly timely, when so many cities and towns are discussing the acceptance or hoping for the proffer of Carnegie gifts. The taxpayer naturally wants to know what the public library costs or is to cost him, and how much he gets for his money. Not much light is thrown upon this question by the amount spent respectively for new books and for administration, because a library which lends its standard books effectively often does better for its community than by purchasing

largely of new books. Probably the best pecuniary estimate of the efficiency of a library is found in the proportion of the number of books circulated to capital invested, the cost per volume of circulation, and the proportion of circulation to total population. At the best, however, these figures tell quantity and not quality of the work, and, as has often been pointed out, the circulation of one informing book which requires two or three weeks for its reading should really count for more than the circulation of a dozen light novels which can be skimmed through in a day apiece. Mr. Wright, as quoted elsewhere in this number, makes some good points as to the misleading character of many library statistics, and his view as to the importance of reference work, so difficult to report statistically, is especially well taken. Mr. Carr, at Scranton, in facing the abnormal demand for new novels which has been encouraged recently by the great sales of well-advertised books, has done the wise thing of confessing frankly that the public library cannot undertake to cater to this ephemeral demand, and suggesting that those who want "the newest book right away" should avail themselves of the facilities offered by the Booklovers' Library. Of course the circulation at the Scranton library would seem to decrease if this suggestion were carried out, but such wholesome decrease the librarian should welcome and be ready to explain, and it is worth while to pass on the hint to other libraries.

---

A NEWARK paper has recently printed some critical statements regarding the Newark Public Library administration, based upon figures of circulation and of cost which seem to be defective both in giving the actual figures of circulation, and in including in the cost of the library for the past year the increased interest charges for the new building before the library had actually taken possession of its new quarters and obtained the advantage of the facilities which they are now to give. A summary report included by Mr. Hill with

his annual report, just presented to the board, stating the development of the library during the twelve years of its existence and of his administration of it, is therefore peculiarly interesting. The corrections put quite another face upon the facts. It is wholesome that the light of publicity and newspaper discussion should be thrown upon questions of library administration, and particularly upon cost; and the wise librarian will always be on the alert to make the most and the best out of the criticism that comes to him, and indeed, to write such criticism. But a public journal should take even more pains than a private critic to make sure that the facts and figures upon which criticism is based are thoroughly accurate. Comparisons between cities are often misleading, because of differences of condition, while on the other hand the line of statistics in Mr. Hill's own report on cost per capita of population rather than of circulation are not of vital significance. It is to be hoped that the A. L. A. may ultimately take action in suggesting the statistical lines in which figures mean something, and recommending the avoidance of figures which are only seemingly and not really comparative.

MORE than a dozen years ago some suggestions were made as to an index of portraits, on which there was a discussion at the Catskill Conference of the American Library Association in 1888 and a report at the St. Louis meeting in 1889. At that time Mr. Bunford Samuel had already begun portrait indexing at the Ridgway Branch of the Philadelphia Library, and the first fruits in print of his labors now appear in the April issue of the "Pennsylvania Magazine of History and Biography," in a first instalment of an index to American portraits, found in certain of the magazines and in a selected list of books. The material here brought together shows how interesting and useful portrait indexing may be made, and Mr. Samuel's list should be found in all the larger libraries. Large quantities of material toward the general "Index to portraits," to be issued ultimately by the Publishing Board of the Library Association, have been got together, but much remains to be done before this can be put in final shape. When this also is completed the Poole index and Fletcher index will be most usefully supplemented.

### DATA ON GIFTS AND BEQUESTS.

LIBRARIANS are requested to communicate to the undersigned information regarding all gifts (exceeding 250 volumes or \$500 in money) made to libraries during the year beginning May, 1900, not recorded in the LIBRARY JOURNAL.

GEORGE WATSON COLE,  
A. L. A. Reporter on Gifts and  
Bequests, 1900-1901.

EAGLE CLIFF,  
Essex Co., N. Y.

### INFORMATION WANTED ON LIBRARY LEAGUES.

MAY I ask that librarians who have organized library leagues or similar societies among their school children will kindly send me statistics of their work?

I shall also be glad to receive accounts of special work in children's rooms, as reading aloud, story-telling, etc.

ELIZABETH P. CLARKE,  
Ass't Lib'n for Reference and School Work.

Evanston, Ill. }

### THE A. L. A. REPORT ON SLAVIC TRANSLITERATION.

THE report of the A. L. A. committee on transliteration of Slavic languages, printed in your journal of September, 1900, shows a decided improvement over all schemes hitherto put forth with equal authority. The present writer, however, would like to make some suggestions.

The committee's scheme makes "E=E," and "B=Ie, E." There is the same need of E=Ie as of the other. Both are pronounced *ie* at the beginning of words and syllables, the two being precisely alike phonetically, differing only historically (etymologically).

*ě* has been passed by as deserving no mention; though it can hardly have failed of discussion. But we cannot be content to call it *e*. Thus *Orel* is not a correct form of either the proper or common noun *Ortol*, *ortol*.

The committee's *tch* for the Slavonic *ч* is to us the least satisfactory feature of their scheme. Not one English word begins with this combination; nor any syllable, unless words like *hatchet* are to be divided *ha-tchet*. At the end of English words of one syllable (primitives) the sound in question is expressed by *ch* seven times to six of *tch*. Dr. Murray's dictionary says: "The sound also occurs in Slavonic and many non-European languages, and is usually spelt *ch* in words thence taken into English."

*ч* being represented by *ch*, *щ* becomes of course simple *sch*.

It seems strange that *ѣ* should be made into *y*, which had already very properly stood for *ѣ*. For *ѣ* is pronounced just like *и* and *і*, and not at all like *ѣ*.

All these statements regarding pronunciation are made on the authority of the best Russian orthoëpists.

NEW HAVEN, CT.

LIBRARY LITERATURE IN ENGLAND AND THE UNITED STATES DURING  
THE NINETEENTH CENTURY.\*

By FREDERICK J. TEGGART, *Mechanics' Institute Library, San Francisco, Cal.*

SINCE libraries publish much while librarians write little, it might well be expected that a review of "library literature" would concern itself even exclusively with the output of the former. That a wholly different course has been followed in the present instance results from the acceptance of the term as meaning that which has been written concerning libraries or the library profession. The library publishes for its patrons; its printed matter is designed for the use of the public, not for the elucidation of professional questions. The librarian, on the other hand, writes as being a "debtor to his profession" "by way of amends to be a help thereunto." There is this distinction also to be made, that the standard of work in the official publication is set in the ideals and principles enunciated in the professional treatise. Consequently, however detached and seemingly ephemeral the latter may be, to the librarian, at least, it is of the greater importance.

Manifestly, it is not practicable within the limits of a short article to refer specifically to the separate items which together constitute the literature of libraries during the last century, or even to go beyond the most general aspects of the subject. Following Gräsel's example the retrospective review might take up chronologically the various works which one might think most deserving of attention, and either by a revision or rep-

etition of accepted judgments seek to renew an interest in them. More profitably, however, the review may be devoted to indicating the important factors and unrealized influences in professional advancement as represented in the literature of the subject, not, however, dwelling upon tendencies to the exclusion of the men who have contributed unselfishly to this advancement. For as we are in a very real sense members of one body, and as members derive benefit individually from the existence of the whole, being joint inheritors of a tradition and a sum of knowledge which is the accumulated experience of the generations of our predecessors, it is not only incumbent upon us, each according to his ability, to add to the store which is for a little while in our keeping, but by occasional remembrance to honor the memory of those men, as a result of whose efforts our own labors are made more effective.

And, first, it is of importance to notice that the literature called forth by the awakened interest in libraries in the middle of the last century, from which point our calendar may be said to date, consisted less of the enunciation of new ideas and theories than of appraisals of the resources in existence with which to meet the new demands.

This is true both of Great Britain and the United States, for in general the library experience of these two countries during the 19th century has been identical, and strikingly dissimilar to that of the countries of continental Europe. In other words, the distinctive library development of the last fifty years was practically confined to Anglo-Saxon countries and was a natural outgrowth of Anglo-Saxon institutions. The great factors in the establishment and progress of the municipal free library have been the democratization of education and of local government. The extension of the former made the "open library" a necessity, while the extension of local self-government enabled every community to provide means in proportion to its special requirements.

The history of libraries provides no internal landmarks coinciding with the termini

\* It is to be regretted that with all the facilities of college courses and library schools the elementary necessity of a bibliography of library economy has not been supplied. The contribution made by Mr. Spofford in the 1876 report (pp. 733-744) is now very inadequate. Of special lists perhaps the best are: Mrs. (Cutler) Fairchild's on "Catalog rules" (1889), Mr. Kephart's "On classification" (1893), and Mr. Ashley's on "Libraries and popular education" (1900). Two instalments of a general bibliography by the present writer have recently been printed in the LIBRARY JOURNAL, a third part dealing with the 18th century has been completed, and much has been done towards a list of the 19th century literature. The only critical review of treatises on library economy is that which forms a part of the introduction to Gräsel's *Bibliothekslehre* (1890, pp. 10-25; 1897, tr. Laude, pp. 10-33.)—an invaluable summary which should be familiar to every student of library economy.

of centuries, but contrasting the beginning and end of the one which has just passed we find that a wholly new institution with its special constituency and means of support has come into existence. In a broad sense the historical importance of this phenomenal development lies in the example which it furnishes of the adjustment of demand and supply in an intellectual sphere. It has been generally true historically that the public libraries of any country have been commensurate with the extent of education among its people, but up to the first half of the last century it had been necessary to provide for the needs of scholarship and leisure alone. Subsequent to the enlightenment of the Revolutionary era the amelioration of the condition of the "masses" brought with it the "common" school and the "common" library. It is of importance to note what the striking growth of this new factor in civilization tends to obscure, that neither Great Britain or the United States was destitute of schools or libraries before the establishment of such institutions freely open to every one. The modern democratic library was not a creation of something hitherto unknown, but the extension to a wider constituency of a means for acquiring knowledge which had previously existed for the benefit of a smaller number.

This fact is evident in all the early literature of the subject. The advocates of library extension recognized the importance of the great libraries maintained by central governments and universities; but they pointed out that men to whom these institutions were inaccessible were compelled to support libraries by personal contribution, and advocated the extension for their benefit of the principle involved in the public support of the larger libraries. The literature of the subject takes, therefore, the form of descriptions and estimates of existing conditions rather than of direct advocacy, "in full faith that, to have the deficiencies supplied, it was only necessary to point them out." A sentiment which is also expressed in the report of the Ewart Committee: "Your committee believe that, on such a subject as this, inquiry alone will stimulate improvement."

This "Report from the select committee on public libraries," presented to the House of Commons in 1849 (with additions in 1850, '51 and '52), is one of the most important

documents in library literature. In addition to its momentary influence in promoting legislation on the subject of free libraries, which was great both in Great Britain and the United States, it remains to-day the principal source for any consideration of the history of European libraries. For the committee did not confine its labors to an investigation of libraries of the United Kingdom, but through Her Majesty's representatives abroad exhaustive reports were obtained from foreign governments on the libraries of their respective countries, the United States being the only one which refused its aid. In addition to the best informed Englishmen, such distinguished men as Guizot, Libri, and Henry Stevens "of Vermont," attended and gave evidence before the committee. One witness the report mentions particularly: "The thanks of the committee are especially due to Mr. Edwards, of the British Museum, who has not only devoted a large portion of his time to the subject, but supplied to the committee the result of his inquiries and his experience during many years."

Edwards occupies a unique place in library literature, and one which entitles his name to be held in high respect by the profession. He was an untiring advocate of the Free Public Library, and was certainly the most voluminous author on library subjects. His efforts were uniformly directed to the purpose of awakening interest in the extension of the accessibility of books, and it is significant, in view of what has been said above, that his writings were almost without exception of an historical and descriptive nature. The "Memoirs of libraries" (2 vols., 1859, about 2000 pages) is his best known work, and his succeeding publications, "Libraries and founders of libraries" (1864), "Free town libraries" (1869), "Lives of the founders of the British Museum" (1870), may be looked upon as amplifications of certain portions of it. While these volumes as histories are not of a high order of merit, and while they especially offend in the total absence of bibliographic references, they constitute even to-day the only full and consecutive history of the subject. They deserve to be widely known, not alone because of the importance of the ground they cover, but because they show how an apparently unimportant member of the profession, by an untiring zeal,

materially aided in awakening a public interest in libraries and did much towards putting the new institutions upon a sound basis.

Reference has already been made to the fact that the United States government contributed nothing to the valuable material collected by the Ewart Committee. The refusal of Mr. Clayton, which is dated July 18, 1850, is the more curious in view of the fact that Jewett's "Notices of public libraries in the United States" had been transmitted to the secretary of the Smithsonian Institution Jan. 1, 1850, and was "printed for the Senate" during the same year.

Jewett explains his object in preparing the "Notices" as follows: "Of these [public] libraries I have endeavored to collect such historical, statistical, and descriptive notices as would be of general interest; together with such special details as would be beneficial to those who are engaged in the organization and care of similar establishments."

What was practically a second edition of this book was prepared by W. J. Rhees and published by Lippincott in 1859. In this also the hope of the author was that the book would "tend to produce greater interest in those powerful means of mental and moral improvement — public libraries."

Like the Ewart Committee reports, these two publications will retain permanently an historical value as showing fully and with considerable accuracy the status of library resources at the inception of the new movement.

That similar appraisals of library conditions should be made from time to time will scarcely be disputed, and for the purpose the mere tabulation of statistics is by no means adequate. Since 1859 this phase of library literature has not been extensively entered upon in the United States, the only contribution towards such a work being the 170 pages of the 1876 report devoted to "Public libraries of ten principal cities." But there has appeared during the last few years a tendency to provide descriptive notices of the libraries of individual states, under the auspices of library commissions and associations, the best example of this class of work being the report (9th) of the Massachusetts Library Commission (1899). There is ample evidence indeed that a new estimate of our library resources is desired, and the "A. L. A. handbook of

American libraries," which will probably be completed during the present year, may be expected to supply the want.

The value of such descriptive works in promoting library development has been recognized in England, where Mr. Greenwood's "Public libraries" has achieved a large circulation.

As has been pointed out, the democratic library movement did not begin consciously as a new departure, but as an extension of the resources already available. The remarkable developments which have come from the movement are largely due to the means employed, to the decision that the library designed for local needs should be supported and administered by local agencies. The rapid growth of municipalities in size and wealth during the last half century has enabled these bodies to further library development in a manner which even central governments would have found difficult immediately before.

While equally unforeseen at the start, the progress in library administrative methods under the same influences has been no less remarkable.

About the time when the advocates of increased library facilities were investigating the existing resources of Great Britain and the United States, the librarians for their own part began to feel the need of a similar process in regard to the technical resources of the profession. Following the expressed desire of the New York Conference of 1853, Mr. Guild issued his "Librarian's manual" in 1858. This work, while valuable within its limits, was a failure so far as the general object for which it was designed is concerned. Issued for "the improvement of our public libraries," it dealt mainly with bibliography, the subject of library economy receiving practically no consideration. Thus the opportunity of anticipating by twenty years much of the ground covered by the 1876 report was lost.

It is to be regretted that Mr. Guild did not recognize the importance of the "Report of the commissioners appointed to inquire into the constitution and government of the British Museum" (1850), which offered the material for a valuable work on library economy. In common with all such documents, this voluminous report contains much that is

irrelevant and of little value, but it is a mine of suggestion on library work, more particularly as it represents fully the point of view of the user of many books. Scholars like Thomas Carlyle, Augustus De Morgan, and Henry Hallam were called before the commissioners, and stated their experience and ideas regarding the needs of the reader. The great feature of the report is, however, the evidence of Panizzi, and if for no other reason than to become familiar with the ideas and ideals of this greatest of librarians the report should be familiar to every member of the profession.

The two British reports (Ewart Committee, 1849, and British Museum Commission, 1850) represent the first direct effort, English or American, to arrive at an understanding of what the modern library owes to the public. It is presumably to be attributed to the form of question and answer in which they are thrown and the duplication of evidence by the many witnesses examined, that they are less well known to-day than their importance merits.

A year after Guild's attempt, Edwards published in his "Memoirs of libraries" the first English work on library economy. It is unfortunate that this valuable handbook was appended to a history 1400 pages in length, instead of being issued alone. One is inclined to think that it would then have enjoyed a greater circulation, and thus have exercised a larger influence in the library world. For forty years, however, it has proved a valuable aid to the librarians of both countries.

Further than this nothing was done towards reducing the principles of library practice to writing until 1876, the year of the establishment of the LIBRARY JOURNAL, the foundation of the American Library Association, and the publication of the ever-memorable Special Report of the U. S. Bureau of Education, entitled "Public libraries in the United States of America: their history, condition and management" (issued in two parts, of which the second was Mr. Cutter's "Rules for a dictionary catalogue"). The occasion of the publication of this great work was the Centennial Exhibition at Philadelphia, and it was designed to show the library resources, both as regards extent and technique, of the country at the time of its appearance. To-day, perhaps, its most notable feature is the com-

paratively inconspicuous space occupied by the municipal free library, and the additional fact that but four of its contributors were employed in such institutions.

In form the 1876 report has an important advantage over its British predecessors, in that it consists of a series of papers on special topics written by different individuals. Its great effectiveness, viewed at this distance, does not appear to have consisted so much in what it actually provided as in the beginning it made of a thorough exploitation of library technique. The means for carrying out the latter were the American Library Association and the LIBRARY JOURNAL, two adjuncts in the development of American librarianship whose value it would be impossible to overestimate. During the five or six years after their concurrent establishment, through the medium of one or the other, every point of library economy was brought up and thoroughly discussed, and under the able leadership of such men as Winsor, Poole, Cutter and Dewey library science was placed on a new and substantial basis.

At the end of this period there was a noticeable lull; so much had been accomplished that the profession seemed on the point of accepting the work as finished. There was also a demand for a handbook of library economy which would embody the results of the papers and discussions, and as a preliminary to such a work Mr. Green's "Library aids" (L. J., April, 1881; Wash., 1881; N. Y., 1883) was appreciatively welcomed.

It shortly became evident, however, that the introduction of a standard of work was but the beginning of the activities of the Association and the JOURNAL. Technical questions once decided, there opened the wider field of the exploitation of the possibilities which this new science had created. Here it may be said that it is in the discernment and effective grasping of these possibilities that American librarianship has achieved its greatest and most distinctive success.

A detailed résumé of the literature which has been written in connection with this phase of the subject, consisting as it does of pamphlets and magazine articles, cannot be undertaken within the limits of the present paper. With the questions of "the school and the library," the use of fiction, "access to the

shelves," "children's libraries," "travelling libraries," "home libraries," "library schools," "library associations," "library commissions," and so on, such names as those of Mr. Green, Mr. Foster, Miss Hewins, Mr. Brett and Mr. Dewey will be immediately associated.

The developments of the last decade show unmistakably that the library profession recognizes the importance of systematizing its efforts. As this can be done only through the personal intercourse of the members or through the circulation of professional literature, we find various means provided towards this end both in Great Britain and the United States. The A. L. A. has been supplemented by numerous local associations, and the JOURNAL by the less expensive *Public Libraries* and publications issued by the local bodies.

But notwithstanding the great value of these agencies, and the various library schools, in promoting professional knowledge, the need still remains of a systematic presentation of American library practice. An effort towards this end was made in 1893 by the A. L. A. in connection with the Chicago World's Fair, and the summary of various features of the work then compiled has since been of service. But good as these papers are individually, as a whole they have not taken any such place in professional literature as the 1876 report, or indeed as their merit entitles them. One reason for this is that the form in which the papers are accessible is without either table of contents or index; but it is also apparent that tables of observations, reports and analyses of practice represent rather the data for judicious use than the completed form of a standard work.

While the desired manual delays its com-

ing, three treatises on a smaller scale have proved of the greatest value in the progress of the last few years. These are Mr. Fletcher's "Public libraries in America" (1894); Miss Plummer's "Hints to small libraries" (1894 and 1898); and Mr. Dana's "Library primer" (1899), similar in scope with his "Denver Public Library handbook" (1895). These books represent the most effective literature at our command today.

The same need of a comprehensive work is apparent in Great Britain, where no less than four different "series" have been undertaken within a decade. First came, in 1892, Part I. of a "Public library manual," published by the L. A. U. K.; out of it grew "The Library Association series," of which seven parts appeared in brochure form. Beginning with 1897, "The library series," a much more ambitious undertaking, reached a fifth volume in 1899; this series is edited by Dr. Richard Garnett, the most important factor in English librarianship since Panizzi. Lastly a series published by the "Library Supply Co." has made its appearance. It can scarcely be said that any of these books are permanent contributions to library science, but as efforts to summarize current practice they achieve a much desired result.

At the conclusion of the first half century of the modern democratic library movement we find the profession with a very much enlarged experience, with a great body of valuable but undigested literature, and awaiting three important pieces of work: (1) a bibliography of library economy; (2) a descriptive appraisal of our library resources; (3) a systematic summing up of our professional experience and knowledge.

### FORGOTTEN TRAVELLING LIBRARIES.

BY SAMUEL H. RANCK, *The Enoch Pratt Free Library, Baltimore.*

SOME months ago Dr. Bernard C. Steiner called my attention to an article on "Itinerating libraries" which he accidentally discovered in *Niles' Register* of October 4, 1834 (47:70). I thought the article of sufficient interest to justify considerable effort to discover the author and something about the libraries described by him. On investigation it proved to be the fourth of a series of five

on "Education conventions," all of which are signed "An observer." In every one of these articles the author calls attention to the "simultaneous conventions" for the promotion of education, which are proposed to be held on the "first Wednesday of November next" in each of the 1100 counties of the Union.

The first article was published in the *Reg-*

ister of September 13, 1834 (47:24) and is introductory. There is no specific title as is the case with the other four. It is chiefly an argument for the establishment of county lyceums. In the second article, September 20, 1834 (47:39), "School moneys" are discussed, and it is declared "that until public sentiment is awakened on the subject of education, legislatures may enact laws, appropriate funds, furnish teachers, supply books, and provide the whole paraphernalia of schools, academies, lyceums, colleges, universities, etc., etc., but it will all be in vain." The third article, September 27, 1834 (47:56), discusses "Circuit schools," schools in which a single teacher is to have charge of six or twelve schools, each child to come under his influence one day in a week or once in two weeks. The condition of the country in many parts would not permit a daily school. The fourth article, "Itinerating libraries," is published herewith in full. In the fifth and last article, October 11, 1834 (47:87), "County lyceums" are discussed. All these articles show that the author was a man of ideas (some of them impractical) and much in advance of his time. The article on itinerating libraries is as follows:

#### EDUCATION CONVENTIONS.

##### ITINERATING LIBRARIES.

Not less than 3000 public libraries have lived and died in the United States, since their independence. Notwithstanding the brief existence of so many institutions, established for the best of purposes, they have been instrumental of great good to our country. It is not to be regretted that they lived, but that they died so soon. The ephemeral existence of libraries, hitherto established, ought not to be urged as an objection to farther attempts for the same object, but to incite inquiry into the cause, or causes, of their short duration, that those to be established in future may be placed upon a more enduring foundation.

The principal cause of the unfortunate end of public libraries is evidently the loss of the public interest which brought them into being. This loss of interest is, doubtless, the want of novelty, which is one of the most powerful movers of human passions and human actions, and one of the richest and most abundant sources of gratification, to persons of all ages, pursuits and countries.

It is hence evident, that any plan which will secure to libraries the novelty which, in most cases, is one of the first and strongest incentives in procuring their establishment, must be sufficient to preserve their lives and promote their growth. Such a plan is in *itin-*

*erating libraries*: or those divided into portions and distributed into different parts of a country, city or town, and for juvenile libraries into different schools, and, after three months, all returned to a common deposite and a new distribution made. Such a distribution, virtually, gives to each section of the community interested, four new libraries in a year; to schools, it might, in many cases, give a new one every month.

This plan is not good in theory merely, but like all other theories which are really good and sound, can be, for it has been, reduced to practice, and experience proves that it effects more in practice than it promises in theory.

To the questions, where and how itinerating libraries can be put into operation, it is answered first, in counties, especially through the whole of the western and southern sections of our country. Under the direction of COUNTY LYCEUMS such libraries may be formed and sustained with the greatest ease. When the books are procured, they can be divided by the curators of the lyceums into portions, of 50, 100, or 200 volumes each, and delivered out to neighborhood lyceums, once in three months, with far greater ease than they can be delivered, individually, to all the members of a library association, once a week, or, as is frequently the case, every day. At the quarterly meetings of the county societies, the books can be returned to the common deposite, without inconvenience.

These quarterly meetings and distributions bring into action another principle of our nature, scarcely less energetic or constant, than novelty: it is *sympathy*. Different branches of the same institution coming together, occasionally, to unite their energies, under the impulse of a *generous rivalry*, in promoting a common object, could hardly accumulate less strength from warmth of feeling, than from union of action, or the love of novelty. All combined must produce great and happy results.

The plan of itinerating libraries is no less applicable to the city than the country; for schools it is applicable in villages and large towns.

I am informed, Mr. Editor, that measures are in progress, by some of the most intelligent and benevolent individuals in our country, to make a selection of such books as will be fitted for the purposed libraries. Such being the fact, it is only necessary to make arrangements at the proposed "*education conventions*," on the 5th of November, or better, perhaps, by the *county lyceums* organized on the occasion, to provide for all sections of the country, and every class of the community, the rich and abundant source of knowledge, which must be contained in a public library.

AN OBSERVER.

Two questions naturally arise in connection with this article on "itinerating libraries."

First, when and where had this plan "been reduced to practice?" Second, who is the author? Both these questions can be answered with a degree of certainty, but not absolutely.

In 1831, May 4-8, there was held in the city of New York a convention to organize the National Department of the American Lyceum. The proceedings of this convention were published the same year in a pamphlet of 31 pages. At this convention the American Lyceum was organized, a constitution adopted, and measures for carrying the scheme into operation provided. Among the latter it was declared that "A portion of the money collected from memberships may be put under the direction of the county and state lyceums, to be appropriated to *itinerating county libraries*, costly apparatus, employing agents for making surveys, or giving other aid to mutual efforts, paying the expenses of delegates who attend the national, state or county lyceums, or such other measures for *general diffusion* as shall be deemed expedient." Near the end of the pamphlet in a description of the methods of "itinerating libraries" occurs the following: "If twenty lyceums in a county should apply a portion of the funds appropriated to general objects and the diffusion of useful knowledge, to procuring a county library to be divided into twenty parts according to the amount paid by the several lyceums, and a new division made once in three months each town would have the advantage of four new libraries in a year." At the time of the meeting of the convention in 1831 New York and Massachusetts were the two states most active in the lyceum movement. It is therefore most likely that the plan had "been reduced to practice" in one or both of those states before 1834.

For a long time after I had begun my investigation of the authorship of the articles in *Niles' Register* I was inclined to ascribe them to James MacNaughton, M.D., of Albany, N. Y., who published there, in 1830, "An inquiry into the present system of medical education in the state of New York. By an observer." MacNaughton was a man of most original mind, interested in education, and in many ways in advance of his age, as a number of pamphlets published by him show.

A careful examination of volume 46 of *Niles*, however, disclosed two articles in the same style and from the same point of view as those on education conventions. In the issue of August 16, 1834 (46:418) there is an article on "County museums," signed "A farmer." Again, on August 30, 1834 (46:445), there is a letter to the editor on "Lyceum seminaries," signed Josiah Holbrook. Both the articles and the letter urge the importance of simultaneous educational conventions. Holbrook was the founder of the American Lyceum and the leading spirit in the convention in New York in 1831; and the pamphlet containing the proceedings of that convention seems to have been the work of his pen. "Lyceum seminaries" and all the other schemes for the diffusion of knowledge advocated in the articles in *Niles' Register* are advocated in the pamphlet, and all seem to have originated with Holbrook. To me it is clear that Josiah Holbrook is the author of the article on "Itinerating libraries."

A sketch of Holbrook's life strongly confirms the belief that he is the author of the articles in *Niles'*. For most of the facts of his life I am indebted to volume 8 of Barnard's *American Journal of Education* (p. 229-247). This volume also contains an engraved portrait of him. Josiah Holbrook was born at Derby, Ct., in 1788, and was graduated from Yale College in 1810. In 1813 he married a daughter of Rev. Zephania Swift, and six years later his wife died and both his parents, leaving the care of a farm to him. On this farm in the spring of 1824 he opened a school for boys, combining manual labor for self support with education. This school was given up in the fall of 1825, but the experiment satisfied Mr. Holbrook that the principle was a practicable one. In November, 1826, he organized at Millbury, Mass., "Millbury Lyceum, No. 1 Branch of the American Lyceum." A number of other lyceums were organized by him in nearby towns, and these were united in pursuance of a general plan which was to include not only the whole country, but the world. From 1827 to 1834 Boston was the center of his activities. He lectured, organized the manufacture of apparatus for common schools, edited a series of scientific tracts, a weekly paper, *The*

*Family Lyceum*, etc. In 1834 and 1835, he was active in introducing the lyceum system into the state of Pennsylvania. In this state he performed valiant service for the cause of public schools. In 1837 he organized the lyceum village of Berea, Ohio. The failure of this project left him under a heavy debt which crippled all his subsequent efforts. About this time a lyceum village at Westchester, N. Y., was partly organized.

In 1842 Mr. Holbrook was established in New York city as the central agent of his plan of school exchanges, part of his original scheme of lyceums. He went to Washington in the spring of 1849 in the hope of enlisting the general government in his lyceum system of education. Washington remained his headquarters the rest of his life. In May, 1854, he visited Lynchburg, Va., in connection with his enterprise and while collecting minerals near there he fell from a cliff into a stream of deep water and was drowned.

Whether Holbrook's plan of itinerating libraries was original or was suggested by those of Scotland is uncertain. I am inclined to think he was familiar with the itinerating libraries established by Samuel Brown in East Lothian (Haddington), Scotland, in 1817. A catalog of some of these libraries in 1827, with an account of them, was printed in the *Bulletin* of the New York Public Library of November, 1898 (2:404-406), and reprinted in the LIBRARY JOURNAL of May, 1899 (24:206-207).

Holbrook, through the working of his scheme of lyceums, must have been more or less familiar with similar movements throughout the world. Reports of the East Lothian libraries were published from time to time, and writers on the lyceum movement in America referred to the itinerating libraries of Scotland. About 1830, according to the British Museum Catalogue, Rev. William Brown, M.D., secretary of the Scottish Missionary Society, author of "The history of the propagation of Christianity among the heathen since the Reformation," and brother of Samuel Brown, founder of the East Lothian libraries, published in Edinburgh the second edition of a pamphlet entitled "Memoir relative to itinerating libraries." This pamphlet was reprinted in New York in 1836 by D. Fanshaw, 150 Nassau street. The reprint contains 16 pages and is a most interesting

account of the work of itinerating libraries accomplished and proposed. The author is fully persuaded that this system of libraries "is worthy to stand by the side of our great institutions—our Bible, our Missionary and our School Societies." It was proposed to plant "divisions" of fifty books each in all the towns and villages of East Lothian (Haddington) county, so that "no individual may be more remote from one than a mile and a half." The scheme commenced with five "divisions," and at the time of writing (about 1830) there were forty "divisions" in Haddington "and in thirty-one of the principal towns and villages of the county." They were kept at one place for two years, and were accessible to all persons over twelve years of age. The author says that the issue of books for the whole system was then 10,000 a year, or five times for each book. The average cost of establishing these "divisions" was about £10 each.

When the libraries were started the books were all issued gratuitously, but in 1821 a system of subscriptions was inaugurated, though the gratuitous feature was not given up. The number of subscribers increased from eight in 1821 to 162 in 1829. The subscribers were to have special privileges in the way of new books, and they were to pay 5s. per annum. It was believed that each division would yield in this way a revenue of 25s. per annum.

Dr. Brown urges the establishment of a British and Foreign Itinerating Library Society, and that this society should raise £5000 a year for forming new libraries. On the basis of this £5000 a year and the annual revenue of 25s. from each "division" he constructs a most interesting table to prove that in fifty years there would be nearly a million itinerating libraries, or one for every 600 inhabitants of the earth. "These statements," he says, "are not chimerical—they are matter of simple calculation." But such a society would do even more. It would eventually print its own books, thus reducing the cost to one-fourth of what it then was, and from that time on "nearly four times the numbers of libraries might be established. Salaries would have to be paid to conduct such a large institution, but," says Dr. Brown, "I would propose that they should be paid out of the savings which I have supposed to be

effected by having a paid agency. A small percentage on the amount of the whole would be quite sufficient for this purpose."

In a foot-note Dr. Brown tells us that Samuel Brown, the founder of the East Lothian libraries, was engaged in raising funds to send such libraries to Jamaica, and that four had actually been sent out. The Scottish Missionary Society had voted £20 in aid of this movement.

William Brown, the author of this pamphlet, was the youngest son, and Samuel Brown, the founder of the "itinerating libraries," was the eighth son of Rev. John Brown of Haddington, author of "The self-interpreting Bible." Samuel Brown was the father of Samuel Brown, M.D., the chemist (1817-56), author of "Lectures on the atomic theory," etc. In the last years of his life Samuel Brown, M.D., wrote a life of his father, Samuel Brown. This life I have been unable to find. It doubtless contains a full account of the founder's work in behalf of "itinerating libraries."

In this connection it seems worth while to mention a forthcoming publication of the Maryland Historical Society that will throw further light on the early history of travel-

ling libraries. Fund Publication no. 37 of the Society will be entitled "Rev. Thomas Bray: his life and selected works relating to Maryland, edited by Bernard C. Steiner." Among the works of Bray included in this publication is "An essay towards promoting all necessary and useful knowledge, both divine and human, in all parts of His Majesty's Dominions," London, 1697. In this work are certain "Proposals to the Gentry and Clergy of this Kingdom For Purchasing Lending Libraries in all the Deaneries of England, and Parochial Libraries for Maryland, Virginia, and other of the Foreign Plantations."

One of the proposals is as follows:

"That within a Month after, the following Books to the value of Thirty Pound, be sent down into the subscribing Deaneries to such Places as from the Visitation shall be directed. And that they be made up in such Boxes, or Book-Presses, with Shelves in them, and Locks and Doors to 'em, as will serve both to preserve 'em in the Carriage down, and in the Place where they shall be deposited for the Publick Benefit. And being kept in such movable Repositories, they can at any time be removed to any other part of the Deanery, as by vote of the Clergy at a Visitation shall be judged most convenient to have 'em lodg'd in; and that without the Charge of building any Room wherein to lay 'em up."

### ON TAKING OURSELVES TOO SERIOUSLY.\*

By JOHN ASHURST, *Free Library of Philadelphia.*

It has been recorded by one of the few men of our own time who has kept a diary, the author of "Collections and recollections," that "Lord Houghton, when he saw a young friend at a club supping on *paté de foie gras* and champagne, said encouragingly, "That's quite right. All the pleasant things in life are unwholesome, or expensive, or wrong." It seems appropriate to begin with this aphorism for two reasons. In the first place, Augustine Birrell, in speaking of the use of quotations, says that a writer should, in his opinion, "leap-frog into his subject over the back of a brother," and in the second place, the undoubted tendency of a large number of our profession to agree with Lord Houghton, in regard to one of the pleasantest things in life, is one that I wish to deplore.

Unwholesome, expensive, and wrong! What a familiar sound these adjectives have

as applied to the reading of fiction. I suppose it would be acknowledged by almost everyone who is at all familiar with the conditions of the past, that one of the most marked features of our life to-day is the growing desire on the part of an increasing number of individuals to endeavor, in the first place to lighten the suffering that seems incidental to life, and secondly to increase, when it is possible, the actual sum of human happiness. The hospitals and asylums, the reformatories for juvenile offenders, and the many homes for the aged and infirm, are the expression of the first of these desires, while the many museums and art galleries and public parks now thrown open to the people, for their enjoyment, do much to render happier the lot of the general mass. In the meantime, with our eyes turned backward to the past instead of forward towards the future we librarians continue to wag our heads sadly over what should be to us, in my mind, one of our greatest sources of

\*Read at joint library meeting, Atlantic City, N. J., March 23, 1901.

congratulation, our contribution to the sum of human happiness, the circulation of fiction. We gravely debate from time to time in the columns of our strenuous library papers; or in solemn conclave at our cheerless library clubs, as to whether the reading of fiction be not unwholesome, forgetting that all the world cannot be expected to view this question through our near-sighted glasses, and that Thomas Gray, the author of what is probably the best known and most justly famous poem in the English language, the man whom the "Dictionary of national biography" calls "the most learned of all our poets," was guilty of the highly scandalous and unorthodox sentiment that "to lie upon a couch and read new novels is no bad idea of Paradise."

That fiction may be unwholesome for a body of individuals suffering, as I fear librarians often do, from a severe form of mental indigestion induced by an over-conscientious effort to bolt all the biographies and histories and works on education as fast as they come out, I am not prepared to deny. What I do wish to deny, however, is that novels are an inherently unwholesome diet. "All people with healthy literary appetites love them" — wrote Thackeray — "almost all women; — a vast number of clever hard-headed men. . . . Judges, bishops, chancellors, mathematicians are notorious novel-readers; as well as young boys and sweet girls, and their kind tender mothers. Who has not heard of Eldon and how he cried over novels every night when he was not at whist?" A couple of years ago I met a distinguished Greek scholar and philologist, coming out of a library in Philadelphia, at the beginning of the summer vacations, with ten or twelve novels under his arm. He greeted me with a sickly smile. "One of those young women in there," he said, "stopped me as I was going out with my novels and told me that if I would come back she would be very glad to pick out some good 'class' books for me." This sort of thing would be funny if it were not sad. That many of the readers who frequent our libraries are our seniors in point of age I suppose you will admit, that many of them know quite as much as we do about books I am prepared to assert, that it is not well to attempt to teach your grandmother how to suck eggs should be constantly borne in mind.

In a magazine that recently had its birth on the news-stand, a periodical with a sad gray cover bearing the somewhat comprehensive title of *The World's Work*, and which quite appropriately had as frontispiece the portrait of that professor of all literalness, Mr. John Fiske, there appeared an article on "Fiction in public libraries," by the librarian of a public library who with rare modesty neglected to sign his name. The article was rather widely copied in the daily papers. It contained one of those tables, so dear to the mind of a certain class of librarian, which showed the percentage of fiction circulated in twenty-five of the larger libraries of the United States. After making the novel observation, that "the public library is the people's university," and following up that original and never-hitherto-quoted statement by a few trifling remarks on the necessity for purchasing fiction "only when there is a class of neglected, uneducated people to be attracted who could not be drawn to the library with any other bait," this anonymous librarian suddenly gives vent to "an exceeding bitter cry." "But what are we to think," he wails, "when a good old New England town like Salem confesses to a circulation of 83 per cent of fiction in its library?" My own feeling about the matter is that the good old New England town of Salem is better employed in brightening the lives of its aged women by means of novels, than by means of the lighted fagots of the "good old" days.

The librarian of one American library, who considers novel-reading unwholesome, is at present engaged in a laudable attempt to elevate the taste of his community by publishing from time to time in a "library bulletin," lists of books on Palmistry, Hypnotism, and Magic. Weaned from his novel, the reader in the favored institution I have alluded to may peruse with profit "Fingers and fortune," by Mrs. E. M. F. Forbes, and "Hands of celebrities," by K. St.-Hill. His palate duly tickled, so to speak, by Mrs. Forbes's fingers, he may refresh himself with "The life and the doctrines of Philippus Aureolus Theophrastus, Bombast of Hohenheim, known by the name of Paracelsus," by Franz Hartmann. This little manual of 383 pages (a mystic number, as you will instantly note if you are learned in the black art) I confess that I once bought and read. In it

the reader will find much valuable information concerning the *Mumia* of a drowned person, which will cause the room where it appears to be pervaded by a corpse-like odor, while the "air may become damp and musty or a sprinkling of spray may take place." He will learn, in addition, that frequently when a *Mumia* is about, all the milk in the house will become blue, deepening after a time into an almost inky darkness, while the surface will exhibit strange zigzag lines. Soon the whole mass will begin to putrefy and emit a horrible odor. Dr. Hartmann adds, in a foot-note, that he has taken especial pains to investigate this subject and that several cases of "blue milk" are known to him personally. Astral bells are described, the invisible bells whose ringing in men's ears often precedes those invisible voices that cause the "delusions of persecution" so well known in insanity. "The more we begin to understand the language of the adepts," writes Dr. Hartmann, "the more grows our respect for their wisdom." He then proceeds to describe the *Xeni Nephidei* who feed on men's brains, the *Flagae* who appear in the Beryll or in Chrystal, and the Rakasas which are demons that were once the souls of evil sorcerers. The mystery of *Erodinium* is explained, and *Mangonaria* or levitation, the creation of *Homunculi*, and how to poison a mirror by the moon. It is probably untrue of Paracelsus that "He lived like a hog, had the appearance of a teamster; found his greatest pleasure in being in company with the lowest and most vulgar people; was drunk nearly all his life, and seems to have written all his books in a state of intoxication." As this was said of him by another physician, it behooves us to make allowances. However, it is to be feared that he was scarcely what we are accustomed to regard in the light of an estimable character.

I have a certain sympathy for those persons who believe that the rest of the world should spend its leisure moments in reading history and biography, or something "solid." I believe that is the correct term; because it gives me an opportunity to ask what histories and biographies they are reading themselves, and to receive the stock answer, that they are really too busy to read anything just then, but that they hope to read all the new histories and biographies when they have time. We also most of us know, by experi-

ence, how irritatingly apathetic our friends can be when we approach them with a book which we have just read and which we want them to read. How often, too, in the silent watches of the night, are we ourselves smitten by a guilty pang on remembering that we left the book which he so strongly recommended to us, and which we took from our friend's hands with such simulated joy, on his hat-rack, when we came away. The man who does not himself read is, of course, a good judge of what other persons should read, just as almost every man is prepared to teach a woman how to cook. The strange indifference and callousness that marks the behavior of our friends when we urge them to read a book that we have just finished, is balanced in the beautiful working of the law of compensation by our own feeble and unsuccessful efforts to appear gratified when they force a book upon us. But why a custodian of books, to whom it would seem natural to attribute from his choice of an occupation some love of literature, should suggest works on Palmistry, Hypnotism, and Magic as possible substitutes for fiction, it is difficult to understand.

The initial expense incurred in buying the books is apparently regarded by many librarians as a serious phase of the question of fiction. Of course in the case of libraries that are endowed, and in subscription libraries, this question is not usually so burning a one as in the case of the unendowed public library. The endowed library has the expression of the will of the donor as a guide, or the matter of choosing the books is in the hands of a board of trustees. In a subscription library, the wishes of the subscribers as carried out by a board which they elect or a committee of its choosing usually decide the matter. In the cases of neither of these libraries does the responsibility of the whole choice of books as a rule fall upon the librarian. The case of the unendowed public library is apt to be different. Here the money by which the library is carried on, whether it comes through city councils, or a board of public education, or some other municipal body, is ultimately given by the people. The people is the court of last resort, and on its popularity with the people finally depends the success or failure of the unendowed public library.

It is here that the responsibility of the

librarian comes in, and where his courage sometimes seems to fail him. He is treated with a certain amount of deference, he finds that he is able to answer many questions that puzzle little boys and old ladies without having to have recourse to reference books, his staff laugh politely at his jokes, and after a time he finds that he is probably familiar with the titles and names of the authors of a greater number of books than almost any one of his acquaintance. He grows so accustomed to the appearance of his books upon the shelves, that, after he has consulted their indexes upon a few occasions, he really comes to feel as if he must have read them, so familiar have they become, just as we all of us feel as if we somehow ought to speak to the persons whom we know by sight at home, when we meet them in another city. But the real downfall of a librarian, the moment when the caterpillar ceases to be open to new impressions and begins to spin his chrysalis, probably dates from the time when he first discovers a mistake in the writings of some well-known authority. This is indeed a proud moment. The assistants are all summoned, the page is exhibited, encyclopedias are called for, all the reference books agree, a low murmur of admiration is heard, the librarian modestly relates how he just happened to find it, he puts a little mark in the volume to show it to the first visitor of importance who comes along, and a bibliographer is born. Happy the librarian who at this supreme moment is endowed from his past reading with a strong and healthy love of fiction to stay him in his hour of peril. "The Philistines be upon thee, Samson." The novels may well tremble upon their shelves. Education is a great thing, the librarian reflects. Only a year or two ago I thought this author, whom I have just caught napping, infallible, and here I find him making a stupid mistake. Education is frightfully neglected, and it is my duty to do more than I have been doing to elevate the tone of what people read. It is when he has arrived at this conclusion, through somewhat this process of thought, that the librarian is apt to become impressed by the expense which attends the buying of novels.

In Æsop's fable of the stag who took himself seriously, it was not the antlers that he so greatly admired that enabled him for a time to escape his pursuers, but the legs that

he so thoroughly despised, and it is not the students in his reference rooms of whom the librarian thinks with pride, but the many readers of fiction to whom he scarcely gives a thought that may be safely depended upon to stand loyally by the library when its existence is assailed.

To those persons, for I suppose there are such, who have an undefined sort of feeling that the reading of fiction is wrong, I have but little to say. There are many philosophies of life and that of Dumas "may not be the best, nor the ultimate philosophy," to quote Andrew Lang, "but it is a philosophy, and one of which we may some day feel the want." It "is that old philosophy of the Sagas and of Homer. Let us enjoy the movement of the fray, the faces of fair women, the taste of good wine; let us welcome life like a mistress, let us welcome death like a friend, and with a jest—if death comes with honor."

The kindly humor of Dickens and his hatred of all cruelty and oppression, the broad charity of Thackeray and his scorn of all shams, the brave life and gentle wisdom and love of all mankind that characterize the good Sir Walter, all surely add something to the character of the immense number of those who read their novels, that the world can ill afford to lose.

And the novel-readers themselves form one of the most interesting democracies that the world has ever known. The little boy who is reading the story for the first time and the tired old man to whom it brings back his lost youth, Capital in his private car and Labor who flags the crossing, the lady in her drawing-room and the servant-maid in her garret, Dives in his club and Lazarus in his cellar, the judge at his fireside and the prisoner in his cell, the physician at his office-table and the patient on his bed of pain, all yield up their minds at the same moment to the same divinely inspired singer, who with one wave of his magic wand lulls to rest all their different cares and sorrows and pains and disappointments, and leads them a united family, side by side though they know it not, to that same fair land through which our ancestors loved to wander long ago, and to which our descendants will love to hasten in the time to come, the land of True Romance, where, for at least a few brief and happy moments, we are at charity with our fellow-men.

## THE LIBRARY MOVEMENT IN ONTARIO.

*Part of address by James Bain, Jr., before Ontario Library Association, Toronto, April 8.*

THE library field in the Province of Ontario contains a population of about two and one-half millions, almost all of which is included in that portion of the province lying between Lakes Huron, Erie, Ontario and the St. Lawrence River, and south of a line drawn from Parry Sound to the Ottawa River. For the present, therefore, until New Ontario grows, the extent of country to be covered is not excessive, especially as so large a portion of the population is clustered in cities and towns.

Successful efforts have been made by the government and private individuals since the first proposals of Governor Simcoe, to supplement the educational work carried on in this province by introducing and popularizing free libraries. Every encouragement has been given to those which were weak, and from \$40 to \$44,000 have been annually granted towards bonusing them. We think now, however, that the time has come for more liberal and sympathetic municipal and individual action, confident that the government of the province will continue to furnish the same generous assistance which they have always given in the past.

By the last report of the Minister of Education we learn that there are in this province:

- 118 free public libraries, supported by the municipality.
- 253 public libraries — supported mainly by fees.
- 24 libraries recently organized.
- 23 libraries not reporting.
- 12 university and college libraries.
- 3 society and scientific libraries.
- 25 law libraries.
- 1 legislative library.

Giving a total of 459 in the province.

The public libraries, numbering 371, make an excellent exhibit, but which, however, does not stand close analysis. Of books they have on their shelves 918,022 volumes. The issue of books estimated for 1900 was 2,376,237, rather more than one per head of the population of the province. The expenditure, which was virtually the entire income, was \$178,642. If from these figures we deduct the amounts paid by the larger libraries we find that the amount spent by the smaller libraries, numbering 362, is \$140,187, or an average of \$387 per library — and if from this we deduct \$100 as the average government grant we gather that the average amount contributed to each library, by individuals or municipality, is \$287 per annum. A number of these far exceed this amount, so that a very large proportion of the libraries of the province are struggling for an existence on an income of less than \$250 per annum.

Turning to consider the size of these libraries, 103 are entered as under 1000 volumes, 128 contain from 1000 to 2000, and 115 from 2000 to 5000, so that 346, or all but 25, are under 5000 volumes. The condition upon which the government grant is made, is that the library must expend on books a sum corresponding to the grant, with the result that the funds as far as possible are expended in this way.

It is evident from these figures that the amount spent on the 346 smaller libraries is so small that the necessary attendance for care-taking and distribution cannot be provided after making the due allowance for rent, light and heat. To investigate thoroughly this condition of affairs and make suggestions as to the best method of overcoming the difficulty is one of the subjects which should occupy our attention. Let me suggest two plans which may be considered. The wants are trained assistants, uniformity in buying, cataloging, and more regular supplies of new books. To suppose that the smaller libraries can afford to engage trained assistants is folly — but if all the libraries within a county could be transferred to the county and government grants paid to it, it would be an easy matter for it to engage a librarian, who would work up the raw material within its limits. The librarian would correspond to the school inspector combining with that the duties of a normal school teacher. She would arrange with those of each school section, or with such other divisions as the county council might direct, for placing libraries; would interest the people in the work, would train the assistants in the elementary work necessary for keeping and distributing the books, and at some central point would arrange for purchases and binding. Money would be saved by printing one catalog for three or five libraries, and these libraries could be exchanged with other parts of the county.

The expense to a county would be comparatively small and the gain enormous. Especially if with this were combined the school libraries which our educational leaders are demanding as a scholastic necessity, furnishing a ready and inexpensive means of distribution in the more sparsely settled districts.

The other path is for the government to take upon itself the responsibility of declining to aid small libraries directly, and devoting the money heretofore spent in the maintenance of a number of travelling libraries of 100 or 200 volumes, one of which would be supplied to each library, say three times a year — in this way ensuring that the proper character of books reached the readers and that the supply of new books was continuous.

One of the difficulties we have to encounter is training our masters. As an almost universal rule library boards are ignorant of the requirements of modern libraries. Nor can we wonder at this, because the gentlemen who give their time and patience in the effort

to make their libraries prosperous are engaged in other vocations which occupy the greater part of their time. If they are scholars they are almost certain to be unsystematic, and if systematic, to know nothing of books. I think, however, that it will be uniformly found that they are perfectly willing to leave the details of work to the librarian, if he or she proves to be competent for the position. Unfortunately with so many of our small libraries only occasional untrained assistants can be employed, whose work supplemented by equally uninformed trustees is inevitably disastrous. Confusion on the shelves, want of promptness in looking after books overdue, allowing books to become ragged and unreadable, and failure to supply new books regularly are rocks upon which many small libraries have been wrecked. The only remedy is the supply of a class of regularly trained librarians who would command confidence—not that the training should be of that advanced character which is required for a university or college library, but a training which would give knowledge of the orderly care, handling, and repair of books, of the best method of distribution suited to the character of readers, of exactness in the charging and return system, and above all familiarity with English literature, and with such subject indices as will enable them to name at least one authority on every common subject. . . .

The time for this library development is now propitious—the air is charged with rumors of library progress. The generosity of Mr. Carnegie, which has overflowed the borders of his own land, has made sure another large public library in the city of Ottawa, and has added to the possibility of the one already active in Windsor. The efforts made by the ladies of Belleville for the conversion of the present small library into a public library, supported by the municipality, has met a reverse, but must eventually be successful. The strong plea which the Minister of Education makes in his last annual report for school libraries, shows that the educational authorities of this province are not lagging behind and must result in awakening the attention of trustees to the value and necessity of books as a means of education.

In East Victoria County the teachers at a recent convention, impressed with the absolute necessity for providing school libraries and resolved not to delay longer, have prepared sets of a small historical collection which they are inducing trustees of schools to purchase, as a nucleus of a larger library. The books chosen for a commencement are those which bear on English, American and Canadian history. No more hopeful sign of the times can be seen than the determination of the teachers to supplement their work, by directing the mind of youth to the books which widen their school training.

#### THE ONTARIO LIBRARY ASSOCIATION, TORONTO, APRIL 8-9, 1901.

THE American Library Association meeting at Montreal last June was evidently a true missionary: the Canadian delegates present were moved upon to organize a Canadian library association to extend the good work of library co-operation. After much planning in the interval, the Ontario Library Association gathered for its first meeting in Toronto, Monday and Tuesday, April 8 and 9. Sessions were held in the Normal School building, and though the meeting was not large, it was thoroughly representative, not only geographically but of the various library interests, viz., the large city public libraries and small country libraries, law, college and special libraries, the publishers and the government.

Mr. James Bain, Jr., Toronto Public Library, was chairman and presided with tact and dignity, and added much to the profit of the meeting by his exceedingly practical suggestions.

The first session was largely of a business character, a constitution was adopted, the delegates' roll signed, and the delegates were made known to each other. Two papers were given, one by Mr. Lancefield, of Hamilton Public Library, and the other by Mr. Keller, of the Uxbridge Public Library.

"Modern library methods and appliances for small libraries" was the subject presented by Mr. Lancefield, in a comprehensive and practical manner. He said, in part: "It will not do for us as librarians to consider ourselves as merely the custodians of a more or less extensive collection of books. We must go further than that. We must realize the responsibilities placed on us, and be prepared not to follow but to show the way. This involves a consideration of many details, which will vary according to the size of the city or town and the available funds at the disposal of the library board. Probably the two most important details are the selection of the architect and the choice of a librarian. In too many library buildings, usefulness has been sacrificed for the sake of architectural effect. Now, while architectural beauty is desirable, it should certainly be subordinated to the demands of practical use. Each librarian has no doubt his idea of a library building. I have mine, adapted to a city of 20,000 to 200,000. If the reading rooms and book rooms are all to be on one floor, I would have the library in the front part and the reading rooms in the rear, or at the side, according to shape of the building lot. When those going to exchange books have to pass through the reading rooms there is a constant shuffling of feet and buzzing of talkers, most annoying to those in the reading rooms. With the library in the front part and the reading rooms in the rear or side, this is avoided, as in the Buffalo library. But where

\$50,000 could be spent on the erection of a two-story building, so much the better. Then on the ground or first floor would be the books and circulating department, also the reference reading room and the ladies' reading room. Off the ladies' reading room would be a comfortable lounging room. On the second floor would be the general reading rooms; off these would be the board rooms and executive offices, also a lounging room for men, equipped also with tables furnished with chess, draughts, and similar games. This may seem an innovation, but I know that it is one that would be heartily welcomed. Such a room as I speak of in connection with the public library would do a great work in providing a resort especially for young men, which would be free from the contaminating influences of the saloon and the average public billiard and pool room. From the games room the visitor would naturally drift to the library and take home a good book to read.

"The second important point is the selection of a librarian. Whether man or woman, the librarian must be a person of considerable executive ability, of wide reading, affable in manner, slow to take offence—and he will be tried very often by the cranks who make the library their hunting ground. A good librarian is worth a good salary; the requisite requirements demand a person who is well worth all and more than the average library board can or is able to pay. The assistants, although appointed by the board, must be under the direct authority of the librarian, as to ensure the perfect working of the library the utmost harmony between the staff and the chief is essential. This is the more reason for securing the proper person as chief librarian." Selection and classification of books were touched upon, and the use of the Decimal classification was recommended. "The question of admission to the shelves must perhaps be settled by the size of the city and the architectural possibilities of the building. I should say, however, that no modern library can afford to absolutely forbid admission to the book shelves. The more freely admission is allowed (to books other than fiction or juveniles) the more fully will the library fulfil its mission as an educational factor. Give people fairly free access to all your books except fiction and juvenile and you encourage people to read travels, historical and general literature in place of fiction. Six years' experience of this latter plan has convinced me that it is a good thing. The chief objection to it is that books are liable to be stolen. This has not been our experience. Trust the people and they seem to respect the trust reposed in them; as although thousands have been admitted to our stacks in the past six years, not six books have been stolen. In every new library building of the future I trust provision will be made for admission to the stacks. It is hard

enough for many people to select novels from catalogs; it is much harder for them to select other books from catalogs. In fact, in addition to the catalogs, the librarian and assistants should encourage people to ask for any special book wanted. The assistant could probably find the book in a moment and save much trouble. This indeed is a most important function of the modern library, and should be carefully noted by every assistant."

In regard to the reading room, Mr. Lancefield thought that the common criticisms of its use by tramps or idlers should not be given much weight, as it was one of the best places to which a man out of work could go. As to arrangement of papers and magazines, he said: "As good a plan as any is to have the large daily papers on stands, and to place the cheaper magazines on tables in the reading rooms, open to all comers; and to keep the better and more expensive magazines at the counter, to be given to those asking for them—posting a list in the reading rooms. Above all, have stools for the stands and chairs for the desks in the reading rooms. Nothing is more trying on the muscles of the legs than to stand 10 or 20 minutes at a high desk reading a paper or magazine. Especially is this trying to a man who has been working hard all day in a factory or warehouse. Don't torture readers—try to make them comfortable."

Mr. Keller's paper dealt with "The character of books for a small library," and noted the principles of selection advisable in various classes of literature. He recommended special emphasis upon national literature—"Don't fail to encourage everything that is Canadian even to the extent of favoritism, and without any distinction as to race. The English, the French, the Irish, the Scotch of Canada, are Canadians, and Canada should encourage her national literature."

The evening session was marked by three excellent papers. Mr. Bain's presentation of the library situation in Ontario, given elsewhere, furnished much food for thought, while the two papers by Messrs. James and Langton on "Canadian poetry" and "Canadian history" respectively, were scholarly and valuable studies by two experts. Mr. James has made probably the most complete collection of Canadian poetry in existence, and is the editor of the "Bibliography of Canadian poetry" (Toronto: William Briggs), and Mr. Langton is the librarian of the University of Toronto Library, an authority on Canadian historical literature and associate editor of the "Review of historical publications relating to Canada" (Toronto: University of Toronto Library).

The other features of the session were an address by Mrs. S. Frances Harrison ("Seranus"), a gifted Canadian novelist and poet, on "The influence of scenery upon character," and the hearty address of welcome by Mr. John Miller, Deputy Minister of Education.

Mr. Miller welcomed the association as likely to prove of assistance to the government in perfecting their plans of library administration.

The Tuesday morning session proved exceedingly helpful. Committees were appointed to study two important problems and report next year—the problems of library architecture and classification, especially as adapted to small libraries. Another committee was instructed to issue periodically to all the libraries in the province generous lists of the new books and an annual list of the “best books of the year.”

The officers for the year 1901-2 were chosen as follows: President, James Bain, Jr., Toronto Public Library; 1st vice-president, H. H. Langton, University of Toronto Library; 2d vice-president, R. J. Blackwell, London Public Library; secretary, E. A. Hardy, Lindsay Public Library; treasurer, A. B. MacCallum, Canadian Institute, Toronto; councilors: W. Tytler, R. T. Lancefield, Avern Pardoe, Judge Macdonald, Henry Robertson.

Four papers were given at this session, all of a practical character. The first, “The needs of a small library,” was by Miss M. C. Budge, librarian of a subscription library at Port Hope. She thought the library should be well situated, in a good spot for fresh air in summer, should have at least three rooms—library, reading room, gymnasium or game room. It should be well warmed, lighted and ventilated, and well provided with chairs. The reading room must be stocked with the best magazines, placed in covers and fastened to the tables; good order is indispensable. The book shelves in the library should not be more than seven feet high. Books should be bought as published and not once a year *en bloc*. Books should not be changed too often in a small library; the library loses its freshness if you do. The trustees, or at least one of them, must be active. Encourage the faithful workers occasionally.

“Travelling libraries” was the subject of a paper by Dr. A. B. MacCallum. He regarded these libraries as an exceedingly important phase of the library movement. The dearth of reading matter in many rural districts is painful to think of, and the travelling library brings sweetness and light into many a scanty home. The movement originated with the New York State Library and has westward spread its imperial way, and in every other direction also, till now it is general throughout the United States. It has been introduced in British Columbia, and an appropriation has been granted in Ontario at the present meeting of the legislature. Its first field in this province has been the lumber-camps. Two suggestions may be presented: the co-operation of the various women’s clubs in this work, and the co-operation of temperance and other fraternal organizations. Dr. MacCallum’s paper elicited much discus-

sion. There was a strong feeling that travelling libraries should be sent, at government expense, only to poorer and sparsely settled districts. Any well-to-do section desiring a travelling library should bear the major part of the expense.

“An outline program of the work of Ontario Library Association” was presented by E. A. Hardy, the secretary. It gave a careful summary of the library situation in the province, and considered the future work of the association under four different heads: 1, assistance to libraries; 2, assistance to the general public; 3, assistance to the schools; 4, assistance to Sunday-school libraries. Under the first head, aid was advocated in the selection of books, by the issue of special bulletins, an annual list of best books of the year, and special subject bibliographies; in the introduction of modern methods, by bulletin or by personal visits; by giving instruction and advice in regard to classification and cataloging; by the establishment of short courses of training for librarians; by systematic co-operation of small libraries with larger ones; by formulating a method for handling and utilizing public documents; by the affiliation of special libraries. Under the second head, it was urged that public interest should be stimulated in the library movement, that bibliographies on subjects of public interest be issued, and that collections of local history be developed. In the fourth division it was suggested that the association should prepare lists of books suitable for Sunday-school libraries, and of higher character than the mass of literature contained in those collections.

As means toward these ends it was suggested that all publications of the association should be issued as government documents, furnished free to all public libraries, and to others on application; that a small government appropriation be granted for the purposes of the association; or that a Provincial Library Commission, akin to that of Wisconsin, be created to carry on such work. Mr. Hardy was felt to have covered the ground so carefully that the meeting resolved to have his report published and sent to every library in the province. It was also decided to request the government to publish a full account of the proceedings.

The closing paper was by A. H. Gibbard, on “The library and the school.” Mr. Gibbard spoke from an intimate knowledge of both, having taught for many years, and having been the moving spirit on various library boards in Ontario. He said in part: “This library association will have accomplished a good work if it can suggest to the Minister of Education any means by which either the school or the library can be improved. The Minister has the right idea about reading, for in his last report he says: ‘It should never be forgotten that the boy or girl who leaves the school with a taste for good read-

ing has received the most important part of an education.' Provision for this 'most important part of an education' has been very faulty in the past. Our teachers have not realized their mission in this respect, or have not had the time or facilities to do what they desired. Things are brightening with us, however. The American city schools, many of them, have a complete system of supplementary reading from the primary to the highest grade, thus cultivating in their pupils a taste for the best that literature affords. We may do well to follow their example. To accomplish the best results the Minister of Education should employ competent persons to compile an authoritative and detailed guide in supplementary reading for the public and high schools, and place a copy in the hands of every teacher in the province, with instructions to provide for this work in the school programs. No work could give better results."

As an initial meeting, the 1901 O. L. A. gathering at Toronto was a success. The representative attendance, the high scholarly and practical character of the papers, the animated discussions and the spirit of enthusiasm were indicative of great possibilities.

#### HOUSE-TO-HOUSE DELIVERY OF BOOKS.

THE Springfield (Mass.) City Library inaugurated on April 27 a system of weekly house-to-house delivery of library books, in accordance with announcements previously made (*See L. J.*, April, p. 230). There were easily secured in one district 100 persons willing to pay five cents a week for this service—a sum which it was estimated would defray the expense involved—and the plan as carried out experimentally in that district will, if successful, be later extended over the city. An explanatory circular was sent to all persons included in the first delivery. It is as follows:

"The first delivery of books will be made on Saturday morning, April 27. We hand you herewith recent lists. From these, on the slip enclosed marked 'order list,' make out your list of books wanted in the order of preference. You are not confined in ordering to the lists of books we send. If possible make out a list of 10 titles. Give author and title and the book number, wherever the latter is given in the lists. Put the list and your borrower's card in the envelope enclosed and mail it on or before April 24.

"If your card is at the library, we shall find it. If you are not already a cardholder at the library, you will find enclosed registration slip for your signature. Sign this slip on the line marked A, and put it also in the envelope with your order list. A borrower's card will be returned to you with your book.

"All residents of Springfield are entitled to

take books from the library. If there are others in your household who wish cards, let each sign one of the enclosed registration slips and place it also in the envelope with a list of the books wanted pinned to it. The borrower's card will be returned with the book. Five cents per week pays for the delivery of as many books as there are cardholders in each house.

"If you wish, you may hand the messenger a second list when he delivers the first books, April 27. Each successive Saturday forenoon have ready for the messenger additional lists, with your name on each one, and the books you wish returned.

"All books can be kept two weeks and, except some recent fiction, can be renewed for two weeks more. The messenger can renew all renewable books at the door. Supplementary lists can be sent in on postals. Telephone inquiries will be answered as far as possible.

"Many recent novels and some other recent books are included in the duplicate collection, as well as in the general library. So also are current magazines. Both books and magazines in the duplicate collection can be reserved on request. They are lent at one cent per day. This charge begins on the day on which they are reserved. The 50 cents due for 10 weeks' delivery can be paid at the library or to the messenger."

#### SOME QUESTIONS OF NOMENCLATURE.

W. E. FOSTER, of the Providence (R. I.) Public Library, raises rather an interesting question of library nomenclature. In preparing an historical summary of the Providence library he notes that four terms, now commonly used in American library practice, were used continuously in that library, in their restricted or technical sense, for many years, and he asks, "Did we use them thus, earlier than other libraries?" Mr. Foster gives the following record of the terms referred to, with statement of origin and use so far as the Providence Public Library is concerned, and would be glad to know of their prior usage, if any, by other libraries:

"Reference list."

Used continuously in manuscript and printed notices of this library, from 1879. See 2d annual report of this library, p. 26, showing its use as early as Oct. 18, 1879.

See also article by W. E. Foster, in *LIBRARY JOURNAL*, Feb., 1880, v. 5, p. 38-42.

"Information desk."

Used in this library continuously, from 1891.

See 14th annual report of this library, p. 10-11.

"Staff meeting."

Used in this library continuously, from 1890.

See 13th annual report, p. 14.

"Standard library."

Established in new building, opened March, 1900. Written about, in advance, in the *Monthly Bulletin* of this library, Oct., 1898, v. 4, p. 272-82; also in the *LIBRARY JOURNAL*, Dec., 1898, v. 23, p. 661-63.

## MISLEADING LIBRARY STATISTICS.

*P. B. Wright in The Dial, April 16.*

WHILE library workers are gratified at the increased attention given library work and use, by students, critics, and writers, believing that, as a result of any public agitation, additional knowledge of these institutions will bring increased opportunities for good, they cannot but object to the plan which seems to be so generally adopted, of measuring the work accomplished by the percentage of the different classes of books issued for home use. Writers in recent publications take the "home use statistics" of a number of prominent libraries, and because they find from the circulation tables, that an average of three-fourths of the volumes so issued are classed under the heading of fiction, argue that it is questionable whether the public library is really a good thing for a community.

It is unfortunate, perhaps, that library reports do not give the exact "quality" of fiction circulated; that they do not say whether the library is closely classified or not; whether a great many or a few titles are placed in fiction which properly belong in other classes; whether juvenile fiction is placed under fiction pure and simple, or is reported under the general heading "juvenile books"; for without this information, and a few other things which will be here referred to, no one can accurately judge of the work being done by any given library.

The main point, however, is the injustice done the library by the attempt to measure its value to a community solely by the books issued for home reading. A visit to any library of considerable size will reveal the fact that most of the real work is done in the library rooms; that for every book other than fiction taken home, from eight to 15 will be used in the building; and that in certain seasons, and especially in educational centers, this proportion will be largely increased. This is true especially of the library small in comparison with the population of the city in which it is located and with limited means—this latter a condition all but chronic west of the Allegheny mountains. A large proportion of this use of books in the library is compulsory (if they are to be used at all), for various reasons, chief among which is the inability of the library to supply a sufficient number of copies of a given book or to provide enough other works upon the same subject to meet a large but temporary demand. For instance, a study club with an extensive membership, or a high school or college class, is given a subject to look up, with references to comparatively few volumes. The library could increase the "home circulation" of books other than fiction by issuing these few volumes to the first comers of either the club or the class, while the other, for various reasons, later applicants at the library would be deprived of the use of any

of them. The rule in most of these libraries, in these emergencies, is to reserve these volumes for use in the library, on the basis of "the greatest good for the greatest number." With a number of such clubs and classes, one may readily see how a library could change its circulation statistics if it would. Again, these libraries, unable to purchase more than one copy of valuable works or one set of periodicals, place them in the reference room for use in the library exclusively, where no record is kept of their use, these rooms and shelves usually being open to the public. Here at times they have a wonderfully extensive use.

Thus, a library of 25,000 volumes in a city of 100,000 inhabitants may be doing a large amount of commendable work, of lasting value to a community, while its published statistics may show a "home use" of more than 80 per cent. fiction. Another library of 75,000 volumes in a similar city may not be doing any better work, yet its home circulation may be but 60 per cent. fiction, or less.

Figures are often more than misleading, but in nothing else so much as in so-called "library statistics."

## RURAL FREE DELIVERY AND THE LIBRARY.

THE greatest boon ever conferred upon farming communities by the United States government has come with the dawn of the twentieth century. It is that of free rural mail delivery. Through this new agency, isolated people may come in contact with the great outside world through the medium of the daily paper. As an evidence of this, an example may be cited of a county in which in former days there was but one rural subscriber to the daily press, while at the present time 69 families are reading the morning journal; and the death of the Queen of England is known almost as soon 26 miles from Tomahawk, Wisconsin, as it is in New York City.

Rural mail delivery offers the opportunity for which those interested in library extension have long waited, to secure to farmers the same privileges as are enjoyed by city folks, and it should lead to the establishment of many new county libraries or the conversion of city libraries into such institutions. In lieu of this, municipal libraries should extend their privileges to farmers without cost or by arrangement with the boards of surrounding settlements. Many rural letter-carriers will be found willing to collect the lists of books desired and deliver the volumes free of charge or for a mere pittance. The drawback to the delivery of a single volume rests, however, in a postal regulation which prohibits the carriage of packages under four pounds in weight without being stamped at the usual book-rate, though larger packages may be carried by private arrangement. This ordinance makes the issuance of single volumes some-

what expensive and hinders the operation of the new system. The advocates of library extension are working for the abolishment of the regulation so far as it pertains to the distribution of books from free libraries. Travelling libraries have done a wonderful work in bringing good books into the homes of isolated farmers, but a travelling library has its limitations. It must cater to the wants of the many with its miscellaneous selection, thus neglecting the would-be scholar whose interest centers on a particular line of study. Again, unless travelling libraries are constantly reinforced with new books, but little opportunity is given rural readers to learn of new discoveries in science or of the world's progress from month to month. A community, for example, that is in a circuit of 30 boxes exchanged every six months would be 15 years behind the times in the world of science and history at the expiration of the circuit of boxes, were not constant additions made of volumes pertaining to current topics. With rural free delivery of books, an inquirer need not wait more than 24 hours for the receipt of the latest works on the world's progress. It should be the pleasure of librarians everywhere to see to it that the wants of their rural neighbors are supplied, making their libraries veritable sources of information, inspiration, and refreshment to those who will most appreciate and profit by the blessings conferred. L. E. STEARNS.

#### LIBRARY LEGISLATION IN WISCONSIN.

At the recent session of the Wisconsin legislature a number of new laws affecting libraries were enacted:

1. Directing the library commission to make an explanatory check list of the state documents. The law further provides that the state printer shall send an advance copy of each document published by the state (including the bulletins of the state university, geological and natural history survey, State Academy of Arts and Sciences and kindred organizations) to the commission, which shall print cards for the card catalogs of the public libraries and send a copy of each document, with the appropriate cards, to each public library in the state. An annual appropriation of \$1500 is provided for this purpose. This law is of especial importance, because the annual reports of most of the important state organizations with educational or philanthropic purposes are printed by the state.

2. An increase of \$5000 annually in the appropriation to the State Historical Society to be used for the purchase of books.

3. Reducing the number of library trustees in each of the cities or villages of less than 10,000 inhabitants, where libraries may be established in the future, from nine to six, and providing for a gradual reduction in the number in libraries now established.

4. More fully describing the form of the annual reports of public libraries.

5. Providing that a township which contributes one-sixth or more of the annual income of a public library in a neighboring village or city shall choose a member of the board of trustees.

6. Permitting the common councils of cities which receive gifts for library buildings to bind their successors to make annual appropriations not exceeding 15 per cent. of the amount of such gifts to maintain the buildings and the libraries which they house.

#### LIBRARY LEGISLATION FOR INDIANA.

THE act "for the establishment, increase and maintenance of public libraries in cities and incorporated towns" in Indiana, recently passed by the legislature of that state, gives to Indiana its first satisfactory general library law. It repeals all former laws for organization and maintenance of public libraries, except such acts as were drawn to fit certain conditions in certain localities. It provides that any library already established may reorganize under the present act, while all new libraries must be established according to its provisions. The new law authorizes common councils or town boards to levy a library tax of not more than six-tenths of a mill on each dollar of taxable property. If such a levy is not made by the city authorities, it must be made after the taxpayers raise "by popular subscription, for each of the two years immediately following the date of the completion of such subscription, a sum of money equal to the amount that would be derived from a tax levy of two-tenths of a mill on each dollar of the taxable property, provided that not more than two per cent. of the entire amount necessary to be subscribed shall be subscribed by any one person, firm or corporation." Provision is made for the creation of a public library board, appointment of members (three by the judge of the circuit court, two by the common council, and two by the school board), not less than three of whom shall be women; and the duties of library boards are defined. A township library levy of two-tenths of a mill is authorized, provided library privileges be extended to all inhabitants of the township. It is also provided that libraries managed by associations or other bodies may be transferred to a public library board for maintenance as free public library, subject to acceptance by vote of the city council.

The law is regarded as well adapted to aid in the library development of the state. Heretofore library legislation in Indiana has been practically prohibitory, among the various restrictions and hindrances being a provision that no public library could be established until its board had succeeded in raising \$1000, or the equivalent in books.

### THE NEW BRITAIN (CT.) INSTITUTE LIBRARY.

THE new building of the New Britain (Ct.) Institute, shown elsewhere, is an interesting addition to the library architecture of the year, combining, as it does, the features of an institute with those of a public library. The dedication exercises were held on Jan. 20, as noted in these columns (L. J., February, p. 97), and on March 4, by vote of a special town meeting, a yearly municipal appropriation was granted to it on condition that the library be made free to the public. This condition—long desired by the library authorities—was carried into effect on May 1.

The library building was about two years in course of construction, and its total cost, including site, was \$104,000. It stands on a lot about 200 x 160, with the short side toward the principal street, which makes an obtuse angle of the street upon which the building faces. Both on account of the angle of the lot and the shape, it was decided to face the building toward the minor street, and the result is entirely satisfactory. The building itself is about 55 x 100, with a stack wing about 35 x 40, so that it has an ample setting upon the lot. The building is in the Renaissance style, but with details derived rather from the Greek than from Italian sources. In point of composition the aim was to express the library part of the building, which is confined to the first floor, by use of the order for this story. The materials of the exterior are rusticated Milford granite for the basement story, and light buff Ridgway brick, trimmed with limestone colored terra cotta, for the main story and attic.

The entrance is by a vestibule under the stairs into the staircase hall. The stairs are thus at one's back on entering, which further subordinates the upper story. The axis is turned from the entrance to the right and left by a large fireplace, and on the one hand is the delivery room, a continuation of the main hall, and on the other hand the main reading room, occupying the entire end of the building. On either side of the fireplace are doors to the reference room.

The work space and entrance to the stack are immediately back of the delivery desk, and there is a service staircase and a book lift in this space. From the work space open, on either side, the librarian's room and the cataloging room. A children's room is also on this floor.

There is an entrance under the main entrance directly to the basement. Books are received in this way, and separate access is had to the newspaper room, which is located here. The toilet rooms, janitor's quarters, boiler rooms, etc., are accommodated in the remainder of the basement.

On the second floor there is an assembly hall accommodating about 200 people, a direc-

tor's room, an art room with top light, and a room for historical collections.

The stack has an ultimate capacity of about 80,000 volumes, and the stack wing is so arranged that it can be prolonged, if in years to come it should be needed. There are four floors of stack, which is of metal throughout, with glass floors and wood shelving, furnished by the Library Bureau.

The interior finish of all the first floor is light oak, the second floor is whitewood painted, and the stack and basement yellow pine. Glass partitions are used in the library floor where practicable, and bookshelves five feet high line the walls, the windows being over them and extending to the cornice of the rooms. All floors in the library rooms are covered with "corticine."

### THE NEW YORK PUBLIC LIBRARY AND THE CATHEDRAL LIBRARY.

CONSIDERABLE comment has been caused in the New York City press by an address delivered on April 17 by Archbishop Corrigan at a social meeting of the Cathedral Library Association, held at the Hotel Majestic. It sounded a strong note of protest against the possible merging of the Cathedral Library into the organization and under the direction of the Public Library, as a result of the recent Carnegie gift and the tendency toward local library consolidation. The present status of the Cathedral Library, as an institution chartered by the state university and receiving a yearly city appropriation based upon the circulation of its books, was noted; and the affiliation of the New York Free Circulating Library with the Public Library and the merging of library interests in Brooklyn were referred to as indicating the probable course of events in relation to the Cathedral Library. In setting forth the reasons why the library could not consolidate with the Public Library Archbishop Corrigan said: "First, the Cathedral Library is church property; it would not, therefore, be suitable for us to relinquish the title to it. Second, if the New York Public Library is to assume complete control of the library administration of New York, we would have no representation on its board of trustees. From that point of view the consolidation would be unfortunate, as the preponderating—we may say the entire—interests of the present board of trustees are non-Catholic. Third, the purpose of our library would be destroyed by any such consolidation. We were established in order to counteract the evil influences of public libraries in general, to supply people with innocuous reading, and to minimize, as far as possible, the harm that can be done by dangerous books. If the control of the public libraries pass to the Public Library, with no provision made for representation of Catholic interests, it is quite evident that the work represented by the

Cathedral Library will in no wise differ from that of other public libraries; and so our efforts at preventing the dissemination of dangerous literature will receive a serious check, as we cannot without city aid carry on to such an extent the work that we have been doing." It was pointed out that the Cathedral Library was the third largest library in New York City, containing now over 55,000 volumes. During 1900 its circulation exceeded 300,000 volumes. It has 11 branches, and travelling libraries in over 20 parochial and private schools. "It exercises a rigid supervision over the books purchased for it, and also a surveillance of the reading indulged in by young people. It is evident that if the Cathedral Library were blotted out, no matter how many public libraries there might be, it would be injudicious and unwise to have our Catholic people use them, on account of the ever-increasing danger of which they are the center." Emphasis was laid upon the difficulty of properly supervising the use and character of books in the library if consolidation should take place, and reference was made to various books commonly found in libraries that were regarded as injurious to morals and calumnious of Catholic doctrine, and to the paucity of Catholic literature in most public libraries. "The loss, therefore, to Catholic intellectual interests in this city by the discontinuance of the work of the Cathedral Library would be irreparable." Three remedies were suggested: "First, to allow the present library law to remain operative, effectual, and to continue to grant to the Cathedral Library its *pro rata* share. Second, to place at the disposal of the Cathedral Library at least three sites in the Borough of Manhattan and one in the Borough of the Bronx, where the Cathedral Library branches might be built; such branches to remain under the control of the Cathedral Library corporation under its present charter and responsible either directly to the city of New York or to a library commission, to be composed jointly of representatives from the New York Public, from the other circulating libraries of New York, and from the city government. Third, if it is deemed desirable to consolidate all the libraries in the city of New York, such consolidation should consider the interests of the smaller libraries, and not compel them to consolidate with the New York Public Library, but to form a library board or commission, on which the New York Public Library would have its representation, but on which also the other libraries of the city would have secured to them a similar representation."

Commenting on this address, the *Evening Post* says: "Here is the problem: Shall the circulating libraries which, under the direction of the Public Library, the city is to support, form a consolidation or a federation? Shall they all be subject to the authority of

the library trustees, or shall they retain virtual autonomy? No one can doubt how this question will be answered. If the largest Roman Catholic library in town is to receive city aid and to control three branches, why not a Hebrew library, a Christian Science library, a Presbyterian, an Anarchist, a Seventh-Day Baptist, a Spiritualist, a Unitarian, a Socialist, and so *ad infinitum*? Any such politico-religious apportionment would be clearly impracticable, and, if possible, disastrous. Nor is there any injustice to these religious and political sects in denying them control of any part of the Public Library. A voice they already have. If a Roman Catholic scholar needs a book on Catholic theology, the Public Library will do its utmost to get it for him. If the Fathers are incompletely represented, it is because other demands are more urgent and other needs greater. It is the element of public support that must determine policy. The more libraries privately controlled and supported, and the more diverse their aim, the better. But any aid that the city has accorded to sectarian libraries has been provisional, in default of a better system. When the city has its own library system, aid to libraries not therein included should be discontinued."

#### LIBRARY DEPARTMENT N. E. A.

THE annual meeting of the Library Department of the National Educational Association will be held in connection with the session of the general body, at Detroit, Mich., July 11 and 12, 1901. The sessions will be held in the Central M. E. Church Chapel, and the following program will be presented:

##### Thursday afternoon, July 11:

President's address. R. G. Metcalf, superintendent of schools, Boston.

The library movement and what it means. Dr. J. H. Canfield, librarian Columbia University.

The library and the school in the south. G. F. Boyd, president Mississippi State Teachers' Association.

Address by representative of American Library Association.

##### Friday afternoon, July 12:

How shall children be led to love good books? Miss Isabel Lawrence, State Normal School, St. Cloud, Minn.

The place of the library in education. Melvil Dewey, N. Y. State Library.

The library and the school as co-ordinate forces in education. Livingstone McCartney, superintendent of public schools, Hopkinsville, Ky.

The officers of the department are: President, R. G. Metcalf, Boston; vice-president, Jerome H. Raymond, Morgantown, W. Va.; secretary, Miss M. E. Ahern, editor *Public Libraries*, Chicago.

## American Library Association.

*President:* H. J. Carr, Public Library, Scranton, Pa.

*Secretary:* F. W. Faxon, 108 Glenway st., Dorchester, Mass.

*Treasurer:* G. M. Jones, Public Library, Salem, Mass.

*23d General Meeting:* Waukesha, Wis., July 3-16, 1901.

### COMMITTEE ON BY-LAWS.

H. M. Utley has been appointed chairman of the A. L. A. committee on by-laws, succeeding F. M. Crunden, resigned.

### WAUKESHA CONFERENCE.

#### TRAVEL ANNOUNCEMENT FOR EASTERN MEMBERS.

A circular giving full announcement of travel arrangements for the Waukesha Conference is nearly ready for distribution. It is expected that the attendance at this meeting will exceed 400, and a large eastern representation is hoped for.

The various passenger associations have authorized a rate of a fare and one-third on the usual certificate plan, *going and returning by the same route.*

In order to get any advantage from this rate it will be necessary to purchase full first-class tickets to Waukesha, and at the *same time* ask for certificates issued to those attending the A. L. A. meeting at Waukesha, Wis. These forms may be obtained at all important railroad stations and coupon ticket offices. If a through ticket cannot be procured at the starting point purchase to the nearest Trunk Line point, and then buy ticket to Waukesha.

*No reduction in return fare can be obtained without the certificate, which must be countersigned at the meeting by both the secretary and the special agent of the passenger associations.*

The rate of a fare and one-third will especially benefit those who must go and return as quickly as possible via the same roads.

Tickets by this plan may be purchased not earlier than June 30, nor later than July 6th, returning from Waukesha not later than July 19.

#### PERSONALLY CONDUCTED TRIP.

Following the custom of past years, a special trip has been planned for the eastern members, covering some interesting features.

The Boston party will leave Southern Terminal Station at 2 p.m., July 2, joining the New York delegation at Detroit the next morning.

The going trip will be via Boston & Albany, New York Central, Michigan Central, and Chicago & Northwestern Railroads. Returning, the steamer *Northland*, of the Northern Steamship Company, will be taken at Milwaukee, Wednesday, July 10, at 8 p.m., for

a sail of two and one-half days through Lakes Michigan, Huron, and Erie to Buffalo, where a stop-over privilege will be allowed by the railroad.

In order to obtain the lowest rate the whole party must travel from Boston and New York and back to Buffalo on *one* ticket, thus obliging those who start on the trip to keep with the party until Buffalo is reached. At the latter point, upon payment of \$1 by members of the New York party, and a small extra payment by Boston delegates, single tickets will be issued to those who wish to remain longer at the exposition than the committee has arranged, providing the main parties returning from Buffalo to starting point contains at least 10 people, otherwise every one will have to pay the additional amount.

The cost of this rail and water trip is as follows:

Boston to Waukesha and return (10 or more in party).....	\$38.00
To which should be added, to cover cost of sleeper and meals going, and stateroom,* sleeper and meals returning .....	21.00
A single railroad ticket from Boston to Waukesha and return, covering the above route, will be.....	46.25

(The above estimate includes seven meals *a la carte* on steamer, estimated at \$4, and sleeper, Buffalo to Boston. If day coach to Boston is taken a saving of \$1.50 can be made.)

New York to Waukesha and return (10 or more in party).....	\$39.30
To which should be added, to cover cost of sleeper and meals going, and stateroom,* sleeper and meals returning .....	21.00
A single railroad ticket from New York to Waukesha and return, covering above route, will be...	42.85

Hotel accommodations and \$1 for execution of single tickets not included in above estimates.

Rates from other local points may be obtained by addressing the New York Central Railroad, 1216 Broadway, New York City.

If the party is large enough special hotel arrangements will be made for the Buffalo stay.

The eastern travel committee is made up of H. J. Carr, Scranton, Pa.; F. W. Faxon, 108 Glenway street, Dorchester, Mass., and Frank P. Hill, Public Library, 26 Brevoort Place, Brooklyn, with one of whom arrangements for the trip should be made.

Librarians and others intending to join the excursion party should obtain information from and register with the nearest member of the travel committee *as soon as possible.*

Other sections are in charge of the follow-

\* This means three individuals in an outside room. Special rates for special accommodations.

ing persons, from whom full information may be obtained:

Lake Erie region, Charles Orr, Case Library, Cleveland, O.

Indiana, Cincinnati, and points south, W. E. Henry, State Library, Indianapolis, Ind.

Central Illinois, St. Louis, and Mississippi Valley, south, Purd B. Wright, Public Library, St. Joseph, Mo.

Omaha and points west, Purd B. Wright, Public Library, St. Joseph, Mo.

Delegates from Chicago, and those who will arrive there not with parties mentioned above, should communicate with Rutherford P. Hayes, 31 Washington street, Chicago, member A. L. A. travel committee for the west.

#### EASTERN PARTY: ITINERARY.

Leave Boston via Boston & Albany R. R., 2 p.m., Tuesday, July 2.

" Worcester, 3.05 p.m., Tuesday, July 2.

" Springfield, 4.33 p.m., Tuesday, July 2.

" Albany, 7.50 p.m., Tuesday, July 2.

" Detroit, 8.25 a.m., Wednesday, July 3.

Leave New York via New York Central R. R., 1 p.m., Tuesday, July 2.

" Albany, 5.45 p.m., Tuesday, July 2.

Leave Buffalo via Michigan Central R. R., 1.40 a.m., Central time, Wednesday, July 3.

" Detroit (Breakfast), 8.25 a.m., Wednesday, July 3.

" Niles (Lunch), 1.30 p.m., Wednesday, July 3.

Arrive Chicago, 4 p.m., Wednesday, July 3.

\*Leave Chicago via Chicago & Northwestern R. R., 6 p.m., Wednesday, July 3.

Arrive Waukesha, 8.30 p.m., Wednesday, July 3.

#### Returning.

Leave Waukesha, by special train, if number warrants, via Chicago & Northwestern R. R., Wednesday afternoon, July 10.

Leave Milwaukee via Northern Steamship Company, 8 p.m. (Central time), Wednesday, July 10.

Leave Macinac, 5 p.m., Thursday, July 11.

" Detroit, 12.30 p.m., Friday, July 12.

" Cleveland, 10.00 p.m., Friday, July 12.

Arrive Buffalo, 10 a.m. (Eastern time), Saturday, July 13.

Leave Buffalo via New York Central R. R., 8.40 p.m. (Eastern time), Monday, July 15.

Arrive Albany, 4.10 a.m., Tuesday, July 16.

" New York, 7.25 a.m., Tuesday, July 16.

" Boston, 10.35 a.m., Tuesday, July 16.

It is hoped that the eastern and western delegations will meet at Chicago and travel to Waukesha by special train.

#### HOTEL ACCOMMODATIONS.

The Fountain Spring House has been selected as headquarters, and will accommodate all who attend. Rates have been made as follows:

\$2.25 per day each, two persons in a room. (If two beds are desired rate will be \$2.50.)

\$2.50 per day, one person in a room.

Rooms with bath, 50 cents per day extra for each occupant.

Persons who desire less expensive accommodation will find boarding houses and smaller hotels not far away. Those who expect to attend the meeting should notify F. W. Faxon, secretary, as soon as possible.

\* Special train if number warrants, otherwise time of leaving Chicago will be 8 p.m., arriving Waukesha 10.55 p.m.

## State Library Associations.

### CONNECTICUT LIBRARY ASSOCIATION.

*President:* H. M. Whitney, Blackstone Library, Branford.

*Secretary:* Miss Anna Hadley, Ansonia Library, Ansonia.

*Treasurer:* Miss J. P. Peck, Silas Bronson Library, Waterbury.

The spring meeting of the Connecticut Library Association will be held at the Blackstone Memorial Library, Branford, on Tuesday, May 21. The program is as follows:

Morning session, 10.30 a.m.

Business.

Welcome and introduction to the Blackstone Library, Dr. C. W. Gaylord, secretary board of trustees.

English and American libraries, Andrew Keogh, Yale University Library.

Incidents in the early history of the Boston Public Library, J. L. Whitney, Boston Public Library.

Afternoon session, 2 p.m.

The public and library methods, Miss F. B. Hawley, New York.

Discussion.

Lunch will be served at the library at noon, and the afternoon session will give opportunity for full inspection of the building.

### DISTRICT OF COLUMBIA LIBRARY ASSOCIATION.

*President:* F. A. Crandall, Office of Documents.

*Secretary:* Hugh Williams, Library of Congress.

*Treasurer:* F. E. Woodward, 11th and F streets.

The 55th regular meeting of the association, held in Carroll Institute hall, April 17, was called to order by the president at 8.45 p.m. The minutes of the preceding meeting were read and approved. Mr. Weston Flint, who will represent the association at the annual meeting of the American Library Association at Waukesha, Wis., was called upon. He earnestly requested the attendance of a large delegation of Washington librarians at the Waukesha meeting.

The president then welcomed the vice-director and students of the New York State Library School to the association. He recalled with pleasure his visit to the Library School and New York State Library before entering upon his duties as superintendent of documents. In responding to Mr. Crandall, Mrs. Fairchild, the vice-director of the school, dwelt upon the need of capable reference librarians. She suggested that reference librarians be trained in special subjects, as university men are trained for professorships. She ventured the opinion that the coming library school would be a part of the university, where one or two years would be devoted to professional training, and two or three years to the study of special subjects. She also

pointed out the lack of sympathy between librarians of different types, *e. g.*, public and college librarians.

Miss Anne S. Ames, librarian of Mt. Vernon Seminary, then read a sympathetic paper on Mlle. Marie Pellechet, the noted woman librarian of France. She gave a biographical sketch of Mlle. Pellechet, and noted in some detail her monumental contributions to the bibliography of incunabula. George William Hill, chief of the publications division of the Department of Agriculture, presented concisely the difficulties arising from the "Multiplication of series in the publications of the Department of Agriculture." He appealed to librarians to help him in solving the problem. L. C. Ferrell, superintendent of documents, read an admirable historical paper on the "Public documents of the United States," which will be later published in the LIBRARY JOURNAL. The last speaker of the evening was the Hon. Ainsworth R. Spofford, whose paper, entitled "Some library experiences," dwelt most interestingly upon some of the chief events of his 40 years' service as Librarian of Congress. He described the slow development of plans for the new building and the many difficulties met with under former conditions, and touched entertainingly upon the varied demands of readers.

The meeting adjourned at 10.40. There was an attendance of 160 persons.

HUGH WILLIAMS, *Secretary.*

#### IOWA LIBRARY ASSOCIATION.

*President:* A. P. Fleming, Public Library, Des Moines.

*Secretary-Treasurer:* Miss H. L. McCrory, Public Library, Cedar Rapids.

The 12th annual meeting of the Iowa Library Association will be held in Burlington early in October. Sessions have been arranged to fill three days, from a Wednesday to Friday, and a program has been outlined, as follows:

#### *Wednesday:*

2 p.m.—Address of welcome. President's address.

2.30 to 5.30 p.m.—Papers and discussions on "Libraries and the public," "Practical work with children in the library," "Schools and libraries."

8 p.m.—Reception.

#### *Thursday:*

9 a.m.—Reports of officers and committees.

9.30 a.m.—College libraries.

10 a.m.—Public documents. List of those valuable to small libraries. How they can be made useful to the public.

10.30 a.m.—Library extension and publicity.

2 p.m.—Excursion on the river.

8 p.m.—Address by prominent librarian.

#### *Friday:*

9 a.m.—Business meeting.

9.30 a.m.—Round table on practical work, conducted by Miss Alice Tyler, secretary of the Iowa Library Commission.

11.30 a.m.—Question box.

## Library Clubs.

### BIBLIOGRAPHICAL SOCIETY OF CHICAGO.

*President:* Camillo Von Klenze, University of Chicago.

*Secretary:* Aksel G. S. Josephson, John Crerar Library.

*Treasurer:* Carl B. Roden, Chicago Public Library.

The second annual meeting of the Bibliographical Society of Chicago was held in the John Crerar Library, April 4, 1901.

The following new members were elected: Dr. Francis W. Shepardson, University of Chicago; Dr. Ralph C. H. Catterall, University of Chicago; Mr. Clarence W. Perlev, the John Crerar Library; Mr. E. A. McClean, New York City.

The secretary read the following report of the council:

"REPORT OF THE COUNCIL OF THE BIBLIOGRAPHICAL SOCIETY OF CHICAGO FOR THE YEAR 1900-1901.

"The council has met eight times during the past year. Two vacancies have occurred in the council and have been filled by the council. The treasurer, Miss Caroline L. Elliott, resigned and was succeeded on Oct. 9 by Mr. Carl B. Roden, and on Nov. 14 Mr. Camillo Von Klenze was elected president to fill the vacancy caused by the removal from the city and consequent resignation of Mr. Charles H. Hastings.

"The committee on publications has issued the first year-book of the society, containing papers read before the society, by-laws, list of members, etc., and the first of the society's contributions to bibliography: 'Bibliographies of bibliographies, by Aksel G. S. Josephson.' Both of these publications have been sent to members free of charge.

"The committee on private libraries, appointed in February, 1900, made a preliminary report only, consisting of a draft of a circular to be sent to book collectors in Chicago, and a list of book collectors. The committee was relieved from further duty and the matter put in the hands of Mr. J. W. Thompson, who will report on what he has accomplished.

"At the January meeting of the society the secretary submitted a plan for the preparation of a complete bibliography of American literature on cards and with electrotypes for the entries, and for a Bibliographical Institute to carry out this and similar undertakings. A committee, consisting of Messrs. C. W. Andrews, F. H. Hild and C. B. Roden, was appointed to consider the plan. The committee has reported "that they recognize the importance and value of the suggestion and the usefulness of such an institute, but they do not think that the society as such is in a position to take action in the matter. They hope that the development of biblio-

graphical work in the Library of Congress may secure for American bibliography many of the advantages outlined in this plan."

"At the February meeting Miss M. McIlvaine read a paper on the 'Indexing of bibliographical periodicals,' which was followed by an interesting discussion resulting in the council being asked to investigate the possibility of the preparation of such an index. Under the authority of the council the secretary has put himself in communication with members of the society to insure co-operation in the preparation of such an index and with the Publishing Board of the American Library Association, with the view of having the index published under the auspices of the Board. Some half dozen members of the society have agreed to co-operate, and a letter has just been received from Mr. W. I. Fletcher, of the Publishing Board, stating that the Board will be ready to issue a card index to some twenty bibliographical serials indicated in the letter of your secretary, as far as covered by subscriptions, and that a circular soliciting subscriptions, with a list of these serials, will be issued in a few weeks.

"Eleven new members have been elected by the society, and four have joined in response to invitations sent out at the organization of the society and renewed at the beginning of the present working year. The council will now close admission in response to these invitations. Four members have resigned and 11 have by non-payment of the first year's dues signified their withdrawal. The society has now 73 resident and 25 non-resident members."

The treasurer reported: receipts, \$342.40; disbursements, \$226.28; cash on hand, \$116.12. Sale of publications: Year-book, 1899-1900, 14 copies; Bibliographies of bibliographies, 108 copies.

Mr. J. W. Thompson, for the committee on private libraries, reported slow progress. Sixteen answers had so far been received.

Mr. R. C. H. Catterall read a paper on "Recent literature on the Cromwellian era of English history."\*

The following members of the council were elected: Camillo Von Klenze, president; Mrs. Mary H. Wilmarth, vice-president; Aksel G. S. Josephson, secretary; Carl B. Roden, treasurer; Clement W. Andrews; Mabel McIlvaine; James W. Thompson.

AKSEL G. S. JOSEPHSON, *Secretary*.

#### CHICAGO LIBRARY CLUB.

*President*: W. B. Wickersham, Public Library.

*Secretary*: Miss Margaret E. Zimmerman, John Crerar Library.

*Treasurer*: C. A. Torrey, Chicago University Library.

The April program of the Chicago Library Club was devoted to the subject of Illustra-

tion. Mr. Walter Marshall Clute, of the art department of the *Daily News*, delivered an interesting address on "Book illustration." Mr. Clute compared the illustrators of to-day with those of the early days of art work, and then outlined the history of illustration, tracing the development from the crude scratchings on stone to the complete and finished picture which we find in the modern book. The various kinds of illustrations which have been in use during the present century were named and explained—and a plea for the illustrator as a recognized artist closed the address.

Through the courtesy of Mr. Chapin, art editor of *Scribner's Magazine*, Mr. Clute had secured several pen and ink drawings, originals of the pictures in the current number of *Scribner*, and a pleasant half hour was spent at the close of the meeting, viewing the exhibit made up of these original drawings and the interesting examples of color printing which Mr. Frederic S. Osgood had sent for exhibition. Mr. Osgood read the second paper of the evening, which was entitled "Color printing as illustrated by modern color photography." It consisted of an elaborate exposition of the methods used in modern processes of color printing.

The pictures, beautiful in themselves, were of far greater interest when the process of their making had been explained. Adjournment took place at 9.30, and the remainder of the evening was spent in viewing the exhibit.

MARGARET E. ZIMMERMAN, *Secretary*.

#### LONG ISLAND LIBRARY CLUB.

*President*: Miss M. W. Plummer, Pratt Institute Free Library, Brooklyn.

*Secretary*: Miss M. S. Draper, Children's Museum of Brooklyn Institute.

*Treasurer*: Miss Mabel Farr, Adelphi College, Brooklyn.

The May meeting of the Long Island Library Club was one of the largest and most enjoyable meetings which the club has held. On the afternoon of May 2 about 40 members of the club met at the Shelter House in Prospect Park, where luncheon was served, thereby affording an opportunity for social intercourse. The members then adjourned to the Art Gallery of the Brooklyn Institute of Arts and Sciences, on the Eastern Parkway, where the subject of Nature Study was discussed in a series of papers.

About 80 persons had assembled when the meeting was called to order by the president. The names of 11 persons were proposed for membership in the club, and they were duly elected.

The subject of affiliation with the New York State Library Association was considered, and it was voted that the question be laid on the table.

Miss Plummer, chairman of the committee on co-operation between libraries, reported progress in regard to a library bulletin. Miss Moore, chairman of the committee on co-

\* This paper will be printed in the forthcoming Year-book for 1900-1901.

operation between libraries and schools, reported progress.

The next regular business of the meeting was the election of a secretary, as Miss Julia B. Anthony declined to serve. The balloting resulted in the choice of Miss Miriam S. Draper.

After some remarks by Mr. R. R. Bowker on the Department Libraries of the Brooklyn Institute of Arts and Sciences, Dr. R. Ellsworth Call, curator, gave an address on the "Children's museum: the place it is intended to fill in education." The speaker stated that this museum is not intended for amusement or research, but is designed to assist in nature study. It is unique in character, and its prime object is to have a complete local collection of birds, reptiles, fish, shells, rocks, etc. Teachers may bring entire classes, and may conduct lessons in nature study. Two or three courses of instruction are given each year to teachers, which they may adapt to the needs of children, the aim being to learn by personal contact that nature is a great sympathetic, living unit.

Miss Miriam S. Draper, librarian of the Children's Museum, then read a paper on "Scientific libraries for children." The evolution of the nature book was traced from the old style, which furnished bare statements of fact, to that of the present time, which requires an abundance of good illustrations in addition to clear and simple statements of facts in accordance with the science of to-day. Young children are interested in books illustrated by color photography. In considering the best nature books for children, we must take into account not only those written especially for them, but the best books which are adapted to their use. In the special library of the museum are being collected all the latest and best nature books not only for the use of children, but also for the use of all students, members of the Humboldt Club, and teachers.

One of the most suggestive papers of the day was given by Miss Aida W. Barton on "How the teacher may interest children in nature study." Miss Barton gave some hints from her own experience as a teacher. First of all, the teacher herself must have an interest in nature, and then she may arouse the interest of the city children in the bits of nature around them, as the life of the meadow, brook, and wood is out of the reach of many children. At this season of the year even the children in the city may observe the fresh awakening of all nature. Interest in nature may be strengthened by stories drawn from the teacher's observation and experience. The direct gain of the child from nature study was pointed out to be the development of his power of observation, the broadening of his sympathy, and, above all else, he should have learned a lesson of truthfulness.

Miss Annie C. Moore, in charge of the children's room, Pratt Institute Free Library, was the next speaker. In introducing her

subject, "How the children's librarian may interest the children in nature," she said that the children's librarian must get out of doors, in the woods and fields; and through her own love for nature only can she interest children. She spoke of the place that natural objects have in the children's library, and of the value of encouraging children to lend their treasures for the benefit of other children. A monthly calendar entitled "Out of doors," containing some pictures and poems and quotations appropriate to each month, has proved to be of value to children.

A few remarks were then made by Mr. E. W. Gaillard, librarian of the Webster Free Library, New York, who stated that in his library natural history specimens are placed side by side with the books. The specimens of minerals and rocks, as well as models of the eye, heart and ear are loaned to the public schools. The books on these subjects are in great demand, and cannot be kept in the library.

The meeting then adjourned, after which members of the club were kindly conducted through the museum by the curators in charge of the several departments.

MIRIAM S. DRAPER, *Secretary.*

#### NEW YORK LIBRARY CLUB.

*President:* Dr. H. M. Leipziger, Aguilar Library.

*Secretary:* Miss E. L. Foote, New York Public Library.

*Treasurer:* Miss Theresa Hitchler, Brooklyn Public Library.

The annual meeting of the New York Library Club was held on Thursday, May 9, at the University Settlement, 189 Eldridge street. The afternoon was rainy, but about 60 persons gathered in one of the pleasant parlors of the Settlement house, where they were welcomed by Miss Grace Phillips, librarian of the Settlement. The president, Mr. Eames, called the meeting to order at 3.30 p.m., and the minutes of the last meeting were read and approved.

The following officers were elected for the coming year: President, Dr. H. M. Leipziger; vice-president, Rev. J. H. MacMahon; secretary, Miss E. L. Foote; treasurer, Miss Theresa Hitchler.

The program contained only two papers, the first being an extremely interesting account of "The public card catalog of the New York Public Library," by Dr. J. S. Billings. This will be published later in the LIBRARY JOURNAL. Rev. Dr. MacMahon, of the Cathedral Library, followed with a paper on "Reading circles as a help to the library," describing the methods and results of the reading circle connected with the library which he directs. This association was formed with the purpose of systematizing the reading of individuals and directing it along profitable lines, and it has developed to be of real service in the work of the library. The reading is done under supervision, reports of progress by

readers being submitted to the criticism of the director, but the courses are made as flexible as possible, allowing more or less depth of study. "The Cathedral Library supplied the books indicated in the course, most of which were purchased from the funds of the reading circle. In this way and at once the circle began to be of benefit to the library." Lists of books on related and sometimes on lighter topics were furnished from time to time, and every effort was made by the library to supply these books as needed. "In this way we think we have benefited also other libraries. As it was absolutely impractical to purchase a sufficient number of copies of these books to satisfy the wants of the members, we advised them to apply for these books at libraries conveniently situated. Their requests, as a rule, were courteously received, and the books were usually purchased for them. Our work in this direction led to a wide correspondence with libraries of all sorts and conditions through the country, and we have been able to furnish satisfactory lists to different libraries on subjects with which they themselves were familiar." Other means by which the circle had made itself useful to the library were noted, as the critical passing upon new novels submitted for purchase, the indexing for the card catalog of current periodical literature omitted from the Poole and "Cumulative" indexes, and the establishment of two series of public lectures in connection with which suggestive lists of reading are given out, thus rounding out the library's collection. The membership of the circle was stated as 210, and its influence upon the members and upon the library had been proved to be most helpful and far-reaching.

At the close of his paper, upon request of the president, Dr. MacMahon read a statement of the remarks recently made by Archbishop Corrigan regarding the possible consolidation of the Cathedral Library with the New York Public Library, as noted elsewhere in this issue. The treasurer's report, presented by Miss Hitchler, showed receipts of \$431.28, expenses \$175.82, and a balance of \$255.46. The meeting then adjourned, and after refreshments had been served and enjoyed, many of the visitors were conducted through the varied departments of the interesting and admirably equipped Settlement house, under the guidance of Miss Phillips.

ELIZABETH L. FOOTE, *Secretary*.

#### WESTERN MASSACHUSETTS LIBRARY CLUB.

*President:* W. I. Fletcher, College Library, Amherst.

*Secretary:* Miss Ida F. Farrar, City Library, Springfield.

*Treasurer:* Mrs. A. J. Hawks, Meekins Memorial Library, Williamsburg.

The first of a series of library institutes under the auspices of the Western Massachusetts Library Club was held in Sunderland, April 9. These institutes are the outgrowth of a feeling on the part of some of

the members of the club that more ought to be done for the small country towns, where people have not yet come into vital touch with the modern library movement, and where librarian and teachers may not have realized how closely they may work together.

At this meeting, which was a type of others to be held, an effort was made to have present the library trustees, teachers, and as many as possible of the townspeople of Sunderland and of seven of the adjoining towns. The following program was carried out in a very informal way, with Mr. W. I. Fletcher, of Amherst College, presiding:

4.30.—Address, Value of the library to the community, W. I. Fletcher.

Paper, How to reach outlying districts, Miss Dorcas Tracy, Forbes Library, Northampton.

Discussion and questions.

6.—Supper and inspection of new library building.

7.—Address, Relation between the library and the school, G. H. Danforth, superintendent of schools, Greenfield.

Address, The scope of the public library, Miss M. A. Tarbell, Brimfield, president Bay Path Library Club.

The second of these conferences will be held at Williamsburg, May 31.

IDA F. FARRAR, *Secretary*.

## Library Schools and Training Classes.

### NEW YORK STATE LIBRARY SCHOOL.

#### ANNUAL LIBRARY VISIT.

The 10th annual library visit, which took place April 9-22, and included New York, Brooklyn and vicinity, Philadelphia, Baltimore and Washington, fully equalled previous visits both in pleasure and profit, if the appreciation of the students may be taken as the standard. The trip covered much the same ground as in 1899 (*see* L. J., 24:222). Three new buildings completed since that date were visited, those of New York University, Newark Free Public and Jersey City Free Public libraries, all of them most interesting to those who have studied the problems connected with planning a noble and convenient library building.

At Columbia, through the courtesy of Dr. J. H. Canfield, we visited other departments of the university, including Barnard College.

A new feature was a delightful evening spent at the Grolier Club. The president, Mr. Howard Mansfield, gave a brief address on the purpose of the club, and Mr. H. W. Kent spoke in a very interesting way on the proposed scheme of classification. The rest of the evening passed quickly in enjoyment of the book treasures and an exhibition of engravings. The Webster Free Library was added to the list of libraries in New York visited by a small party of students, and well repaid the choice.

We attended two suggestive library club meetings, in Philadelphia and in Washington. The former included a most enjoyable reception given by the Philadelphia Free Library in the palatial rooms of the H. Josephine Widener branch. An important feature of the Washington meeting was a characteristic paper on "Some library experiences," given by Dr. Ainsworth R. Spofford at the special request of the school.

In the lecture room of the Jersey City Library we enjoyed a luncheon given by Dr. Leonard Gordon, of the board of trustees, and Miss Esther Burdick, the librarian.

We made the acquaintance of the Pratt Institute instructors and students very pleasantly over a cup of tea, and enjoyed a wonderfully rich exhibit of early printed books.

Miss Kroeger will long be held in grateful remembrance for her thoughtfulness in arranging during our evening at Drexel Institute an organ recital, which contributed both to rest of body and peace of mind.

Fortunately the mildest day of our trip was the one spent at Bryn Mawr. Here we were royally entertained by President Thomas and by the three library school students on the library staff—Miss Lord, Miss Borden, and Miss Prentiss. The president honored us by sharing in the festivities.

In Baltimore we were "personally conducted" by Miss Aimée Guggenheimer, of the library school class of '09, who played most gracefully the part of hostess in her native city.

A strong point was made this year of the study of library work in branches, a new committee of six students being formed for the purpose. Twelve branches in New York City, six in Brooklyn, a delivery station in Jersey City, two branches in Baltimore and seven in Philadelphia were visited by small parties, and as a result much light was thrown on a subject which gathers significance in the light of the recent Carnegie gifts.

The advantages of the trip are already manifest. The students have gained a keener insight into the complex problems that await them, a fund of first-hand data on which to work them out, a better grasp of the situation as a whole and a heartening sense of the spirit of good comradeship which prevails in the library world.

#### RECENT LECTURES.

Lectures have been given as follows:

Mr. R. G. Thwaites, Parkman's historical work.

Mr. Gardner M. Jones, Some topics in administration; Some topics in cataloging.

Mr. W. E. Foster, Reference work (2 lectures); Work with schools (2 lectures); The standard library.

Mr. C. A. Cutter spent the first week of April in the school. The students laid aside other work and classified about 300 books by the Expansive classification.

SALOME CUTLER FAIRCHILD.

## Reviews.

MORRAH, Herbert, *ed.* The literary year-book and bookman's directory, 1901. New York, F. P. Harper, 1901. 12+420+46 p. D. \$1.25.

Though it possesses no bibliographical features of importance, this volume should be a useful addition to the librarian's reference shelves. Some improvements have been made in this second annual issue, especially in the direction of compactness of arrangement. The volume contains various special articles on literary subjects, as "The year's work, 1900," "The Authors' Pension Fund," "Book sales of 1900," "Copyright," etc., but these are subordinated to the full classified directories of authors, artists, binders, printers, booksellers, clubs, periodicals, plays, publishers, reviews, societies, etc., and like data. The material presented is, of course, almost exclusively English, but in the book and author lists some American names are included, on no very clear principle of discrimination. There is a section given to "Libraries," but the record is very inadequate, only 29 being listed, and this is followed by a carelessly made list of "Great libraries of the world." The list of societies should be useful for library reference, as should the lists of publishers, booksellers, and members of the French Academy. The directory of authors covers 111 pages, and gives considerable data for catalogers in the direction of full names and pseudonyms. A selection of the pseudonyms recorded, covering those less generally known, is given elsewhere in this issue, but confidence in the entire accuracy of the information is somewhat shaken by finding, on p. 240, that Charlotte Mary Yonge is listed as a *nom de plume*. Leading books of 1900 make an interesting selected list, each title being accompanied by extracts from various—and generally conflicting—reviews. On the whole, the annual contains a mass of miscellaneous literary information, conveniently arranged.

MUSS-ARNOLT, William. Theological and Semitic literature for the year 1900: supplement to the *American Journal of Theology* (April, 1901). Chicago, Chicago University Press. 108 p. 75 c.

The quarterly bibliographies which were formerly appended to each number of the *American Journal of Theology* have been abandoned, and in their stead appears this annual summary of the previous year's output of books and magazine articles. It is proposed by the editors to issue this bibliographical supplement in the April number of each year hereafter.

The compiler of this work, Dr. Muss-Arnolt, is a Semitic scholar of distinction, whose Assyrian dictionary is well known and who has had large experience in bibliographical work. Perhaps his best known work in this line is the index to the first 25 volumes

of the *American Journal of Philology*. He has compiled the bibliographies in the four earlier volumes of the magazine in which his present work appears.

The design of the compiler apparently is to list all books, series, and periodical literature of importance, in the field of theological and Semitic studies. In any subject of such wide ramifications as theology, ranging as it does from tracts to profound philosophical or linguistic treatises, an exhaustive bibliography is as little needed as it would be difficult to make. A careful study of the present work results in a favorable impression of the compiler's discretion in his selections.

The large quarto page of the journal is divided into two columns for the purpose of printing this bibliography, and a smaller type is used for the entries of magazine articles than that employed for books. Abbreviation is carried to an almost extravagant extent, even initials of authors are omitted, and yet the list reaches a total of 108 pages. Prices are given for books in the monetary notation of the country in which the book is published. Books in practically all the languages of Europe and emanating from all schools of theology are included.

The bibliography of Semitic studies covers but seven pages. This division, however, does not include works on the Old Testament which are placed under Theology. The classification of the theological works is interesting. Its main divisions are the familiar ones: Prolegomena, Exegetical theology, Historical theology, Christian art and archaeology, Systematic theology, and Practical theology. The terminology of this and the other parts of the classification is open to serious objection, but the manner in which the subdivisions have been worked out is worthy of praise.

The chief value of the bibliography lies in its extensive citations from periodical literature. The compiler has listed articles in 230 magazines and series in eight languages. There are no annotations except an occasional cross-reference. Reviews of books are listed under the entry of the book itself, but are confined to a few out of the many works cataloged. The chief fault of the work appears to be its excessive use of abbreviation, perhaps a necessary evil on the score of time and expense. There is a good list of these abbreviations, and an index which remedies many of the difficulties caused by the classification.

W: W. B.

PHILLIPS, P. Lee. A list of books, magazine articles, and maps relating to Brazil, 1800-1900: supplement to the Handbook of Brazil (1901) compiled by the Bureau of the American Republics. Washington, Government Printing Office, 1901. Cover-title +145 p. O.

This work, by the Chief of the Division of Maps and Charts in the Library of Congress,

is arranged as follows: Books, p. 5-84; Magazine articles, p. 85-104; and Maps, p. 105-145. Although lacking a prefatory statement of any kind, we may infer that the compiler aimed at completeness for the period indicated. This is a reasonable supposition, since he goes outside of the books within his immediate reach at the Library of Congress, and even quotes copies in the British Museum and books mentioned in the catalogs of the Paris bookseller, Chadenat. We regret being obliged to state that, had he used the "Bibliographie Brésilienne" of A. L. Garraux, of which he records the title, he could have added several hundred more books to his list. This is not placing too much value on the work of Garraux, which is itself a rather faulty and disappointing compilation. It does indicate, however, that bibliography by government officials should at least be thoroughly digested before being put into print. We find also that Mr. Phillips's headings are sometimes at fault and names are misspelled. Why, we may ask, does he introduce an occasional title which relates only to the primitive history of Brazil, when at the same time he omits the great source books for the earlier periods? If it was his intention, as we believe, to cover only the period between 1800 and 1900, why should this earlier subject matter have been included at all? We find also, for example, that he records only one work or so by a particular author, who has written several separate books that deserved a place in the bibliography. In his list of maps he invariably gives the size, but in scarcely any case is the scale indicated, which is of much more importance to the cartographer. Mr. Phillips's contribution will have its relative value. He is a competent worker and could have done better. It is, therefore, the more regrettable that he has not in this instance sustained the good reputation to which he is otherwise entitled.

Y. M. C. A. LIBRARY OF NEW YORK. Catalogue of the Circulating Department, July, 1900. New York, 1901. [5], 519 p. Q. \$1.50.

The too short list of printed, up-to-date library catalogs has received a valuable addition in the present volume—a catalog which in binding, paper, type, and general make-up is one of the most attractive to appear in recent years. It is a substantial quarto, tight backed, and opening flat at any page; and printed by linotype. It runs two columns to a page, and the headings and call-numbers, at opposite sides of the column, stand out well in black-face gothic type. The body of each entry is in 8-point Roman, notes and contents are in nonpareil, no italics are used.

Dictionary form has been adopted, giving, in one straight alphabet, authors, joint-authors, titles, subjects, series, analytics, and references. In most particulars the Library School rules have been closely followed. Main

entries consist of author's name, generally in full—followed by date of birth or dates of birth and death; fairly full title; data as to number of volumes, illustrations, date of publication; series note; and the call-number, carried to the right-hand margin. All this data, with the exception of the author's dates, is repeated under subject.

This library follows the reactionary tendency which is now so evident in giving that form of an author's name last used by the author in publishing. Thus we have Harte, Bret; Allen, Grant; Hope, Anthony; Howard, Blanche Willis; Alexander, Mrs., *pseud.*; Blanchan, Neltje, *pseud.*; the author's actual name not appearing at all. When an author has no second initial, the first name is given in full in all entries.

The catalog has several typographical peculiarities, none of them particularly happy features for the user. One of the most confusing is the use of the dash in case of several subject headings beginning with the same adjective, even when separated by the entry of many books, as:

- Political parties.
- reform.
- science.

When a title is to be repeated, we have, instead of the familiar "Same," a very long dash indented.

Headings carried over to the following column or page have nothing to indicate that they are continued, and the general public would therefore almost surely miss the preceding books under an author or a subject. It is also awkward in glancing down the alphabet to find that the initial article, when retained, is never inverted, even in headings.

The sign & is invariably used for the spelled-out word—in headings, joint authors, imprint, even in the body of the title. Authors who appear also as subjects are most eccentrically treated. Longfellow, for instance, is given as follows:

- Longfellow, Henry Wadsworth. (Bibliography.)
- (Criticism.)
- Longfellow, Henry Wadsworth, 1807-82. Poetical works.
- Prose works.
- Mass. Historical Society. Tributes to Longfellow.
- Underwood, F. H. Henry Wadsworth Longfellow.

Why the bibliographies and criticisms of an author should precede his works under a separate heading and the "tributes" and biographies follow his works under the same heading is a mystery to the writer, but this inconsistency is consistently adopted.

There is every evidence that the work as planned has been most carefully carried out. Analytics, references and cross-references abound, and decidedly specific subject headings are used, as "Literary life," "Sea life," "Political corruption," "Political literature." Popular, rather than scientific, headings are used throughout. Countries and other geo-

graphical divisions are very fully subdivided. Under "Autobiography," we find a list of autobiographies contained in the catalog. Fiction is very fully listed under subjects, forming a second alphabet in each case.

Mr. Berry, the librarian, states in his prefatory explanation "that the circulating department is composed of books selected from the general collection, which was not brought together with the intention of forming a circulating library. One may be surprised that a certain well-known work is not found in the catalog, when it is probably in the Reference Library, but in a form too large or too costly to circulate." Yet taking all this into consideration, it is unfortunate that a circulating department of 15,000 volumes should contain no copy of the "Arabian nights" or "Don Quixote," nor any treatise on Roentgen rays or Christian science.

Inclosed with the catalog is a broadside called "A word with the librarian," in which Mr. Berry gives technical information regarding the preparation of "copy," printing, and binding, that will be of much interest to those contemplating the printing of a catalog.

F. B. H.

---

## Library Economy and History.

---

### GENERAL.

ANTRIM, E. I. The latest stage of library development. (*In Forum*, May, p. 336-340.)

Describes the organization and work of the Brumback Library, Van Wert, O., as opening a new field of library extension, that of library development in counties.

CANFIELD, James H. The average young man and his library. (*In Cosmopolitan*, April, p. 609-612.)

Advice upon the formation and development of the reading habit. Much of it is sound and well put, though one may doubt whether "the average young man" is likely to heed the behest to shun "the serious mental injury caused by rapidly scanning the morning paper while on your way to work or during the first few hurried moments of office hours. If you can read *en route*, daily, slip into your pocket Henry van Dyke's 'Other wise man,' or any of the convenient little *16mos* which you can pick up for a quarter. This is far and away better than any morning paper."

ILES, George. The public library and the public school. (*In The World's Work*, May, 1901, p. 775-6.)

Reviews the main lines of co-operative work between library and school, developed from the beginnings made in 1879 at the Worcester (Mass.) Public Library.

*The Library* for April contains a variety of excellent material, among the articles being a study of "Library statistics," by John Minto; "Descriptive cataloging," by James Duff Brown; "Admission to public libraries in Great Britain," by John Ballinger, who pleads for less red tape restriction; and several bibliographical papers of interest.

*The Library Association Record* for March contains a most valuable paper, giving "Suggestions for the description of books printed between 1501 and 1640," by J. P. Edmond; and an excellent article on "Book selection and rejection," by Thomas Aldred. In the April number Mr. Aldred's paper is supplemented by a paper "On the choice of books for small libraries," by F. J. Burgoyne.

RANCK, Samuel H. Library progress in the 19th century. (*In Reformed Church Review*, April, p. 194-203.)

A good summary review of library development in the past, and a brief outlook on the future. "As a disseminator of sunshine and of knowledge the library enters upon the 20th century with every prospect that its mission to mankind is only in the years of its infancy."

SMITH, Katherine Louise. Railroad traveling libraries. (*In Outlook*, April 27, p. 961-3.)

Reviews the library work carried on by various railroad systems—the Boston & Albany, Baltimore & Ohio, Y. M. C. A. railroad branches, Seaboard Air Line, and Wells Fargo Express Co.

UTLEY, H. M. The reading dissipation. (*In Journal of Education*, April 4, 1901. 53:217-218.)

The teacher is the only person in a position to guide the child intelligently in his reading, as a rule. "The question is not how to induce all children to read more, but how to persuade many of them to read less."

#### LOCAL.

Atlanta, Ga. Carnegie L. (2d rpt.—year ending Dec. 31, 1900.) Added 1521. Issued, home use 13,921; membership 557. Receipts \$51,607.59; expenses \$46,518.65 (building and grounds \$40,094.38).

The year was one of work preliminary to installation in the new building, which it is hoped may be opened in the early autumn of 1901. In the catalog department 12,650 v. were classified and cataloged, at a total cost of \$1993.90, or an average cost of 15 cents per volume. An apprentice class of five was conducted, several of the members leaving during the year to take up library work temporarily elsewhere. The circulating department was kept open for the use of members only, owing to the impossibility of arranging for general public use in the present

restricted quarters, but the library has been free for reference, and its capacities in this direction have been severely taxed.

Augusta (Ga.) Y. M. L. (Rpt.—year ending April 1, 1901.) Added 626; total 9530. Issued, home use 6912. Use of books in the rooms was three times that of the year preceding. The library was closed for eight days for refitting and re-decoration. Miss Campbell says: "Our list of subscribers has also been much increased, and there is to be found among them 19 of the public school teachers. The rate has been reduced for teachers, and we hope in time to be able to class them all as regular annual subscribers."

Baltimore, Md. Enoch Pratt F. L. (15th rpt., 1900.) Added 8977; total 204,337. Issued, home use 643,466 (fict. and juv. 67+ %); reading room use 104,421. New registration 6938; total cards in force 34,263. Expenses \$46,555.12 (books \$8121.20, periodicals \$1631.69, binding \$2207.75, salaries \$24,497.32).

Several new agencies for the distribution of books were established during the year, including branch no. 7 at Woodberry and Hampden, housed in an attractive building erected by Robert Poole, and two new delivery stations. A box of books was also sent fortnightly to the Female House of Refuge.

Referring to loss of books, Dr. Steiner states that since the library was opened, in 1886, 238 v. have disappeared; "the risk of loss was 1 to every 25,789 of circulation in 1900."

Beginning May 1, 1901, the library began a system of daily delivery of books from the central library to the branches and stations. This will be tried as an experiment three months.

Beaver Falls, Pa. The necessary conditions preliminary to Andrew Carnegie's gift of \$50,000 for a library building having been fulfilled, Mr. Carnegie has instructed the library authorities to draw on him for the sum in amounts as needed.

Boston Athenaeum L. (Rpt., 1900.) Added 5498; total 198,703. Issued 59,608. No. shareholders 816; non-proprietors using library 859. The chief accessions of the year are noted. "Much of the library work of the year needs little or no mention. An effort has been made to obtain quickly a larger number of periodicals from abroad by ordering them to come by mail; but as the postage often equals or exceeds the subscription price this is a drain upon our income."

Brookline (Mass.) P. L. (44th rpt.—year ending Jan. 31, 1901.) Added 4378; total 55,441. Issued, home use 118,092 (fict. 63 %), being 5.9 v. per capita of population. Receipts \$15,780.15; expenses \$15,578.72 (books and periodicals \$1180.79; binding \$965.78; salaries \$6146.16).

The year has shown an unprecedented growth in circulation, amounting to 13 per cent.; quality has improved also, the percentage of fiction being 63, as against 68 in 1899. The publications of the library have included the bi-monthly bulletin of accessions, of which 4000 copies are printed and one copy distributed by the police to each family of the town; a list of French and German books, and one of books for teachers; a "List of books for boys and girls," which was sold to residents at 3 c. and to non-residents at 30 c. per copy; a catalog of the photograph collection, and the revised and enlarged catalog of fiction. Mr. Wellman says:

"In order to prevent the future littering of the fiction shelves with novels of ephemeral interest, we have instituted the practice of entering all works which though of present interest are of doubtful permanent value in a temporary accession catalog on probation, so to speak. They thus must prove their fitness after a year or more of trial before being admitted to a permanent place in the library." He adds: "With the completion of these lists the library finds itself unusually well equipped as regards special printed catalogs. There is contemplated, however, a small printed guide to explain the contents of the chief works of reference." A complete reclassification of the library is greatly needed, and it is recommended that a classifier and assistant be engaged for this special work.

An inventory shows an average of 91 volumes missing annually for 10 years, of which two-thirds are juvenile. The facts indicate that one or more persons, probably juvenile, "are deliberately stealing the town's books. All juvenile books have been removed from the delivery hall for the purpose of stopping these depredations, and every effort will be made to detect the thief." An interesting report is given on the school reference collection.

*Brooklyn (N. Y.) Institute, Children's Museum L.* The report of Miss M. S. Draper, librarian of the Children's Museum, for the month of April contains some interesting facts regarding the work of the library since its opening in last July. The total attendance since July 1, 1900, was 11,562, and the library at the present time contains 1390 v. It is believed that "the character of the use of the library has been steadily improving, and that an increasing proportion of persons come for information, and a smaller number come simply for amusement." During April the collection was twice visited by pupils of the Deaf Mute School; it was also inspected by students from the New York State Library School and the Pratt Institute Library School. "Many teachers have made use of the books; in a few instances books have been loaned to them for a limited time. The teachers in charge of summer schools in New York spent two hours one afternoon in careful examina-

tion of books on botany, taking notes from them, and making a selective list for the summer's work."

*Brooklyn (N. Y.) P. L.* The appointment of W. A. Bardwell, librarian of the Brooklyn Library, to be assistant librarian of the Brooklyn Public Library, is regarded as indicating marked progress toward the consolidation of the Brooklyn Library and possibly the Long Island Historical Society Library with the Public Library. The *Brooklyn Eagle* says editorially: "By this proposed consolidation the Brooklyn Public Library will secure a nucleus of 200,000 books and two valuable buildings for the purposes of the new library composed of many branches. The present Brooklyn Library is excellently placed to be a distributing branch, while the fine Historical building would be serviceable for many other uses of the Public Library. Starting with such an equipment, the Brooklyn Public Library will be in an excellent position to enforce its claim for autonomy, or a Brooklyn administration for a Brooklyn interest. That is what we must have for the public library service to become really efficient here. The impending consolidations will make its accomplishment easier."

*Brooklyn, N. Y. Pratt Institute F. L.* The library recently brought together its first exhibition, illustrating the history of book-making. It has been arranged to show the development from the earliest Egyptian and Assyrian inscriptions to the modern book.

The first case contains Assyrian terra-cotta tablets, Cingalese papyrus books, ancient and mediæval manuscripts; and here are three manuscript examples of the book of hours, French, of the 16th century. The German books of the 15th and 16th centuries are very fine examples, and among these is a Bible with pictures colored by hand, crude when judged by our present color ideals, yet full of the simple charm of early art.

There are books printed by Aldus at Venice, and by Caxton and Wynken de Worde. As a supplement to these is a group of photographs from Italian illuminated missals and richly wrought book covers.

The case of modern printing contains three books from the hand of William Blake, a book by William Morris, and pages from the best recent American printing. The Japanese and Chinese books, lent by Mr. Arthur W. Dow, are extremely interesting and varied, and the picture of a printer's shop illustrates the use of the simple outfit shown here, together with the block of wooden type and the engraver's tools. In the Oriental collection lent by Mr. D. Z. Noorian and Mr. Dikran Kelekian are copies of the Koran written and illuminated upon the most silky of vellum sheets, Armenian and Hebrew scrolls, and Assyrian seals and cylinders.

There is an exhibit illustrating the making of type, and one showing the half-tone process and that of wood engraving.

Owners of rare and interesting books have been most generous in lending their treasures, and the library is indebted to the Library of Columbia University, the General Theological Seminary, the Union Theological Seminary, the Century Company, Mr. Frank E. Hopkins, of the Marion Press in Jamaica, Mr. R. R. Bowker, Miss Florence Foote, Miss M. G. Prat, Messrs. Truslove, Hanson & Comba, the Bruce Type Foundry, and Edward E. Bartlett & Co. From the private library of a Brooklyn gentleman who prefers to be anonymous were lent some of the most rare and beautiful books.

*Buffalo (Ill.) F. P. L.* (Rpt.—year ending April 1, 1901.) Added 128; total "nearly 4000." Issued, home use 6816; lib. use 539. Number visitors 9418. Receipts \$1166.56; expenses \$545.54 (librarian \$280).

*Carnegie, Pa. Andrew Carnegie F. L.* The library was informally opened to the public on Wednesday, May 1, when 172 books were issued and 175 borrowers were registered. The handsome building, which cost \$120,000, is fully equipped and in excellent working order, but some finishing touches are still to be given, and the grounds are to be improved. A formal opening will be held in the autumn, when the work is completed, and when it is hoped that Mr. Carnegie and his family may be present.

*Cedar Rapids (Ia.) F. P. L.* (4th rpt.—year ending Dec. 31, 1900.) Added 1161; total 5872. Issued, home use 34,662 (fict. 15,754; juv. 13,825). Cards in use 4745. Visitors to reading room 81,006. Receipts \$5674.99; expenses \$5622.90.

An attractive and interesting report, setting forth the record of a fruitful year. The most notable event was the installation of the library in larger quarters, giving increased facilities for future expansion and usefulness. A building known as Dow's Auditorium was leased and fitted up, the auditorium on the second floor being reserved for other uses. The library, thanks to systematized preparation, was moved from the old to the new building in three days; "the papers and magazines were brought on the last load, the absorbed readers coming along with them, calmly finishing their articles when they arrived in their new quarters." The new building provides a large room for reference and circulating departments, ample accommodations for office, work room and stock room, and above all for a convenient, attractive children's room. Of this Miss McCrory says: "It is lighted by five large windows. The walls are tinted a soft green like the rest of the library, and are partly covered with an old fisherman's seine, which gives us an opportunity to hang many unframed pictures without damaging the walls. Good friends have given us plants for window boxes and a show case is filled with wonderful lichens found in the woods near Cedar Rapids. The

special day bulletin board and burlap screen give us extra space when we need it for exhibits. The room has proved so attractive that children come to us in overwhelming numbers; over 400 children who have never used the library before have registered during the last three months. We have thought it wise to separate the children's department from the adult in every possible way. The decorations in the room have been carefully planned. Each month some special thought has been carried out, all leading in one way or another to books."

The children's reading club has been re-organized, and a course of 12 lessons has been given to children in the library and schools, the admirable outline for which follows Miss McCrory's report. Four apprentices have been added to the library staff, and classes in library economy, current topics, reference work, etc., have been held. Plans are already made for much future work with schools, including school-room libraries and the reorganization of the High School library. Several exhibits were held during the year, and an annual "library day" has been instituted, its first celebration being described by Miss McCrory in *L. J.*, April, p. 201.

*Chicago P. L.* A collection of 300 v. has been set aside for the use of the workmen employed on the Chicago water-works cribs. The books will be divided among the five cribs, where there are employed at certain seasons of the year 200 or more men, and will be transferred from one crib to another. The newly-equipped free reading room for the blind was opened on April 20. Until its usefulness is proved it will be open only on Saturdays. Instruction in reading will be given by the Social and Mutual Advancement Association. There are 500 books for the blind in the cases.

*Cincinnati (O.) P. L.* A movement for the aid of blind readers was begun on March 19 with the inauguration of the Cincinnati Library Society for the Blind. The objects of the society are defined as: "(1) To provide a teacher or teachers to find out and visit the blind at their homes in Cincinnati and its vicinity. (2) To provide a free circulating library of embossed books for the blind. (3) To send volumes to blind readers at distant points, where there are no local libraries of such books. (4) To provide readings and entertainments for the blind." The librarian of the Cincinnati library is *ex-officio* a member of the board of managers, and the society's collection of books are to be deposited at and managed from the library. Since October last the library has arranged for occasional readings to blind persons, and it already possesses a small collection of books in raised type.

*Concord (Mass.) F. P. L.* (28th rpt.—year ending Jan. 31, 1901.) Added 865; total 31,909. Issued, home use 29,484 (fict.

and juv. 66 %). Receipts \$1132.45; expenses \$976.34.

More shelf-room is needed. The library committee urges suggestions from borrowers regarding book purchases. A special book was long ago reserved for such recommendations, but in 10 years only 1500 entries have been made in it, "and many of these have been made by members of the committee." They add: "Now it is manifestly impossible for this committee or any committee to be familiar with all the new books and capable of judging of their quality"; and they urge that suggestions in this line be made to the librarian.

*Connellsville, Pa. Carnegie L.* A design has been accepted for the new Carnegie library building. The floor plans consist of a general reading room, children's reading room, periodical room, reference room, stack room, delivery lobby, toilet room and side halls on the first floor. The delivery lobby is reached by the main entrance, and also by the side entrances, with the reading rooms on either side of the lobby. The delivery desk is so situated in the delivery lobby that every part of the first floor and stairways leading to the second is visible from same, providing complete supervision of the whole and allowing free access to the shelves for the public. The partitions separating the reading room from the delivery lobby and stack rooms are glass. The entrance to and the exit from the stack room is through turnstiles, making it necessary for every one that goes to or from the stack room to pass out by the delivery desk.

The eight stacks in the stack room have a capacity of about 16,000 volumes, which may be trebled by superimposing fourteen more stacks of same size and connecting them with balconies. The reading room will have nine tables, each 3 x 5 feet, with seats for 54 people. The second floor contains an assembly hall with a seating capacity of 450, trustees' room and committee room. The basement contains a work room for unpacking, repairing, etc., boiler room and three large rooms to be used as directed by the trustees.

*Easton, Pa.* The Carnegie library gift of \$50,000, which was refused by the school board on March 14, on account of the increase of tax levy involved, was accepted by vote of the school board on April 11, the first decision being rescinded after assurances had been received that the site for the building would also be given to the city. The much-discussed half-mill tax will be levied for library maintenance. The subject was brought up again by a committee of citizens who felt the need of the library, and who had pledged themselves to give the money that might be required to buy a suitable site on which to erect a library building. The first subscriptions received were enough to assure the board that the sum required would be

donated. Most of those who contributed to the fund had asked that their names should not be made public. The gift was accepted by a vote of 17 to 6.

*Evanston (Ill.) P. L.* The city council has formally approved the recent action of the library board in deciding to issue bonds for the purchase of a \$45,000 site for a new building. This will enable the city to avail itself of the offer of a \$100,000 library, made by Charles F. Grey, of Evanston, on condition that a site be assured.

*Grove City, Pa.* On April 11 a suit in equity was begun by a number of leading citizens against the borough of Grove City and Grove City College, in behalf of the taxpayers of the borough. The object of the suit is to have set aside the ordinance passed by the council one year ago, accepting the gift of \$30,000 from Andrew Carnegie for establishing a free public library, with the attached condition that the borough pay \$1800 a year perpetually for maintenance, the assessed valuation of Grove City at that time being \$414,100. The council, wishing to accept Mr. Carnegie's offer, entered into co-partnership with Grove City College, giving to the college control of the library by appointing a library committee of five, three of whom were trustees of the college. In consideration of being given the controlling interest in the library the college agreed to give a site for the library, and did so, reserving the right to have it revert to the college at any time the college management might desire. It is claimed that the contract, if legal, creates a debt in excess of the constitutional limit. For this reason it is asked that the agreement be declared void and that the borough and college be restrained from carrying out their contract.

*Jersey City (N. J.) F. P. L.* (10th rpt. — year ending Nov. 30, 1900.) Added 3059; total 70,545. Issued, home use 420,468 (fict. 75.3 %); ref. use 67,822. Attendance at reading and ref. rooms 104,023. New registration 4905. Receipts \$43,616.71; expenses \$22,415.56 (salaries \$8833; books \$3261.69; binding \$1567.89).

Contrary to expectations, the library year was finished before removal to the new building could be effected.

Of the total home circulation of 420,468 v., 244,580 or 58.1 % were issued through the 16 delivery stations. Through the school room libraries sent to several public schools, 10,469 v. were circulated. There are 616 special teachers' cards now in active use. "The new registration, begun in 1898, now stands at 12,806."

*Johnstown, N. Y.* The city council at its meeting on April 15 adopted formal provisions for establishing a free library, and appointed a board of trustees for the ensuing year. Arrangements will be promptly made for carrying out plans for the Carnegie library building recently offered.

*Kansas City (Mo.) P. L.* (19th rpt. — year ending June 30, 1900.) Added 3353; total "some 50,000 v." Issued, home use 189,566 (fict. 98,525; juv. 61,443); reading room use 75,740. 9907 borrowers' cards are recorded.

An interesting report, with numerous illustrations. Mrs. Whitney, the librarian, says: "The usefulness of the library has been increased, and its sphere has been widened, by the annexation of the Westport Library, as a branch, and by the addition of two more substations, making seven in all." The page system has been introduced in the delivery room, children's room and stack room with most satisfactory results both to the library staff and to the public. The children's room has been so well used that "if the space devoted to this department could be enlarged to four times its present size, nothing more could be desired by either librarian or the children, except an ever-increasing number of books." Several class lists were issued during the year and it is hoped that the 10 sections of the printed catalog will soon be completed.

The work of the several departments are given separate descriptive notice, and the report as a whole indicates a most creditable state of activity and development.

*Library of Congress, Washington, D. C.* On April 13 the Library of Congress sent out to 260 libraries in the United States a circular letter requesting tabulated information regarding systems of classification used, methods and processes in cataloging and other record-keeping. The questions specify, among other details, size and form of catalog card, extent and character of yearly accessions, and data as to bulletins or special lists. Sample copies of catalog cards and catalog entries are requested. It is stated that the inquiry is made "in the particular hope to render more widely useful to American libraries the bibliographic work of the Library of Congress." Much of the information asked is already partially in possession of the Library of Congress, but it is hoped that libraries will repeat and amplify the data, if necessary, to give complete material for the present investigation, which, it is thought, may prove valuable in connection with plans for co-operative printed catalog cards.

*Malden (Mass.) P. L.* (23d rpt. — year ending Dec. 31, 1900.) Added 2784; total 37,133. Issued, home use 135,722 (fict. 75.92%), of which 43,408 were from the children's room; lib. use 8187. Cards in use 23,042. Receipts \$17,313.50; expenses \$13,311.63.

The record of the year has been one of "success and increased power," notably in the children's room and by means of the six local delivery stations. The most notable event of the period was the gift of the \$125,000 Elisha S. and Mary D. Converse endowment fund, previously recorded in these columns. The income from this fund will be "used freely in any direction in which it may conduce to the welfare of the library."

During the year four photographic exhibitions were held through the Library Art Club.

*Massachusetts State L.* (Rpt. — year ending Sept. 30, 1900.) Added 4306 v., 5384 pm. The amount expended for books, periodicals, etc., was \$6543.14, for binding \$1091.82.

Appended is the "Annual supplement to the catalogue," listing accessions for the year, and a valuable "Catalogue of the laws of foreign countries."

*Michigan, public libraries in.* A plea for the development of public libraries in Michigan through the agency of women's clubs of the state is made in March-April numbers of the *Interchange*, the club publication, by Mrs. Mary C. Spencer, state librarian. A brief statement is included of the aid offered in this direction by the State Library Commission.

*Mosinee, Wis. Joseph Dessert P. L.* (2d rpt. — year ending Feb. 15, 1901.) Added 100; total 812. Issued 4504 (fict. 3564, of which 1781 was juv.). New borrowers 110; total active borrowers 387. Visitors to reading room 7310, of whom 4311 were children. Receipts \$59.44; expenses \$57.58.

*Mt. Vernon, N. Y.* A bill has been passed by the state legislature amending the charter of Mount Vernon by authorizing the city to expend \$4000 annually for the maintenance of a public library. This insures the establishment of the \$35,000 Carnegie library.

*Nashville, Tenn. Howard L.* Miss Mary H. Johnson, the librarian, has made a general statement of the regulations of the library, as it has been reorganized on a free circulating basis, which is printed in the local press. The library has decided to require only a reference from borrowers, instead of adopting the guarantee system. Persons still holding membership cards will be entitled to draw two books at a time, until their membership expires. Books will also be reserved for readers on post-card notification.

*New York F. C. L.* (21st and final rpt., 1900.) Added 13,742; total 166,598. Issued, home use 1,634,523 (fict. 544,058); hall use 125,033; reading room attendance 203,505. New cards issued 25,166; total registration 172,929. Receipts \$93,198.81; expenses \$89,839.07.

This, the final report of the library prior to its merging of identity with the New York Public Library, fittingly includes a brief historical sketch of the development brought about in the 21 years since the library had its inception as a reading club connected with a children's sewing class conducted through Grace Church. In 1880 a beginning had been made with 1000 volumes, and through the aid and enthusiasm of interested helpers the library system was gradually developed to reach all classes of readers and nearly all sections of the city. The report is brought as closely as possible to the date of consolidation, by supplementary tables of statistics.

A serious loss was sustained by the library, by the death in December, 1900, of J. Norris Wing, after 19 months' service as chief librarian. Mr. Wing was succeeded in February by A. E. Bostwick, formerly librarian, who as chief of the circulation department of the New York Public Library now has charge of the operations of the library.

The report, as usual, gives brief notes on the work of each branch in the system. Enforced economy resulted in reduced purchases of books and in the Sunday closing of the libraries for circulation—the latter being effected without apparent hardship to readers. "The general health of the staff has been better than usual, and this perhaps has been largely owing to a reduction of working hours, which was made possible by the closing on Sunday." Statistics of hall use will hereafter be abandoned, owing to the difficulty of keeping such records in connection with the open-shelf system. "The open-shelf system continues to give great satisfaction, and on the whole for libraries of this kind it must be considered a very much better method than our old one." A serious objection, however, is found in the loss of books, which in some of the branches has been very heavy.

*New York P. L.* The bill enabling New York City to accept the Carnegie library gift of \$5,200,000 was signed by the Governor on April 27. A public hearing on the bill was held by Mayor Van Wyck on April 15, at which there was a very small attendance, and no opposing arguments were presented.

*Newark (N. J.) F. P. L.* (12th rpt.—year ending Dec. 31, 1900.) Added 77,297; lost 251. Issued, home use 341,899 (juv. 21.5%; fict. 59.2%); visitors to ref. dept. 13,936 (no record of ref. use is kept). New registration 6069; total registration 80,767. Receipts \$108,233.30; general expenses \$37,942.05 (books \$4351.78; binding \$2191.90; salaries \$17,393.67), new building account \$50,000, balance \$20,291.25.

The circulation for home use is divided as follows: individual cards 331,526, teachers' cards 6634, school cards 2654, firemen's cards 248, high school branch 837. About 21 per cent. of the circulation (71,719 v.) was through the eight delivery stations. The number of school travelling libraries has been raised to 10, of 50 v. each. Requests for permanent branch libraries in schools have been made by several principals and selected graded lists have also been asked for. Miss Hunt, in charge of the school and children's work, urges that more money be appropriated "as time goes on, for carrying our books to the thousands of children who are seldom able to walk the long distance to the library building or who cannot afford to pay two car fares for every book they read." As the report closes just prior to the removal to the new building no special recommendations are made.

*Newark (N. Y.) F. P. L.* The Rew Memorial Free Public Library building, the gift of Henry C. Rew, of Chicago, was dedicated on April 9. The exercises, which were held in the local opera house, were elaborate and largely attended. Addresses were delivered by the giver, H. C. Rew, and by W. R. Eastman, representing Melvil Dewey. The library was open for inspection during the afternoon and evening of several days preceding. It stands on the site of the Rew homestead, and cost \$15,000. The equipment, including many rare and handsome pieces of furniture and ornaments, cost \$5000 additional. The book capacity is 10,000 v. and there are now 3100 on the shelves. Miss Ono M. Imhoff, of the New York State Library School, is at present organizer and librarian.

*Newton (Mass.) F. L.* (Rpt.—year ending Dec. 31, 1900.) Added 2505; total 59,389. Issued, home use 167,076 (fict. 56.42%), of which 97,038 v. were delivered through the various agencies. New registration 1296; total registration 12,676. Receipts \$13,107.16; expenses \$13,073.70. West Newton branch, receipts \$1345.27; expenses \$1306.97. Newton Centre branch, receipts \$1000; expenses \$1000. Auburndale branch, receipts \$1000; expenses \$1000.

There were 25,058 v. delivered for use in schools. Two new branch reading rooms at Newton Centre and Auburndale have been established during the year, each under the care of an "assistant librarian who also acts as an agent of the library for the distribution of books from the central institution." Two other branches will probably be established within a year. The trustees recommend additional shelving in the library stack room and the consequent necessary strengthening of the floor. Five photographic exhibitions were held through the agency of the Library Art Club.

*North Carolina library legislation.* The state legislation at its recent session added an important measure to the library legislation of North Carolina. This is the act encouraging the establishment of libraries in the public schools of the rural districts. It amends the public library law of 1897, which authorized the establishment of public libraries in towns of more than 1000 population, by making its terms apply to towns of less than 1000; and it "provides that whenever the patrons and friends of any free public school shall raise \$10 towards a library and tender it to the county superintendent of schools, the county board of education shall add \$10 from the funds of the district and shall appoint an intelligent person to manage and select the library." An additional sum of \$10 shall be appropriated from the state board of education, and the \$30 thus received shall be devoted to the purchase of books. Libraries shall be exchanged among adjacent schools, no exchange to be made oftener than six months,

and the cost to be at private expense. An appropriation of \$500 is made for public schools to carry the provisions of the act into execution. It is also provided that not more than six schools in each county shall establish such libraries; and that no school district in an incorporated town shall receive any moneys under its provisions, while county boards are empowered to decide which schools shall be decided upon as library schools.

In Durham county the act was immediately availed of, and each of the six schools applying for the library grant will receive in addition \$10 offered for the purpose by Gen. Julian S. Carr, of Durham.

*North Carolina State L., Raleigh.* A separate reading room for negroes has been established in the state library.

*Northwestern Univ. L., Evanston, Ill.* Beginning in January, 1901, an extension of library hours was made in this library. It is now open for circulation and for reference work 11 hours daily. An appreciative and increasing use of the new hours is made by faculty and students. This library has had this year the gift of \$750 from Norman Waite Harris, of Chicago, for the purchase of books in political economy.

*Ohio Wesleyan University L., Delaware, O.* The library has had an unusually prosperous year. The circulation has trebled and the departments have greatly advanced. The cataloging has been pushed and the most important divisions are now cataloged and shelved. Two lectures have been delivered through the year, one by Miss Linda Duval, assistant librarian, on "The use of reference books," and one by W. H. Brett, of the Cleveland Public Library, on "The modern library." Many improvements are projected for next year.

*Ouray, Colo.* The Walsh library building was dedicated on April 17. It is the gift of Thomas F. Walsh and has been in process of erection for the past year. In addition to a well equipped library there is also a gymnasium, baths, etc.

*Pawtucket (R. I.) F. P. L.* (24th rpt. — year ending Sept. 30, 1900.) Added 952; total 19,313. Circulation 47,291 (fact. 79 %); lost or unaccounted for 54. New borrowers 932; total borrowers 8459. Receipts \$7196.25; expenses \$7195.

"The close relation of the library and the school continues; teachers are having 'library days' when they come to the library with a class and help them in their selection of books." Mrs. Sanders gives some interesting extracts from reports made to teachers by school children upon books read by them. One significant question asked was, "Whether school readers or books from outside were preferred." The general reply was, "The school book stories are too short; long ones are better." One pupil said, "School readers are good in their place, but the place isn't

outside the school room." A list of selected books from lists presented by pupils and teachers was prepared for use in the schools.

Sunday opening of the reading room is no longer an experiment, but is acknowledged as an influence for good in the community; the average attendance is given as 246. The new library building will be ready for occupation in a few months.

*Peru (Ind.) P. L.* Saturday, April 20, was "animal day" at the library, and its observance was marked by some unusual features. The choice of date was made with regard to the visit of a circus, which had aroused excitement among the children; and the library vestibule was filled with animal pictures cut from circus lithographs. In the room were hung a Barye poster, pictures and illustrations of works by Landseer and Rosa Bonheur, and many other animal pictures lent for the occasion. An exhibit of animal drawings by school children was included. A special collection of all books and magazines in the library relating to animals had been made, and these could not be issued fast enough to meet the demands of the crowds of children. But the special feature of the day was the exhibition, from the circus farm of B. E. Wallace, of two lion cubs and a small monkey, quartered in special cages, which were displayed in the room adjoining the reading room. It had been intended to give special talks on animal life, but the great crowd made that impossible. It is now planned to make such an "animal day" a yearly event.

*Philadelphia, Academy of Natural Sciences L.* (Rpt., 1900.) The additions for the year amounted to 5441 v., of which 4427 were pamphlets and parts of volumes. The amount of binding done showed a substantial increase, as a result of the larger appropriation granted for the purpose. Nevertheless, about 5000 v., "mainly in the department of journals and periodicals," are still reported as unbound.

"The Werner library, consisting for the most part of books on mathematics, received in 1892, has been rearranged, and the catalog incorporated with that of the academy."

*Richmond, Va.* The offer of Andrew Carnegie to give the city of Richmond \$100,000 for a public library, provided the city will give a site and bind itself to give \$10,000 a year for the maintenance of the library, was accepted by the board of aldermen on April 19 by a vote of 14 to 2.

*Salt Lake City (Utah) F. P. L.* (Rpt., 1900.) Added 2411; total 14,766. Issued, home use 64,047; ref. use 42,209. New cards issued 2499; total membership 9233; total visitors (estimated) 107,530. Expenses \$7153.71.

Miss Chapman, the librarian, writes: "Our books, excepting a few government publications which will be finished during the spring, are all cataloged according to the Dewey system, somewhat modified, under subject, and also under title and author."

"Library work in Salt Lake City struggled along without much encouragement from the public until 1897, when a law was enacted by our legislature providing for the establishment of free public libraries in Utah, and the following year the 9000 volumes, constituting the Pioneer Library (a subscription library), were given to the city, and on Feb. 14, 1898, opened to the public in the city hall, under the name of the Free Public Library of Salt Lake City.

"A fine lot, valued at \$25,000, has recently been given to the city by Mr. John Q. Pachard, who will, in the near future, erect upon it a \$75,000 library building. This munificent gift was entirely unsolicited, and its announcement in our newspapers came as a surprise, even to Mr. Pachard's most intimate friends."

*San Francisco (Cal.) P. L.* The contract for the new branch public library, presented to the city of San Francisco by Mayor J. D. Pheelan, has been awarded. The building has a frontage of 60 feet, a depth of 51 feet, and will occupy a lot of 80 feet in width, thereby ensuring ample light all around. The building will comprise a basement in which is located a large lecture room — afterward available as reading rooms. Behind this are located lavatories, furnace room and staircases. Two separate entrances lead to this basement — one from Clara street and one from Fourth street. The main floor, a room measuring 48 feet by 58 feet, by a ceiling height of 28 feet, is raised several feet above the street, access to which is directly from Fourth street. Ample light is provided for by high windows on all sides and by a large skylight over the central portion of the room. The building is of the classic order and shows an ornate exterior, and will be faced with light-colored Roman brick and terra cotta trimmings and cornice and granite steppings at all entrances. The cost of the structure as already contracted for is \$16,000.

*Smithsonian Institution L. Washington, D. C.* (Rpt. — year ending June 30, 1900; in Rpt. of S. P. Langley, p. 110-111.) Added 23,701, or, including accession to three minor collections 25,571. There were 213 new periodicals added to the list, and 309 defective series were completed or added to. Additions to the library of the National Museum amounted to 15,606 v.

"It has been the practice hitherto to record in the accession book each separate item, and while this plan rendered it possible to have a permanent record of every publication, the labor involved became very great. The necessity for it had disappeared to a certain extent since the use of card records, and after careful consideration it seemed best to institute the system of recording only completed volumes of periodicals and transactions (which form the bulk of the Institution's library) in the accession book."

The circulating library established for em-

ployes now contains 1220 v., and circulated 1824 v. among 115 readers.

*Taunton (Mass.) P. L.* (35th rpt. — year ending Nov. 30, 1900.) Added 1799; total 48,000. Issued 72,932 (fict. issued for home use 41,507; juv. 16,700). New registration 387; total registration (since 1866) 15,186. Receipts \$6863.27; expenses \$6862.27.

A card catalog of authors, titles and subjects of the books included in the last six of the seven bulletins published each year has been made, and it is in mind not only to continue the cataloging of accessions, but also little by little to include the "volumes of all preceding supplements."

It is recommended that a plan be adopted for the preparation and distribution among the schools of special graded lists of books for children's reading.

*Tennessee State L.* A bill has been introduced into the legislature creating a state library commission to have charge of the management of the state library and the selection of librarian. A local paper says: "Members of the legislature mean to shirk the unpleasant task of selecting the state librarian. They have grown weary of the lobbying and tearful pleas of many women applicants every two years, and a determined effort is now on to have a library commission created.

"The election of the librarian two months ago was a dramatic affair. There was a deadlock on for several days, and much hard feeling was engendered among members. Women pleaded and wept and considerable of the legislature's time was given to the contest.

"Mrs. Lulu B. Epperson, the present librarian, finally won through the efforts of her sister. The contest had narrowed down between Mrs. Epperson and Miss Jennie Lauderdale, the two leading applicants, so that one vote would elect. Mrs. Epperson's sister determined to secure the vote of Representative John Murphy, of Knox county, who was still on the fence. She went to him, got down on her knees before him and begged. The representative was unable to resist her, and when she left him he had promised to and did vote for Mrs. Epperson.

"After the contest it was charged that members of both houses had deliberately broken promises. Several legislators were made lifetime enemies. A small commission, it is claimed, could select the librarian without the excitement and scandal which now mark every election. The bill introduced, if passed, is not to take effect until after the expiration of the term of the present librarian. It is more than probable that the Tennessee Supreme Court will be the commission having charge of the selection of a librarian in the future."

*University of Nebraska L., Lincoln.* The library has recently received a gift of 2000 v. from the late Simon Kerl, of Oakland, Neb. Mr. Kerl was an author and publisher of

educational books of considerable vogue some 30 or 40 years ago, and his library is a particularly valuable collection along the lines of history, literature, and education. The only condition attached to the gift was that the books should never be loaned for use outside the library rooms. This gift brings the university collection slightly above 50,000 v. The library will receive between \$11,000 and \$12,000 for bookbinding and periodicals during the coming year.

*Utica (N. Y.) P. L.* Regulations for the architects' competition for the new library building have been issued by the library board, and it is specified that all drawings submitted must be received by June 1. Eleven firms are formally invited to enter the competition and are to receive payment of \$150 each; others are invited to enter without compensation. Prof. W. R. Ware, of Columbia, has been chosen as special professional adviser for the board. The regulations call for a building of brick, iron and stone, on a site 213 x 224, and averaging 340 feet in depth; it shall be "erected in a simple and dignified classical style appropriate to its uses. Broken pediments and rococo ornamentation are not to be employed. The amount of money at the disposal of the trustees, exclusive of the furniture, is \$150,000."

The requirements are, in part: 1, Stack rooms capable of containing 100,000 volumes, with abundance of open floor space on each story for the consulting of books, independently of the reading and reference room; 2, a delivery room about 1000 square feet; 3, a reading and reference room, about 1600 square feet; 4, a children's room, about 1600 square feet; 5, a librarian's office room, about 300 square feet; 6, a staff lunch and locker room, about 300 square feet; 7, a newspaper and periodical room, about 1200 square feet; 8, a trustees' room, about 400 square feet; 9, a cataloging and work room, about 900 square feet; 10, a librarian's work room, about 300 square feet; 11, a map room, about 250 square feet; 12, a picture gallery and lecture room, about 2400 square feet; at least three special collection rooms, about 500 square feet each; at least three or more study rooms, about 250 square feet. Abundant room for public lavatories, etc.

"It is desired that there shall be easy access from the reading and reference room to the book stacks, which are to be open to the public."

*Waltham (Mass.) P. L.* (Rpt. — year ending Jan. 31, 1901.) Added 688; total 27,169. Issued (home and lib. use) 57,907 (fict. 28,300; juv. 18,590).

The library accommodations have been satisfactorily increased by the addition of an adjacent store, which has been remodelled and connected by passages, thus giving enlarged reference and stack rooms. A reading room for children has been provided.

*Washington (D. C.) P. L.* The corner-

stone of the Carnegie library building was laid on the afternoon of April 24, with simple exercises.

*Windsor (Vt.) L. Assoc.* (Rpt., 1900.) Added 374; total 8651, "besides a large number of pamphlets and old U. S. documents." The total cost of purchased additions was \$349.90, being an average of \$1.18 a volume. Issued 10,735 (fict. and juv. 74%). New cards issued 85.

The preparation of a condensed catalog has been completed. There has been a slight increase in the reading room use, and it is felt that if the library could be kept open each day of the week and an assistant librarian could be engaged, there would be a large development of its usefulness.

*Winnebago County, Wis.* The Winnebago County Library board was organized on April 10, being the first in the state to take advantage of the recent law making it possible for county boards to establish public libraries. F. A. Hutchins, of Madison, of the state library commission, and Miss L. E. Stearns, of Madison, state library organizer, were present and assisted in the organization. The board has received from the county an appropriation of \$500 for the purchase of books. Miss Emily Turner, of the Oshkosh Public Library, was appointed supervising librarian, and it is proposed, if consent can be secured, to make the Oshkosh library the distributing point of the system.

*Worcester County (Mass.) Law L.* (3d rpt. — year ending March 22, 1901.) Added 589; total 20,360. Issued 9453 v. to 1889 readers.

"This library of 20,360 volumes has been reorganized inside of three years. It has been cataloged and classified, two catalogs, one public and one official, have been made in 15 months' time of one person. This has been done without in the least interfering with the work of the library."

Appended to the report is the full scheme of classification in the subject law, devised by Dr. Wire, and incorporated in the Cutter Expensive classification, seventh division. It will repay careful attention.

#### FOREIGN.

*Kristiania (Norway).* *Det Deichmanske bibliotek.* This library has issued its annual report for 1900. The librarian, Mr. Haakon Nyhuus, gives detailed statistics, from which some few facts may be selected. The library has now 57,600 volumes; over 10,000 volumes were added during the year; nearly 320,000 volumes were given out; the reading room (which is not in the same building as the main library) was visited by over 7000 readers. The institution has five branches. There was formerly a branch connected with the reading room, but it had to be closed at the beginning of the last year, because it was very slightly used. The loans through the branches were 36,000. The report is accompanied by a portrait of the late well-known

university librarian and bibliographer, J. B. Halvorsen, author of "Norsk forfatterlexikon."

*Manchu Library of Mukden.* Great interest has been excited in learned circles in Russia by the arrival in St. Petersburg of the Manchu library "looted" from Mukden. The manuscripts made two heavy railroad carloads. There has been a current report that Greek and Roman documents of great value would be found among them, but inasmuch as Mukden was of no importance until about 300 years ago, there does not appear to be any good reason for expecting any find of that sort; but it is more than likely that old Manchu records of great interest and value may be discovered. That any of them will ever be returned to their legitimate owners is extremely unlikely.—*N. Y. Evening Post.*

*Ontario, Can. Library extension.* A Fitzpatrick, whose plans for libraries in Canadian lumber camps have been noted in these columns (L. J., March, p. 141), writes: "The Department of Education is taking hold of the project, and an item of \$1200 has been placed in the estimates for the purchase of books. The Presbyterian Church in Canada gave a grant of \$100, and several individuals have contributed smaller sums. The W. C. T. Union has given \$30. The reading camp is likely to become quite popular. Already eight reading camps have been promised at the expense of the lumbermen, in addition to the three built at my own expense. It is hoped that the movement will become general. Efforts are being made to open reading rooms at sawmill and mining towns and to introduce the travelling library."

*Ontario, Can. Rpt. of Minister of Education, 1900.* The report of Dr. S. P. May, superintendent of public libraries, etc., covers 14 pages. It covers eight months, ending Dec. 31, 1899, and records 421 libraries for the province, of which 253 are free to the public. Tabulated lists of the libraries are given, presenting full details of equipment and use. A presentation of the importance of school libraries is made by the Minister of Education in his report of the needs and work of the Education Department (p. xix.-xxii.).

*Ottawa, Ontario, Can.* On April 15 the city council voted to accept Andrew Carnegie's offer of \$100,000 for a public library building, and will ask the legislature for permission to divert \$7500 per annum of civic revenue for maintenance.

*South Australia, P. L. of Adelaide.* (Rpt.—year ended June 30, 1900.) Added 1618; total 43,584. No statistics of use are given. Attendance 71,340, of which 6302 was Sunday attendance. No record of attendance in newspaper and magazine room is kept. There has been a development in book purchases and in cataloging, owing mainly to a special appropriation of £250 for new books. The room devoted to patent specifications has been

closed to the public, owing to some of the volumes having been "seriously and wilfully damaged"; these can now be consulted by special application in the main hall of the library. An important gift of the year was the original manuscript of Tennyson's dedication to the Queen of the 1851 edition of his poems, presented by Lord Tennyson.

The Library Association of Australasia will hold its next meeting in Adelaide, in October, 1901. The government has undertaken the cost of printing in connection with this meeting (including proceedings) up to £75.

*Zurich, Switzerland, Concilium Bibliographicum.* The Concilium Bibliographicum has issued a general statement for 1900, setting forth the present status of its work, which for five years past has been maintained and conducted by Dr. H. H. Field. The official foundation of the institution was by a vote of the third International Congress of Zoologists, at their meeting in Holland of 1895, and the experimental stage of its work has now passed. The Swiss Society of Naturalists, who have throughout supported the undertaking, have induced the Swiss government to increase fivefold a subsidy with which it has endowed the work. Thus there is assured the future permanence of the enterprise. The pamphlet gives an analytical table of the cards and other bibliographic materials which have emanated from the bureau, and a register of the distribution of the cards in the chief divisions of the bibliography.

---

### Gifts and Bequests.

---

*Centerville, Ia.* Ex-Governor F. M. Drake has offered to furnish a suitable site and erect a public library building, both to cost not less than \$25,000, for Centerville, on condition that the citizens vote a library tax of two mills on the assessed value of the property of the city to maintain a library and that the city council agrees to provide for the perpetual and proper care of the property. Centerville already has a reading room under the auspices of the Ladies' Library Association, and this library will probably be turned over to the city if the new building is erected.

*Cornell College, Mt. Vernon, Ia.* On April 1 it was announced that Andrew Carnegie had offered to give \$40,000 to the college for a library building.

*Janesville (Wis.) P. L.* By the will of the late F. S. Eldred, of Janesville, the library receives a bequest of \$10,000.

*St. Cloud (Minn.) P. L.* The library association has received a gift of \$2000 from J. J. Hill, of St. Paul, towards the site for the new Carnegie library building.

*Schenectady, N. Y.* The General Electric Company has donated \$15,000 to the city of Schenectady with which to purchase a site for the proposed \$50,000 library to be erected by Andrew Carnegie in that city.

## Librarians.

**BARDWELL**, Willis A., for 32 years connected with the Brooklyn (N. Y.) Library, was on April 23 elected assistant librarian of the Brooklyn (N. Y.) Public Library, at a salary of \$3000 per year. The appointment was made on the recommendation of Mr. F. P. Hill, the recently-elected librarian. Mr. Bardwell was for some years first assistant to Mr. Noyes, whom he succeeded in charge of the Brooklyn Library, and practically his whole life has been identified with the quiet subscription library in Montague street, where his thorough knowledge of books and unflinching consideration and courtesy have gained the sincere appreciation of more than one generation of readers. Mr. Bardwell has been a member of the American Library Association since 1890.

**CARPENTER**, Miss A. Dell, for six years librarian of the Willimantic (Ct.) Public Library, has resigned that position.

**CLARK**, Miss Elizabeth V., of the Drexel Institute Library School, class of 1900, has been appointed assistant in the Drexel Institute Library.

**DODGE**, Melvin Gilbert, librarian of Hamilton College, Clinton, N. Y., has been appointed assistant librarian of Leland Stanford Jr. University, California. Since his graduation from Hamilton, in the class of '90, Mr. Dodge has combined the duties of instructor with those of librarian of the college. He has also acted as editor of several college publications.

**FARR**, Miss Mary P., has been engaged to organize the newly established Free Public Library of Hackensack, N. J., the gift of State Senator Johnson.

**GARLAND**, Thomas B., a trustee of the Dover (N. H.) Public Library from its establishment in 1883, died at his home in Dover on May 9, aged 83 years. Mr. Garland was born in Portsmouth, Aug. 30, 1817, of Revolutionary stock, and his childhood and youth were passed at Haverhill, Mass., where he was a fellow-student of Whittier. For over 50 years he had been one of the most prominent and respected citizens of Dover. He was actively identified with local educational interests, serving continuously on the school board for more than 40 years. Mr. Garland attended the White Mountains conference of the A. L. A. in 1890. He is survived by two daughters, Miss Caroline H. Garland, librarian of the Dover Public Library, and Mrs. David Hall Rice, of Brookline, Mass., and by one son, Alfred K. Garland.

**GODDARD**, Edward M., has been appointed assistant librarian of the Vermont State Library, succeeding the late Thomas L. Wood. Mr. Goddard was admitted to the Vermont bar in 1898, and has since then been associated with a law office in Montpelier. He was

elected a school commissioner at the last city election.

**GRACIE**, Miss Helen, of the New York State Library School, 1898-1900, has been appointed first assistant in the order department of the Carnegie Library, Pittsburgh, Pa.

**HAWTHORNE**, Thomas M., formerly assistant in the Newburgh (N. Y.) Free Library, has been elected librarian of that library, succeeding the late Charles Estabrook.

**HODGE**, Mrs. Harriet Evans, has been appointed librarian of the University of Cincinnati.

**KOOPMAN**, William Franklin, librarian of the Maryland Diocesan Library in Baltimore, died in Boston, Mass., April 25, 1901, of meningitis, after a brief illness. The deceased was born in Freeport, Maine, Feb. 4, 1877. He was the youngest son of Charles Frederick Koopman, of West Roxbury, Mass., and a brother of H. L. Koopman, librarian of Brown University. He was graduated at the Roxbury Latin School, 1895, and at Brown University, 1899. Since the latter date he had been librarian of the Maryland Diocesan Library, where his work had given marked satisfaction. He was a young man of fine scholarship and high promise as well as noble and attractive character.

**MALCOURONNE**, Francis Eugene, librarian and secretary of the Fraser Institute, Montreal, Canada, died at his residence in Montreal on April 11, 1901.

**MEAD**, Miss Alice, for two years librarian of the Waukegan (Ill.) Public Library, has resigned that position, and has been succeeded by Miss Lucy Clarke.

**RICHARDSON**, Miss Mary A., librarian of the New London (Ct.) Public Library, has resigned that position, owing to ill health. Miss Richardson will for the present retire from library work for a needed rest.

**ROOT**, Miss Elizabeth A., for many years librarian of the Newington (Ct.) Public Library, has resigned that position. She has been succeeded by H. C. Goodale, who was elected to fill Miss Root's unexpired term.

**STEVENS**, Don C., librarian of the Millicent Library, Fairhaven, Mass., since its organization eight years ago, has resigned that position, his resignation taking effect June 1. Mr. Stevens has brought the library to an excellent condition of efficiency, and has been actively connected with various local interests. He was for three years president of the Fairhaven Improvement Association.

**TURNER**, Miss Emily, librarian of the Oshkosh (Wis.) Public Library, has also been appointed supervising librarian of the recently organized system of travelling libraries for Winnebago County, Wis.

**WALSH**, William A., of the Boston Public Library, was on April 26 elected librarian of the Lawrence (Mass.) Public Library, succeeding Frederick H. Hedge, resigned.

## Cataloging and Classification.

**BIBLIOGRAPHIE FRANCAISE:** recueil de catalogues des éditeurs français, accompagné d'une table alphabétique par noms d'auteur et d'une table systématique. 2d ed., revue, corrigée et considérablement augmentée. Paris, H. Le Soudier, 1900. 10 v. 8°, (9000+p.) 50 fr.

A second revised issue of the great French "trade list annual," first published in 1895. It is nearly twice as large as its predecessor, contains catalogs of 174 publishing houses, and lists about 125,000 titles of books in print at the close of December, 1900. The tenth volume is devoted to an index by authors, and a short classed index, alphabetical by subjects, referring to publishers who carry books on those subjects.

**BIBLIOTHEQUE NATIONALE.** Catalogue général des livres imprimés de la Bibliothèque Nationale. Auteurs. Tome iv. Aristote-Aubrun. Paris, Imprimerie nationale, 1900 [1901.] 1228 col. 8°.

Dates of sheet printing: Mai, 1900-Septembre, 1900. The record of Aristotle covers 105 columns.

**BIRMINGHAM (Eng.)** F. Ls. Occasional lists, no. 1: Books, pamphlets, Parliamentary reports and magazine articles on China. Birmingham, 1901. 8+20+4 p. O.

The list of books, title-a-line, one column to the page, gives call number, size, date, occasional annotations, and includes about 140 entries. The list of magazine articles covers 10 two-column pages, in fine type.

The **BOSTON BOOK Co.** *Bulletin of Bibliography* for April contains, in addition to other useful lists, a short list of books for children, compiled by Miss Helene L. Dickey, of the Chicago Normal School, and divided into three classes—picture books for little children, books for children under 10 years, and books for children over 10 years.

**CHICAGO (Ill.)** P. L. Special bulletin no. 1: List of books and magazine articles on Memorial day and patriotism. 12 p. O.

A full classed list, analyzing numerous poetical collections, volumes of recitations, etc., in addition to magazine references.

**DETROIT (Mich.)** P. L. Bulletin no. 12, of books added in 1900. Detroit, 1901. 232 p. O.

**ENOCH PRATT F. L. OF BALTIMORE CITY.** Bulletin [quarterly]. April 1, 1901. 24 p. O.

The **FITCHBURG (Mass.)** P. L. *Bulletin* for May contains a good reference list on Queen Victoria.

The **KANSAS CITY (Mo.)** P. L. issued for April the second number of its attractive *Quarterly Bulletin*. This contains short articles upon the departments and use of the library, notes on books, a special reading list on liquid air, and a record of accessions for the quarter.

**MANCHESTER (Eng.)** P. F. Ls. Quarterly record. v. 4, no. 4. p. 87-110. O.

Lists the accessions from October to December, 1900.

**MASSACHUSETTS STATE L., Boston.** Catalogue of the laws of foreign countries in the library; prepared by Ellen M. Sawyer. (*In* Mass. State L. rpt., 1900. 74 p.)

This catalog, printed as an appendix to the recent report of the library, is a careful and useful piece of work. The record of general codes and collections (seven titles) precedes the full list of individual publications arranged alphabetically by countries. The entries are compact, yet all essential information is included, and the work shows care and accuracy. The lack of full bibliographical record of such material gives this catalog special importance.

**PEABODY INSTITUTE, Baltimore.** Second catalogue, including the additions made since 1882. Part 5, L-M. Baltimore, 1901. 2621-3354 p. 4°.

The entries from Latin agriculture to Latin weights and measures extend from page 2675-2716 and show a wealth of material on subjects connected with ancient Rome. Those on London cover nearly 30 pages.

**ROYAL LIBRARY AT NINEVEH.** (*In Nature*, April 11, 1901, 63:562-564.)

A review of the "Catalogue of the cuneiform tablets in the Konyunjik collection of the British Museum," by C. Bezold.

The **SALEM (Mass.)** P. L. *Bulletin* for April devotes its special reading list to Shakespeare. The list is excellently selected and well arranged.

**SCANDINAVIAN MANUSCRIPTS.** The Commission for the Arnamagnæan Legacy in Copenhagen has authorized and defrayed the expense of publication of the valuable "Catalogue of old Norwegian and Icelandic manuscripts," in the Great Royal Library and University Library of Copenhagen. The catalog is the work of Dr. Kalund, librarian of the Arnamagnæan collection, and supplements his previous two-volume catalog of the manuscripts in the great collection of which he has charge. It will be of value to all students of Germanic and Scandinavian philology; and it contains an admirable historical and bibliographical introduction on old Norwegian and Icelandic literature.

**VERMONT FREE PUBLIC LIBRARY COMMISSION.**

List of recent books recommended to Vermont libraries, 1901. 8 p. D.

About 225 books are included in this useful little list.

**WINDSOR (Vt.) L. Assoc.** Catalogue of English prose fiction and juvenile story-books.

March, 1901. 8+100 p. D.

A neatly printed and attractive little catalogue, in one alphabet by authors. Cutter book numbers are used.

**FULL NAMES.**

**WILSON, J. M.**—Two men, each bearing these initials, write for U. S. Government publications. One is James Maxwell Wilson, whose name is connected with Bulletins 58 and 96 issued by the Office of Experiment Stations, Department of Agriculture. It will be of interest to all librarians who catalog government publications to note that on page 4 of Bulletin 58 Mr. Wilson is spoken of as John M. Wilson, but the John is a misnomer. His correct name is James Maxwell Wilson. He has another article in process of publication on "Irrigation investigations in California."

The other J. M. Wilson is Brig.-Gen. John Moulder Wilson, Chief of Engineers, War Department. **MARY A. HARTWELL,** Chief Cataloguer, *Public Documents Office.*

*The following are supplied by Catalogue Division, Library of Congress:*

Adams, James Alonzo (Victoria: maid—matron—monarch, by Grapho [J. A. Adams]);  
 Baker, Lorenzo Bird (Baker's twentieth century homes);  
 Bartlett, Dana Prescott (General principles of the method of least squares);  
 Beals, Zephaniah Charles (China and the Boxers);  
 Beck, Charles Edgar (Beck's ideal phonography);  
 Blake, Silas Leroy (The later history of the First Church of Christ, New London, Conn.);  
 Brownlee, Addison McClung (Sermons from the tripod);  
 Congdon, Herbert Eugene (Manual of graded dictation);  
 Dodge, Leslie Shelley (Le compagnon);  
 Doolittle, Oliver Taylor (Straight shoulder rules, systems and methods of the present day);  
 Ferguson, William Porter Frisbee (The canteen in the United States army);  
 Ferrell, John Appley (Ferrell's elementary arithmetic);  
 Flecher, Henry McDonald (Odin's last hour and other poems);  
 Gordon, George Alexander (The life and labors of Rev. Henry S. Gordon);  
 Graham, Matthew John (The ninth regiment, New York volunteers);  
 Heath, Frank Stowe (Soul laws in sexual, social, spiritual life);

Herbert, John Frederick (Anatomy and physiology of the eye);  
 Hobson, John Peyton (What we owe: from a lawyer's standpoint);  
 Hotchkiss, Chauncey Crafts (Betsy Ross: a romance of the flag);  
 King, Stanton Henry (Dog watches at sea);  
 McCandless, Lewis Wilson (Tabular analysis of the law of real property);  
 Macdonald, Thomas Anthony (Two lovers and two loves);  
 McGlumphy, William Harvey Sheridan (Village verse);  
 McVey, Frank Le Rond (The government of Minnesota);  
 Maloney, Edward Raymond, *ed.* (St. Basil the Great to students on Greek literature);  
 Marshall, Nina Loring (The mushroom book);  
 Mays, Thomas Jefferson (Pulmonary consumption, pneumonia, and allied diseases of the lungs . . .);  
 Nolen, William Whiting (England, 1689-1830: a chronological outline of political history);  
 Perkins, Mary Elizabeth (Old families of Norwich, Conn.);  
 Pingrey, Darius Harlan (A treatise on the law of suretyship and guaranty);  
 Reighard, Jacob Ellsworth, *and* Jennings, Herbert Spencer (Anatomy of the cat);  
 Rogers, Jesse La Fayette (The magistrate's manual and legal adviser . . .);  
 Sinclair, Upton Beall, *jr.* (Springtime and harvest: a romance);  
 Smart, Melville Clarence, *ed.* (A new grad-atim . . .);  
 Spalding, Henry Stanislaus (The cave by the beech fork);  
 Spinelli, Hyacinthe Besson (A catechism of court-martial duty . . .);  
 Stern, Charles August (Arbitrations and parties of foreign exchange . . .);  
 Tadd, James Liberty (New methods in education);  
 Tratman, Edward Ernest Russell (Railway track and track work);  
 Traxler, Charles Jerome (A treatise on the law of mechanics' liens of the state of Iowa);  
 Wilson, Mrs. Julia Virginia (Phelps) (Leaves from my diary);  
 Winchell, Samuel Robertson (Orthography, orthoepy, and punctuation).

*The following are supplied by Harvard University Library:*

Bennett, Edwin Clark (Musket and sword);  
 Bigelow, Willard Dell (The composition of American wines);  
 Byrn, Edward Wright (The progress of invention in the nineteenth century);  
 Byrnes, James Charles, [*ed.*] (Model lessons in arithmetic);  
 Callahan, Edward William (List of officers of the navy of the United States; published by Lewis Randolph Hamersly);  
 Dellenbaugh, Frederick Samuel (The North Americans of yesterday);

Dotterer, Henry Sassaman (Historical notes relating to the Pennsylvania reformed church);  
 Frizell, Joseph Palmer (Water-power);  
 Hastings, William Granger (The development of law as illustrated by the decisions relating to the police power of the state);  
 Higgins, Samuel Gaty (The salt industry in Michigan);  
 Josephson, Aksel Gustav Salomon (Bibliographies of bibliographies);  
 Kimball, Lillian Gertrude (The structure of the English sentence);  
 McCarthy, Denis Aloysius (A round of rimes);  
 Miffin, John Houston (Lyrics);  
 Newcomb, Charles Benjamin (Discovery of a lost trail);  
 Newcomb, Katherine Hinchman (Helps to right living);  
 Newcomb, Harry Turner (The postal deficit);  
 Poole, Cecil Percy (Electric wiring);  
 Randolph, Lewis Van Syckle Fitz (Survivals);  
 Robinson, Philip Alexander (Coin, currency and commerce);  
 Sheldon, Jennie Maria Arms (Concretions from the Champlain clays of the Connecticut valley);  
 Sherman, Philemon Tecumseh (Inside the machine);  
 Smith, George James (Writing in English);  
 Thomson, John Crawford (Taxpayers' actions to redress municipal wrongs);  
 Ware, Eugene Fitch (The ancient ballad).

### Bibliography.

ALDRICH, T. B. North, E. D. A bibliography of the original editions of the works of Thomas Bailey Aldrich. (*In The Book Buyer*, May, 1901, p. 196-303.)

Chronologically arranged, with full collation, contents, and brief bibliographical notes.

AMERICAN POETRY. Bradshaw, Sidney Ernest. Old Southern poetry prior to 1860: dissertation for the degree of Ph.D., University of Virginia. [n. p. p.], 1900. 162 p. 12°.

A chronology of poetry and a bibliography comprise 23 pages.

ARBOR AND BIRD DAY. The Wisconsin "Arbor and Bird Day annual" for 1901, issued by the Superintendent of Instruction for the schools of the state, contains, in addition to many suitable extracts in prose and verse, two short reference lists on nature topics.

BOOK-PLATES. Bowdoin, W. G. The rise of the book-plate. New York, A. Wessels Co, 1901. 207 p. il. 8°. net, \$2.

Pages 27-44 are bibliographical.

CANADA. Wrong, G. M., and Langton, H. H. Review of historical publications relating

to Canada. Vol. 5: Publications of the year 1900. University of Toronto, published by the librarian, [Toronto, W: Briggs,] 1901. 12+226 p. O. \$1.50; pap., \$1.

The fifth annual volume of this important historical and bibliographical work maintains the scholarly standard of its predecessors. Under six main divisions (with geographical subclasses for division 3, "Provincial and local history") there are recorded, with critical reviews, 171 publications dealing with Canadian history directly or indirectly. The usual full and careful index is appended.

CHEMISTRY. Bolton, H. C. A select bibliography of chemistry, 1492-1897. Section 8: Academic dissertations. Washington, Smithsonian Institution, 1901. 6+534 p. O.

Dr. Bolton says: "The 'Select bibliography of chemistry' was published in 1893; the first supplement issued in 1899 brought the literature of chemistry down to the close of the year 1897; this volume is devoted exclusively to academic dissertations, especially those from the universities of France, Germany, Russia, and the United States." It covers only dissertations that have been independently printed, excluding all contributions to periodicals. The record is in one alphabet, supplemented by a full subject index. This volume completes Dr. Bolton's great undertaking, in which, as a whole, are contained over 25,000 entries. Material is already being collected for a supplementary fourth volume.

CLAYS. Sheldon, Mrs. J. M. Arms-. Concretions from the Champlain clays of the Connecticut valley. Boston, [pub. by the author,] 1900 [1901.] 45 p. il. sq. 4°.

Contains a full bibliography of writings on concretionary structure and drift clays, in addition to the scant literature upon the specific subject of claystones.

COMMERCE. Terrón, Pablo. Bibliografía mercantil; reseña crítica-bibliográfica de las obras publicadas en España durante el presente siglo para la enseñanza mercantil. Madrid, Murillo. 60 p. 4°. 1.15 pes.

The EARLY ENGLISH TEXT SOCIETY, through its director, Dr. F. J. Furnivall, has issued an appeal for support, addressed to 500 university and college librarians in the United States. Dr. Furnivall says: "The English language is the birthright of every American as well as of every Englishman. Cynewulf, Caedmon, Alfred, Bede, Wyclif, Langland, Chaucer, and their successors belong to every one in the States as much as they do to every one in Britain. But we in England have the old men's manuscripts; you in the States have none, or hardly any. Your scholars and students want prints of these mss. for the study of our common mother-tongue. With such prints as they have your scholars have done

admirable work, but they and we want more texts to work on. The poor Early English Text Society has been doing its best since 1864 to supply this want, but it has never had enough money to print the texts its editors have offered it. If, however, American libraries would support the Early English Text Society as they ought to do, as it should be their pride and pleasure to do, the money needed would be forthcoming at once, and all the mss. wanted by American scholars would in a few years be placed in their hands in a cheap and convenient form." The Society offers all its back texts at \$3 a year for each series, instead of \$5.25.

**EARTHQUAKES.** Baratta, M. *I terremoti d'Italia: saggio di storia, geografia e bibliografia sismica italiana.* Torina, Bocca, 1901. 660 p. 8°. 20 lire.

**EDUCATION.** Wyer, James Ingersoll, jr., and Lord, Isabel Ely, *comps.* Bibliography of education for 1900. (*In Educational Review*, April, 1901. 21:382-421.)

Classified and annotated, with an index of authors. 481 titles.

**FRENCH LANGUAGE.** Braunholz, E. G. W. Books of reference for students and teachers of French: a critical survey. London, T. Wohlben, 1901. 4+80 p. O.

A comprehensive descriptive survey of the subject, ranging from general bibliographies of French literature to reference books in a restricted field, as French folk-lore, old French, Provençal, French metre, French history, art, geography, etc. The arrangement of the various divisions is systematic, although no special order is apparent in the mention of individual works. The record is entirely descriptive, titles being included briefly in the general text, with no indication of publisher, price, or other bibliographical data; dates are occasionally given, and number of volumes are usually noted. The little manual should be useful and suggestive to librarians in the formation of a French collection, though of course many of the text books named would be unnecessary for such a purpose.

**GARNETT, R.** Royal libraries and papyrus in Phœnicia in the eleventh century B.C. (*In Athenaeum*, April 20, 1901, p. 501.)

**GOODE, George Brown.** Geare, Randolph Ilyd. The published writings of George Brown Goode, 1869-1896. (*In Smithsonian Institution rpt.*, year ending 1897: Rpt. of U. S. National Museum, pt. 2. Washington, Gov. Print. Office, 1901. 12+516 p.)

This bibliography covers 20 pages (p. 481-500). The volume containing it is devoted to a "Memorial" of Dr. Goode's life and scientific services.

**NEW YORK.** New York State Library, Bulletin 56, February, 1901. Bibliography 24: Bibliography of New York colonial history; by Charles A. Flagg and Judson T. Jennings, N. Y. State Library School, class of 1897. Albany, 1901. p. 289-558 O. 35 c.

A classed bibliography covering New York history from the earliest times to 1776. Entries are fully and carefully given, with annotations when desirable, and reference is aided by the table of contents, and the full author and subject index.

**PENNSYLVANIA-GERMANS.** Kuhns, Oscar. The German and Swiss settlements of colonial Pennsylvania: a study of the so-called Pennsylvania Dutch. New York, Henry Holt & Co., 1901. 5+268 p. 12°, \$1.50.

Pages 247-257 contain a very good bibliography, very poorly arranged.

**PHILOLOGY.** Yve-Plessis, R. *Bibliographie raisonnée de l'argot et de la langue verte en France du XVe au XXe siècle.* Paris, H. Daragon, 1901. 8°. 7.50 fr.

**LAW.** *Bibliographie générale et complète des livres de droit et de jurisprudence publiés jusqu'au 8 novembre 1900, classée dans l'ordre des codes, avec table alphabétique des matières et des noms des auteurs.* Paris, Marchal et Billard, 1901. 31+168 p. 8°. 1.50 fr.

**MILK.** Rothschild, Henri de. *Bibliographia lactaria: bibliographie générale des travaux parus sur le lait et l'allaitement jusqu'en 1899.* Paris, Octave Doin. 600 p. 8°. 20 fr.

**NEW YORK CITY.** Contributions of value to the bibliography of New York City are made in the New York P. L. *Bulletin* for April, which contains seven special lists on the subject, covering: 1, Water supply, sewers, etc.; 2, Health, vital statistics, etc.; 3, Fires and the Fire Department; 4, Streets, markets, real estate, public buildings, etc.; 5, Street railways, rapid transit, etc.; 6, Parks, monuments, etc.; 7, Water front, its harbors, docks, ferries, and bridges. Each list records municipal reports and like documents in chronological order, followed by an author list of other publications.

**POLITICAL SCIENCE.** Mühlbrecht, Otto, *comp.* Uebersicht der gesammten staats- und rechtswissenschaftlichen litteratur des jahres 1900. 23d jahrg. Berlin, Puttkammer & Muhlbrecht, 1901. 25+300 p. O. 6 m.

**STEEL WORKS.** Brearley, Harry. A bibliography of steel works analysis. Pt. 8, Vanadium and titanium. (*In Chemical News*, April 4, 12, 1901, 83:163-164; 171-172.)

- TAINÉ, Henri. Giraud, V. *Essai sur Taine: son oeuvre et son influence; avec portrait, des extraits de 60 articles de Taine non recueillis dans les oeuvres, des appendices bibliographiques, etc.* Freiburg, Universitäts-Buchhandlung, 1901. 24+322 p. S. 8°.
- WEST VIRGINIA. Fast, Richard Ellsworth, and Maxwell, Hu. *The history and government of West Virginia.* Morgantown, W. Va., Acme Pub. Co., 1901. 10+511 p. O. \$1.25.  
The "bibliographical notes," p. 493-500, record the chief historical materials relating to Virginia, including publications of societies and leading newspapers.
- WITCHCRAFT. Yvc-Plessis, R. *Essai d'une bibliographie française, méthodique et raisonnée, de la sorcellerie et de la possession démoniaque.* Paris, Chacornat, 1900. 8°, 10 fr.
- INDEXES.
- SAMUEL, Bunford. *Index to American portraits. (In Pennsylvania Magazine of History and Biography, April, 1901, p. 47-70.)*  
This interesting and useful index, of which the first instalment runs from Abercrombie to Fulton, is a selection only from the very large amount of manuscript material prepared during many years by Mr. Samuel, of the Ridgway Branch of the Philadelphia Library. The index as printed includes references to 15 magazines, English and American, and one French, ranging from 1732 to 1851. This list is extended by reference to seven other magazines (1821-1896) for the same subjects, and references to some books are also given. An interesting detail is the indication of engraver, when known. The index is well arranged and shows careful work.
- 
- Anonyms and Pseudonyms.**
- The following are from "Literary year-book, 1901:"*
- Ackworth, John, pseud. of Rev. Frederick R. Smith, "The minder," 1900.  
Bickerdyke, John, pseud. of C. H. Cook, "Angling for game fish," 1900.  
Brooke, Magdalen, pseud. of M. H. M. Capes.  
Calderford, M., pseud. of William Ford Robertson, M.D., "Text-book of pathology in relation to mental diseases," 1900.

# LIBRARY SHELVES

ART METAL CONSTRUCTION CO.,

General Office and Works, JAMESTOWN, N. Y.

STEEL LIBRARY STACKS FOR PUBLIC AND PRIVATE LIBRARIES.

# THE AMERICAN NEWS COMPANY

## BOOK DEPARTMENT

ON account of a large increase in the volume of business which we are now doing with the libraries of the country we have decided to establish a special LIBRARY DEPARTMENT in order to make our services more efficient. We invite you to take advantage of our facilities.

We have the largest miscellaneous book stock in the United States, embracing the publications of the various publishers, and assure you that our facilities for the proper handling of our correspondent's orders are of the best. We promise you the most careful attention and prompt dispatch on all business entrusted to us.

Would be pleased to receive from you a list of books on which you desire quotations, and, when possible, will be pleased to have you visit us and make use of the facilities of our store and library department in making a selection of books.

Very truly,

THE AMERICAN NEWS COMPANY,  
39-41 CHAMBERS STREET, NEW YORK.

BENJAMIN FRANKLIN STEVENS.

HENRY JOHN BROWN.

# B. F. STEVENS & BROWN,

American Library and Literary Agents,

4 TRAFALGAR SQUARE, CHARING CROSS, LONDON.

THIS Agency was established in 1864 for supplying American Public Libraries, Institutions, and Book Collectors, with English and Continental Books, Manuscripts, Drawings, Philosophical Apparatus, etc., at the lowest London prices.

Special attention is paid to the selection and purchase of rare old books and manuscripts. Auction sales are carefully watched and good knowledge kept of the stocks of the old Booksellers of Europe.

Lists of Desiderata have the best attention and Librarians are respectfully requested to test the value of the Agency by sending trial orders on by submitting lists for Estimates for goods to be delivered, either free in London or New York, as desired.

Auction Catalogues when printed in advance and Catalogues issued by Publishers and Second-hand Booksellers are mailed to Customers when desired.

Large shipments are sent by cheapest and quickest route, or as ordered. Small shipments are made weekly through our New York Agency, at a minimum of expense and trouble to purchasers, or single books are sent by mail on receipt of order.

Special attention is given to Bindings in all styles.

Periodicals are supplied either direct by mail from London or by mail from New York Agency at lowest rates for prompt and efficient service. Send for Lists.

Payments may be made either direct to London or in U. S. Currency through our New York Agency.

*Just Ready. 100 Copies Printed for Subscribers Only.*

## B. F. STEVENS'S

### Facsimile of the Unpublished British Headquarters Coloured Manuscript Map of New York and Environs (1782)

Reproduced from the Original Drawing in the War Office, London.  
24 sheets. Scale, 6½ inches to a mile. 10 feet by 4 feet. . . .

The successive British Commanders-in-Chief in America, Generals Sir William Howe, Sir Henry Clinton, and Sir Guy Carleton, during their respective occupations of New York and Environs in the Revolution, caused this manuscript plan from time to time to be kept up.

The plan extends from below Guanans Bay to the Heights of Spikendevil, a distance of about eighteen or nineteen miles. It shows the Fortifications, Defences, Topography, Streets, Roads, etc., of the whole of the Island of New York with the Harbor, Islands, Water Ways, and River Frontages on the Hudson and East Rivers, the Military Works on Long Island including Brooklyn, the Works in Paulus Hook and parts of the Jersey Shore. It has a copious Table of References to various works (British and American), some of them with notes as to the time of their construction or destruction.

The Original Drawing, ten feet by four feet, is on a scale of about six and a half inches to a mile. It is handsomely reproduced for subscribers only, in careful facsimile on 24 sheets which can be joined up and mounted like the original as a Wall Map or mounted on linen if desired. It will be issued either mounted on linen to fold in book form with leather (slip) case, 13 x 10 inches, or the 24 sheets (22 x 15 inches each), will be supplied in a portfolio.

No more than 100 copies have been printed and the engravings were erased as each sheet was printed off.

A few extra copies of sheet 8 have been printed so that it can be sent as a specimen on application from intending subscribers.

#### Prices to Subscribers

Mounted on linen to fold in book form with leather (slip) case. . . \$30 net.

Unmounted, on 24 sheets in portfolio. . . . . \$25 net.

The above prices include delivery to any Public Library or Institute in the United States or Canada, but private subscribers must also pay the duty.

**B. F. STEVENS & BROWN, 4 Trafalgar Square, Charing Cross, London, W. C.**  
**New York Agency, 45 William Street.**

# CEDRIC CHIVERS,

Portway, Bath, England.

BOOKSELLER { Library Books,  
Reference Books,  
Belles-Lettres.

AND

BOOKBINDER { Duro-Flexile,  
Vellucent,  
Reliure de Luxe.

---

*“Buy Your Popular Books and Your Costly Books  
in Duro-Flexile Binding.”*

I OBTAIN books from the publishers in sheets and bind them “ONCE FOR ALL.” This binding lasts longer than the leaves of the book, and the leaves of the book are preserved and their life immeasurably lengthened by this binding. Librarians cannot persuade publishers to print special editions for them, but I supply books specially bound for them.

If the paper is bad I sew and forward the book so that the leaves are subject to no strain and are indeed strengthened in the folds. If the paper is very stout I sew the book and forward it in a special manner adapted to the thickness of the paper, in other words I adapt Duro-Flexile binding to both good and bad paper with the results that the utmost service and the longest possible life are obtained for both.

No binding in the world is adapted to the varied qualities of the paper as is Duro-Flexile.

The service obtained from a book of bad paper when supplied bound in this way will surprise you.

A papier maché box and a steel safe are not hinged in the same way. Thin tough paper and thick spongy paper also require very different treatment, and with Duro-Flexile they get it.

**TIGHT BACKS** are used for books of a thickness and quality of paper best suited for such treatment.

**LOOSE BACKS** are given where such are better suited.

My bookbinding is in short adapted in its every detail, both of material and method, to the requirements of a Public Library Book.

500 Public Librarians in all parts of the English speaking world buy these books.

## POPULAR BOOKS AND COSTLY BOOKS

bought of me, bound from the quires, give 50% more service.

---

*A catalogue of Standard Fiction and popular recent books priced net delivered free to your Library will be sent on application.*

# HENRY MALKAN.

## Library Department.

### A FEW SPECIALS.

Having just secured some very choice lots of books, we make the following unprecedented offers.

Librarians interested in these works would do well to order immediately, as the supply of some of these books is limited.

**Funk & Wagnalls' Standard Dictionary.** Indexed. 1 vol. edition. Covers slightly shopworn, *net*, \$5.00.

**Roosevelt's Works.** Sagamore edition. 15 vol. Cloth, published at \$7.50, *net*, \$3.65.

**Spofford's Historic Characters and Famous Events.** 12 vol. Half Morocco, *net*, \$18.00.

This is a set of the limited edition.

**Spofford's Library of Choice Literature.** Royal edition. 10 vol. Half Morocco. Illustrated on India proof paper, *net*, \$35.00.

**International Cyclopaedia.** Latest edition. Published at \$68.00, *net*, \$45.00.

**Duruy's History of Rome.** Royal edition. 16 vol. Published at \$160.00, *net*, \$55.00.

This is a very fine set of the edition, limited to 750 sets.

*ESTIMATES FURNISHED ON ANY LIST OF BOOKS.*

**HENRY MALKAN, 1 William St., New York.**

## LIBRARIES.

WE ask the attention of Librarians and Library Boards to the facilities possessed by our house for supplying libraries.

For more than half a century we have made a specialty of library business, and the experience of our Library Department has been wide and varied.

The business is under the immediate supervision of one of the principals of the house, who has had thirty years' experience.

Our extensive retail stock makes it practicable for persons selecting books for libraries to examine at their leisure in our retail store, the books themselves, instead of depending upon the very unsatisfactory method of picking out titles from catalogues.

We carry a considerable stock of the best second-hand books bought at favorable prices and are constantly receiving additions.

We have direct relation with all publishers, and buy at the lowest prices. Through our Branch House in London (where we conduct a general publishing and bookselling business) we supply promptly and import free of duty English books without the commission paid by other American dealers.

With many of our library customers we have arrangements by which at stated intervals we forward on approval consignments of new books. After examination and selection, those volumes not wanted are returned.

We are always ready to give our customers the full benefit of our advice and experience, in answering questions, literary and bibliographical. We are glad to assist them in making selections for purchase, and, when desired, will take entire charge of making up lists for the initial purchase of new libraries, or for additions to established institutions.

Correspondence solicited.

## G. P. PUTNAM'S SONS,

LIBRARY DEPARTMENT,

27 and 29 West 23d Street, New York,  
and 24 Bedford Street, Strand, London.

## The Needs of a Library

Cannot be supplied with money alone. Intelligent selection of books and a judicious choice of the source of supply on the part of the librarian are all important even when a library is generously endowed, and in cases where the purchasing fund is limited, they are vitally essential. There are several reasons why we enjoy the confidence and patronage of librarians, and among them we may name :

- 1.—**OUR LARGE STOCK**, which embraces more of the standard and popular books of American and English publishers than that of any other house in the country.
- 2.—**OUR DISCOUNT SHEET**, which holds out exceedingly liberal terms to Public, University, College, and School Libraries.
- 3.—**OUR EXPERIENCE** of many years in meeting the wants of librarians and in furnishing the information that they find really helpful.

*ALL INQUIRIES ARE PROMPTLY ATTENDED TO.*

## SITUATIONS WANTED.

**YOUNG WOMAN** now holding responsible library position desires to make a change. Address H., care of LIBRARY JOURNAL.

**LIBRARIAN** who has June, July, and August for vacation would like to substitute in some library. Normal school library preferred. Address A., care of LIBRARY JOURNAL.

**WANTED.**—By a cataloger of eight years' experience in a college library, a small library to catalog and classify during the summer vacation. Address J., 17 Sacramento Street, Cambridge, Mass.

**YOUNG WOMAN**, having had experience in small library, desires position in larger. Has taken short course in library economy, worked with Dewey system, has good education. Good references. Address F. G., care of LIBRARY JOURNAL.

**WANTED.**—A position in library (preferably one which pays special attention to document and historical work), by a student of Pratt Library School with some experience at the Astor Library, N. Y. Address Mrs. F. H. GARDNER, 7 Clifton Pl., Brooklyn, N. Y.

**WANTED.**—Librarian (young man) of nine years' experience in a small library, now numbering 8000 volumes, using the Dewey Decimal Classification, desires a position in a larger library offering opportunities for advancement. Address F. W. H., care of LIBRARY JOURNAL.

**WANTED.**—A lady with nine years' experience in a small library, three years as librarian, desires position as librarian or assistant in a larger library. Can hold present position longer if she desires to, but is anxious to change. Good references. Address B. H., care of LIBRARY JOURNAL.

ARE YOU INTERESTED IN**LIBRARY AND SCHOOLROOM DECORATIONS?**

Eighty-five per cent. of the "one hundred best pictures" selected by the regents in Albany are my publications. Write for catalogue.

Rev. ALMON GUNNISON, D.D.,  
President, Board of Directors, Free Public Library, Worcester, Mass., writes:

"The set of your carbon photographs of the Cathedrals of Europe, which we recently purchased of you, has been received. The photographs are of great excellence, and admirably give not only the general features of the buildings, but the minutest architectural details. They are creating much interest, and are invaluable in the work of popular education, which our Library is trying to accomplish."

286 Fifth  
Avenue,  
New York.

**The Baker & Taylor Company**

INVITES librarians to visit its new quarters, 33-37 East 17th Street (Union Square North), running through the block to 18th Street and containing 18,000 square feet of floor space devoted to the display of books. For over fifty years we have been buying and selling books in wholesale quantities and have maintained a Library Department organized to meet the special demands of library business, great and small.

Our wholesale buying enables us to quote prices of interest to the business librarian.

As a help for small libraries we issue a classified catalog of a Standard Library of 2500 approved volumes arranged in classes. Each title is sold separately but a lump price is also made on the complete library. Our twice-a-year clearance sales and the catalogs descriptive of them are well and favorably known to alert librarians.

When lists are sent to us for prices we give itemized quotations based on editions selected with reference to library use. Catalogs, bargain lists, etc., sent on request.

**THE BAKER & TAYLOR CO., Wholesale Booksellers, New York**

**H. SOTHERAN & Co.,**

*Booksellers, Bookbinders, and Publishers, and General Agents in Europe for Private Bookbuyers and Public Institutions in America.*

WITH exceptionally long experience in Library Agency, they can promise the best care, diligence, and discretion in everything relating to it, and in small matters as well as great. Established 1816.

# EDW. G. ALLEN'S

## London Agency for American Libraries

28 HENRIETTA ST., COVENT GARDEN, LONDON.

### Special Notice to Librarians.

Mr. E. G. ALLEN desires to lay before you the advantages of using this Agency for procuring English and Foreign Books, Magazines, Periodicals, etc., and for General Library Work in Great Britain.

Long existing relations with the Booksellers and Publishers of the United Kingdom enable him to execute orders of any magnitude promptly and economically. All important books collated before delivery.

Specialty is made of the finding of Out of Print Books. His success in this department is unrivalled, possessing unique means of search, by which he is able to supply scarce books expeditiously and at moderate prices.

A good selection of Second-hand Dealers' Catalogues is sent to clients by every mail, and no commission charged on orders from them.

New Books supplied on the most advantageous terms, and the Full Trade Discount allowed off the published price.

Auction Catalogues Mailed, Sales Attended, and Commissions Executed with Care and Judgment.

Defects of Rare Books Reproduced in Facsimile.

Long Sets of Scientific and Other Periodicals Supplied. Imperfect Sets Completed.

Large consignments sent by fast steamers at through rates. Small orders can be sent by mail or by express system at low charges.

Special note is kept of all continuations of serials, which are forwarded immediately on publication.

Bookbinding in every style, Cheap and durable for library use. Dilapidated old binding skilfully repaired. Pamphlet binding at specially cheap rates.

Should you at present be without the services of a London Agency, MR. ALLEN would be pleased to answer any inquiries. All orders receive his personal attention, and with an experience of forty years in library business, and the thorough equipment of his agency, he believes himself capable of meeting every library requirement in a satisfactory manner.

**References permitted to first-class Libraries.**

**Special terms for large orders.**

**FOUNDED IN 1856.**

# THE LIBRARY JOURNAL

VOL. 26.

JUNE, 1901.

No. 6

PLANS for the Wisconsin meeting of the American Library Association are rapidly approaching completion, and the outline program, printed elsewhere, gives promise of a conference of great professional interest and inspiration. Indeed, the criticism to be made of this, as of most A. L. A. programs, is that in variety and extent it is almost too formidable; but it must not be forgotten that a librarian's work nowadays is specialized into many and diverse departments, and that the national association must aim to be a center for all the interests of the profession. How thoroughly this has been accomplished for the present year the program indicates, perhaps its most interesting features being the meetings of the National Association of State Librarians and of the Library Section of the National Educational Association, to be held in connection with the general library gathering. Both these bodies meet independently under their own organization, but the questions of ethics and methods in the management of state libraries and in library work with schools, which they will separately consider, are of interest to many outside their membership, while on the other hand the more general topics of the A. L. A. program should be helpful and interesting to these special workers.

It is curious to note how many are the departments of library work represented in the Waukesha program. In addition to state libraries and school libraries, library work with children will be considered in two sessions; methods of developing and conducting state library commissions and travelling libraries; the extension of library sentiment through women's clubs, principles and practice in library architecture, questions in college library work, in cataloging, in bibliography—all these will be brought up for discussion in section or round table meetings, while the broad subjects of the library in its relations with the state, to the public and to books will be considered in the general sessions. There is hardly a library, large or small, which is not directly concerned in some of the subjects to be brought up at this meeting, and to libra-

rians in every field of work it should prove most helpful and stimulating. It but remains to repeat, what has so often been said in these columns, that attendance at the Library Association meeting should be regarded by trustees as a matter of professional necessity for their librarian, if not for themselves, and that especially in the case of the smaller and newer libraries, so many of which have developed in the present Carnegie era, representation at the Wisconsin meeting will many times repay the expense in time and money.

LIBRARY training for entrance into library work as a profession has developed, within the modern library period of the quarter century now closed, in even step with the growing recognition of librarianship as a professionship. This issue of the LIBRARY JOURNAL may be considered a "library training number," in view of the illuminating sketch by Miss Plummer of what has so far been accomplished and what may yet be accomplished in this field, and of the elaborate presentation of library examination papers, collated from different sources. Libraries have endeavored to apply the best civil service principles in selecting assistants, and in no profession has there been more marked growth in the standard set for entrance into practical work. The time has, happily, almost passed when the young woman who liked to read books and who had a friend on the library board was the natural candidate for an assistant's place, and on the other hand no class of training schools finds so immediate a demand for their graduates as do the library schools. The fact that every member of the present class at the Pratt Institute School is already assured of a position, and that this is almost a general rule in the classes of all the schools, speaks volumes in this direction. The "library spirit" conjoined with the training of the library school gives the young librarian an opportunity of social service which is in itself both stimulus and reward.

MR. CARNEGIE'S generous giving continues on an even more lavish scale, but with it there arise more and more questions as to the ac-

ceptance and administration of his gifts and their indirect result. More than one town has declined the gift because it was unwilling or thought itself unable to pledge the continuous appropriation for library support upon which Mr. Carnegie's gifts are conditioned, and in some quarters normal library development has been in some measure checked by the willingness of other towns to wait for Mr. Carnegie's beneficence rather than to do for themselves. In New York there has been little further development in relation with Mr. Carnegie's munificent offer, but there has been some reaction from it, especially among the smaller libraries which have heretofore received city aid under the state law, but which would be required, naturally, to come under the general administration of the Public Library, if this aid is to be continued. This is not really a "Carnegie question," for it had arisen, in fact, before Mr. Carnegie's gift was announced. The city controller had emphasized the suggestion that libraries receiving city aid should be a part of the general system of regulation and inspection. But this should not, as is feared by some, put a straight-jacket on the individual development of individual libraries, for a really comprehensive system should provide for the development of each branch or associated library according to the different needs of its locality or constituency. The ideal system is one in which the individual library should be saved the immense and wasteful cost of duplication of classification, cataloging, etc., should have the benefit of the large-minded experience of a librarian of the first rank, and should have, not least, full opportunity for individual development within its own proper sphere.

#### A SUGGESTION FOR POOLE'S "INDEX."

I NOTICED not long since in the LIBRARY JOURNAL Mr. Ranck's suggestion about the wearing out of the preliminary pages of Poole's "Index." I save these pages and the time of readers by having the list of the periodicals which are in this library closely typewritten, and mounted. For mounting at the present time two "Century dictionary" covers joined with a cloth hinge happen to be in use. The label on the outside reads, "List of periodicals indexed in 'Poole's index to periodical literature,' which are in the Northwestern University Library." Two copies of this list are kept on the table de-

voted to Poole's "Index" and supplements in the reading room. The entries made are in the following form:

*Lib. J.* Library Journal; complete.  
*Westm.* Westminster Review; 59—current vol.

The list is arranged alphabetically. This plan has worked very satisfactorily.

#### A LIBRARY OF MAGAZINE ARTICLES.

AN incarnation of Poole's "Index," whereby instead of the shadow one might have the substance, instead of a block of references on Cuba the articles themselves readily at hand and together—that is an attractive imagination. I have lately seen a collection of magazine literature which has something of this character, and a brief account of it may be of interest to others. The collection is the work of Mr. F. H. Bailey, for many years a teacher of experimental physics in Boston. For a long time he has taken the leading American periodicals of a popular nature, has dissected each number and classified the articles. In this way he has treated about 60 magazines, including a full set of the *Century*, *Scribner*, *New England*, *National*, *McClure*, *Ainsley* and *Puritan*, and a set of *Harper*, complete except for the first four numbers and three numbers in 1851. Among others included are *Cosmopolitan*, *Donahoe*, *Frank Leslie*, *Godey*, *Munsey*, *Metropolitan*, *Outlook*, *Peterson*, and of the English magazines, *Pall Mall*, *Strand*, *New Illustrated* and *Pearson*. It is estimated that there are well on toward 100,000 separate articles, even excluding the fiction from the count. The completeness of each article has been secured in many cases by the use of duplicate copies, and where such could not be secured the necessary amount at the beginning or end has been supplied by typewriting. The articles are neatly covered with stiff manila paper and lettered on the back where this was possible.

The classification has been worked out by experience without regard to D. C. or E. C., but seems sufficient to insure the quick finding of the subject desired. I was, however, unable to give sufficient time for a full examination of the arrangement in detail. The collection fills a large case of shelves, which are so constructed as to be easily and safely packed and moved. It seemed to me to contain much valuable material in readily accessible shape and to be worthy of maintenance and further development. To aid this an index book gives an exact record of every magazine contained in the collection. I understand that Mr. Bailey, who is prevented by ill health from continuing the work, would like to sell the collection, and would give more detailed information about it on request. His address is Rochester, N. H.

## TRAINING FOR LIBRARIANSHIP.

BY MARY WRIGHT PLUMMER, *Director Pratt Institute Free Library, Brooklyn, N. Y.*

THERE were formerly at least three methods of managing libraries in this country; first, by main strength, each librarian evolving a system of his own from his inner consciousness and that of his board, committing the same natural mistakes committed by the majority of librarians before him, and finally sitting down helplessly in the confusion thus created, solving each difficulty as it came up according to the inspiration of the moment, and occasionally finding the inspiration good. This type of librarian and board is fast disappearing, although it still exists in quarters not so very remote from the extreme of library civilization.

Then there was management by imitation. The board of the new library sent the librarian for two or three weeks to some large city library to pick up what he could by observation and by working in some of its departments. Naturally, he took the large library's system bodily back to the small new library, and found out only by long and hard experience that the so-called best is sometimes too good, and that he had to modify, prune, and generally make over the system for a period of years before it fitted the circumstances of his library.

There was also the opportunity, though a rare one, to learn certain parts of the work of a library by tuition. This was chiefly in college libraries, where one might learn the principles of cataloging, for instance, under excellent catalogers. The librarians or catalogers thus trained were not always the equals, as to education, of their teachers, and the chief fault to be found with this preparation was that the teacher was not always sufficiently critical in the beginning of the applicant's fitness for the work. And of course, there was the objection to its limited scope, in that it made catalogers only, not librarians.

It was surely time for something to be done. Librarians and their boards were overrun with applications, written and oral, for positions. They found themselves, very often, saddled with incompetents, with assis-

tants of poor education and no refinement. Persons of reading tastes, who would have liked to use libraries, were driven away by the affronts they met at the library from ill-bred young persons, secure in their positions by reason of influence. Of course, this was not so in all libraries, but it was so in many, as it still is in a few. It was natural therefore that the first effort after broad training for librarianship should meet with encouraging success from the beginning, as it certainly did. Too little credit is sometimes given to those courageous persons who are willing to try experiments for the general benefit, at a possible loss or expense to themselves; and among those who availed themselves of the services of the first graduates of the first school were some of our best-known librarians, to whom all honor is due for their assistance in this pioneer enterprise. The students of the second class were even more quickly absorbed into the work. Indeed the attitude of librarians generally toward the schools has been friendly, and those who preached "library school training" seemed always willing to go as far as they were permitted toward practicing what they preached.

A fear which existed in some quarters that the assistant who had learned by experience would be crowded out by the school-trained assistant, was not justified in those cases where assistants were intelligent and ready to adapt themselves to the new demand. The fact that a trained competitor might stand ready to take a given position when vacant could not fail to be a spur; and the opportunity of improving their own knowledge of their work was spur in itself for many, so that there were always in the classes some students who had come from libraries, urged by their own desire for enlightenment. A general awakening and spirit of generous emulation may be noted for the last 10 or 12 years, which seems to be owing largely to the impulse originally given by the schools. Librarians began to struggle more hopefully against the pressure in favor of the unsuitable local candidate, and to preach "trained assistance"

to their boards; and while some of them succeeded in putting in one or two trained persons, others secured perhaps a more general benefit for the library in the establishment of competitive examinations for all positions.

The sending forth each year into the library world of from 70 to 100 young people from the various library schools was bound to have at least one good effect—to carry the habit of discussion promoted in the school out into the profession. There had been, previous to the opening of any school, 10 years of conferences, at which library matters were discussed, but the attendance was not more than a third or fourth what it now is and it consisted chiefly of the heads of libraries, who, according to their gift, were able to carry the discussions home and inspire their respective staffs. The schools sent out as graduates more assistants than librarians, so that the enthusiasm for improvement now often began with the assistant himself, which is perhaps a preferable starting-point.

These were some of the outward effects of the establishment of library schools.

It may be asked, Why should attendance on a school have done more for the assistant in the way of arousing his energy and ambition than the work itself had been able to do? It is a fact that this is so, and there is a psychological basis for it, which thoughtful people appreciate. An instance from another field may make this clear. A teacher of cooking undertook a class of Jewish girls on the East Side. The first lesson in the course was the scrubbing of the kitchen floor, of which each student had her portion assigned. There was open rebellion. They had come to learn something, not to scrub floors. The instructor saw their point. She gave them a lesson on wood, the kinds of wood of which floors are made, the grain, the necessity of considering it in cleaning floors, etc., and she gained the day. They were learning something, and they did not mind the manual work provided it was simply the exemplification of what they had learned and not the primary object of tuition. It is, in short, the difference between science and tradition that the student feels, and the glorification of what has been drudgery.

Let us consider for a few moments the objects of library training: and first, the object of the inexperienced applicant in presenting

himself for entrance. As a rule, he does not know enough about library work to take it up from love of it or from a desire to elevate it; he is looking for an occupation that at the same time provides a congenial means of living and an intellectual or philanthropic stimulus. If the school accepts him, knowing him to be unfitted for the work and likely to be a failure, it is responsible primarily to the student and secondly to the profession.

If, after receiving an applicant as suitable, the school fails to provide the training that will fit him for actual work in libraries as they now exist, it is culpable toward all who enter its doors, as well as to the profession.

If it receives and trains students without a reasonable certainty of a demand for their services, it is culpable toward the student if it conceals the true situation, and indirectly toward the profession; for the throwing out upon the employment market of large numbers of trained persons who cannot find work would have an immediate tendency to bring the schools into disrepute and to lower the attraction of the work for the best-equipped persons. Thus in the long run the desired elevation of the work would not be secured, rather prevented.

Therefore, if only with reference to their own continuance in favor, the schools must have a constant regard to the amount and quality of the demand for trained assistants; and for the sake of the student, who is paying for his training, must not spend the brief time at their disposal in the teaching of things that will not be required of him, confining their instruction to those things that will meet in one way or another the existing need. For instance, if the greatest demand comes from public libraries, the training should be largely for public library service. If from the college library, then for college library service. This regard paid to the actual situation and to the student's case need not militate in the least against the fundamental, if not the most urgent object of training—the elevation of the profession. *That* the school should have in mind all along, but it would be hypocritical of the student at the beginning of his course, and concealed of him at the end of it, if he professed to be going out with this end in view. He begins his studies with a view to earning a livelihood by work that appeals to him, and he be-

gins his work determined to live up to at least what he has been taught and to do his best. It will not be until he has added some years of observation and experience that he will realize for himself the need of such elevation, or feel himself qualified to criticize the conditions of his profession. The highest possible ideal of librarianship should be and, I believe, is held before the students during their school course. It is the one thing calculated to counteract the absorption in the minutæ of cataloging and in the mastery of details necessary if the student would accomplish the technical part of his task.

Another object should be and, I think, is kept in view—the training in principles, and the education of the judgment of the individual, so that he may apply these principles in any given case and not fall back helplessly upon cut-and-dried methods as the only tool he has. During all the period of training, constant observation of the students' aptitudes and characteristics should be kept up by all who have them in charge, instructors and library-assistants alike. Invariably the existence of diversities of gifts is proven; and if the schools were always referred to in considering the engagement of a given trained applicant, librarians and library boards would often hear something to their advantage. The school could sometimes say, "The graduate in question is an excellent cataloger, but she is not calculated to work well with the public," or vice-versa. The certificate of the school, in our own case, states simply that the graduate has completed satisfactorily the course of instruction—not that he or she is fitted for any and every variety of library work. Personalities are too radically different for even an identical training to bring about this desirable consummation, especially in the one year that most students have to devote to the work. When one considers the task of the schools—first, to select by examinations, by interviews, by letters and references, the material most to be desired—then to plant in a field mostly quite barren of such seed, ideals of librarianship, business habits, and an accurate knowledge of technique, cultivating at the same time those traits of the individual which make for success in any work—all in one year, or at least in two—it is not surprising, perhaps, that they occasionally fail in individual instances. And if they

sometimes (but rarely) take into account sympathetically the circumstances of an applicant's previous life and, seeing a gleam of hope for the future, accept as students those who give more promise than they have so far given performance, it is surely not the opponents of school training who can object, for libraries have been full of untrained assistants, taken in from the same motives of sympathy and desire to encourage.

So much for the objects of the school training. Now as to methods. For the most part these are the methods of any graduate school—lectures, quizzes, seminars, the propounding of original problems for solution and presentation in class, recitation to show the accomplishment of assigned work, never as a re-rendering of what has been given out in lectures, written reviews and examinations, as well as oral, suggestive and inspirational, as well as technical, talks from visiting lecturers—and, to finish—actual work in the library connected with the school; these are the means by which the training is accomplished. Field-work, in the form of visits to libraries, publishing houses and book-dealers, book-auctions, binderies, etc., is always included. That a year is more or less crowded, with all this to be done, can be easily seen; yet a year is as much as many personally valuable applicants can give, and in our own case we have gradually stripped the first-year work of some of the proved non-essentials and shall do a little more in this direction next year—at the same time, relegating all thorough work in a special direction to second-year optional courses. The making of these courses independent of the first year, has brought back to us several graduates of earlier classes whose experience had shown them the direction in which they desired to specialize, or who have wished to drink again of the inspiration of study without going over old ground.

The differences of method of the schools are largely owing to the kinds of libraries with which they are connected, and each tries to supplement in the lines in which that library is lacking by recourse to co-operation with other libraries. The spirit of the library with which the school is connected is also calculated to make its impress on the school.

The dangers to which the schools are liable are several: First, the tendency of teaching

to become crystallized. This danger is more or less minimized by the fact that the results would soon show in the training of the graduates, and the school that had got into a rut would find itself taking second place. It is emphatically by their fruits, in the shape of the work done by graduates, that schools are to keep their reputations. The preventives of crystallization are strict attention on the part of the faculty to all library movements of significance, a practical share in the technical work or the administration of a library of some kind, so as not to lose technique and touch with the people who use libraries, and constant communication with other workers in the field, in order that they may be one with the profession and that they may hear and consider all well-directed criticism.

A second danger comes from the school graduate himself. Unless students are made to feel, while in the school, that they are merely learners, that it is in actual experience that they are really to gain their laurels, it is quite possible for a few of them to go out with the idea that wisdom will die with them, so far as library matters are concerned, and thus to antagonize those who might have been friends and helpers. A little experience is the chief antidote for this spirit, and it is wise to send such graduates to libraries where they will hold subordinate positions under librarians whose reputation must command their respect, and in association with assistants of superior age and acquirements whom they cannot disconcert. Another antidote is responsibility. There is nothing like being called to account for one's evident mistakes and failures, to take the scholastic conceit out of one—but it is not so advisable as the former way, because the library also suffers in the process. This particular danger is by no means so great as in former years, because school training is no longer a new thing, and the graduate knows that he is now only one of a large body of trained librarians and library assistants, and that his predecessors have by this time gained experience as well, which he has not yet had.

A third danger comes from the profession itself, and is really an outcome of the perception that training is valuable. I mean the lowering of salaries, and the consequent lessening of the attraction of work in libraries for well-educated and refined young men and

women, by the indiscriminate training of apprentices.

Take the case of a large city library. It has constant applications from citizens, young and old, educated and uneducated, refined and unrefined, for positions. The librarian cannot afford to pay good salaries to trained people unless they happen also to be citizens, the local prejudice being strong. The apprenticeship class seems a necessity, and he chooses those of the applicants who look bright and quick, sometimes sifting them by a slight examination. Then he "teaches them to do by doing"—and after a few months, when vacancies occur, introduces the most promising into the staff at a nominal salary. Very well if they continue to hold only the positions for which their education has fitted them. But quickness, or accuracy, or some special quality, combined with personal ambition, is very apt to promote them, without further examination or further study, and in the course of a few years copyists become catalogers, pages become heads of circulating departments, etc. With good examinations for entrance and for promotion, the danger of advancing mere quickness of manipulation and energy is avoided, but the examination for promotion is not general as yet.

Let us go back, however, to the apprentices who were not appointed when the vacancies occurred. Some of them can afford to wait longer, still working without payment, but others have reached the limit of their ability to wait, and think that having worked in one library they may work in another. The librarian feels bound to give them the letter they ask for, certifying to their "training." As they have worked so long for nothing, they are willing now to work for little more than nothing, and can underbid the applicant who has been first carefully selected and then carefully trained. The effect is to cheapen the work of all grades of assistants. And where the apprenticeship has not been preceded by a fairly stiff examination, the consequence of turning loose upon the library field of the untested apprentice, provided with a letter, is likely to bring an inferior grade of assistant into the field, lowering not only salaries but the educational and sometimes the social level of library staffs. For this reason the librarian should not allow his sympathies or his desire to rid himself of importunity,

to lead him to give his signature lightly to recommendations, or even to statements of bare fact, seeing that the glamor of a name so often blinds the reader to the real scope and significance of what is written above it. Library boards, and even some librarians, are not apt enough to go back of the word "training" to find out what it means—and an applicant trained in one way or in another, in a school or in a library, for a year or for six weeks, is all one to them—she is "trained" and that is enough. I am giving this as an extreme case, but I think its parallels exist.

The only thing that the schools can do in the face of this danger is to continue to select their students with care as to their education, personal characteristics, good breeding, etc., not to abate one jot of the thoroughness of their training, and then to let their work speak for itself. So far, except where the local library conditions are very unsatisfactory, the school student has not suffered appreciably from the apprentice, and librarians generally have appreciated the difference and recognized it pecuniarily. Library boards will probably also learn better how to discriminate.

The training given by the summer schools of library economy may also, if not carefully guided, be an exemplification of the saying that "the good is the enemy of the best." If they accept as students persons who could, with a little effort and resolution, take a more extended and thorough course; if they lead students to feel that there is no necessity for extended training since positions are obtainable without it, and the position's "the thing"; if they swerve from their original and professed object of helping those who already hold library positions and cannot give them up, but have a laudable desire to become better fitted for their work; if they do these things, and in so doing bring into competition the fully trained and the superficially trained applicant, the latter willing to accept a very meagre salary, they will be responsible for much harm. On the other hand, if they keep to their professed field, the supplying of deficiencies in the technical knowledge of those who already hold library positions, the inspiring of those who are obliged to work in greater or less isolation of spirit, they fill a most decided need and are worthy of all praise.

The fact that there are many libraries in small places unable to pay any but small salaries, and that for these they cannot secure fully trained heads, not to speak of assistants, is one deserving consideration, for their problem is a hard one. The town may be aspiring and ambitious, but it simply has not the money to pay even the average salary. Is the solution for this the engagement of the student with six weeks of training and no previous experience? It may be the only present method of meeting the difficulty, but there must be a better way. Let local persons, qualified by personality and education, secure the full year's or two years' training, and return to their own town inspired by local pride and the spirit of the missionary to make the home library a light shining in darkness, even if at some financial sacrifice to themselves. If such a person does not wish the position of librarian, let her become a member of the library board and train a librarian. Let the average student of the library school, who has no claim to exceptional brilliancy and no right to expect a leading position, but who has the more necessary virtues of painstaking, accuracy, sympathy and public spirit, aided by her educational fitness—let her look upon such a library as an ideal place in which to gain experience and prepare to go up higher, and realize that a small salary in a small place is more than equivalent to an average salary in a large place—and the problem is solved.

The contention of some librarians that school-trained assistants should go into libraries and work for nothing is unreasonable, for in most schools they can and do have practical work, and their services are valuable from the very beginning—certainly more valuable than those of the average apprentice with whom they would thus be put on a par. Nor can we have much sympathy with the board of the large library whose recognition of service ranges from the wages paid to cash-girls in stores, through a gradual advance of \$25 per year, up to the salary of the primary or intermediate grade teacher, when it expects to secure for this the selected student of the schools. Where a library appropriation is sufficient for good salaries and its ideals only are low, the case is entirely different from that of the small library whose ideals and aims are high and whose appropriation alone is necessarily small. In the latter case

the missionary spirit on the part of the student who accepts the small salary is an admirable thing—in the former case it would no longer be missionary spirit.

I cannot close this chapter on the dangers the schools have to meet without calling attention to a fallacy which seems to have taken root in some quarters, owing to constant repetition and a tendency we all have in some degree to accept what sounds like a truism without investigation. There has been a fashion of setting school training and certain personal qualities over against each other, as if they were antagonistic, and could not possibly exist in the same budget of qualifications. "School training is all very well," one hears said, "but common sense and sympathy are better." So they are, but why not have all? It is quite possible. It is the object of the schools to select those people from among their many applicants who seem to have the best personal characteristics; and throughout the course the student is constantly estimated with these very things in view. Entrance into a library school does not necessarily mean graduation from it, and a person distinctly lacking in judgment, in good manners, stands no chance of being recommended, especially for work requiring just those qualifications.

Nothing will ever take the place of personality in a library—and the large library run by machinery can never have the influence of the smaller library where a benevolent personality makes itself felt throughout. But it is entirely possible—indeed, I believe it is most likely to be the case—that there will be such a personality in all its work if the staff has in some measure been influenced by the teachings of the schools.

A few words as to the future of library training. What are its tendencies at present, and what do they indicate? I think a close observer can hardly fail to see the leaning toward specialization in training, following the rapid increase in the number, size, and kinds of libraries. The introduction of the children's department means the necessity for children's librarians, and consequently the preparation of a course fitting them for their work. The growth of large private collections, the tendency to give or bequeath them to some permanent institution for safe keeping, and the tendency of large libraries to buy *en bloc* desirable collections, means large

acquisitions of works on specific subjects, requiring for their classification, cataloging and handling a more intelligent understanding of the subject than the ordinary library course can possibly give. For such work our large libraries have frequently had to call on foreigners. A knowledge of cataloging alone does not fit one to catalog a law library, a medical library, a collection of music, of maps, prints or mss., or even of incunabula. The subject must be got in hand first, and the schools can never hope to supply a demand for such work until they have among their graduates persons who are intelligent in these subjects as well as catalogers. A case comes to mind of a library graduate who obtained the work of indexing a magazine of mechanics. She knew nothing of mechanics, and she knew that the general principles of indexing were not enough for her. She went to a successful teacher in a technological school, took such a course as he considered necessary to give her an understanding of the terminology of the subject, and then began her indexing with a hope of success which proved to be justified.

It is a mistake for a school to allow students to go out with the impression that because they have studied cataloging they can catalog anything. Unfortunately, libraries are somewhat to blame for this impression, since they pay equally, in many cases, for mere technical proficiency and for expert knowledge. The only person available who can handle satisfactorily a special collection is certainly worth more than the one out of hundreds who can do the current work on ordinary books, no matter how well. Not until the value of the specialist, the expert, is suitably recognized pecuniarily will our students, to any great extent, prepare themselves for special work. Those students who, in spite of the failure of the work to provide special emoluments, do a second year's work for the acquirement of greater insight into the scholarly side of librarianship, are invariably glad to have done it, but it is difficult to convince of this beforehand the first-year student who feels impelled, for one reason or another, to get to work. There are other lines in which the schools may find it necessary to specialize some day. College settlements now have libraries, and the would-be librarians of these should pur-

sue a course including in part the training for work with children and in part the study of sociology. The normal schools are awaking to the necessity of training teachers in the use of libraries. For the normal school librarian a course including the study of school curricula, of the history of education, etc., is desirable; while a course especially fitting the student to organize libraries and train local staffs is really urgently needed. A specialist in our own and foreign state documents would probably find a large field awaiting her, for instance, if she went about to libraries, putting their documents in order and showing them how to handle future additions.

When libraries become themselves sufficiently conscious of their special needs and sufficiently appreciative of those who supply them, it will be comparatively easy to keep students two years, and even three, for preparation; though I doubt if there is any one school or library which, unaided by co-operation with other institutions, could give the whole of the necessary preparation. Judging from our own experience, however, such aid and co-operation would be easy to obtain, given the proper source at hand, for the great

reference and college libraries naturally sympathize with any attempt to raise the standard of library work and bring it within the scholarly atmosphere. It is my hope that some day our leading universities may have chairs of librarianship, with courses similar to, though perhaps more extended than, that given by Dr. Dziatzko at Göttingen, and that the mature college student may be able to elect college work that will combine naturally with these courses.

We cannot afford to lose scholarship from our libraries in our care for technique, for executive ability, for personality. Let us not be "content with our middlingness," to use George Eliot's phrase, let us rid ourselves of the reproach that we are merely quick of perception and practical, but not thorough and not appreciative of depth, and that we do not look beyond the present moment. Even if one did not know that there are many librarians who sympathize with this aspiration, one would still be willing to be a voice crying in the wilderness, if only so this further ideal might be kept in view, in addition to those we already hold of practical usefulness and technical perfection.

#### LIBRARY EXAMINATIONS AND METHODS OF APPOINTMENT.

At the sixth conference of the American Library Association, held in Buffalo in 1883, the following resolutions were adopted:

*"Resolved,* That efficiency in library administration can best be obtained through the applications of the cardinal principles of an enlightened civil service, viz.: the absolute exclusion of all political and personal influence; appointment for definitely ascertained fitness; promotion for merit; and retention during good behavior; and

*"Resolved,* That, in the opinion of this association, in large public libraries, subordinate employees should, so far as possible, be selected by competitive examination, followed by a probationary term."

Ten years after the passage of this resolution, at the Chicago World's Fair meeting, Mr. Hill reported that of 229 libraries communicated with on this subject, only 17 made appointments on the result of written examinations, although "the consensus at the Chicago meeting decidedly favored such examinations." Since then the practice has been much more widely adopted—often in connection with a term of apprentice ser-

vice—especially in the more recently established libraries.

As an indication of the character of information and equipment required of library assistants, of special interest in connection with Miss Plummer's paper on the professional training of librarians, there are here submitted a selection of examination papers prepared and used by representative libraries, together with brief statements of method from other libraries, in which written or competitive examinations have never been adopted.

The examinations conducted by the Los Angeles (Cal.) Public Library are elaborate, and form a part of the routine of the training class, long a successful feature of that library's administration. The training class was organized in 1891, when it was decided "That previous to being given paid employment all applicants be required to take a course of training in this library," this training including four hours of daily library service, without salary, for six months. It was later provided that "the work of the training class shall hereafter be confined to the preparation of young

women for service as attendants in this library." Entrance to the training class is by written examination, supplemented by an oral examination conducted by a committee of the board, "designed to supplement the written, on those points which no written examination can possibly reveal—that is, personal appearance, general manner, alertness, etc." The entrance examination prepared for the 13th training class, held Oct. 15, 1900, is as follows:

I. Name ten books which you have read during the past year, giving a brief opinion of three.

II. Locate by country and briefly characterize the following: Milton, Dante, Tolstoi, Hugo, Cicero, Raphael, Socrates, Confucius, Goethe, Ruskin.

III. In what works do the following characters appear? Maggie Tulliver, Rudolf Rassendyll, Shylock, Becky Sharp, Jeanie Deans, Jean Valjean, Betsy Trotwood, Simon Legree, Gabriel Lajeunesse, and Jo March.

IV. Name three scientists of note, five musical composers, and five painters.

V. Name five magazines with which you are familiar, briefly stating the character of each. Name five daily newspapers.

VI. State briefly the meaning or the effect of the following events: Battle of Hastings; Edict of Nantes; Battle of Waterloo; Battle of Manila.

VII. When was California admitted as a state? Name the Governor of the state, the U. S. Senators, and the Congressman from this district.

VIII. What is the Board of Freeholders, and what the character of the work they are engaged upon?

IX. What elections occur this fall? Name the principal candidates, the office for which they stand, and the party to which they belong.

X. Name some of the most notable inventions and scientific discoveries of the past fifty years.

Commenting on this, Miss Jones says: "The written examination is a new departure in the training class work, the preceding 12 classes having been admitted on the oral alone. To me it was a significant fact that the six who presented the best written examination excelled in the oral, but this might not be true at another time. Of course this examination does not admit to the library, and the examinations which are passed at the close of the six months' term would really be considered as pre-requisite to admission to service in the library." These later and more technical examinations cover the various divisions of library work. Those prepared for the 12th class (1899) were in part as follows:

#### GENERAL LIBRARY METHODS:

Describe the accession book. State its purpose in the library.

What are the various functions of a shelf list?

How are pamphlets cared for in this library?

What items are of importance in checking the magazines and newspapers?

What is a tight-back book? Define a signature.

What are the respective merits of records on sheets and on cards in the various departments of the library?

Name three periodicals which you would recommend to a person seeking a technical knowledge of library methods, stating for what you would recommend each.

Aside from periodicals, name four works of value to the same person.

Give an outline of the library law in California, stating any modifications of it relating to Los Angeles.

What statistics are kept in this library and what is their value?

What is fixed location and its opposite? Name the advantages of each.

Garvanza has a subscription library of some 300 volumes. The authorities ask that this library ac-

cept these books and in return maintain a delivery station in that part of the city. Give reasons for accepting and for rejecting the proposition.

Suggest wherein the course of study of the Training Class may be improved.

What means could be employed to raise the grade of reading in this library?

#### GENERAL LIBRARY TOPICS:

Give briefly the development of a written language.

State briefly the successive stages from the early written language to a book of to-day.

Describe at length any one important stage.

What records of books published in America have we in this library?

Trace briefly the development of the free public library movement.

Name six of the largest libraries in the world.

Name five prominent American librarians, mentioning the library with which each is connected.

Name two histories of painting.

Name two histories of architecture.

Name two books on birds.

Name two musical works.

Where among the public documents would you look for an article on nut culture? On secondary education? On salmon fisheries? On Indian blankets? On Yellowstone Park?

Give a brief history of the Los Angeles Public Library.

Problem: A reader wishes a half dozen articles covering the subject—the English-Russian Boundary Dispute. State the reasons which would guide you in deciding upon articles found in the following periodicals:

1. *Quarterly Review.*
2. *Saturday Review.*
3. *Spectator.*
4. *American Law Review.*
5. *Harper's Monthly.*
6. *Review of Reviews.*
7. *American Monthly.*
8. *New Review.*
9. *London Geographical Journal.*
10. *Littell's Living Age.*
11. *Political Science Quarterly.*
12. *North American Review* (a symposium.)
13. *Century.*

Plan of the Los Angeles Library.

#### CATALOGING:

1. What distinguishes the main entry of a book from all other entries?

2. When is an author's full name used? When abbreviated, and how?

3. What cards are made for an autobiography? For fiction?

4. What is the rule for pseudonymous books?

5. What is the rule for anonymous books?

6. What is the difference between a "see" reference and a "see also"?

7. Name ten works of reference useful to a cataloger and state why in each case.

8. How would you explain to a person, who had never seen one, the use of our card catalog?

9. Name and locate the various catalogs, card, printed, and manuscript, in this library.

10. Give subject headings to the following, with references in full:

Whitney. Language and the study of language.

Northrup. Camps and tramps in the Adirondacks.

Maclaren. System of physical education.

Howells. Italian journeys.

Putnam. Children's life of Lincoln.

Baird. History of North American birds.

11. Catalogue in full:

Irving. Granada.

Public library handbook.

and one of the following:

Stebbing. Peterborough;

Temple. Laurence;

HCooper. Wellington.

CLASSIFICATION (3 hours.)

Answer questions 1-4 without helps, and hand in your paper before answering the questions following

1. Give the name of the 1st, of the 2d, and of the 3d figure of the class number.

2. On what plan is literature divided? Illustrate by a specific number, telling what each figure means.

3. On what plan is biography divided? Illustrate by a specific number, telling what each figure means.  
 4. The number of the history of Paris is 944.36. What is the number for the description of Paris?  
 Answer the following questions by the help of the Decimal classification.

5. Give class number for history of slavery in Russia.
  6. Legislative manuals of France.
  7. A Polish grammar.
  8. An American dictionary.
  9. History of the Franco-German war.
  10. Collected works of James Russell Lowell.
  11. Poems of James Russell Lowell.
  12. Essays of James Russell Lowell.
  17. Life of a Russian traveller.
  14. Of a French lawyer.
  15. Of a Queen of Holland.
  16. Of a philologist.
  17. A life of James Freeman Clarke.
  18. Bibliography of chess.
  19. A bibliography of Darwin.
  20. A bibliography of Shakespeare.
  21. Map of Oceania.
  22. A work on methods of writing history.
  23. Mrs. Harrison's "Anglomaniacs."
  24. The flora of Albany County, N. Y.
  25. What class of books belong in 220.91?
  26. In 920.073?
- Give the distinction between the following class numbers:
27. 656, 385, 625.
  28. 390, and 913 to 919.
  - 29 to 34. Classify six books to be assigned.

At the San Francisco Free Public Library regulations adopted in 1895 provide that all appointments to the staff shall be made from an eligible list, names for such list being secured through examinations of applicants "held under the supervision of an examining committee composed of members of the Committee on Rules and Administration and the librarian." The list of questions asked at the last examination is submitted by Mr. Clark, who adds: "In addition to the questions herewith the applicants were asked to write an essay of not less than 300 words on one of the following topics:

1. Longfellow.
2. Slavery in the United States.
3. The war in South Africa.

"For the purpose of ranking the candidates the Examining Committee apportioned the credits as follows:

Literature.....	300	} The essay was marked for these.
Probationary service.....	250	
History.....	150	
Composition.....	100	
Grammar.....	25	
Spelling.....	25	
Geography.....	100	
Arithmetic.....	50	

1000

"Literature is the first examination held, and all who do not pass satisfactorily are excused from the remaining examinations."

LITERATURE EXAMINATION, SAN FRANCISCO PUBLIC LIBRARY.

- I. Give the names of the authors of the following works:
  1. Anatomy of melancholy; 2. Curiosities of literature; 3. Adventures of Telemachus; 4. Sorrows of Werther; 5. Areopagitica; 6. Murder considered as one of the fine arts; 7. Sartor resartus; 8. Stones of Venice; 9. Two years before the mast; 10. Bab ballads; 11. Paul and Virginia; 12. Ingoldsby legends; 13. Religio medici; 14. The Decameron.
- II. Give the names of the authors who wrote under

the following pseudonyms, with the title of some work written by each:

1. Owen Meredith; 2. Ik Marvel; 3. Barry Cornwall; 4. Charles Egbert Craddock; 5. Diedrich Knickerbocker; 6. Pisisstratus Caxton; 7. George Eliot; 8. John Phoenix; 9. Christopher North; 10. Currer Bell; 11. Father Prout; 12. Artemus Ward; 13. Mark Twain; 14. Gail Hamilton.

III. Give the names of the authors of the following novels:

1. Castle of Otranto; 2. Lavengro; 3. Marble faun; 4. White lies; 5. Cranford; 6. Vathek; 7. East Lynne; 8. Epicurean; 9. John Brent; 10. Frankenstein; 11. Villette; 12. Uncle Tom's cabin; 13. Vivian Grey; 14. Clarissa Harlowe; 15. Eugene Aram.

IV. Give the names of the authors of the following poems:

1. Vision of Sir Launfal; 2. Kubla Khan; 3. One hoss shay; 4. Burial of Sir John Moore; 5. Bonnie Dundee; 6. Allan Percy; 7. Sheridan's ride; 8. Cotten's Saturday night; 9. Ivry; 10. Destruction of Sennacherib; 11. Abou Ben Adhem; 12. Annabel Lee; 13. How they brought the good news from Ghent to Aix; 14. Battle hymn of the republic; 15. Casabianca.

V. Of what epoch or country have the following authors written a history?

1. Milman; 2. Hildreth; 3. Mommsen; 4. Motley; 5. Lingard; 6. Niebuhr; 7. Gibbon; 8. John Fiske; 9. Harriet Martineau; 10. Justin McCarthy; 11. Francis Parkman; 12. John Foster Kirk.

VI. Name the works and authors in which the following characters are found, and some trait peculiar to each character:

1. Falstaff; 2. Bob Acres; 3. Mrs. Grundy; 4. Captain Costigan; 5. Ithuriel; 6. Oily Gammon; 7. Pecksniff; 8. Di Vernon; 9. Mrs. Caudle; 10. Scrooge; 11. Sir Artegal; 12. Flora McFlimsey; 13. Dr. Primrose; 14. Charles Surface; 15. Squire Western.

VII. What historical event is referred to in the following works?

1. Marmion; 2. Evangeline; 3. Tale of two cities; 4. Kenilworth; 5. Barnaby Rudge.

- VIII. 1. In whose reign did Pepys write his Diary?
2. In what form was it originally written?
3. What other person has left a diary covering the same period?
4. Name five writers of French drama.
5. Name two English translations of Dante.

GEOGRAPHY:

1. Mention some advantages to commerce that a ship canal across Nicaragua would bring about.
2. Describe Admiral Dewey's course from Manila to New York, naming the different bodies of water through which he sailed.
3. Name two great wheat producing countries. Name two great iron producing countries. Name one American industry of which California has a monopoly.
4. Locate briefly the most elevated region of each of the Grand Divisions and name two large rivers that have their sources in each of these regions.
5. Locate Liverpool, Copenhagen, Stockholm, Cologne, Lyons, Malaga, Trieste, Hamburg, Odesa, Oporto. (Just give the country of each.)
6. Locate Smyrna Aden, Teheran, Bangkok, Cavite.
7. Alexandria, Magdala, Pretoria, Bloomfontein, Ladysmith.
8. Bogota, Lima, Valparaiso, Buenos Aires and Cayenne.
9. What sections of the United States are most noted for the production and export of wheat?
10. Name five states noted for cotton; two for petroleum; three for tobacco; three for lumber; two for iron; three for cattle raising; two for manufactures.
11. Give the boundaries of the Zones and state distances in degrees from the Equator. How many statute miles in one of these degrees?
12. What causes an eclipse of the sun? Of the moon?
13. What are the causes of the ocean currents? Of tides? Of differences in annual average temperature?

## HISTORY:

1. Name three voyagers who explored portions of the coast of California prior to 1650.
2. Give a brief account of the discovery of San Francisco Bay.
3. What was the "bear flag" revolt?
4. What is the "Consolidation Act"?
5. What territory has been acquired or annexed by the United States since the declaration of war with Spain?
6. What were the "Kentucky resolutions"? When were they passed?
7. Name the sovereigns or rulers of England in chronological order from 1066 A.D. to the present.
8. What is the Domesday Book?
9. What were the "Wars of the Roses"? In whose reign did they begin?
10. State briefly the causes of the French revolution. Who was the sovereign of France at the time of its outbreak?
11. Give a brief account of the events culminating in the battle of Omdurman?
12. What countries constitute the "triple alliance"? For what object was it formed?
13. What was the "Edict of Milan"? By whom was it promulgated?
14. By whom was fought the battle of Chaeronea? What was the effect upon the defeated nation?
15. When did they flourish and with the histories of what countries are the following respectively associated: Constantine the Great; Wallenstein; Richelieu; Cavour; Junipero Serra.

## ARITHMETIC (all answers must show the entire work):

1. [Dictated.]
2. How many yards of silk can be bought for \$100 at \$1.62½ per yard?
3. What will it cost to lay linoleum in a library room 27 ft. by 60 ft. at 85 cents per square yard?
4. The meter is 39.3708 inches in length and the yard 36 inches. If a merchant import 200 meters of silk at a total cost of \$300, what will he gain by selling it at \$1.50 per yard?
5. The diameter of a circle is estimated to be  $\frac{7}{8}$  of its circumference and also, more accurately,  $\frac{11}{16}$  of it. Which of these fractions is the greater? Express their difference decimally.
6. Two boys become partners in selling newspapers. One invests \$2 and the other \$1.50. When they have made a profit of \$5.60, they decide to dissolve partnership and divide the gain in proportion to their investments. How much does each get?
7. Which is the better investment, to purchase stock that pays 5 per cent. at 120, or stock at 80 that pays 3 per cent.? Give full explanation.
8. The average number of visitors daily in three branch libraries is 70, 80 and 90 respectively; if 3600 books be divided among these branches in proportion to these averages, how many will each receive?
9. (a) What per cent. of 50 lbs. is 5 lbs. 4 ozs.?  
(b) One half a stock of goods was sold for  $\frac{2}{3}$  of the value of the whole stock. What was the gain per cent. thereon?
10. If one steamer start at noon and sail at the rate of 10½ miles an hour and another start from the same place at half-past one, and sail in the same direction, at the rate of 12 miles per hour; at what hour will the latter overtake the former?
11. If I lend \$1000 to A at 8 per cent. per annum, simple interest, and \$1000 to B at 6 per cent. per annum, compound interest, payable half-yearly; what amount will each owe me at the end of two years?
12. Work the following in the shortest way you know:
  - (a.) Find interest on \$743.60 for 8 months at 1¼ per cent. per month.
  - (b.) Find the percentage of gain a newsboy makes when he buys papers at the rate of 2 for 5 cents and sells them at the rate of 3 for 10 cents.
  - (c.) Find cost of 224 articles at \$1.75 each
  - (d.) Find cost of 8 pairs of gloves at \$13.55 per dozen.
  - (e.) Find cost of 64 yds. of cloth at 37½ cents per yard.
  - (f.) A pound avoirdupois weighs 7000 grains and a pound troy 5760 grains. What decimal is the latter of the former?

Regarding the appointments at the St. Louis Public Library Mr. Crunden says:

"The examinations for appointment to the position of apprentice in the St. Louis Public Library include papers on general history, general literature—particularly English and American—and general information, together with easy translations from Latin, French and German, or in two of these and some other language which may be taken in lieu of one of them. In a few instances Greek has been taken, and in one or two Spanish. The examination presupposes a first-class high school education. High school graduates more often fail than succeed; and two college graduates have failed to make a satisfactory percentage, having been distanced by applicants who have been only graduates of the high school. The examination is always competitive.

"The standard is about the same as that which existed for entrance to the Albany Library School six or eight years ago. Some of the school's entrance examinations at that time were used by us with very little change. Of late years, however, the Albany examinations have been too severe. The examination generally occupies a day and a half, the history and literature taking the greater part of the first day, and the paper on general information and languages being completed the second morning. With scarcely any exceptions appointments have been made in accordance with the percentages made in the examinations; but personal qualities—health, appearance and manners—are taken into consideration, and might easily outweigh advantages in percentage. Applications are considered only from persons between the ages of 17 and 25.

"The other grade to which appointments are made is that of messenger or page. This is open to boys from 12 to 17. The examination is such as a graduate of a grammar school, who has done some good reading, may be expected to pass. Most of the applicants come from the public schools, and are between the ages of 13 and 15. By passing subsequent examinations these boys may progress to higher grades. Boys of 16, who have come from the grammar schools and been two years in the library, have, on two occasions, taken the higher examination for apprentices and averaged more than 10 per cent. above the average of the high school graduates who took the same examination."

For the Indianapolis (Ind.) Public Library Miss E. G. Browning submits the following report: "Applicants must be between the ages of 20 and 30 years, unmarried, and residents of the city of Indianapolis. A personal application must be made to the librarian, and if the applicant is found to be a suitable person, her written application is filed. When a necessity for new substitutes arises, postals are sent to all those whose applications have been filed. These persons take an examination in general literature, and they must have had a

high school education, or its equivalent, in order to pass this. All those who pass above 78 per cent. are placed on the substitute list, and are trained, three at a time; those passing highest are considered first. This weeds out from our list of applicants those who are deficient in education, or who are too nervous to be relied upon in an emergency.

"The present law gives the librarian of this library the sole power to appoint or discharge the attendants, and this first step, the examination, is the one I have adopted in order that the board and its officers shall be relieved of the constant attempt to bring influence to bear upon the making of appointments in the public library.

"While the substitute is taking her training she understands that she is not a member of the force, and is likely to be dropped at any time if she is found to be unsuitable in any way. Before she begins her training she must bring a certificate from one of two well-known physicians here — women, members of the regular and homœopathic schools. This examination is a very rigid one. While she is taking her training she is under constant surveillance in order to determine whether she is accurate, good tempered and pleasant mannered with the patrons and with her fellow-workers. If not, or if she shows a disposition to shirk her fair share of work, or if she develops traits that seem to show her to be undesirable, these deficiencies are pointed out to her and she is given a good chance to break herself of what may lead to forming very bad habits. If after repeated warnings she fails to change her ways she is dropped, and another substitute is taken on. Otherwise, when a vacancy occurs she gets a regular appointment. We have held these examinations for six years, and have had three of them. I would not change this method for any other, as long as it brings about such satisfactory results."

#### INDIANAPOLIS PUBLIC LIBRARY, EXAMINATION QUESTIONS:

1.

Write a business letter addressed to the librarian of the Indianapolis Public Library, applying for a place in the library, stating:

- (a) What educational advantages you have had.
- (b) What occupation you have followed.
- (c) Whether you are conversant with any other language than English.
- (d) What you consider necessary qualifications for a library attendant.
- (e) Give date of your birth and sign full name and place of residence.

2.

What do you consider the scope and purpose of a public library?

3.

Name authors and titles of books in which the following appear as characters: Jean Valjean; Becky Sharp; Rip Van Winkle; Shylock; Meg Merrilies.

4.

Name ten leading magazines and state their general character.

5.

Name one work of each of the following authors: Charles Kingsley; Charles Lamb; Thomas Carlyle; Goethe; Chaucer; John Fiske; Robert Browning; Wordsworth; Tennyson; Milton.

6.

Write a short criticism of some book you have read — not fiction.

7.

Name five women authors, with the title of one work of each.

8.

Give the real names of the following: George Eliot; George Sand; Diedrich Knickerbocker; Owen Meredith; Uncle Remus; Charles Egbert Craddock; Christopher North; Boz; Miss Mulock.

9.

Name five scientists and five historians.

10.

Name five celebrated writers — a German, French, Russian, Scandinavian, and Italian.

At the Cleveland (O.) Public Library applicants for positions are required to fill out a detailed blank, which, in addition to the usual demands as to age, condition, nationality, education, etc., includes such questions as: "How long have you resided in Cleveland?" "Do you live with your parents?"

"If not, state reasons." "How many situations have you filled during the past 18 months, and in what capacity did you serve?" "What language or languages have been spoken in your home?" "Would you accept an appointment for one year as a substitute, to work whenever your services were needed, at a compensation of 12½ cents per hour?" A "circular of information" is issued with the application blanks, which gives full details regarding the requirements and conditions of the library service.

CLEVELAND PUBLIC LIBRARY, EXAMINATION QUESTIONS: HISTORY AND GENERAL INFORMATION (3 hours.)

Answer questions 1-2 and eight of the others. If more than eight of the others are answered, only the first eight will be considered.

1-2. Write about a page on one of the following subjects: expansion, initiative and referendum, silver question, municipal ownership, woman suffrage, German in the public schools.

3. Mention the principal colonies of the British empire.

4. Mention some of the leading causes that brought about our late Civil War, and show some of the results of the struggle.

5. Characterize briefly, giving country, century, and for what noted, ten of the following: Galileo, James Anthony Froude, Phillips Brooks, Robespierre, F. Hopkinson Smith, John Hay, Albrecht Dürer, Père Marquette, Marco Bozzaris, Demosthenes, John Knox, Leonardo da Vinci.

6. Name one English and two American weeklies treating of public questions; one English and one American critical review; a prominent journal devoted to art; sport; religion; science; household affairs.

7. Give a brief outline of the colonial history of Massachusetts, New York or Virginia.

8. Name two men who have been Secretary of State; two who have been governor of Ohio; two who have been Speaker of the House of Representatives.

9. Tell briefly (about two or three lines) what is suggested by the following: French academy, Cripple Creek, Tai Mahal, Brook farm, Ides of March, University extension, Lion of Lucerne, Chevy Chase, Society for Psychological Research, Reign of law.

10. Mention five famous pictures, giving artist of each.

11. Who discovered:

- Circulation of the blood?
- That the earth moves around the sun?
- Law of gravitation?
- Motive power of steam?
- Principle of the lever?

12. Write five or ten lines on each of two of the following: Julius Caesar, the Crusades, the Thirty years war, settlement of California.

13. Give approximately the period covered by each of the following historians of the United States: Bancroft, Hildreth, McMaster, Rhodes, Henry Adams.

GENERAL LITERATURE (3 hours.)

Answer ten questions. If more than ten questions are answered, only the first ten of these answers will be considered.

1. Mention one writer and one book on each of the following subjects: education, fine arts, religion, travel, sociology, science.

2. Name a good work (by author and title) treating of political economy, the discovery of America, the French revolution, English literature, the history of Greece.

3. What do you consider the best English encyclopædia? The best one published in America? Compare the two in a general way.

4. Name the standard dictionaries in the English language, and mention in what particular each one is especially strong.

5. On what special subject have the following authors written: Ernest Seton-Thompson, Richard T. Ely, Charles Darwin, Mary Baker Eddy, Dr. Nansen, Friedrich Froebel, John Burroughs, Dean Farrar, J. L. Motley, Aristotle.

6. Mention three of your favorite authors, giving reasons for your preference.

7. Mention as many works as you can of Milton, Goldsmith, Carlyle, Tolstoy, Hugo, Lowell, Irving, Thackeray, Hawthorne, Robert Browning.

8. Name five novelists writing in English, whom you would regard as in the first rank, giving briefly a characteristic of each, and name one or more of the best books of each.

9. Name two Greek dramatists, a Roman historian, a Roman epic poet, a Roman lyric poet.

10. Name three great German writers who flourished during the latter half of the 18th and early part of the 19th centuries.

11. Name an historical poem, giving the country and events illustrated and the author's name; a poem of travel, giving author and country written about; a noted sonnet; a well-known ballad.

12. Give the authors of the following: *Stones of Venice*, *Conduct of life*, *Anatomy of melancholy*, *Sartor resartus*, *Water babies*, *Wealth of nations*, *Gates ajar*, *Doll's house*, *Sentimental journey*, *Margaret Ogilvy*.

13. Name the authors of the following: *Janice Meredith*, *Richard Carvel*, *To have and to hold*, *The reign of law*, *David Harum*, *Robert Elsmere*, *The Honorable Peter Stirling*, *A gentleman of France*, *The Prisoner of Zenda*, *The master*.

From the Minneapolis (Minn.) Public Library are received the following examination papers prepared for applicants for the position of library apprentice:

LITERATURE:

1. Name ten books that are authority on some subject in which you are especially interested. Indicate the particular value of each book.

2. Give an estimate of any author of whom you have made a special study. Indicate also the extent and line of that study.

3. Name two well-known works by each of the following authors: James Bryce, Immanuel Kant, Henry Thoreau, Jane Austen, Thomas Hughes, Marcus Tullius Cicero, W. E. H. Lecky, Arthur Penrhyn Stanley, Philip Gilbert Hamerton, John Fiske.

4. Explain what is meant by the *renaissance*, especially in relation to literature.

5. Write a criticism (about one page) on one of the following: Victor Hugo, Heinrich Heine, Ibsen, Tolstoy.

6. Mention a distinguished English or American author who was prominent in public life. Discuss the relation of his public to his literary work.

7. Group by century and arrange in proper chronological order the following: Charles Kingsley, Henry Fielding, John Gower, William Cowper, Maria Edgeworth, Percy Bysshe Shelley, Sir Philip Sidney, Ben Jonson, Richard Brinsley Sheridan, Sir Richard

Steele, Leigh Hunt, Christopher Marlowe, John Dryden, Matthew Arnold, Tobias Smollett, Colley Cibber, Dante Gabriel Rossetti, Thomas Gray, David Garrick, John Bunyan.

8. Describe the transcendental movement in New England, especially in its relation to American literature.

9. Give an outline of the history of English poetry such as would be useful for chapter heads in a work on that subject, giving names of chief writers in each period.

SCIENCE:

1. What is the province of chemistry? of physics? of metaphysics?

2. Define briefly the following scientific terms: fauna, crustacea, strata, molecule, evolution.

3. Mention and describe five deciduous and five evergreen trees.

4. In what fields have the following men gained fame: Max Muller, Pasteur, Cuvier, Linnaeus, Sir Roderick Murchison, W. D. Whitney, Volta, Faraday, Asa Gray, Lamarck, Goethe (in science), Agassiz.

5. To what branches of science do the following phrases belong: the unearned increment, the survival of the fittest, the correlation and conservation of forces? What do the phrases mean?

HISTORY:

1. In the case of the battle of Marathon, describe the cause at stake, the nations taking part, and the personages on both sides who were prominent.

2. Give some account of Marcus Aurelius.

3. Compare Charlemagne and Napoleon as military leaders and civil organizers.

4. Show the results of the crusades on European life.

5. Describe the model parliament of 1295, and state the main points in the development of the House of Commons from that time to the present.

6. Explain the objects of the counter reformation, and show how far they were the same as the objects of the Protestant revolution.

7. Compare the part taken by Spain in the discovery and settlement of America with the part taken by France and that taken by England.

8. What were the theories of England in the 18th century in regard to colonial government? How far did these theories justify the colonists in separating from England? How has England modified her colonial government during the present century?

9. What part did the following men play in the history of England: Simon de Montfort, Sir Robert Peel, Clive, John Hampden, Thomas Cranmer, Richard Cobden?

10. Illustrate from the history of France the truth of the following statement: "History furnishes numerous examples of fruitless attempts to impose on people constitutions whose principles are not in harmony with the popular political sentiment."—*Tiedeman*.

11. Mention historical facts that prove or disprove the following statement: "As the British constitution is the most subtle organism which has proceeded from progressive history, so the American constitution is the most wonderful work ever struck off at a given time by the brain and purpose of man."—*Wm. E. Gladstone*.

12. Compare the organization and powers of the American House of Representatives with those of the English House of Commons.

In addition, exercises for translation are given in French, German and Latin, and knowledge of Scandinavian languages is tested orally and from books.

The methods followed at the Detroit (Mich.) Public Library are thus described by Mr. Utley: "The system of competitive examination for the selection of persons for employment as library assistants has been in vogue in the Detroit Public Library for 20 years. The library is not subject to any civil service board. The plan was adopted independently and the details are in the hands of the Committee on Administration, governed by

a rule which provides that "The selection of regular assistants and substitutes, excepting such as may be required for special duties, shall be made from those who have submitted to and passed a regular examination, duly advertised to be held publicly. The successful passing of such an examination places candidates in line of appointment to act as substitutes or regular assistants, but gives them no right to demand appointment, as the commission reserves to itself the right of selection, irrespective of grading developed at the examination. The papers submitted by candidates at the examination shall form the basis of the recommendation made by the committee thereon, but the committee may also take into consideration the age, health and domestic relations of candidates, as well as their bearing and moral character."

"No regular dates are set for the examinations, but they are subject to emergencies which may arise. When the list of eligibles is exhausted an examination is called, and notice of time and place is mailed to every known applicant. No preliminary ceremony is necessary, no blanks to be filled out, no endorsements required. The applicant simply files her name and address with the librarian and receives notice when the examination has been called. There is also newspaper announcement, and every one who chooses to do so is privileged to come in and make the trial. Only, those who pass are required, if not personally known to the librarian or some member of the board, to furnish endorsements of known citizens as to character and moral standing. In recent examinations there have been as many as 75 to 100 candidates.

"The percentage of correct answers required for success has been, for a number of years, 75. This is not fixed by rule, but is subject to change at any time. It will be noticed that the rule provides that the successful passing of an examination does not of itself guarantee employment. The candidate who ranked highest might be too young or too old to be thought desirable; she might have physical defects or be very unattractive in appearance and manner; she might have a husband able to support her, or children which require a mother's care, in which cases her claims simply would not be entertained.

"After each examination the committee makes up a list of eligibles from those who have reached the required percentage, which list they recommend to the board for approval. This list, when approved, is placed in the hands of the librarian, and he is given discretion in calling the persons named therein into service. Usually they are likely to be called in the order of their standing, but there are sometimes good reasons for changing this order. It is well understood by candidates that they are given opportunity for library work on trial merely. Sometimes it is quickly seen that they are not wholly desirable for the work in every way. Such are quietly dropped and their places supplied

from the list. With so many applicants and so many successful in the examination we can afford to be decidedly critical of shortcomings. A thorough and satisfactory trial is given before appointment to the permanent staff, which is made upon the recommendation of the librarian. This probationary period sometimes extends over as long time as two years, depending upon vacancies in the staff or opportunities for promotion. There are at present six persons on the temporary list who are working either full or partial time and four upon the eligible list who have not yet been given a chance to show what they can do.

"The most recent examination was in July, 1900. Two persons passed this examination with a grading of 97 per cent., and six passed above the required 75 per cent. The examination continued through two sessions of three hours each. The morning session was devoted to general information and history and the afternoon session to general literature." The examination papers were as follows:

GENERAL INFORMATION, HISTORY:

1. Where in this country is the power vested:
    - a To regulate marriage and divorce.
    - b To grant street railroad franchises.
    - c To regulate the currency.
    - d To limit or extend the suffrage.
    - e To make treaties with foreign powers.
    - f To determine the constitutionality of a law passed by Congress.
    - g To appoint judges of the federal courts.
    - h To elect United States Senators.
    - i To grant municipal charters.
    - k To veto measures passed by State legislatures.
  2. For what cause did the United States declare war against Mexico? Name the famous generals on each side. How long did the war last? What was its result? In what respect did this country chiefly profit by it?
  3. Give some account of the present troubles in China. Who are the "Boxers" and what are they trying to do? What are civilized nations doing for the protection of their citizens resident in China?
  4. Write 20 to 25 lines on the history of the nineteenth century in one of the following countries:
    - France.
    - Italy.
    - Germany.
  5. Describe the national life of to-day in one of the following countries, stating form of government, chief products, educational, social, religious conditions:
    - Russia.
    - Spain.
    - Switzerland.
  6. Describe some famous building you have seen or read about, considering style of architecture and noting its historical associations.
  7. Name buildings of architectural and historic interest in London, Paris, Rome, Venice, Boston.
- GENERAL LITERATURE:
8. Mention two great English writers of this century, exclusive of novelists and dramatists; one German, one French, one Scandinavian.
  9. Mention the books which you have read of five of the following authors, and give your opinion of the authors and their work:
    - Rudyard Kipling.
    - Bret Harte.
    - E. G. Bulwer-Lytton.
    - Hall Caine.
    - William Dean Howells.
    - Capt. Charles King.
    - George Ebers.
    - Elizabeth Stuart Phelps Ward.
  10. Mention five important English novelists of the present century, and some of the principal works of each.
  11. Name five of the best known American authors,

with some of their works, and describe the field of literature in which each succeeded best.

12. Give the works and authors which you have read dealing with the French revolution, whether in the form of history or romance.

13. Name three of the greatest dramatic writers in the English language, one in French and one in German, with the title of at least one of the best known dramas of each.

14. Name two celebrated animal painters.

Name two English landscape painters.

Name two French artists of the nineteenth century.

Name two celebrated American artists.

Name two Italian painters of religious subjects.

15. Name two composers of grand opera.

Name two great American tragedians.

Name a great orchestral leader.

At the Cincinnati (O.) Public Library an examination of persons desiring to enter the library service as apprentices was held in the summer of 1900, this being practically the first examination of applicants held by the library. There were six vacancies to be filled, and 36 candidates entered for the examination. "The material that offered was excellent. Most of those who passed were graduates of the University of Cincinnati, and graduated with honor." In addition to exercises in translation from French, German, Latin, Spanish, and Italian, the examination covered the following subjects:

HISTORY AND GENERAL INFORMATION (QUESTIONS 1 AND 9 AND 8 OTHERS):

1. Write a brief account (two pages) of affairs in one of the following countries: China; South Africa; Philippine Islands.

2. Describe the origin, growth and influence of Mohammedanism.

3. Why was the Peace of Westphalia such an important treaty, and what war did it end?

4. Describe one important invention or discovery made during the last two years.

5. Mention five famous composers, giving the name of one composition by each.

6. Name three important events in Roman history, and tell what was accomplished by the Punic wars.

7. Describe the crusades and the effect they had on European society.

8. Write a sketch of Charlemagne and his empire.

9. Give an account of the political and social condition of France in the 18th century, and tell what caused the French revolution.

10. Mention five prominent colleges or universities, giving the name of the president and the location of each.

11. Define the following: (a) Paleontology; (b) Ethnology; (c) Physics; (d) Bibliography; (e) Botany; (f) Pedagogy; (g) Meteorology; (h) Theology; (i) Zoology; (j) Anthropology.

12. What territory has the United States acquired within the last two years and how?

13. Mention five presidents of the United States, giving dates and some noted event during the administration of each.

14. Give an account of Oliver Cromwell and the Commonwealth in England.

15. Characterize briefly the following: Nikola Tesla; Melancthon; Herbert Putnam; Theodore Roosevelt; John D. Rockefeller; Li Hung Chang; Sir Walter Raleigh; John Hay; Dwight L. Moody; Emile Loubet.

GENERAL LITERATURE (QUESTION 1 AND 9 OTHERS):

1. Discuss briefly the English literature of the 18th century and name the principal writers.

2. Name three Greek and two Roman writers, with one work by each.

3. Who wrote Faerie queene; Every man in his humour; American commonwealth; Daniel Deronda; Sartor resartus; Toilers of the sea; She stoops to conquer; Ordeal of Richard Feverel; Mosses from an old manse; Wilhelm Meister?

4. Give a sketch of Provençal literature.

5. Mention five books that you would recommend on one of the following subjects, and give your reasons: United States history; English literature; Social science; Psychology; Political economy.

6. Who were the Lake poets? Mention one work by each.

7. Give the author and title of one important work in the literature of each of the following countries: Norway; Russia; Persia; Italy; Spain.

8. Name four literary, two scientific, two religious and two juvenile periodicals.

9. What is meant by the "Storm and stress period"?

10. Write a criticism (about one page) of one of the following: Hamlet; House of seven gables; Old curiosity shop; Ivanhoe; Evangeline; Mill on the Floss.

11. In what works do the following characters appear: Shylock; Mrs. Poyser; Amy Robsart; Rawdon Crawley; Ichabod Crane; Uriah Heep; Olivia Primrose; Sinbad the sailor; Hester Prynne; Lady Teazle?

12. Give your personal estimate of the following authors: Rudyard Kipling; Horatio Alger; Martha Finley; James Russell Lowell; Mary J. Holmes; Frances Hodgson Burnett; E. P. Roe; Mrs. Southworth.

13. What is an epic poem? Name three. What is a lyric poem? Name two.

14. Name two American historians, two English dramatists, two German poets and two French novelists, and the title of one well-known work by each not mentioned elsewhere on this paper.

15. Name one work by each of the following: Ralph Waldo Emerson; John Fiske; Robert Louis Stevenson; James M. Barrie; Eugene Field; Charles Dudley Warner; George William Curtis; Sir Walter Besant; Dante Gabriel Rossetti; Jane Austen.

In the Carnegie Library of Pittsburgh examinations are held for subordinate positions in the central library and branches. "If the examination is held for positions in the central library, any resident of Pittsburgh is eligible. For the branch examinations only those who live in the district served by the branch are eligible." The papers submitted (known only by numbers) are carefully graded by the librarian and three or four assistants, different values having previously been assigned to different questions, and if it is proved that the candidates passing the highest examination have no personal disqualifications, positions are assigned in the order of grading. The following are the questions prepared for applicants for positions in the Hazelwood branch of the library, May, 1900:

a. Have you had any experience in library work? If so, where, how long, and in what capacity?

b. Are you a college or high school graduate? If not, what has been your school education?

c. Do you read or speak any language except English?

d. How many days have you lost from sickness during the past year?

e. Are you near sighted, or is your eyesight defective in any other respect?

f. Is your hearing good?

g. State your age and birthplace.

1. Explain the doctrine of "state rights."

2. What idea do you associate with each of the following names?—Alexander the Great, Sir Philip Sidney, Luther, Marcus Aurelius, Father Damien, Millet, Wendell Phillips, Cromwell, Buddha, Nathan Hale.

3. Mention five prominent literary men who have served the American government as ministers or ambassadors to foreign courts.

4. What American periodical has had an unusual number of famous American contributors and editors? Mention some of the contributors and editors.

5. What people are associated with the following?—Pre-Raphaelitism, Utopia, Abbot'sford, Hawarden Castle, Vailima, the Lake District of England, Walden Pond, Thrums, Brook Farm, Concord.

6. What and where are the following:—Acropolis, Louvre, Colosseum, Kremlin, Alhambra.

7. In your opinion who are the two greatest American novelists? Give the reasons for your opinion.

8. Mention the authors of the following works:—The compleat angler, Arabian nights' entertainments, William Tell, Conduct of life, Biglow papers, Wild animals I have known, Tales of a traveller, Autocrat of the breakfast table, The excursion, Gil Blas.

9. State your opinions as to whether the works of the following authors are of high or low grade as literature, and arrange them in the order of your preference:—Stanley Weyman, "The Duchess," Jane Austen, Edna Lyall, Nathaniel Hawthorne, Amelia E. Barr, Charlotte Brontë, Rosa Nouchette Carey, Bertha M. Clay and Victor Hugo.

10. Give authors and titles of two works of fiction, two of travel, and two of biography which have been published in the last three years.

The Carnegie Library of Allegheny, Pa., also holds competitive written examinations for the selection of assistants. The following examination paper comes from that library:

GENERAL INFORMATION:

1. Name one important seaport on each of the following named bodies of water: English Channel, Black Sea, Mediterranean Sea, Gulf of Mexico, Irish Sea.

2. To what powers do the following countries, islands or provinces belong: Australia, Java, Cape Colony, Cuba, India.

3. Add the following, placing the total at the bottom:

95,673,917,978.88
34,376,013,705.80
32,673,231,698.25
9,746,910,286.16
642,855.24
26,195,328,266.57
182,873.63
8,956,864,397.49
9,048,307,000.33

4. Name five distinguished presidents of the U. S. and two vice-presidents, who afterwards became presidents.

5. What noted personages or events are suggested by the following names: Stratford-on-Avon, Corsica, Ayr, Appomattox, Balaklava.

LITERATURE:

1. Name the authors of the following works:—Robinson Crusoe, Odyssey, Faust, Divine Comedy, Paradise Lost.

2. Name twelve plays of Shakespeare; and state whether they are tragedies, comedies, or historical plays. Which do you consider his greatest play?

3. Name three important works of each of the following authors: Charles Dickens, Sir Walter Scott, Wm. M. Thackeray, George Eliot, and Nathaniel Hawthorne.

4. Name author and work suggested by the following names: (1)—Pickwick, (2)—Sancho Panza, (3)—Iago, (4)—Giant Despair, (5)—Svengali.

5. Give the title of the best ten novels which you have read, and name a character from each.

For the Newark (N. J.) Free Public Library Mr. Hill reports: "In a very few words I will give you our method of accepting candidates for library positions. All applicants fill out the regular blank which is furnished by the library. This furnishes information as to the candidate's age, residence and education. The blank is placed on file, and when the committee is ready to give an examination word is sent to the applicant and a notice is inserted in the local newspapers as to the time and place of examination. The examination papers are prepared by the librarian and approved by the committee on assistants. Questions are confined to literature and history, the aim being to ascertain the general education of the candidate.

"Those who successfully reach the required standard, 75 per cent., serve a two weeks' apprenticeship with pay. During this time they are under observation, and if the necessary requisites for a successful assistant are lacking, the applicant's name is dropped from the list. It sometimes happens that candidates passing the best literary examinations prove to be quite unfit for the ordinary duties of a library assistant. The candidate then serves three months on trial before being assigned to a position on the regular staff."

In the Boston Public Library there are three grades of service for which examinations are held. These are grade E (salary \$3.50 per week), in which the equivalent of a grammar school education is required; grade C (\$7.50 per week), equivalent of a high school education and knowledge of one foreign language; grade B (\$11 per week), equivalent of college education, knowledge of at least two foreign languages, general history and literature and library science. Examinations for each grade are regarded as preliminary tests, to be followed by a period of probationary service, upon the results of which appointments are confirmed.

Recent examination papers in the three grades noted were as follows:

GRADE E (3 hours.)

1. A book is to contain 528 pages and each page contains 294 words. The printer charges 75 cents per page for type, and \$1.10 for each 16 pages for printing. What is the cost of the book, and how many words will the volume contain?

2. A man bought 1500 shares of copper stock at \$7 a share, which represented one-half of the par value. Two years later he sold out at \$6, and had drawn two dividends of 8 per cent. How much had he lost or gained over the cost of the shares?

3. Name the oceans, and tell how they are connected in navigation.

4. Where are Manila, Formosa, Samoa, St. Helena, Delagoa Bay?

5. To what nations do Puerto Rico, Jamaica, Hawaii, Newfoundland, and Algeria belong?

6. Mention three of the largest railroads in the world; their length; and the extreme points which they connect.

7. What was the occasion of the American Civil War? Of the first French Revolution?

8. Who is the Governor of New York? Who are the United States Senators from Massachusetts?

9. Who is Prime Minister of England? Who are the rulers of Austria, Germany and Italy?

10. Name a famous empress, a living woman author, an inventor, a musician (either composer or performer.)

11. For what are the following characters conspicuous, and in what century did each live: John Bunyan, Daniel Webster, Alexander Hamilton, Queen Elizabeth, John Paul Jones, George III.

12. What countries (on both sides) are now at war, and why?

13. Name two recent popular books. Give an estimate in one paragraph, of any book which you have lately read, or, if you prefer, a description of the author.

14. What is the difference between a biography and an autobiography? Name one example of each.

15. Improve if necessary the following sentences (in spelling, punctuation, grammar.)

(1) Between him and me there is this difference, he sees well and I see bad.

(2) Shakespeare and Chaucer were magnificent poets; the former being the greatest; and the latter was earlier.

GRADE C (3 hours.)

1. Name an important seaport of France, Italy,

Germany, Russia, Spain; and three each of Great Britain and the United States.

2. Draw a rough map of South Africa, and designate the seat of the present war there, including important localities.
  3. Why is it important that the United States shall control the Nicaragua Canal?
  4. What countries have colonial systems?
  5. Mention two great trading companies of the past.
  6. Give ten of the notable dates in American history, and tell what they commemorate.
  7. What people settled New York, Pennsylvania, Maryland, Massachusetts Bay, Virginia?
  8. Name three conspicuous characters who were or are navigators; Generals; Statesmen; Inventors; Orators; Engineers; Dramatists; Organizers (as of railroads, corporations, or large business interests.)
  9. Name a poem or drama by each of the following: Pennycuik, Longfellow, Whittier, Shelley, Milton, Goldsmith, Goethe, Schiller, Burns, Chaucer.
  10. What is a melodrama, high comedy, farce, burlesque, and give an instance of each.
  11. Give an instance of a romance; a historical novel; a lyric poem; a general history; a "classic"; naming the author in each case.
  12. Who wrote "Vanity fair," "Tam o'Shanter's ride," "Janice Meredith," "Alice in Wonderland," "Les miserables," "Don Quixote," "Wilhelm Meister," any history of the American Revolution, any life of Napoleon, any poem on a heroic or patriotic deed.
  13. A newspaper has a circulation of 456,000 a day, and is published six days in the week. It has one press which turns off 16,000 copies an hour and another which prints 22,000. How many hours a week will the two presses be required to run to print the full edition?
  14. The paper used in printing weighs 62 pounds to the ream (500 sheets to the ream) and from one sheet two papers are printed. How many pounds of paper will be needed to print 456,000 copies? How many reams will be needed each month, allowing 26 issues to the month, and  $\frac{1}{2}$  of 1 per cent. in weight for waste?
  15. Each paper costs  $\frac{5}{8}$  of a cent for composition;  $\frac{1}{4}$  of a cent for presswork, and  $\frac{2}{3}$  of a cent for delivery. Two-thirds of the edition are sold to newsboys for 3  $\frac{1}{2}$  cents a copy; and the rest are sold at 4 cents a copy. What is the profit on a day's sales?
- GRADE B (3 hours.)
1. What do you hold to have been the main influences which produced English literature of the Elizabethan era, and of American literature of the past fifty years?
  2. By whom were written the following: "History of the decline and fall of the Roman empire," "Uncle Tom's cabin," "Faerie queene," "Antigone," "Agamemnon," "Pharsalia," "Countess of Pembroke's Arcadia," "Tale of a tub," "Conciliation with the colonies," "Stones of Venice," "Jerusalem delivered," "Quo vadis," "Rime of the ancient mariner," "Rise of the Dutch republic," "Intellectual development of Europe," "Social evolution?"
  3. Name two modern plays (within the last five years) by different authors, and comment briefly on their significance.
  4. Name at least one famous political debate, the opponents, and the subject in contention.
  5. Name some writer of celebrated love sonnets, of a comedy of "high life," of stories of western life, of Scotch character sketches, of travels in the east.
  6. In what wars have actual hostilities taken place on the soil of Massachusetts?
  7. What have been the great accessions to the domain of the United States from 1783 to the present time?
  8. What countries took part in the discovery and settlement by Europeans of the Western Hemisphere; what portion was covered by each; and what is left of those influences at the present day?
  9. What was the cause of the war of the English Commonwealth, of the Seven Years' War, of the Crimean War, the Mexican War, and the Peninsular War? Give dates.
  10. Mention at least five Ministers of State whose services have been important in American history.
  11. Give (with dates if possible) three leading events in the history of Greece, Rome, India, Spain, France, Germany, England, United States.
  12. What is the Triple Alliance? What, briefly, is the present condition of the Eastern Question?
  13. When did the following characters flourish and for what were they distinguished?  
Toussaint L'Ouverture, Jane Austen, Dr. Samuel Johnson, Noah Webster, General Prim, Count Ito, Harriet Martineau?
  14. If you were to write an essay on the Declaration of Independence, mention the five books which you would first consult.
  15. Write ten lines on the proper limitation of works of fiction in a large public library.
  16. Into what main sub-divisions would you classify a collection of books on Sociology?
  17. Name a serviceable work on the United States navy, the Arctic regions, Hygiene, the history of France, travels in Africa.
  18. Write a few lines on the invention of printing, giving dates, early presses, etc.
  19. Name ten general magazines and reviews indispensable for even a small library.
  20. Into what main divisions of learning would you put books on the following topics: Single tax; Mound builders; Atlantis; Nicaragua Canal; Balloons; Papal infallibility; Greek epigrams; Latin inscriptions; Parliamentary rules; Neutrality; Christian science; Palmyra?
- From Miss Caroline M. Hewins we have the following account of the methods that prevail in the Hartford (Ct.) Public Library:
- "The examination paper below is simple, and has been used for ten years, but serves its purpose in frightening away incapable applicants, such as girls who have dropped out of school early, and elderly women who are 'fond of reading' and looking for 'light congenial work,' but 'a little above going out cleaning for the day'.
- QUESTIONS FOR APPLICANTS:
1. Have you had any experience in library work? If so, where?
  2. Are you a college or high school graduate? If not, what has your school education been?
  3. What languages have you studied? Name those which you read easily without a dictionary.
  4. To what extent have you pursued special studies or courses of reading?
  5. What has been the character and extent of your general reading since leaving school?
  6. Name five leading modern historians who have written in English, and one work of each.
  7. Name five of your favorite novels, with their authors.
  8. Name five of the best historical novels and their authors.
  9. Name five modern travellers and a book which each has written.
  10. Name five good and interesting books for a boy from ten to fourteen years old, and five for a girl of the same age.
  11. Name five amusing novels or collections of short stories to read to an invalid.
  12. Is your health good? Are your back and eyes strong?
  13. How many days have you been kept in the house by illness in the last year?
  14. Can you stand for two hours without much fatigue?
  15. Are you willing to work ten hours a day\* if necessary, give up most of your evenings to the library, and do your share of Sunday labor if the building is open on that day?
  16. What do you think that the duties of a library assistant are?
- "If a high school graduate or a girl who has more than a grammar school course applies for a place, I usually ask her if she knows enough English history to tell without stopping to think whether Queen Elizabeth or

\*This means on Saturday or in an emergency, not every day.

Richard III. reigned first, or how it happens that Queen Victoria succeeded to the throne. A certain amount of United States history is required for admission to the high school, and a little English history is now studied in connection with it, but it is possible for a boy or girl to come from a four years' high school course without knowing anything about Great Britain. A girl who had nearly all this course and two years in addition in a good school came to me the other day. I asked her the two questions in English history noted above, and she could not answer them. She had told me that she was fond of history, and I asked her how it happened that she did not know more about it. She replied that she enjoyed historical novels. I asked her to name one. She answered, 'Richard Carvel.' I then requested her to tell me who was reigning when Richard Carvel went to England, and she said, 'James the Sixth.' I asked her to tell me the name of some famous man mentioned in the book, and she could not remember one. She added figures accurately, and wrote a good hand in English and German, but could not translate a simple German paragraph. I told her plainly that she had not the kind of mind for library work, and did not ask her to take the examination.

"High school graduates who have spent four years in studying Latin cannot translate a title-page, and have not learned to handle French and German easily. They lack most of all the power of association, that is worth everything to a librarian. A five-minute talk with one of them often shows this and saves the trouble and disappointment of an unsuccessful examination.

"A set of papers reveals the writer's habits of work. The girl who writes diffuse and apologetic answers, telling why she has done one thing and has not done another, although she may do excellent literary work, is out of place in a library, where habits of concise expression and the power of turning quickly from one thing to another are of great value in daily routine. The girl who cannot spell is useless as a cataloger or even a copyist, and the girl whose slipshod reading and untidy habit of mind are revealed by her papers can do no part of library work well.

"An examination is not an unfailling test of fitness. A librarian, or anybody else who is in the habit of meeting people, can often 'size up' a candidate in five minutes, and if a girl passes this short ordeal invite her to put herself on written record. One of the best papers we ever had, however, came from a middle-aged woman who had done reference-work in a large library, had four languages at her command and the endorsement of one of the greatest preachers in the country, but failed entirely from a lack of executive ability and confidence in herself when she was sent out of town to make an annotated catalog of a large Sunday-school library."

As a final contribution to the subject, it

may be interesting to give the examination paper prepared for applicants for the position of assistant librarian at the Webster Free Library of the East Side House, New York City. A circular was also issued stating the conditions of the appointment: "The salary will be at the rate of \$600 per annum. The assistant librarian will be expected to go in residence at the East Side House and to interest himself in the work of the settlement. Candidates must be graduates of a college or have taken a course in a professional school. Candidates must submit letters of recommendation from one or more officers of the college or professional school where they have studied." The examination was limited to three hours.

WEBSTER FREE LIBRARY:

I. Write from dictation.

II. a) Calculate the percentages from the following report of circulation (Leave all the work on the paper):

Juvenile.....	42973
Fiction.....	29456
History.....	8902
Biography.....	3846
Travel.....	3465
Literature.....	6980
Arts.....	8539
Phil. and Rel.....	2468
Foreign.....	7244

b) What is the difference between cataloging and indexing?

III. a) Define Sociology; Eschatology; Biology; Meteorology; Mythology.

b) State the difference between a dictionary and an encyclopedia.

c) Explain the following terms:—The melancholy Dane; Gideon's fleece; the golden fleece; a man of blood and iron; spoiling the Egyptians; the Army of the Potomac; crossing the Rubicon; old Hickory; the Gordian knot; Joseph's coat.

IV. Give a list of books, including fiction, that you would recommend to people who consulted you as follows:

a) A college student who was required to write an essay on (1) National wealth, (2) the Elizabethan drama, (3) Socialism.

b) A high school scholar who was required to write an essay on (1) Mary, Queen of Scots, (2) Our great west.

c) A school child who was required to write a composition on (1) The study of Nature, (2) Abraham Lincoln, (3) the Greek gods.

V. a) Write a letter to Miss Anna Page, teacher of a class of boys of about fourteen years of age in Pub. School 168, in answer to one from her asking you to recommend a list of books for the class library concerning the period of the American Revolution.

b) Name the authors of the following poems:

1. Saul.
2. The blessed demoiselle [sic.]
3. The vision of Sir Launfal.
4. Ulysses.
5. The rape of the lock.
6. Laodamia.
7. The vision of Piers Plowman.
8. Lycidas.
9. The psalm of life.
10. The curse of Kehama.

c) Name the authors of the following books:

1. Progress and poverty.
2. Henry Esmond.
3. Through the dark continent.
4. The autocrat of the breakfast table.
5. The descent of man.
6. Triumphant democracy.
7. The seven lamps of architecture.
8. The natural law and the spiritual world [sic.]
9. Literature and dogma.
10. The American commonwealth.

VI. Discuss very briefly the following questions:

a) Imperialism; b) Trusts; c) The Monroe doctrine in its relation to present events.

VII. Please bring the answer to each question within one hundred words.

1. State briefly what you conceive to be the idea of the Settlement and of the relationship it should sustain to the community.

2. In what relation to the other work of the settlement should the library stand and in what ways may the librarian promote the general success of the settlement.

3. Should the library attempt to co-operate with the public schools of the neighborhood and, if so, in what ways?

4. To what extent should the librarian direct the reading of the different classes of readers in a library?

In some of the libraries which hold no formal examination the application blanks to be filled out by candidates serve in a measure the purpose of an examination. This is the present practice at the Library of Congress, where all applicants for positions are required to fill out an elaborate blank, as follows:

**LIBRARY OF CONGRESS:**  
**APPLICATION FOR APPOINTMENT TO THE LIBRARY SERVICE**

[This form is to be filled out in ink by the applicant himself. He must not write upon the fourth page. He should first read the circular that accompanies it.]

I hereby make application for the position of \_\_\_\_\_ in the \_\_\_\_\_ department (a particular position or department need not be specified; see below, questions 15 and 16) of the Library of Congress, and declare the information given below to be correct and in my own handwriting:

(Signature, every name in full: \_\_\_\_\_  
(Post-office address: \_\_\_\_\_  
(Legal residence: \_\_\_\_\_)

(Date: \_\_\_\_\_  
1. Present occupation (if employed, give also name of employer or institution, address, and precise position now held by you)? \_\_\_\_\_

2. Date of birth? \_\_\_\_\_ 3. Place of birth? \_\_\_\_\_

4. Are you a citizen of the United States? \_\_\_\_\_

5. Are you married or single? \_\_\_\_\_ (If widowed, please so state.) \_\_\_\_\_

6. White? \_\_\_\_\_ Colored? \_\_\_\_\_

7. Names of parents (living or deceased)? \_\_\_\_\_  
8. Have you any infirmity, physical or mental, of which you are aware? \_\_\_\_\_

9. Schools, academy, college at which you have been educated? (State length of course, and degree if taken. Give dates.) \_\_\_\_\_

10. Your past occupations: (So far as employed give dates, names, and addresses of employers; describe positions held by you)? \_\_\_\_\_

11. Your special education, if any, for library work? \_\_\_\_\_

12. Actual library experience, if any (institutions, dates, and character of work done)? \_\_\_\_\_

13. Any special qualifications which you can present (in addition to what may be represented in your answers to the questions above.) (For example: Stenography, typewriting, a knowledge of bookkeeping, of foreign languages, special courses of study pursued)? \_\_\_\_\_

14. Have you ever been examined for the public service? If so, when, where, for what branch of the service, and with what results? \_\_\_\_\_

15. (If you omit, as at your option you may, in paragraph one, to specify a particular position or department) for what class of work in the Library of Congress do you consider yourself particularly fitted? For the purpose of this question you may consider the existing work in the Library to be classified as follows: Administrative (the purely executive work); clerical; ordering (having to do with the purchase or other acquisition of books); classification; cataloging; maps and charts; manuscripts; fine arts; music; law; public documents; newspapers and periodicals; general reference; special reference (both of these dealing with the public and including the work at the delivery desk); subordinate service (pages, messengers, etc.). \_\_\_\_\_

16. If you do not specify a particular position, what is the lowest position as to salary for which you desire this to be considered an application? \_\_\_\_\_

17. Any other facts you desire to mention indicating (a) your special aptitude for library work, or (b) your particular qualifications for services in this library. (Be brief.) \_\_\_\_\_

18. References: The names below are to be written in by the applicant himself. They are not to be names of members of his immediate family nor of members of the present library force. If you are personally or as to capacity known to any of the latter, append the names of such in a separate memorandum and refer to it under C below. (Further references or testimonials may be inclosed, but are not to be entered here.)

A. The names and addresses of not exceeding six persons who know you personally and will testify as to character.

B. The names and addresses of not exceeding six persons (including, if need be, any of the above) who know personally of your capacity.

C. Memorandum of certificates, testimonials, or other documents inclosed with this application. Mention also any such previously filed. \_\_\_\_\_

(When completed, fold oblong twice, as indicated, and forward to the Librarian of Congress, Washington, D. C.)

If this application is considered favorably a personal interview is generally arranged for, and appointment is usually made at first for a probationary term of service for six months.

In the New York Public Library an "apprentice class" is conducted, from which appointment to many of the minor positions are made. Dr. Billings says: "There have been no recent examination papers prepared in this library. All the appointments recently made have been copyists or catalogers, and the examination has consisted in each case of giving the person a month's trial at the work which it was desired should be done, and the candidate was judged by the result. Our copyists are generally selected from those who have been trained in the apprentice class, and the character of the work is thoroughly well known."

At the Enoch Pratt Free Library, of Baltimore, no system of written examinations prevails. Candidates are given a personal interview as to education, general health, etc., and the most promising are selected for trial as probationers, usually at one of the branch libraries. This trial is a test of accuracy, disposition to learn, and manner of coming into contact with the public. If it proves satisfactory they are appointed as substitutes, which is practically a further test, but one for which compensation is given. From the most satisfactory persons on the substitute list regular appointments are made, usually to a branch library, and again from the best of the branch force to the central library. At the central library all assistants are given a fortnight's service in the cataloging room, at such mechanical or other work as they are fitted for, the object being to give each one practical knowledge of the use of catalogs and other helps, and to test their capacity for service outside the delivery department. Appointments are made on recommendation by the librarian, over which the trustees may exercise veto power, but thereafter promotion rests with the individual.

CLEVELAND (O.) PUBLIC LIBRARY SERVICE.

THE Cleveland Public Library, in addition to a detailed application blank which is issued to persons desiring positions on the library force, makes use of a "circular of information" regarding the requirements and conditions of the library service. This is of so much general interest in its schedule of qualifications desired that it is here reprinted:

QUALIFICATIONS.—The qualifications for acceptable library service may be summarized as follows:

Equivalent of a high school education, fair knowledge of books, good health, courteous manner, neatness in appearance and in work, accuracy, speed, reliability, general intelligence, and good judgment.

The more general qualifications mentioned will be tested by the year's work in the library as a substitute. During that year the substitute will also be expected to acquire proficiency in library handwriting and a knowledge of library methods. Those serving acceptably one year in the library as substitutes, and passing the technical examination in library methods at the close of the year, will be eligible to appointment as regular assistants. Only regular technical training at one of the library schools, or a sufficient previous experience in library work can be accepted as an equivalent to the year's experience as a substitute before receiving a regular appointment.

A substitute is to report for duty whenever needed during her first half year of service, and receives for her work 12½ cents per hour.

GRADES, ASSIGNMENTS AND SALARIES.—The regular assistants in the library are included in three grades of five years each, and certain special positions. The following schedule states the qualifications and assignments of each grade, together with the salaries.

The appointment of substitutes, and of assistants of the first grade, and promotions to the second and third grades, will be by special action of the board in the case of those who have passed through the successive years of the grades which they hold, and have fully qualified themselves for the work of the grade to which they are candidates for promotion. The board will also recognize special ability and efficiency by more rapid promotion. The increase of salary from year to year within each grade will depend simply upon satisfactory progress.

First Grade.—Salary per month: 1st year, \$35; 2d year, \$37.50; 3d year, \$40; 4th year, \$42.50; 5th year, \$45.

DEPARTMENT.	ASSIGNMENT.	SPECIAL QUALIFICATIONS.
Administrative.	Assistant to accountant and supply clerk.	Knowledge of bookkeeping, accuracy.
*Cataloging.	Accession clerk.	Knowledge of accession rules, experience in accessioning.

DEPARTMENT.	ASSIGNMENT.	SPECIAL QUALIFICATIONS.
*Cataloging.	Shelf lister.	Knowledge of shelf-list rules, experience in shelf-listing.
	Assistant to catalogers.	Knowledge of catalog rules, experience in elementary cataloging.
	Gift, withdrawal and transfer clerk.	Knowledge of accession rules, careful attention to detail.
Circulating.	Second assistant in alcoves.	Tact, knowledge of books in alcoves.
	Desk attendant.	Tact, speed and accuracy.
Reference.	Reading room relief.	Tact, knowledge of periodicals.
Branch libraries.	Work corresponding to that in above departments, but more general.	
<i>Second Grade.</i> —Salary per month: 1st year, \$45; 2d year, \$47.50; 3d year, \$50; 4th year, \$52.50; 5th year, \$55.		

DEPARTMENT.	ASSIGNMENT.	SPECIAL QUALIFICATIONS.
Administrative.	Office assistant.	Stenography, typewriting, office experience.
Cataloging.	Charge of accession records and shelf-lists.	Knowledge of Library school rules, knowledge of books, ability to direct work of others.
	Dictionary cataloger.	Knowledge of catalog rules, critical judgment of books, experience in cataloging.
Circulating.	Charge of alcove.	Critical knowledge of books in alcove, tact, ability to direct work of assistant, relief, and page.
	Desk attendant.	Tact, speed, accuracy and business ability.
Reference.	Reference room assistant.	Knowledge of and ability to use reference books, tact.
	Reading room assistant.	Critical knowledge of periodicals, tact.
Branch libraries.	Work corresponding to that in above departments, but more general.	
<i>Third Grade.</i> —Salary per month: 1st year, \$55; 2d year, \$57.50; 3d year, \$60; 4th year, \$62.50; 5th year, \$65.		

DEPARTMENT.	ASSIGNMENT.	SPECIAL QUALIFICATIONS.
Administrative.	Accountant.	Knowledge of methods of accounting used in this library, accuracy.
Cataloging.	Assisting catalog librarian.	Knowledge of and experience in all work of department, special strength in cataloging and classification, ability to direct work of others.
Circulating.	General supply and assistant to loan librarian.	Tact, knowledge of books and all work of department, ability to supervise work of others.

\*For all grades and assignments in the Cataloging department, good library handwriting is absolutely essential.

DEPARTMENT.	ASSIGNMENT.	SPECIAL QUALIFICATIONS.
	Charge of children's room.	Knowledge of children, juvenile literature and of educational principles, ability to direct work of others, sympathy with children.
	Charge of south room.	Wide acquaintance with books in literature, science, sociology, religion, biography and fine arts, tact, ability to direct work of others.
	Charge of receiving, fine and registration desks.	Tact, knowledge of human nature, ability to direct work of others.
	Charge of loans to schools, branches and stations.	Knowledge of school work and of books of service to schools; ability to look after many details, and to direct work of others.
Reference.	Assistant reference librarian.	Knowledge of reference work, tact, ability to direct work of others.
	Charge of reading room.	Critical knowledge of periodicals, tact, ability to supervise all work of reading room.
Branch libraries.	Assistant branch librarians.	Knowledge of all work of branch; ability to direct work.
SPECIAL POSITIONS.		
Librarian, Vice librarian, Catalog librarian, Loan librarian, Reference librarian.		} Salaries fixed by the board.
Branch Librarians.—Salary, \$50 to \$85, according to size of branch and ability of incumbent.		

Following this schedule is a brief statement of the need of special library training, of the several schools, and the leading text-books and periodicals.

#### FOR A LIBRARY SCHOOL AT WESTERN RESERVE UNIVERSITY.

SUGGESTIONS for the establishment of a library school at Western Reserve University have been made to President Charles F. Thwing by a committee consisting of Allen D. Severance, Edward C. Williams, Linda A. Eastman and W. H. Brett. The committee estimates the cost of installation at \$4500, and says in part:

"The estimated annual expenditure in addition to the cost of maintaining the building will be as follows for the second and subsequent years: Three instructors at \$1500, \$4500; two revisers at \$650, \$1300; one clerk, \$600; stationery, supplies, postage, \$750; total, \$7150. For the first year two instructors and one reviser would be sufficient, reducing the expense to \$5000. This estimate does not include services of university instructors on advanced bibliography and reference work, and for the elective courses offered.

"A fee of \$80 per year seems fair in com-

parison with other library schools and with other schools of the university. It seems advisable not to accept more than 40 students. The largest possible income from tuition fees would, therefore, be \$3200. This would leave, in case the classes were filled, an annual deficiency of \$4150 to be provided for, to which should be added the cost of maintaining the building and the cost of the lectures given by members of the university faculty.

"In order to enable the school to be successfully carried on a sufficient building should be provided. We would suggest the erection of a building on the campus south of the Hatch Library, fronting on Adelbert street, and connected with the library by a covered way. If the co-operation of the public library board could be secured, a building might be erected which would house in the first floor a branch of the public library and on the second floor the library school. By telephone connections and a messenger service the resources of the main public library would be conveniently at the service of the neighborhood, the college and the school.

"We suggest the same requirements for admission and a course of the same length as that at Albany, but we believe that the proposed school might be differentiated from the Albany school very greatly to its advantage, as follows:

"First—The instruction in cataloging should be devoted mainly to dictionary cataloging, which is generally used throughout the country, instead of classed cataloging as taught at Albany, which is comparatively little used. This is important.

"Second—By bringing the elementary practical studies more fully into the first year, thus making this a more complete preparation for the work of the library assistant, we would fit students more thoroughly for subordinate positions at the end of that year, and would even recommend them to take opportunities which may offer to do practical work before completing the course. In the second year we would place the studies which deal with the broader phases of library work, including support, control, and administration, which are of more value to those in positions of responsibility as librarians or heads of departments.

"Third—We would give, by the help of the university faculty, more advanced courses in bibliography and reference work.

"Fourth—Students in the college course planning to enter the library school might advantageously elect such studies as would be of most value to them, the purpose being to give them, in connection with that thoroughness in some special lines which is necessary for mental discipline, a more comprehensive view of the whole field of knowledge than is usually given."

The growing demand for trained service in library work is touched upon, and it is pointed out that this must "raise the stand-

ard of work required in our libraries and increase their efficiency and value." "Among the appointees to the Cleveland Public Library during the past 18 months have been ten college graduates. The two sessions of summer school which have been held in Cleveland in 1898 and 1900 attracted students from states as remote as Florida and Iowa, and the number of applicants each summer was greater than could be received."

#### RECENT LIBRARY LEGISLATION.

AMONG the states that have recently added to their statute books legislation in the interest of libraries are California, Oregon, Delaware, South Dakota, and Missouri, the measures passed in the two latter states affecting only school libraries.

The California law, approved March 23, 1901, provides for "the establishment and maintenance of public libraries within municipalities." This is a new general library law for the state, its special feature being the provision, in section 1, making it obligatory for town and city authorities to establish a public library upon petition of 25 per cent. of the voters. Library trustees, heretofore chosen by popular election, are henceforth to be appointed by the mayor or other executive head of the municipality; trustees are given additional power, for buildings, lending books, and procuring public documents; and annual reports must be filed at the state library. An increase of library tax is permitted after two years, for cities of the fourth, fifth, and sixth classes, to a maximum of two mills, this being an amendment of the original draft, which provided for a mandatory increase at the close of that period. Travelling libraries are authorized to be sent out by municipal or county public libraries, upon "a reasonable compensation," to be paid by the districts benefited; and the final clause of the act provides for the repeal of the library ordinance and the disestablishment of the public library upon request of 25 per cent. of the voters of a municipality. Despite this last clause the act marks a decided advance in the library legislation of the state. Its passage was largely secured through the efforts of the League of California Municipalities.

The Oregon law, introduced into the legislature in January, 1901, authorizes "the establishment and maintenance of public libraries, their control and protection." It empowers the council of any incorporated city to establish and maintain a public library, and to levy a library tax of not more than one-fifth of a mill on each dollar of taxable property. A city council may also contract with any society or corporation maintaining a library for the free public use of such library, in return for a yearly payment agreed upon. Provision is made for the appointment of directors (nine in number, except that in cities of less than 3000 inhabitants the number shall be

six), for general organization and management, for the free public use of such libraries, presentation of annual reports, etc. The passage of the measure was largely owing to the efforts of the state federation of women's clubs, but its promoters were obliged to accept an amendment placing the library levy at the almost prohibitory maximum rate of one-fifth of a mill. This is the more regretted as the low valuations prevailing in Oregon will prevent the smaller cities from raising any but meagre amounts. The new school library law of Oregon is simply permissive, allowing the creation of a school library fund by levying a tax in each county for the purpose at the rate of 10 cents for each child of school age, this fund to be apportioned among the various school districts according to number of school children. Provisions are also included for the purchase of books, preparation and issue of lists of books suitable for school libraries, election of librarian, etc.

The school library law of South Dakota follows in the main that of Oregon, excepting that the school library is to be under the charge of the clerk of the school district, who "shall receive and have the custody of the books and shall loan them to the teachers, pupils and other residents of the district in accordance with the regulations prescribed by the state superintendent." During the time the school is in session the library shall be placed in the school house, and the teacher shall act as librarian under the supervision of the district clerk. The Missouri law creates a state library board of five members, who shall select, classify and recommend lists of suitable books, to be revised every two years, and provides for a book purchase fund to be reserved from the school tax at the rate of "not less than five nor more than 20 cents per pupil."

In Delaware, the General Assembly at its last session (1901) passed an act providing for the establishment and maintenance of free public libraries. The bill provides for a state library commission composed of nine persons appointed by the Governor and holding office five years. The state librarian is *ex officio* secretary of the commission, but not a member of the body. Commissioners receive no salary, but bills for printing, postage and stationery are paid from the state treasury. The commission has general supervision of all libraries founded or maintained under the provisions of the act, and of the travelling library system already inaugurated and formerly in charge of the State Federation of Women's Clubs.

Incorporated cities or towns may by majority vote at a special election decide to establish and maintain public libraries, and must hold such an election on petition of 25 qualified electors. On the question of establishment of library and in the election of the town library commission provided for by the act, women who have resided in the town

for three months preceding the election, and who have paid a town tax for one year, are qualified electors. The town commissions are composed of nine persons, holding office three years, and, as in the case of the state commission, women are eligible as members.

For purposes of taxation, towns and municipalities are divided into three classes: First class, real estate not less than \$1,500,000 valuation, tax from  $\frac{1}{8}$  to  $\frac{1}{2}$  mill; second class, real estate, \$250,000 to \$1,500,000 valuation; and third class, real estate less than \$250,000. The second and third classes tax may be not less than  $\frac{1}{4}$  or more than 1 mill on the dollar; but those of the second class must raise not less than \$100, and those of the third class not less than \$50 annually.

Libraries of all three classes of towns are entitled to \$100 from the state treasury on certification from the state commission that they have complied with the requirements of the law.

The law does not apply to Wilmington, the free library of that city being supported in part by rentals from property owned by the corporation and partly from payments from the city board of education required by law.

#### TRAVELLING LIBRARIES IN DELAWARE.

At the annual meeting of the Delaware State Federation of Women's Clubs, held in Wilmington, May 24, Mrs. Ella C. Marshall, chairman of the state library committee of the federation (and now a member of the new state library commission) reported on the travelling library work in the state during the last three years.

In 1899 the General Assembly of the state provided for an annual appropriation of \$100 to go to the federation to aid their travelling library work. With the money thus far available from the state grants 375 volumes have been bought—the money going exclusively for books, other expenses being met by gifts, and the cases being made by the boys of the Ferris Industrial School. Within less than three years seven travelling libraries of about 50 volumes each have been sent to 21 communities by means of this small annual appropriation.

Besides these state libraries 22 other travelling libraries have been in circulation throughout the state through the agency of women's clubs. Eleven are owned and sent out by the Wilmington New Century Club, five by the Milford Century Club and six by the Dover Century Club. These combined libraries (state and club) aggregate about 1500 v.

There are but three free public libraries in the state: Wilmington (42,000 v.), Odessa (3000 v.), and St. James—a school district near Dover—(1400 v.). Eight other towns have subscription libraries: Smyrna (3000 v.), Dover (3000 v.), Milford (1800 v.), Newark (1000 v.), Lewes (600 v.), Bridgeville (300 v.), Georgetown and Milton.

#### N. E. A. LIBRARY SECTION.

A CHANGE has been made in the program of the Library Section of the National Educational Association, to accommodate members of the American Library Association who desire to attend the section meeting. The opening session of the section, including addresses by A. L. A. representatives, will be held on Friday afternoon, July 12, instead of July 11, as first announced. The program of the section sessions was given in the LIBRARY JOURNAL, May, p. 277.

#### American Library Association.

*President:* Henry J. Carr, Public Library, Scranton, Pa.

*Secretary:* F. W. Faxon, 108 Glenway st., Dorchester, Mass.

*Treasurer:* G. M. Jones, Public Library, Salem, Mass.

*23d General Meeting:* Waukesha, Wis., July, 1901.

WAUKESHA CONFERENCE, JULY 3-16.

#### GENERAL PROGRAM.

While it is not possible to give full details regarding all topics and speakers included in the program for the Waukesha meeting of the American Library Association, a general outline of the arrangements made—more detailed than the brief announcement given in April L. J.—is as follows:

*Wednesday, July 3:* Arrival of delegates. It is expected that the evening (from 8 to 10) will be given to an informal introductory session, with address of welcome and response.

*Thursday, July 4:*

*Morning.*—Council meeting, in accordance with section 16 of constitution. The special committee on by-laws is expected to report, and other business of importance will come up for consideration. A full attendance of members of council is requested.

*Afternoon.*—Reunions of library associations (state, sectional, and local). The Wisconsin Library Association has planned an elaborate program for its meeting, which will be devoted to the topics of travelling libraries and free rural mail delivery of library books. Among the speakers will be Judge J. M. Pereles, of the Milwaukee Public Library board; Mrs. S. C. Fairchild, Miss L. E. Stearns, Miss Cornelia Marvin, State Senator J. H. Stout, and J. D. Witter.

*Evening.*—Public meeting.

President's address—H. J. Carr.

What may be done for libraries:

1. By the city. T. L. Montgomery, Philadelphia.
2. By the state. Dr. E. A. Birge, University of Wisconsin.

3. By the nation. Herbert Putnam, Librarian of Congress.

*Friday, July 5:*

*Morning.*—General business; reports of officers and standing committees; miscellaneous business.

*Afternoon.*—Simultaneous meetings of National Association of State Librarians and A. L. A. Section for Children's Librarians, as follows:

National Association of State Librarians, 4th annual meeting, first session, 2-5.30 p.m.

Early newspapers in Ohio. C. B. Galbreath, State Librarian of Ohio.

The decimal classification and cataloging of public documents. Artana M. Chapin, cataloger Indiana State Library.

Free distribution of state documents and the limits thereto. L. D. Carver, State Librarian of Maine.

The gathering of local history material. R. G. Thwaites, secretary Wisconsin State Historical Society.

The association will meet under direction of its own officers, L. D. Carver, president, W. E. Henry, secretary.

A. L. A. Section for Children's Librarians, first session.

Book reviews, lists, and articles on children's reading (Are they of practical value to the children's librarian?) Miss C. M. Hewins.

The books themselves: How to tell a good book; how to tell a poor book. A collective paper, covering—

Fiction. Miss W. Taylor, Pratt Institute Free Library.

Fairy tales. Miss A. L. Sargent, Medford (Mass.) Public Library.

Books of science. Miss Ella Holmes, Brooklyn Institute Children's Museum.

Reference work for children: some of its possibilities and the necessary equipment. Miss H. M. Stanley, Brookline (Mass.) Public Library.

There will be full discussion of each subject, and the section will be conducted by Miss L. E. Stearns. Miss M. E. Dousman is secretary.

*Evening.*—Meeting of National Association of State Librarians, continued; Reunions of library school alumni associations.

National Association of State Librarians, second session, 8-10 p.m.

State librarians: their duties and powers relative to library commissions and free libraries. Dr. G. E. Reed, State Librarian of Pennsylvania.

Should the state loan books from its reference library, and if so, on what conditions and under what limitations? Johnson Brigham, State Librarian of Iowa.

Election of officers.

The library schools' reunions will probably be informal and social, preceded by short

business meetings in the case of associations so desiring.

*Saturday, July 6:*

*Morning.*—General business; reports of special committees; special papers, including "Collection and cataloging of early newspapers," by William Beer, New Orleans.

*Afternoon.*—Simultaneous meetings of A. L. A. Trustees' Section, College and Reference Section, Section for Children's Librarians.

The Trustees' Section meeting will probably be devoted, first, to general business, and will then take up the subject of "Library buildings for smaller libraries," chosen in view of the many Carnegie and other gifts for library buildings ranging from \$35,000 to \$50,000 in cost. This subject will probably be opened with a paper by W. R. Eastman, University of the State of New York. Dr. H. M. Leipziger is chairman of the section and T. L. Montgomery, secretary.

In the College and Reference Section the general topic for consideration will be "Twentieth century problems for college and reference libraries." W. I. Fletcher is chairman of the section, and Miss Olive Jones, secretary.

A. L. A. Section for Children's Librarians, second session.

Opening a children's room. Miss C. W. Hunt, Newark (N. J.) Free Public Library.

Bulletin work for children. Miss C. E. Wallace, Carnegie Library, Pittsburgh.

Vitalizing the connection between the library and the school:

a. The school. Miss May Prentice, Cleveland (O.) Public Library.

b. The library. Miss Irene Warren, Chicago Institute Library.

*Evening.*—Opportunity will be given for special committee meetings if desired. The latter part of the evening will be in charge of a committee of entertainment, Miss Katherine L. Sharp, chairman.

*Sunday, July 7.*—No sessions will be held. At Bethesda Spring Park a concert will be given from 3.30 to 5.30 p.m., tendered to the A. L. A. by Senator A. M. Jones. Visits will probably be made to Madison or Milwaukee by individual parties.

*Monday, July 8. Madison Day.*—Early start for Madison will be made by special train, the low rate of \$1.25 for the round trip having been made by the Chicago & Northwestern Railway. The Madison visit will be under direction of a local committee. There will be a trip about the city to points of interests, and after luncheon the new building of the State Historical Society and the university library will be visited. A short session will be held, at which two papers will be read: "European and American libraries—a comparison," by Miss M. W. Plummer;

and "From the reader's point of view — and the era of the placard," by Dr. J. K. Hosmer. Return to Waukesha will follow, where an informal social evening will be held.

*Tuesday, July 9:*

*Morning.*—Papers: Book copyright, Thorvald Solberg, Register of Copyrights.

Trusteeship of literature, George Iles, New York City; Dr. R. T. Ely, University of Wisconsin.

Relationship of publishers, booksellers and libraries: R. R. Bowker, New York; W. Millard Palmer, Grand Rapids, Mich.; general discussion.

*Afternoon.*—Simultaneous meetings of A. L. A. Catalog Section, and Round Table on state library commissions.

The Catalog Section meeting will be devoted to a general discussion of co-operative printed card-catalogs. A. H. Hopkins is chairman; Miss Agnes Van Valkenburgh, secretary.

In connection with the State Library Commissions Round Table there will be reports and comments on an elaborate exhibit of travelling libraries, conducted by F. A. Hutchins, Wisconsin Free Library Commission. The Round Table meeting will be under the direction of Melvil Dewey.

*Evening.*—A. L. A. council will meet in accordance with sections 16 and 17 of constitution. Elementary institute will be conducted by Miss Cornelia Marvin, chairman.

*Wednesday, July 10:*

*Morning.*—Round tables—1, Work of state library associations and women's clubs in advancing library interests, Miss Marilla Freeman, chairman; 2, Professional instruction in bibliography, A. G. S. Josephson, chairman.

*Afternoon.*—Election of officers, final reports, resolutions, unfinished business.

*Evening.*—Departure from Waukesha for a. Library Section, N. E. A., Detroit; b. Visit to points of library interest in the state; c. To Buffalo by lakes.

#### A. L. A. BADGE.

Members of the A. L. A. are reminded that the official badge, adopted several years ago, should be in evidence at the Waukesha meeting, and those who have not already possessed themselves of this library emblem are urged to do so promptly. The badge may be had, either as a pin or a charm, at \$2.50, by addressing Miss N. E. Browne, Boston Athenæum, 10½ Beacon street, Boston, Mass.

#### A. L. A. PUBLISHING BOARD.

The A. L. A. Publishing Board is prepared to print cards during 1901 for the following sets, provided the orders are sufficient to justify the work.

- \*1. American Academy of Political and Social Science. Annals, 1890 to date. v. 1-15, with supplements. (250 articles.)
- \*2. American Economic Association. Eco-

nomie studies, 1896-97. v. 1-2. (11 articles.)

- \*3. — Publications, 1887-96. v. 1-11. (57 articles.)

4. Bibliographica, 1895-97. 3 v. (73 articles.)

5. Bureau of American Republics. Publications. (77 articles.)

- \*6. Columbia University studies in history, economics, and public law, 1891-96. v. 1-7. (18 articles.)

\*7. Johns Hopkins University studies in history and political science, 1883-98, series 1-15. (117 articles.)

- \*8. U. S. Geological Survey. Bulletins, 1884-98. (156 articles.)

\*9. Monographs, 1882-98. v. 1-28. (40 articles.)

10. U. S. Geological and Geographical Survey of the Territories. Reports, 1875-90. v. 1-13. (10 articles.)

- 11. — Miscellaneous publications. 12 nos. (12 articles.)

*Price, 75 cents per 100 cards.*

As in the case of the sets recently printed and others now in press, suggested subject headings will be printed at the foot of the card, and enough cards will be provided to furnish for each title an author entry and the requisite number of subject entries. The cards will be of 33 size, but 32 size will be furnished for advance orders.

The number of articles noted after each title is in many cases a careful estimate only. The number of cards in each set may be expected to be about two and a half times the number of articles.

The asterisk (\*) indicates that the current numbers of the publication are included among the periodicals for which printed cards are already regularly issued. The latter are issued at the rate of \$4 per 100 titles, two cards being furnished for each title. The additional price is due to the additional expense of distributing the cards for periodicals selected from the periodical list.

Address orders to the A. L. A. Publishing Board, 10½ Beacon street, Boston, stating the size of card desired, and if current issues are wanted.

The list of periodicals indexed on cards by the Publishing Board will be increased by the following:

American Academy of Political and Social Science. Annals.

American Historical Society. Papers.

American Historical Society. Reports.

Old South leaflets.

U. S. Bureau of Education. Circulars of information.

Libraries which have purchased cards for the sets may wish to subscribe for their continuation, and notice is hereby given that the continuations can only be furnished on advance subscriptions. Price is at the rate of \$4 per 100 titles, two cards being furnished for each title. Extra cards may be obtained at the rate of 50 cents per 100.

## State Library Commissions.

**DELAWARE STATE LIBRARY COMMISSION:**  
C. A. Frear, jr., secretary, State Library,  
Dover.

Members of the state library commission, recently created by the state legislature, have been appointed by the governor, as follows: Mrs. Ella C. Marshall, Dover; Mrs. Charles H. Miller, Wilmington; Mrs. H. A. Richardson, Dover; Miss Margaret Truxton, Georgetown; Manlove Hayes, Dover; Daniel C. Corbit, Odessa; George F. Bowerman, Wilmington; Joseph K. Holland, Milford; John Barkley, Clayton. The state librarian, C. A. Frear, jr., is *ex officio* secretary of the commission.

**IOWA LIBRARY COMMISSION:** Miss Alice S. Tyler, secretary, State Library, Des Moines.

The commission has issued the second number of its *Quarterly Bulletin*, in which are found articles, reports, notes, etc., on library affairs, excellently chosen and well arranged. The page devoted to "Library news of the state" is a useful feature.

**NEBRASKA PUBLIC LIBRARY COMMISSION:**

The members of the recently-organized Nebraska library commission are: E. Benjamin Andrews, chancellor of the state university; R. E. L. Herdman, clerk and librarian of the supreme court; J. I. Wyer, librarian of the state university; Frank L. Haller, of the Omaha Public Library board; and W. K. Fowler, state superintendent of public instruction. A secretary, as provided for in the bill, has not yet been appointed.

**NEW JERSEY PUBLIC LIBRARY COMMISSION:**  
H. C. Buchanan, secretary, State Library,  
Trenton.

The annual meeting of the commission was held on April 15, when W. C. Kimball, of Passaic, was elected chairman, and H. C. Buchanan re-elected secretary.

It was reported that the legislature had allowed \$200 for the expenses of the commission for the fiscal year ending Nov. 1, and \$300 for the ensuing year. In addition an appropriation of \$1000 was allowed for the establishment of free public libraries throughout the state, under the law providing that the commission may allow \$100 toward the founding of a library, provided a like amount is raised by any city. 14 towns have expressed a desire to take advantage of the act, but the funds at hand will not permit of aid to more than 10.

It was decided to prepare and issue a pamphlet in the interest of free public libraries in the state, Moses Taylor Pyne, of Trenton, one of the members of the commission, having generously offered to defray all expenses in this connection. The pamphlet will probably be prepared by Messrs. Buchanan, E. C. Richardson, and F. P. Hill.

**PENNSYLVANIA FREE LIBRARY COMMISSION:**

Dr. G. E. Reed, secretary, State Library,  
Harrisburg.

On May 7 Governor Stone appointed Joseph G. Rosengarten, of Philadelphia, a trustee of the Free Library of Philadelphia, a member of the commission, to serve until Jan. 3, 1904, succeeding the late C. L. Magez.

## State Library Associations.

**CALIFORNIA LIBRARY ASSOCIATION.**

*President:* C. S. Greene, Oakland Public Library.

*Secretary:* F. B. Graves, Alameda Public Library.

*Treasurer:* Miss M. F. Williams, Mechanics' Institute Library, San Francisco.

The regular meeting of the California Library Association was held on the evening of April 12, in the rooms of the Wells-Fargo Library Association, San Francisco, President Greene presiding.

The following program was given: Short address by the president; vocal solos by Miss Maude Purdy; "The Spanish press in California," by R. E. Cowan, and "Cataloging," by Miss Anna Fossler (Univ. of Calif.).

Messrs. Teggart, Rowell and Clarke were appointed a committee on publication for the current year.

After the meeting light refreshments were served.

At adjournment the association passed a vote of thanks to Miss Purdy and to the librarian and staff for their entertainment and hospitality.

F. B. GRAVES, *Secretary*.

**CONNECTICUT LIBRARY ASSOCIATION.**

*President:* H. M. Whitney, Blackstone Library, Branford.

*Secretary:* Miss Anna Hadley, Ansonia Library.

*Treasurer:* Miss J. P. Peck, Bronson Library, Waterbury.

The spring meeting of the Connecticut Library Association was held Tuesday, May 21, at Branford, Ct. The beautiful James Blackstone Memorial Library, the most costly and elaborate town library in the state, was decorated with potted plants and great quantities of spring flowers in honor of the occasion. Members of the association were cordially greeted by members of the board of trustees, and those arriving early had ample opportunity to note the many interesting architectural features of the building.

The meeting was called to order at 10.30, the president, Henry M. Whitney, in the chair. Dr. Chas. W. Gaylord, secretary of the board of trustees extended hearty words of welcome, following with an interesting account of the early days of Branford's struggle towards the establishment of a reading-room or library, and of how generously the efforts of those interested were met by the late Hon. T. B. Blackstone, of Chicago, who erected the present magnificent building and presented it with a liberal running allowance to his former townspeople, the citizens of Branford.

Mr. Whitney, speaking of the work of the library at the present time, referred to the great advantages derived from "right beginnings," to the tact and energy required to stimulate the interest of the public when the "newness" of a library has somewhat worn off, referring particularly to the work accomplished by former librarians, Mr. Arthur W. Tyler and Miss Susan A. Hutchinson.

The second paper on the program, "English and American libraries," was read by Andrew Keogh, of Yale University Library. Mr. Keogh's paper was an interesting comparison of the libraries of the two countries. The governing boards of English libraries are very much larger than in this country, and having the right to enlarge themselves, they often secure the services of specialists. The number of public libraries in this country, exceeding those of England by some 3000, have also greater means of support, by reason of large endowments in many cases, an endowment library being almost unknown in England. The ideal of the American library is a large circulation, that of the English, the circulation of the best books; the reference department also receiving the greater care on the part of our English cousins.

Following Mr. Keogh, Prof. Addison Van Name, of Yale University Library, gave an informal talk on the British Museum catalog, showing several volumes as specimens.

James L. Whitney, of the Boston Public Library, read a paper on the early history of that library, giving also a few interesting facts in the history of the founding of the two university libraries—Yale and Harvard. Among the books used in illustrating his paper Mr. Whitney drew attention to one old volume, one of the original volumes given at that meeting of eleven ministers, when each gave books for a library, saying, "I give these books for founding a college in Connecticut."

Apropos of this, President Whitney suggested that members of the association visit the monument erected by the Colonial Dames in memory of the founders of Yale University, also the site of the house in which the eleven ministers met, the foundations of which are still the same. Those present were also directed to the monument of Rev. Philemon Robbins, the hero of Rose Terry Cooke's "Steadfast."

"The public and library methods," read by Miss Frances B. Hawley, of New York, was the only paper on the afternoon program. In a very bright and interesting manner Miss Hawley viewed the so-called red-tape methods of the library from the point of the borrower, rehearsing the grievances of many readers, and closing with the plea that the best service that a library has be placed at the delivery desk.

A discussion arose as to the suitability of *Puck* and *Judge* for library reading-rooms. General opinion determined that either both be included, or both be excluded from among our periodicals; that neither, for political reasons, should alone be subscribed for.

The meeting adjourned for examination of the building on the part of some of the members, while others left for a trolley trip to Double Beach on the beautiful Sound shore.

ANNA HADLEY, *Secretary*.

#### THE DISTRICT OF COLUMBIA LIBRARY ASSOCIATION.

*President*: F. A. Crandall, Office of Documents.

*Secretary*: Hugh Williams, Library of Congress.

*Treasurer*: F. E. Woodward, 11th and F streets, N. W.

An open-air meeting was held by the association on the afternoon of May 30. The members and their friends met at the library of the soldiers' home at 2 p.m. A brief address on the history and resources of the library was made by the new librarian, Sergt. Jacob Moore. The library contains 13,000 volumes, many of which relate to the Civil War. Sergt. Moore, on request, also gave a short history of the home. His remarks were very happily complimented by Col. J. Madison Cutts, of the War Department.

The association was then driven to Fort Totten, about a quarter of a mile away. Here the speaker of the day, Brig-Gen. John M. Wilson, U. S. A., retired, late chief of engineers, presented a carefully prepared and interesting paper on "The defences of Washington, 1861-65." Fort Totten is one of the best preserved of the chain of forts which were erected around the city during the Civil War. It overlooks the valley, so that a magnificent view was had for miles around. The association extended to Brig-Gen. Wilson a vote of thanks for his excellent paper.

From the fort the members were driven back through the soldiers' home grounds to the entrance of the Catholic University of America. Here they were divided into two sections. One section went to Brookland to visit the Franciscan monastery, where special arrangements to receive the association had been made by Mr. Charles H. Walsh, of the Library of Congress. The other section visited the library of the university.

The rector, the Rt. Rev. Thos. J. Conaty, conducted in person the members through the libraries of the university. The departmental libraries which were particularly interesting were the botanical, oriental and classical libraries. The general library contains 19,000 volumes, and is especially strong in theological works. It contains many rare early printed books.

The association returned to the city at 6 p.m. It was the general opinion that the members of the program committee, especially Mr. Edward L. Burchard, of the Coast and Geodetic Survey Library, who had charge of the arrangements, deserved great credit for this, one of the most enjoyable and successful meetings of the year. It was hoped that such an outing might be given every year. There were 75 persons present.

HUGH WILLIAMS, *Secretary*.

## Library Clubs.

### BAY PATH LIBRARY CLUB.

*President:* Miss M. Anna Tarbell, Brimfield, Mass.

*Secretary:* Miss Harriet B. Gooch, North Brookfield.

*Treasurer:* Miss Eliza R. Hobbs, Brookfield.

The fourth annual meeting of the Bay Path Library Club was held in the Congregational Church at Webster, Mass., June 6, 1901. The meeting was called to order by Rev. Marshall E. Mott, a trustee of the Webster Public Library. After a cordial welcome to the club and their friends he introduced the president, who responded briefly.

After general business and the election of officers Mr. C. S. Lyman, superintendent of schools of Dudley, Oxford and Milbury, spoke on "Provision for younger readers," "encouraging the reading habit and the taste for good reading." In part he said that New England is known as "God's country," because of the greater advantages resulting from the two great institutions—the public schools and the free public libraries. The multitude of books and periodicals issued yearly indicates that the reading habit is already established, and those providing books for schools and libraries should see to it that as good selections be made as possible. There are three influences that bear directly on the child—the home, the school, and the library. The library should be a help to the mothers in supplementing the reading of the home. Books of interest to both boys and girls should be provided for very young readers, as good reading helps the mothers to keep the boys off the street and away from evil habits. Care must be taken to counteract the habit which children form of reading trash, which they are usually willing to throw aside when good books are offered in their place. Every library should have a children's department with a catalog arranged according to the grades of the schools. At the close of this interesting and practical talk a discussion ensued—one point dwelt upon being the dearth of suitable books for young girls.

The afternoon session opened with a discussion led by Mr. Samuel S. Green, librarian of the Worcester Public Library, whose subject was "The provision of books in foreign languages for the foreign speaking population." In Worcester the conditions seemed to warrant Mr. Green in buying books for adult foreigners. The conditions existing in Webster were so different that it seemed as if it might be a doubtful experiment, although one that could do no harm. Several participated in the discussion as to the advisability of spending money for such an object and the results likely to be gained.

The president spoke of the institute work being done by the Western Massachusetts Library Club, and it was voted that such an

institute under the direction of this club be held at Templeton in the fall.

One pleasant feature of this meeting was the large number of ministers and teachers present and their interest in the club and its work.

MRS. C. A. FULLER, *Secretary.*

### BUFFALO LIBRARY CLUB.

*President:* H. L. Elmendorf, Public Library.  
*Secretary-Treasurer:* R. F. Morgan, Grosvenor Library.

The Library Club of Buffalo held its regular meeting on May 16 in the rooms of the Buffalo Historical Society, President Elmendorf in the chair.

The program consisted of music and a delightful paper by Mr. Henry R. Howland on "John Wyclif." The election of the following officers was then announced: President, Henry L. Elmendorf, Buffalo Public Library; vice-president, Mrs. Adele B. Barnum, Niagara Falls Public Library; secretary, Mr. Richard F. Morgan, Grosvenor Library; chairman of the program committee, Mr. Edward D. Strickland, Buffalo Historical Society.

The executive committee was instructed to make arrangements, if possible, for some entertainment of the members of the A. L. A. who may visit Buffalo on the post-conference excursion. No more regular meetings will be held until October.

ELLA M. EDWARDS, *Secretary.*

### CHICAGO LIBRARY CLUB.

*President:* A. G. S. Josephson, John Crerar Library.

*Secretary:* C. R. Perry, Chicago Public Library.

*Treasurer:* C. A. Torrey, Chicago University Library.

A special meeting of the Chicago Library Club was held on Thursday evening, May 9. The meeting was called for the purpose of holding the annual election of officers and the discussion of plans for the coming year. The election resulted as follows: President, Mr. A. G. S. Josephson; 1st vice-president, Miss Irene Warren; 2d vice-president, Miss Evva Moore; secretary, Mr. Chesley R. Perry; treasurer, Mr. C. A. Torrey.

The annual report of the treasurer was read, and the president appointed as auditing committee Miss Hawley and Mr. Larson. The work of the club for 1901-2 was discussed informally, the members expressing their ideas and wishes. The special points brought forward were:

1. Shall the club follow a special line of work throughout the year?
2. Shall a manual be published?
3. The benefit received in listening to addresses by specialists.
4. Library work in the schools.

No definite action was taken in regard to the program, but as usual the matter was left in the hands of the executive committee.

MARGARET E. ZIMMERMAN, *Secretary.*

## WESTERN MASSACHUSETTS LIBRARY CLUB.

*President:* W. I. Fletcher, College Library, Amherst.

*Secretary:* Miss Ida F. Farrar, City Library, Springfield.

*Treasurer:* Mrs. A. J. Hawks, Meekins Memorial Library, Williamsburg.

The second of the library institutes under the auspices of the Western Massachusetts Library Club was held at Williamsburg, May 31, with representatives from seven of the 10 adjacent towns invited. In Chesterfield special arrangements were made for the school sessions, in order that teachers might be present as well as the librarian and trustees. Whately, Florence, Conway, Westhampton, West Chesterfield, and Goshen were the other towns represented. President W. I. Fletcher, of Amherst College, presided, and made every one feel quite at home.

The first number on the program was a talk by Rev. Calvin Keysor, of Goshen, on "The meaning of books to a community." He said: "The meaning of books differs to each person, but we may say in a comprehensive way books mean education in its highest sense—the calling forth of all the capacities of the human soul. Books are the tools with which we work. In times now past books were for the minister, doctor, teacher only. Now *all* work is intellectual—thought is working in all departments of activity, especially in the farmer's life. Books are not only useful as tools, but to open to men all departments of knowledge. No one is a full man now unless he is more than a machine. Books mean that we are to live, not spend time in getting a living, but in getting the most and best out of life. Libraries are of greatest inspiration to all true teachers. In school the pupil is merely started in the line of knowledge. If pupils take in the significance of the library they never think their education complete when school is done. I was never in but one town without a library, and I found the people not so good as where there was one. Their life was narrow and gossip was the main topic of conversation. I find it worth while sometimes to preach a whole sermon on the library."

Miss F. Mabel Winchell, of the Forbes Library, followed with very helpful suggestions as to "How to increase the usefulness of the library." She said the library ranks next to the school. In the school personal attention is given the children—this should be done in the library. The large library is machine like, each one having his own part of the work to do; the small library does hand work and gets into closer touch. A few good books are better than many poor ones. The two-book system is excellent to induce a love of better literature; the outgrown Sunday-school library may be combined with the public library; outlying districts may be reached from the central library; librarians may loan to one another; pictures are most helpful as suggesting books. Do not have books cov-

ered, dressed alike like children in an orphan asylum. Many a housekeeper has books or magazines stored away in her attic gathering dust—let the library have them.

These suggestions provoked a live discussion of a half hour. The idea of using pictures in a library proved a novel one to some of the people. The Westhampton librarian said they had combined the Sunday-school and public libraries and allowed two books to be taken, one from each, opening the library before and after the Thursday evening meeting.

Supper was served at six o'clock by the W. C. T. U. in their rooms, and this was followed by the inspection of the Meekins library.

The evening session opened at seven with an address by Mr. J. H. Carfrey, superintendent of schools, Northampton. His subject was "The school and the library." He spoke of the library as the instrument to furnish collateral reading. The taste for reading cannot be formed too young. The mistake is often made of having a child begin too late and forcing him to read lists of books he does not care for. Surround him with good literature and allow him freedom.

He was followed by Miss Alice Shepard, of the City Library, Springfield, who spoke on "The library and the school." She said: "When the subject of the library and the school was given me I said, 'Everybody knows that the attitude of the libraries toward the school is one of fellowship in aim, of helpfulness in purpose and co-operation in work.' So I should have continued to think but for the chance remark of a teacher who said in surprise to a library assistant: 'Why! I didn't know librarians cared anything for the people! I thought they only cared for books!' This reminds me of a remark made recently by a very successful librarian. He says: 'A librarian takes care of books. A complete librarian takes care that people read books.' We are accustomed to thinking that if we implant a love of good literature we have accomplished our aim. But we forget the ever-widening ripples of influence which may go out from the casting of one pebble, from the reading of one book. It is this wider, indirect, intangible result extending from the child to the parent and to the home and to the community we are often likely to lose sight of. This broader influence is, it seems to me, especially the province of the country school and of the small library through the school. The school occupies a larger place in small communities, where there are fewer interests than in the city. Consequently it can exert a stronger influence on the community and can become, through the wisdom of the librarian and the sympathetic interest of the teacher, a center of real influence in a district or village remote from the library.

Mr. C. A. Cutter, of the Forbes Library, spoke next on "How libraries can help each other." He emphasized the willingness of

Forbes Library to lend to any of the smaller libraries in this section, and said that Williamsburg was equally ready. He deprecated the narrow spirit which would not allow a library outside the town to enjoy the privileges of the town.

The conference was most encouraging in the intelligent interest taken by all present. The sunburned faces told the occupation of many of the men, but their remarks showed bright minds, and their appreciation of what the library meant to them and to their children. The officers of the club are more and more convinced that the best way to reach the small hill towns is to make the circle meeting small, so that there may be freedom of discussion and bring to them the thought and experience of the larger libraries, but make it practicable to their conditions. When the librarian, the school superintendent, the editor and ministers have become interested in the conference idea the news of it will spread and its success is assured. The work will probably be continued in the fall.

IDA F. FARRAR, *Secretary.*

## Library Schools and Training Classes.

### DREXEL INSTITUTE LIBRARY SCHOOL.

#### ANNUAL VISIT.

The annual visit of the school was made this year in May, the class going to Baltimore and Washington. In Baltimore, the class went first to the Enoch Pratt Free Library, then to the Peabody Institute and Johns Hopkins University.

The Library of Congress was of special interest during the Washington visit. The students were escorted through the many interesting departments, afterward returning in groups for more thorough examination. The Public Library, the Library of the Department of Agriculture and of the Public Documents Office were the other libraries visited. Everywhere the class received special attention, every opportunity being afforded for the inspection of the various libraries. The students thoroughly appreciated the advantages of seeing the methods of these several institutions, and returned to their studies with renewed enthusiasm.

A visit to the libraries of Bryn Mawr College and Haverford College in two of Philadelphia's most beautiful suburbs proved one of the most enjoyable events of the year, and was the close of the year's outings.

Miss Lord, librarian of Bryn Mawr College, came to the school in May to give a talk on the subject of the selection of books for a college library, which was most interesting and instructive.

#### GRADUATION NOTES.

Among the bibliographies presented by the students before graduation are the following: a reference list on book bindings, a selected

and annotated list of books on domestic science, annotated reference list of books on commerce, reading list of books on philanthropy, American history for young readers, etc.

The commencement exercises were held June 11, when the following students received certificates for completing the course of study:

Jessie M. Allen.

Edythe Markoe Bache.

Julia Duncan Brown, A.B. Tarkio College.

Anna Bonnell Day.

Anne Blanche Duble.

Minnie Burtis Hegeman.

Emma Lightner Hellings.

Isabel Holston.

Gertrude Priscilla Humphrey, Ph.B. Olivet College.

Marietta Louise Hunt.

Mary Krichbaum.

Fanny S. Mather.

Inez Mortland.

Margaret Elizabeth Neal.

Edith Frances Pancoast.

Caroline Belle Perkins.

Elizabeth Chesson Ray, A.B. Smith College.

S. Alberta Rice.

Helen Sharpless.

#### APPOINTMENTS.

Miss Margaret E. Neal and Miss Fanny S. Mather, class of '01, are assisting Miss Farr in the reorganization of the Johnson Public Library, Hackensack, N. J.

Miss Anna C. Laws, class of '96, has been appointed to a position in the Library of Congress.

Miss Isabel Holston, class of '01, resumes her position as librarian of the Deptford Institute Free Library, Woodbury, N. J.

Miss Alvaretta P. Abbott, class of '99, is organizing the Public Library of Montville, Ct.

Miss Margaret E. Neal, class of '01, has been appointed to a position in the Library of Congress, to date from July 1.

### PRATT INSTITUTE LIBRARY SCHOOL.

#### PERSONAL NOTES.

Miss Leslie Merritt, class of 1900 and student of historical course, 1901, has been engaged to classify and catalog the library of Vassar Institute, Poughkeepsie, N. Y.

Miss Joanna W. Burnet, class of 1901, has been appointed librarian of the Madison Square Church House, New York City.

Miss Annie K. Emery and Miss Annie M. Thayer, class of 1901, have been engaged as assistants in the Pratt Institute Free Library, also Miss Marian S. Morse for work during the summer.

Miss Sara C. Van de Carr, class of 1901, has been appointed librarian of the Loring Memorial Reading-room, North Plymouth, Mass., in place of Miss Harriet Kellogg, resigned.

Miss Henrietta C. Bartlett, class of 1901, has been engaged to organize the library at Warrensburg, N. Y., given to the town by the Misses Richards.

Miss Bertha Miller, class of 1901, has been appointed librarian of the King's Daughters' Settlement, New York City.

Miss Anna W. Hall, Mr. Franklin F. Hopper, class of 1901, and Miss Laura Hammond, class of 1900, have received appointments to the Library of Congress.

Miss Elizabeth C. Stevens, class of 1898, and student of Course for Children's Librarians, class of 1901, has been elected librarian of the Public Library at New Rochelle, N. Y.

Miss Esther Owen, class of 1899, is engaged to catalog the Field Library, North Conway, N. H., given to the town by Mr. Marshall Field of Chicago.

Miss Bertha Frances, class of 1899, having finished her work at the library of Pennsylvania University, has been engaged as cataloger at the Y. M. C. A. Library, New York City.

Miss Susan M. Griggs, class of 1899, has been engaged as cataloger in the library of the American Society of Civil Engineers, New York City.

Miss Margaret Zimmerman, class of 1897, has recently resigned her position at the John Crerar Library, to be married.

Miss Maud Johnson, class of 1899, with the help of Miss Clendenin, class of 1901, is engaged in reorganizing the library at Roslyn, L. I., which was founded by William Cullen Bryant.

Miss Caroline Koster, class of 1893, and student of Course for Children's Librarians, 1900, has been engaged as children's librarian at the Mt. Washington Branch, Carnegie Library, Pittsburgh.

Miss Edith Hunt, class of 1895, has resigned her position at the Aguilar Library for one at the Library of the Long Island Historical Society, Brooklyn.

Miss Metta R. Ludey, class of 1900, has been engaged to catalog a part of the library of the American Bible Society.

Mrs. Frances Hale Gardiner has been engaged to do some document cataloging by the New York Public Library.

Miss Bertha F. Hathaway, class of 1901, is to spend the summer cataloging for the Pequot Library, Southport, Ct.

#### LECTURE ON BOOKMAKING.

Mr. Charles M. Skinner gave a talk on the "History of bookmaking" to an audience of children, on Monday, May 6, in the room occupied by the exhibition illustrating this subject.

#### NEW YORK STATE LIBRARY SCHOOL.

##### SUMMER COURSE.

The following students began a six weeks' course of study May 31:

Baker, Gertrude Alexander, librarian Mount Vernon Public Library, Mount Vernon, O.

Blunt, Florence Tolman, B. L. Mt. Holyoke College, 1896; A. B., 1899; assistant Haverhill Public Library; Haverhill, Mass.

Bonté, Frances Storer, assistant University of California Library; Berkeley, Cal.

Buchwald, Isabella Caroline, assistant Cleveland Public Library; Cleveland, O.

Crocker, Alice Morgan, in charge periodicals and binding Hartford Public Library; Hartford, Ct.

Deighton, Mary Frances, assistant West Side branch, Cleveland Public Library; Cleveland, O.

Dutcher, Marion Flagler, assistant Adriance Memorial Library, Poughkeepsie; Poughkeepsie, N. Y.

France, Mary Grace, substitute assistant librarian, Johnstown Library; Johnstown, N. Y.

Greene, Lavinia E., librarian, for summer months, Haines Falls (N. Y.) Free Library; Hunter, N. Y.

Gymer, Rose Charter, assistant Cleveland Public Library; Cleveland, O.

Henley, Daisy, Indiana University, 1894; Wisconsin summer school of library science, 1900; assistant librarian Wabash Public Library; Wabash, Ind.

Marple, Alice, Illinois Wesleyan University; assistant Des Moines Public Library; Des Moines, Ia.

Parker, Bertha W., Des Moines College; assistant Des Moines Public Library; Des Moines, Ia.

Selden, Elisabeth C., first assistant librarian Duluth Public Library; Duluth, Minn.

Stonehouse, Mary Elizabeth, assistant Young Men's Association Library, Albany; Albany, N. Y.

Walsh, Augusta Berchman, librarian Pine Hills branch, Albany Free Library; Albany, N. Y.

Wheeler, Jessie F., A.B. Vassar College, 1882; assistant librarian Mechanicville Public School Library; Mechanicville, N. Y.

The regular school year will close Friday, June 28, the summer course will close July 11.

SALOME CUTLER FAIRCHILD.

#### UNIVERSITY OF ILLINOIS STATE LIBRARY SCHOOL.

CANDIDATES FOR THE DEGREE OF B.L.S., JUNE 12, 1901.

Minnie Clarke Bridgman. Partial bibliography of bookbinding.

Jessie Anna Carroll, A. B. (Wilmington College), 1895. Early German book illustration.

Florence Emeline Carter. Earliest forms of books and ancient libraries.

Adelaide Maria Chase. Tufts College Library.

Agnes Mary Cole, B.S. (Wheaton College), 1893. The early Italian printers.

Clara Elizabeth Howard. Modern American book illustration.

Flora Dorothy Hurlbert. Subject index to Illinois school reports, 1885-1897.

Fannie Ella Jones. General index to the *Library Chronicle*.

Mary Harriett Kittredge. Monastic libraries.

Stacia Livingston. The early English press.

May Louise Martin. Block-printing.

Amy Constance Moon. The early French press.

Mabel Reynolds. Select list of children's fiction with an analysis of ninety books and a subject index.

Lorinda Ballou Spellman. The Dutch press of the 16th and 17th centuries.

Mary Estelle Todd. Public library movement in Great Britain.

Florence Sherwood Wing. History of movable type from its invention to 1462.

#### RECENT APPOINTMENTS.

The following positions have been recently assigned to students:

University of Cincinnati Library: Mrs. Harriet E. Hodge, '01, librarian; Miss Minnie C. Bridgman, B.L.S., '01, asst. lib'n; Miss Mary Thompson, '00, head cataloger; Miss Jessie A. Carroll, B.L.S., '01, cataloger; Miss Delia Sanford, B.L.S., '00, cataloger; Miss Margaret Budington, '02, cataloger; Miss Grace Goodale, '02, temporary cataloger; Miss Edna L. Goss, '02, temporary cataloger.

University of Iowa Summer Library School: Minnie C. Bridgman, assistant instructor.

Buchtel College: Lorinda B. Spellman, cataloger.

Champaign Public Library: Florence Emeline Carter, librarian.

### Reviews.

[ANDERSON, AKSEL.] *Catalogue de l'exposition suédoise de l'enseignement supérieur (Exposition universelle de Paris, 1900). Etablissements d'enseignement supérieur et savants. Publications savantes. Upsal, 1900. 7+103 p. 8°.*

International exhibitions may be of doubtful value in promoting manufactures and industry. In one particular their value is certain enough—they give occasion for stock-taking of the achievements of the several countries in arts, industries and culture. The publication at hand is a result of such stock-taking occasioned by the exposition at Paris last year. It is primarily a catalog of an exhibit—the main part of which, by the way, will be permanently on deposit in the Bibliothèque Sainte Geneviève, as a part of this library's "Dépôt scandinave." The completeness of the exhibit makes the catalog itself of very substantial, permanent value as a record of Swedish achievements in the lines not only of higher education, but of "productive scholarship" generally. The catalog is divided in the following groups: Photographs and plans; Higher education: (Universities and faculties; Artistic education; Agricultural education; Industrial and commercial education;)

Archives, libraries, museums; Learned societies; Scientific journals; Publications of individual scholars. The last part is incomplete, recording some 50 authors, represented by some 100 publications; but the range of this collection is fairly representative of Swedish scholarship in the last quarter of the past century. Rather unsatisfactory is the list of "Revue savantes," containing, as it does, only 23 periodicals, nearly all dealing with natural sciences, medicine and education. But this is more than made up for by the splendid collections of publications of learned societies, academies and institutions. As far as the writer is able to judge, not one society or institution of importance is unrepresented. The universities, academies and other bodies are represented by all available publications relating to their history and organization, as well as by in most cases complete files of their proceedings, transactions, and other publications. The catalog is made up with all desirable bibliographical fulness, and must be a necessary tool for any one who needs readily at hand a reliable guide to Swedish scholarship, education and scientific production.

That the exhibition was possible in such a completeness is due to the unsparing energies of the collector and superintendent of the exhibit, Dr. Aksel Anderson, assistant librarian at the University of Upsala. Most of the material exhibited were free gifts by the institutions, publishers or authors concerned, and in the case of serials the continuations will also be supplied. The material seems to have been put at the free disposal of Dr. Anderson, who undertook the collection in addition to his official duties and without remuneration. The whole is, as said, deposited in the Bibliothèque Sainte Geneviève, and the French government will in exchange send a series of valuable official publications to the University Library of Upsala. A. G. S. JOSEPHSON.

MOULTON, Charles Wells, *ed.* The library of literary criticism of English and American authors. v. 1: 680-1638. Buffalo, N. Y., Moulton Pub. Co., 1901. 768 p. Q. \$5.

Mr. Moulton has conceived and executed an admirable piece of work, and if his later volumes maintain the standard of the first, literary bibliography will be enriched by a most valuable accession. The "Library of literary criticism" suggests, in its general plan, Mr. Larned's "History for ready reference," but its essential difference lies in the fact that instead of aiming to give a survey of the world's literature through the medium of extracts, it presents the verdicts that have been passed upon that literature by critics and scholars through successive centuries. Practically this is "evaluation of literature" of permanent value, while at the same time it puts at the disposal of students and readers a general bibliography of literary history and criticism. The arrangement is chronological,

the present volume opening with Beowulf, c 800, and closing with Sir Robert Ayton, 1570-1638. Under each author cited (192 in the present volume) there are given, one or more general bibliographical or introductory selections, followed by various critical "appreciations" on the author's work as a whole and upon individual examples. In the arrangement of the selections the chronological principle is followed. Thus, in the case of Chaucer, the introduction is from Sharp's "Dictionary of English authors," while the extracts open with Gower, 1383, Occleve, 1411 and Caxton, 1480, and run down from Francis Thynne, John Aubrey, and other early writers, to Howells, Corson, Gosse, Saintsbury, and fellow critics of the present day. Choice has been made with discrimination and a thorough sense of fitness, and the chief characteristic of the work is the incitement it gives to know for oneself the masterpieces which have meant so much to others. Its use can hardly fail to lead to the use of the books themselves, and this, of course, gives it special value for the public library and the school reference collection.

Taking Shakespeare as an example of the treatment of the most important names, we find that 131 pages are devoted to the subject, prefaced by a fair reproduction of the Droeshout portrait. These open with a selection of "personal" extracts treating generally of Shakespeare's life and character; then come the poems and plays, each presented chronologically by a collection of critical and appreciative extracts; brief notes on the rejected plays follow; then a selection of extracts on the "authorship controversy," and finally under the heading "general" selections touching upon Shakespeare's work and genius as a whole. This subject, naturally, presents to us the flower of English literary criticism, and the variety, pertinence and excellence of the selections made call for special commendation. Even the cursory reference use of such a compilation cannot but stimulate curiosity and interest and tend to send the user from the criticism to the work criticised. Appended to every extract is author's name, short title, and date, so that the selections open to the student the fuller bibliography of each subject. The volume is prefaced by an alphabetical table of contents and for the last volume copious indexes are promised.

To the preparation of this work Mr. Moulton, it is understood, has devoted more than 20 years, and he states that he has had the co-operation of many laymen and scholars and of every important publishing house in America and Great Britain.

Only those who have labored in the field of bibliography can appreciate the difficulties and the magnitude of his task; but its value should be patent to all users of books, and it is to be hoped that it may receive such general and cordial support as to give substantial recognition of its merit.

UNITED STATES CATALOG. Books in print, 1899; ed. by George F. Danforth and Marion E. Potter. Minneapolis, H. W. Wilson, [1900.] c. 7+755+361 p. Q. \$12.50.

AMERICAN CATALOGUE; founded by F. Leyboldt, 1895-1900: books recorded (including reprints and importations), July 1, 1895-January 1, 1900; comp. under the editorial direction of R: R. Bowker. In 2 pts.: 1, Author-and-title alphabet; 2, Subject-alphabet. N. Y., office of *The Publishers' Weekly*, 1901. c. 1900, 1901. 36+564+301 p. F. \$12.50.

These two publications are interesting in their relation, or lack of relation, with each other. The "United States catalog" seeks to supply an index of books in print such as is an important feature of Whitaker's English "Reference catalogue," but which has not been included in its American progenitor, the "Publishers' trade list annual," for the stated reasons of the cost and delay involved. The "American catalogue 1895-1900" is the final supplementary volume in the series originated with Frederick Leyboldt's great "American catalogue" of books in print and on sale in 1876, which did to them, in more full bibliographical shape, the service done by Mr. Wilson's catalog now. As the years go by, this task becomes more and more colossal and it is easily to be seen why any bibliographer or indexer should shrink, a quarter-century later, from attempting the bibliographical fullness of detail at which the original Leyboldt plan aimed. That has included from the start a subject portion, given in a separate alphabet instead of on the dictionary plan; whether this was thought by the originator and his successor the better plan, or whether because of the delay always incident to such work, does not seem to have been stated. Mr. Wilson has nevertheless accomplished a practical service for libraries, which they have not been slow to recognize, by presenting a title-a-line finding list in which the spirit of Dr. W. F. Poole would have rejoiced greatly. The names of authors stand out all the more strongly in the bold-faced type because of the title-a-line compass in which the entries of books under author are circumscribed. The preface states that the work has had the benefit of co-operation from two independent sources, referring to the work done by Mr. George F. Danforth, of Indiana University Library, on the "In print" index" which he had planned and which is now merged in the present volume, and in that done in Mr. Wilson's own office, by the staff of his "Cumulative index." It is understood that the original material prepared in Mr. Wilson's office for the author alphabet has been amplified or completed by including the material prepared

by Mr. Danforth's efforts, while he has specifically supplied the index from titles to names of authors, which forms the second portion of this work. This portion is, of course, not as satisfactory from the bibliographical point of view as a title-entry proper, but in bibliographies which are commercial enterprises, as are both these catalogs, there are limitations the result of which must fret the bibliographical critic. To point out errors in detail is, of course, possible in reviewing any bibliographical work of this character, but it would be neither gracious nor useful to do so, when so much has been accomplished. The chief defect of the work is the lack of subject indexing.

The final volume of the "American catalogue" on the original Leypoldt system, for such it is stated to be, pursues the same plan as the original work of 1876, and differs from some of the later volumes in omitting appendixes covering U. S. Government publications, state publications and the publications of societies. The reason for this is given as twofold: that adequate provision is now made for these appendixes in the issues of the national Office of Documents, and in the bibliographies of "State publications" and of "Publications of societies" issued from the Office of *The Publishers' Weekly*, and that their inclusion would make the cost of the volume prohibitive. Bibliographical record has now the advantage of the better system of record made by the Copyright Office—if "better" can be said where before there was none—but it is easy to see that there are lines of publications where completeness is anything but possible. Aside from the definite exclusions from the "American catalogue" system, as of directories and other "books which are not books," the publications of the numerous private or semi-private presses of the day, and the habit of subscription publishers of endeavoring to prevent record of their works and often to keep them out of libraries, lead to sad *lacunae* in such bibliographical records as this volume, so far as these publications are not caught by the copyright net or the sieve of industrious bibliographical inquiry. The present volume, labelled 1895-1900, would seem to be under false pretences—since it excludes books actually published in 1900 and includes only those of 1900 imprint actually published within 1899—but for the curious device of the title-page, limiting the period to Jan. 1, 1900, and for the explanation of the preface on this point. Those are few who will still argue that the 19th century ended with 1899, but the editor of the "American catalogue" indicates that bibliographically 1899 on the one side, ending the 1800's, and 1900 on the other, beginning the new imprint set of figures, afford a better division than the logical century-post. Probabilities of the completion backwards of the 19th century record, by the publication of the 1800-1876 volume, seem, from the statement

of the preface, to be waning rather than waxing. Possibly, however, those hard-hearted librarians who rejoice inwardly in the death of an author, because now his or her set can be completed, will receive with satisfaction the statement that this is likely to be the final volume of the present series, especially in view of the announcement by the editor that Phoenix-like a new system is to arise, for which opportunity has been afforded by the development of the linotype method. Briefly, the plan proposed for the new series is the publication in a first alphabet of the weekly record from *The Publishers' Weekly*, first in the annual volume, as now, and finally without the descriptive notes in a five-yearly volume; and secondly, the extension of the monthly index covering the author, title, subject and series entries, now cumulated each month in *The Publishers' Weekly*, through the annual alphabet into a combined five-yearly alphabet, which will form the second portion of the five-yearly volume.

## Library Economy and History.

### GENERAL.

SCOTT, GREENWOOD & Co., London, announce the issue of a series of handy guides to the choice of books, in the form of lists in the various classes of literature, entries being selected by experts, accompanied by historical and descriptive notes, and supplemented by full indexes. The first section, dealing with fiction, will be issued in the course of the year.

TARBELL, M. Anna. *The Homefield Library: its work and its helpers.* Read before the Woman's Education Association. 12 p. D.

This little pamphlet is printed by the Woman's Education Association, and has been widely distributed through New England. Copies may be obtained, so far as the remainder of the edition will allow, by applying to Miss Alice Chandler, Lancaster, Mass. Miss Tarbell tells of the development of intellectual life in the little town of Homefield through the books and pictures received from the Woman's Education Association, which permitted extension of the town's library facilities. Her narrative should be suggestive to others.

### LOCAL.

*Asbury Park (N. J.) P. L.* At a special meeting, held on May 20, it was voted to issue \$18,000 in municipal bonds for the purchase of the library building on Grand avenue. The library has heretofore been maintained through the efforts of the local women's club, but it is hoped that before long it may receive city support.

*Brooklyn, N. Y. Long Island Hist. Soc. L.* The annual meeting of the society was held on May 20, when it was informally decided that the society would not enter into any consolidation with the other Brooklyn libraries.

as a result of the Carnegie gifts. The officers take the stand that the institution is a reference, not a circulating, library, and that neither its books nor its system would be adapted to the work of a circulating library. Besides, entrance into the Carnegie scheme is opposed because of the fact that the library would not then retain its self-perpetuating management.

*Brooklyn (N. Y.) P. L.* The appointment of Mrs. Mary E. Craigie, formerly assistant librarian, to be assistant in charge of the travelling library department, at her former salary of \$1500 a year, has been ratified by the civil service commissioners, the position being made exempt from civil service examination and rating.

At the meeting of the directors on May 22 F. P. Hill and W. A. Bardwell, the recently appointed librarian and assistant librarian, were present, and it was voted that the librarian should hereafter act as secretary of all the committees of the board.

The offer of the Public Library Association to transfer to the library the small library organized by that association in Tompkins Park, was discussed, but the matter was referred to the sites committee for further consideration.

Mr. Snow, chairman of the administration committee, read a letter from Librarian Hill suggesting that all cataloging be done at the Brevoort branch, and then sent to the other branches throughout the borough; that the present Brevoort branch building be known as the "administration building" and that two stores be acquired on Bedford avenue, opposite Brevoort place, for the Brevoort branch library proper. Mr. Snow advised the addition to the existing quarters, since there was not enough office space at present. The committee on sites also recommended the lease of the two stores, and it was decided to lease them for a period of three years at not more than \$150 a month, the present building to be used only for administration purposes.

*Chattanooga, Tenn.* The city council on May 13 passed the ordinance drafted by a committee of the council, authorizing the establishing and organization of a library in Chattanooga under the state laws provided for that purpose, and in accordance with the conditions of Mr. Carnegie's offer of \$50,000 for a building. As the matter will stand under the organization provided for in the ordinance, the city council has complete control of the institution. The board of directors will be appointed by the mayor, subject to the approval of the council. There will be nine members of the board, each holding for three years, and at the expiration of their terms, their successors being appointed by the city council. This was the greatest objection the chamber of commerce committee, which had prepared an alternate ordinance, found to the plan suggested by the council, and they have withdrawn from participation in the matter. The *Chattanooga News* says: "It is

probable the matter will be allowed to rest for some time. The ordinance has passed one reading, and it would not be surprising if the next time the matter should be heard of would be along after the November election. It is equally as probable, however, that the question will be acted upon the next time the council meets. In this event the mayor will appoint the board of directors at once and they will organize immediately thereafter, taking such steps as may be necessary to secure the library at the earliest possible moment. However, the matter at present is in somewhat of an uncertain state."

*Columbia University L.* The university is represented at the Pan-American Exposition by an interesting display of photographs and official publications, including contributions from the various departments, dissertations, students' periodicals, and all the library publications. Included in the exhibit Mr. C. Alex. Nelson, reference librarian, presents as a part of the bibliographical work of one American librarian his Astor Library catalog (4276 p. 4 v.), the catalog of the Avery Architectural Library, and his monograph on the Duryea collection of the Long Island Historical Society.

*Concord (N. H.) P. L.* The report of the librarian, Miss Grace Blanchard, for the year 1900, as printed in the local press, is so bright and interesting that quotation from it is limited only by the lack of space. Miss Blanchard says:

"This has been a good year at the library. We have bought all the necessities, some luxuries, and yet not expended our appropriation. What better can an institution report? This pleasing state of things is explained by the fact that our ambitions have been within reason, and our petty economies so numerous that funds remained for many desirable purchases. We have passed our pens and our ink on from fine work to coarse work, we have had two old chairs made into one, we have turned window shades end for end, walked on errands instead of using stamps, completed imperfect books by writing in missing pages, and hand-copied lists of books rather than hire a typewriter, all to the end that we might add to the resources of the library."

Accessions for the year are given as 1100, of which 630 were new books. "We have tried to buy from two to four copies of each popular novel, but we have known that it was acknowledged impossible in any public library to own enough copies to give one to each borrower, though that would make life as pleasant for the desk attendants as it would for the borrowers." The circulation is given as 90,000, 1800 less than the year before, fiction showing a decrease of 2 per cent. 626 new borrowers have registered. "The exhibits which come every few weeks from the Library Art Club continue to be enjoyed."

*Cumberland, Md.* Andrew Carnegie's offer of \$25,000 for a library building was refused

at the local election held on May 20, owing to the increase of taxation involved in providing the yearly maintenance fund of \$2500 required. In the hope that the offer would be accepted a library site had been guaranteed by interested citizens. It is stated that at the polls the workingmen of the city were almost solidly opposed to the library measure because of the increase of taxation, while the negro vote was also in opposition to it on the ground that the "color line" would be drawn, and that the negroes would therefore receive no benefit from the library.

*East Rutherford (N. J.) L. Assoc.* The library is now in process of organization by Miss Lambert, of the Passaic Public Library. Miss Emma Ver Nooy has been appointed librarian, and will take charge as soon as Miss Lambert's work is completed.

*Galion (O.) P. L.* The Galion Public Library Association was organized early in May, its object being "to acquire and maintain a public library and reading room which shall be free to the inhabitants of the city of Galion." A general membership fee of \$1 yearly is provided for.

*Galveston, Tex. Rosenberg L.* The directors of the Rosenberg Library Association met on May 15 and selected a building site. The property consists of five lots at the northwest corner of Tremont street and Sealy avenue, and the purchase price was \$18,500. It is understood that about \$50,000 is available for the erection, equipment, and endowment of the library. The plans have not yet been decided upon.

*Germantown, Phila., Pa. Friends' F. L.* (Rpt., 1900.) Added 603; total 20,276. Issued 12,911. New cards issued 415. No. of visitors 21,233. For special reasons this report covers only 11 months' record instead of a full year. Special mention is made of the loss sustained in the death of the librarian emeritus, William Kite, who was appointed in 1869 "when the library was very small, and by his faithful service and interest in the work did much to build it up and increase its usefulness."

A list of the accessions for 1900 is appended.

*Gloversville (N. Y.) F. L.* (21st rpt.—year ending Dec. 31, 1900.) Added 1201; total 19,070. Issued, home use, 59,012; reading room use 4630. 68 teachers have drawn 450 books for professional use, and 122 v. have been issued to the local study clubs. A brief summary is given of the work done by the library during its 20 years of existence, closed Dec. 31, 1900.

A list of the year's accessions is appended.

*Greenup (Ill.) P. L.* The newly established library was opened on the afternoon of May 17, in an attractive room in a new school building, which was assigned to the purpose by vote of the board of education. The library was organized in about three weeks, through the spontaneous effort of the whole community. It is said that there are not half

a dozen families in the village that are not represented by some sort of contribution, and gifts were received from former residents from places as far distant as New York City and San Diego, Cal. The movement started in the women's clubs, and a general petition was presented to the village authorities asking the appointment of a designated board of trustees. This was done, a suitable room was secured, shelving was erected as a contribution to the cause from local carpenters, stationery supplies and blanks were given by interested newspapers, volunteer librarian and assistants were secured, and at a public "book shower" held April 27 at the Methodist Church a nucleus of 282 volumes was collected. The library opened its doors with 1500 volumes on its shelves, and with its running expenses assured for a year. None of the public money contributions towards its establishment exceeded \$10 in amount. The librarian is Mrs. Sarah Cunningham.

*Hannibal (Mo.) P. L.* The cornerstone of the John H. Garth Memorial Library building was laid on May 16. It will cost \$25,000, and is erected in accordance with Col. Garth's wish by his widow and his daughter, Mrs. R. M. Goodlett.

*Haverhill (Mass.) P. L.* (26th rpt.—year ending Dec. 31, 1900.) Added 3585; total not stated. Issued, home use, 148,925 (fict. 76%). New cards issued 2086; total cardholders 11,380.

The home use of books showed an increase of 20 per cent. over that of the previous year. "The changes in the library building and in the methods of placing books before the readers account for the increase in patronage. The opening of a children's room and the removal of an age limit have resulted in a greater use of the library by the young people."

Mr. Moulton devotes his report mainly to a statement of the changes made in the library building, which have been already noted in these columns.

*Holyoke (Mass.) P. L.* (Rpt.) Added 722. Issued, home use, 49,744, a gain of 2000 over the year preceding. New registration 1085; total registration 10,496. Receipts \$4370; expenses \$3764. The new building will not be finished until late in the summer.

*Jackson, O.* At a meeting of the city council, held on May 14, the committee on revision of the council presented a unanimous report in favor of a tax levy for public library purposes.

*Jersey City (N. J.) P. L.* A pleasant surprise was arranged for Miss E. E. Burdick, librarian of the Public Library, on May 21, by the local women's club. This was the equipment of Miss Burdick's private room in the new library building with artistic cushions, a couch rug, pictures, and a vase of pink carnations, the flower of the club. The gift was a recognition of the work long given by Miss Burdick in preparing reference lists for the club.

*Lexington (Ky.) P. L.* (2d rpt.—year ending April 10, 1901.) Added 960; total 2960. Issued, home use, 53,161 (fact. 85.92%). New registration 1189; total borrowers 4598. Miss Bullitt reviews the library's record during its two years of existence, it being the first free public library ever established in Kentucky. There has been a steady increase in its reference and home use. The cataloging has been completed, and a printed fiction list was brought out in November, 1900, complete to date. The library is open daily from 9 a.m. to 9 p.m. A children's room has just been established, and is nearly ready for opening.

*Library of Congress, Washington, D. C.* The *New York Evening Post* of May 1 contains an interesting letter from its Washington correspondent upon Mr. Putnam's plans for the development of the Library of Congress. The main points touched upon are the functions of the library as a depository of all American publications, and its possibilities as a future center of bibliographical authority and activity in the United States, including the printing of catalog cards for other libraries as well as for itself. "The purpose of the institution may well be summarized under three heads, as follows: (1) That as a national library the Library of Congress will be rendering a national service in helping to co-ordinate the bibliographical work of the various local libraries; and (2) as a federal library it will perform a special service by co-ordinating the various department and bureau libraries in Washington into an organized system, of which it can be the center; and (3) as the national library again it may fitly represent the United States in international schemes of co-operation. Some important plans of this sort—such, for instance, as that of the Royal Society for indexing scientific literature—are already on foot."

*Muscovite (Ia.) P. L.* The cornerstone of the new library building, the gift of P. M. Musser, was laid with formal exercises on May 6. Mrs. Emma L. Mahin had been elected librarian and Robert Baird assistant.

*New Jersey Hist. Soc. L., Newark.* The society is now installed in the building on West Park street, formerly occupied by the Newark Free Public Library, which gives ample accommodations for its collections. The opening exercises were held on the afternoon of May 28. Although established in 1845, the society has not been widely enough known even in New Jersey. Heretofore its rooms were in an office building up three flights of stairs, and it lacked space and equipment for the best administration of its collection. In 1897 a new constitution was formed and the society began its reorganized existence. The necessity for a trained librarian was recognized, and in 1898 Miss Henrietta Palmer, of the New York State Library School, was appointed to the position and carried through

excellent pioneer work, which is appreciated by her successor, Miss Marie F. Wait. The society looks for increased interest in its work through two instrumentalities—its removal to new and adequate quarters, and the establishment of a woman's branch, which has already done most active missionary work. Its collection now contains about 70,000 books, pamphlets, newspapers and manuscripts, many of which are of great scarcity and value. Among them are a large number of books on genealogy, and many valuable manuscripts relating to the early colonial and revolutionary history of the state. The new library building gives ample room for an art gallery, museum and lecture room.

*New York City. Library consolidation. THE LIBRARY CEPHALOPOD: an appreciation.* (Editorial in *Literary Collector*, New York, May, 1901. 2:25-26.)

Discusses the library situation in New York city with reference to the relations between the New York Public Library and the smaller libraries, such as the St. Agnes, the Cathedral, the Y. M. C. A., the University Settlement, etc. These smaller libraries "live in dread of the day when the tentacles of Cephalopod, long stretched in their direction, will close upon them." The advantages of small independent libraries, in their freedom from red tape, personal interest of directors and staff, and homelike influence, are pointed out, and it is urged that "their charm will be destroyed if they become but little wheels in the big machine. The Public Library may inspire respect, admiration, but affection never."

*New York City L.* The City Library in the city hall, mainly devoted to reports and publications on municipal affairs, is to be classified and cataloged on the card system for the first time in its history.

*New York P. L.* At a meeting of the Board of Estimate and Apportionment on May 20 Mayor Van Wyck expressed himself as favoring a larger representation of city officials on the board of trustees of the Public Library. It was thought that this representation should at least include the mayor and the controller as *ex officio* members, and that various elements of the community be included by the appointment of a Catholic representative, a Jewish representative, and representatives of other denominations.

Work has been begun on the plans to establish 65 branch libraries under the \$5,200,000 Carnegie gift, and several conferences on the subject have been held by the library and city authorities. Corporation Counsel Whalen presented a report, showing that there are now in the five boroughs of the city 125 free libraries, nearly all of which receive money from the city. It has been determined not to establish the Carnegie libraries near those now in existence, and that so far as possible the existing free libraries will be induced to

combine with the New York Public Library and the new Carnegie libraries, so as to be all under one comprehensive system.

Dr. John S. Billings, at one of the conferences, explained Mr. Carnegie's idea of establishing the best library system in the world in New York. He said Mr. Carnegie pointed to a map of the city and said that a free library should be established so that no one would have to walk more than a quarter of a mile to get good books free of charge. To accomplish this result Dr. Billings estimated that 40 additional libraries would be necessary in the Boroughs of Manhattan and the Bronx, and the other libraries could be distributed among the other boroughs.

It was settled that existing free libraries which have books of general interest would be invited to combine with the New York Public Library. Corporation Counsel Whalen said he thought there might be some of the libraries whose trustees would not consent to consolidation. In that event it would be possible for the board of estimate to cut down their appropriations, because the institution would not be acting in the public interest by refusing to consolidate and help establish a library system perfect in every detail. He said that, if necessary, more than 65 libraries would be established in order to carry out Mr. Carnegie's comprehensive plan, and that in a few years New York would have 200 free libraries and the best system in the world for the distribution of free books among the people.

The latest exhibition held in the print galleries of the Lenox building proved an unusually interesting one. It was designed to illustrate the history of engraving to the beginning of the 18th century, and included over 300 prints from Mr. J. Pierpont Morgan's private collection, formerly the Irwin collection. Among the earliest prints shown were several nielli, one of them being accompanied by the original silver plate, some German work of the early 16th century, and a few prints in the "manière criblee." Of Dürer's work there were over 90 examples, and other masters represented included Marc Antonio Raimondi, Lucas van Leyden, Schou-gauer, Goltzius, Ostade, Cranach, Callot, Van Meeken, Lorraine, Wierix, Edelinck and Nanteuil. The exhibition was arranged by schools, to facilitate study and comparison.

*New York City. Society L.* (Rpt.—year ending March 31, 1901.) Issued 35,581. Visitors 17,522, of whom 4262 were men. Receipts \$81,476.27; expenses \$80,292.74. Statistics for accessions and totals are not given, though the chief additions and donations for the year are listed.

*New York City. University Club L.* (Rpt.—year ending Feb. 28, 1901.) Added 798; total 18,122. Of the accessions 322 were purchased at a cost of \$1021.57. The more important additions are briefly noted.

"Mr. Lyman H. Bagg, librarian of the club

for 11 years, resigned on May 1, and was succeeded by Mr. W. H. Duacan, Jr., from the staff of the Brooklyn Public Library. Work on reclassifying and recataloging the library was begun on Nov. 21."

*New York City. Y. M. C. A. L.* The librarian's annual report for 1900, recently presented to the trustees, gives the following figures: Total v. available for ref. use 45,000 v. in West 56th street library; 10,000 (ref. use only) East 23d street library. Books added 2296. No. readers (ref. use) 81,368; reference use of books 112,813. Periodicals on file 443; periodicals used 70,023. Regular expenses (appropriation) \$10,500.

Mr. Berry says: "This reference use puts us in the fourth place among the libraries of New York state as indicated by latest published statistics. There are, however, two libraries the reference use of which exceeded ours, but they have not gathered the statistics to show it. This would then fairly put us in sixth place as to reference use."

*Norristown, Pa.* At a meeting of the Norristown school board, held May 3, it was decided to accept the gift of \$50,000 from Mr. Carnegie for a library building. It was decided that the collection of the present Norristown Library Company should be merged into the new institution.

*North Adams, Mass.* A monthly paper, *What to Read*, issues its first number for April, "in the interests of the patrons of the libraries of Northern Berkshire." Besides various short literary articles and notes, it contains short reading lists and library news.

*Oakmont, Pittsburgh, Pa. Carnegie L.* The new Carnegie Library building of Oakmont, in the suburbs of Pittsburgh, was dedicated on the evening of May 17, with appropriate services, which were largely attended.

*Oberlin (O.) College L.* (Rpt.—year ending Aug. 31, 1900.) Added 4002; total 44,705 bound v., 30,422 unbound v. The accessions exceeded those of any previous year, the majority of gifts having been received in response to a circular sent out by the librarian in May, 1900, asking alumni to present to the library their own publications for the establishment of an alumni collection.

During the year the library was open 305 days, the total number of readers being 63,883. For home use 13,291 v. were drawn by 1044 persons. "It is very evident that there is a steadily increasing tendency to use the books in the building rather than at home." A library club was formed by the members of the staff at the beginning of the college year. Weekly evening meetings are held to compare notes, to make reports on topics specially assigned, and to carry on definite courses of study. An apprentice class of young women was also organized, which receives instruction in library methods and gives needed extra help in the routine work. Under the heading "problems to be solved" Mr.

Root touches upon the growing lack of room, the need of more books, and the need of an enlargement of the force.

*Pawtucket (R. I.) P. L.* It is understood that the new library building will be ready for dedication by Jan. 1, 1902. The present building will be vacated by Nov. 1.

*Portland (Me.) P. L.* The librarian's report, presented April 30, gives the following facts: Added 2183; total 49,422. Issued, home use, 98,002; lib. use 15,939. New cards issued 2313; no. cardholders 7073.

The young people's reading room was renovated and additions of 400 v. were made. The librarian, Miss Furbish, recommends the adoption of the two-book system.

*Richmond, Va. Carnegie L.* The ordinance whereby the city accepts \$100,000 from Andrew Carnegie for the erection of a public library building, and pledges \$10,000 a year for its support, was signed on May 9 by Mayor Taylor, and is now a law.

Regarding the library, the Richmond and Manchester *Leader* says: "The success of the Carnegie Library in Richmond will depend in a measure upon the qualification of the man who shall preside over it. It is proposed to put the library in the hands of a non-partisan commission and to keep it out of politics. This is essential to the well-being of the library, and it is to be hoped that the ordinance creating such a commission will be adopted; and it is further hoped than when the commission comes to the selection of a man to be librarian the members will put aside every political and personal consideration and choose the man who is best qualified for the work. It is not enough that such a man be a 'well-read' man. He should also be a man of executive ability, a man of pleasing manners, a man whose very presence is inviting. The success of the library, we say, will depend in a measure upon the work of the librarian, and if a mistake be made in the selection it will be almost a fatal mistake."

*Sleepy Eye, Minn. Dyckman F. L.* The library was formally dedicated on the evening of May 24. The building was erected at a cost of \$10,000 and given to the city by F. H. Dyckman of Orange, N. J., a former resident of Sleepy Eye, and so the nucleus of books contained in the old local library a purchase fund of \$1500 was added by public subscription. The building is 20 x 46 feet, located in the center of a quarter block of five lots; the interior finish is quartered oak and birds-eye maple, with partitions of leaded cathedral glass, and it is fitted with electric lights and thoroughly equipped for its purpose.

*Somerville (Mass.) P. L.* (28th rpt., 1900.) Added 5249; total 48,072. Issued 270,133, being a gain of 25 per cent. over the previous year. Attendance in ref. dept. 25,907. Receipts \$13,787.02; expenses \$13,744.10.

This is an interesting report, although meagre in statistics, no record of borrowers,

separate home and library use, etc., being included. Percentages of circulation are not given. The year is regarded as having begun a new epoch in the history of the library, "an epoch of growth and of wider development in all departments." A valuable innovation is the school department started early in October, with the object of bringing about closer co-operation between the library and the schools. Through it 112 special libraries have been sent to 112 different school rooms. "We have also delivered in boxes to the different schools 5624 v. Our entire circulation through the school libraries has been 58,520, of which 32,480 have been fiction." Mr. Foss adds:

"I am more and more convinced that it is through the schools that the library can find a field for its greatest usefulness. In the schools it finds all the machinery of distribution prepared ready to its hand, and when, as in Somerville, the school authorities are so willing to co-operate with the library, a great work can be done. Our system of special libraries in the schools should be developed to a higher degree of efficiency. The children who live in distant parts of the city, especially in the winter season, find it impracticable to come to the central library; and if our special libraries in the schools were large enough the schools would practically be distributing centers for the library."

The children's department has grown rapidly in popularity, the removal of the age limit having been announced in all the city schools, where application blanks were supplied to the children. A generous special appropriation for books for this department is urged.

It is pointed out that the present circulation averages less than five books apiece per capita of population, and "unless the library can do something to change this condition of affairs it is not living up to the standard of its possibilities." As a means to this end a system of home delivery by special carrier is suggested. Mr. Foss makes various suggestions toward popularizing the library, urging increased purchases, especially of popular books and current novels, the adoption of free access and consequent completion of the present unfinished wing of the building, and the establishment of numerous small well-equipped reading rooms. In conclusion he says: "In the early days of the public library its first and greatest commandment was, 'Get books.' That day has passed; and to-day the great commandment is, 'Get the books to the people.' That should be the objective point of our campaigns of the future. It is not enough that a few families should come into the library; the library itself should knock at the door of every family. It is not beyond the possibilities of a community that supplies water to all the homes that pay for it to furnish books, likewise, under the same condition."

*Somerville (Mass.) P. L.* A system of house-to-house delivery is contemplated, provided sufficient encouragement for the scheme

is received. In a circular outlining the plan Mr. Foss says: "For the sum of two cents — the usual price paid for a morning paper — any resident of Somerville, if this system is established, can have a library book delivered to his door. A carrier will call at stated times to collect the library cards of the people and return the same day with the library books. The money received from these fees will go to the carrier to remunerate him for his service. The carrier will be a responsible man, selected by the library trustees." The plan will at first be confined to a single section, but if successful will be extended throughout the city.

*Springfield (Mass.) City L.* The *Springfield Republican* for May 31 says: "The home delivery system adopted by the city library has been in operation five weeks, and it seems to have given satisfaction to all those who subscribed to it. For so small a period this charge of five cents a week has not been found quite sufficient to cover expenses. The library, has considered the advisability of extending the system to all parts of the city next October. If it does so the charge will probably be not over six cents per week for long periods, say 36 continuous weeks; and perhaps seven or eight cents for a shorter period like eight or 16 weeks. Persons going away for the summer can take books from the library, and under certain reasonable restrictions several different books, to keep with them during the vacation. Children will be allowed to take during the summer vacation, and to keep the same for eight weeks, if desired, one book of fiction and one additional book from the classified list."

*Syracuse (N. Y.) University.* The university includes in its curriculum a course in library economy, conducted by Dr. Sibley, the librarian, and Mrs. Sibley. It covers two years, and an education equivalent to that given in high school is required. "As proficiency can be attained only by experience, 100 hours of practical work in the university library are required of each student in the second semester of the junior year, and 250 hours of such work in the senior year. Arrangements have been made by which senior classes may work in the Public Library of Syracuse a portion of the second semester, and thus become acquainted with the operations of a public library. On the topics of the scheduled work and on related subjects lectures will be given, and a course of collateral reading assigned. A complete author or subject bibliography or a written discussion in not less than 5000 words of some library problem must be presented before June 1."

*Weymouth, Mass. Tufts L.* (22d rpt., 1900). Added 538; total 20,651. Issued, home use, 55,795 (fict. 69.3%), of which 25,545 were issued through the eight agencies, including Fogg Memorial Library and the high

school. 4315 v. were loaned on 72 teachers' special cards. New registration 341; total borrowers 3802.

Five photograph exhibitions were held during the year through the Library Art Club.

*Wheeling (W. Va.) P. L.* The annual report of the librarian, submitted to the board May 16, gives the following facts: Added 986. New cards issued 435; cards in use 7150. Books used in reading room 13,836, an increase of 18 over the year preceding.

No action has yet been taken regarding the \$75,000 Carnegie library building, as it is desired to wait for more definite authorization from Mr. Carnegie.

*Wilkes-Barre, Pa. Osterhont F. L.* (12th rpt.; in *Library News-Letter*, May.) Added 1545; total 29,182. Issued, home use, 75,326 (fict. 68.94%; gen. periodicals 6.02%). New registration 1502; total registration 6816.

A delivery station has been established in a mission Sunday-school, on request of the school superintendent, and about 100 volumes have been sent there every two weeks. Miss James says: "We have found by our former experience that it is of little use to establish stations where not asked for by the residents themselves, but if a real desire should be expressed in any neighborhood, and responsible persons would care for the safe delivery and return of the books, the library would be only too glad to establish additional stations."

The Newark charging system was installed in July.

*Wilmington, Del. Federation of Women's Clubs.* An address on "Permanent libraries in small communities" was delivered by G. F. Bowerman, of the Wilmington Institute Free Library, before the annual meeting of the State Federation of Women's Clubs on May 24. It was mainly an urgent plea for the development of public libraries in Delaware, toward which the aid of the women's clubs was to be more fully enlisted. He referred to the establishment of a state library commission, and to the excellent results that might be expected from its work, and he advocated efforts to induce municipalities to avail themselves of the new library law and establish libraries supported by local taxation.

*Wilmington (Del.) Institute F. L.* (7th rpt.—year ending Feb. 28, 1901.) Added 4512; total 41,591 (of which 2358 form the permanent collection of the Rockford branch). Issued 188,389 (from Rockford branch 5774), of which fiction was 51.8% and juvenile books 33.4%. Cards issued 5403; total registration 22,748; cards in force 11,042. Receipts \$15,955.62; expenses \$13,885.28.

The report is the first submitted by the recently-appointed librarian, G. F. Bowerman, the period covered having closed before his appointment. It is, therefore, mainly a brief review of existing conditions. For rounding out the collection it is recommended that additions be made to the reference books, to the

"Poole sets" of periodicals, and to the educational and technical sections. During the year 1177 v. were sent out to 24 public schools, for use by children in the school rooms. It is suggested that if possible such collections should be changed once during the school year. Plans for a children's department—later carried into effect—are outlined.

#### FOREIGN.

*Bodleian L., Oxford.* (Rpt., 1900.) Additions for the year amounted to 65,300 items, being the second highest total on record. The chief accession, given by the Egypt Exploration Fund, consisted of 38 papyri "most of which have been published or described by Drs. Grenfell and Hunt in their 'Oxyrhynchus papi.'" There was acquired by purchase an important collection of 34 Sanskrit mss. on palm leaves, dating from the 11th to the 16th century, the earlier ones being "of quite abnormal rarity." The work of the year in cataloging the various collections is briefly reviewed.

*British Museum L.* The British Museum will come to the end of its storage room with the close of the present year. As there is no hope of obtaining enough money from the treasury for the extension of its London buildings—one treasury official is said to have suggested the stoppage of all fresh books, under the act of the abatement of nuisances—some of the Museum officials propose the building of a storehouse for the books long unused in a dry part of the country where land is cheap. All books shunted there would be marked in the catalog with "a big, big D," and would only be accessible after 24 hours' notice, being sent up daily from the mortuary and returned thither when done with. Both the University Library at Cambridge and the Bodleian are sadly in need of some such relief, for there is no room for the due enlargement of their present buildings.—*Athenaeum, May 4.*

*Florence, Italy. Biblioteca Nazionale Centrale.* In the *Bolletino delle pubblicazioni italiane* for April, 1901, are given the statistics for 1900, from which it appears that 49,342 printed works and 5643 manuscripts were consulted by 43,647 readers during that year. Extensive circulation in the city and loans to other libraries are also noted. The accessions were (1) from copyright books 4836 vols. and 15,141 pamphlets, (2) gifts, 1143 vols., 3403 pamphlets, 30 manuscripts (4) international exchange, 141 titles, (6) purchase, 902 vols. and 3329 pamphlets, a total of 6939 vols. and 21,956 pamphlets, together with 131 manuscripts and 600 prints.

Progress on the catalog and inventory (shelf-list) is noted. We learn from the same bulletin that a new building for this library is to be erected, and that a commission has been appointed to outline the architectural features of the new plans.

*Glasgow, Scotl.* On May 15 it was announced that Andrew Carnegie had offered to give £100,000 to establish branch public libraries through the city of Glasgow. This was followed, on May 20, by an offer from Mr. Carnegie to give £2,000,000 to establish free education in the four Scotch universities—Glasgow, Edinburgh, Aberdeen, and St. Andrews.

#### Gifts and Bequests.

*American Institute of Electrical Engineers' L. New York.* The Latimer Clark collection of electrical works, containing over 6000 volumes, has become the property of the American Institute through the generosity of Dr. Schuyler S. Wheeler. It is stated that Andrew Carnegie will provide funds to make the collection available for public use. The library is described in the *Electrical World*, May 25, and *Electrical Review*, May 25.

*Beaver, Pa.* The offer of \$50,000 for a library building made by Andrew Carnegie a year ago was never accepted, as it was found that the yearly maintenance fund of \$2500 would be more than the one-mill tax allowed by law would give. Mr. Carnegie has recently offered, instead of his original proposition, to give for the building ten times as much as can be raised by taxation to maintain the library. It is hoped to secure a yearly tax levy of \$1500.

*Brown University L. Providence, R. I.* It is announced that the trustees of the John Carter Brown Library, acting under the provisions of the will of the late John Nicholas Brown, have decided to give the library, with its \$650,000 of endowment, to Brown University. The formal offer will be made to the corporation of the university on June 20. Mr. Brown had planned to erect a suitable library building for his famous collection, and although his death, somewhat over a year ago, temporarily interfered with this project, he created in his will a trust to which he bequeathed the library, together with \$500,000, for endowment and \$150,000 more for a new building.

According to the present arrangement the library itself and the funds will become a part of the equipment of Brown University. The plan is to put up the building as Mr. Brown had originally intended, and use the \$500,000 to maintain the library as a special institution with a special librarian. The fund which accompanies the gift amounts to \$650,000. The library itself has been roughly appraised at \$500,000. This sum is probably below the real value, for many of the items are unique, or are duplicated only in collections, like those of the British Museum, which will not sell their treasures.

*Evanston (Ill.) P. L.* A gift of \$5000 has been made by William Deering, of Evanston, to the library site fund, bringing the amount subscribed to \$10,000.

*Grossdale, Ill.* It was announced on May 25 that Andrew Carnegie had consented to give \$35,000 for a public library building for Grossdale. A site has been selected and a book purchase fund will be raised by subscription.

*Homer, N. Y.* George W. Phillips, executive of the Homer National Bank, has announced his intention of giving a \$10,000 library building to the village. He has already purchased a central site for the purpose. Equipment and maintenance must be provided by the village authorities, and the library is to be known by the donor's name.

### Librarians.\*

**BOWERMAN-GRAHAM.** George F. Bowerman, librarian of the Wilmington (Del.) Institute Free Library, was on June 13 married to Miss Sarah Newcomb Graham, of Albany, N. Y.

**COOLEY,** Miss Genevieve S., who was assistant in the Forbes Library, Northampton, Mass., for a year and a half in 1898-1900, and since then has been in the Denver Public Library, has an appointment in the Library of Congress.

**DENIO,** Miss Lilian, formerly librarian of the Bryson Library, died in Albion, N. Y., on June 1. Miss Denio was a graduate of the first class of the New York State Library School. After finishing her work in the school Miss Denio spent a year recataloging the books in the Grand Rapids (Mich.) Public library. She then accepted the position of librarian in the Bryson Library of Teachers College, and under her energetic administration this library became a model one of its kind. In March, 1896, a few months after the Bryson Library was moved to its new home on Morningside Heights, Miss Denio was obliged to resign on account of ill health, and was never again able to resume her work. Miss Denio's gentle manner, her unflinching patience, her helpfulness toward those with whom she came in contact gained for her many warm friends, and those who knew her well and realized the suffering her physical condition caused could not but admire and marvel at the indomitable will which enabled her under such adverse circumstances to accomplish so much good work.

**DOWLING,** Mrs. Katherine J., on the 4th of April celebrated her 20th anniversary as librarian of the Central Library, Rochester, N. Y.

**GALE.** Miss Adelaide Calder, for many years assistant at the Providence (R. I.) Public Library, died at her home in Providence, on May 13.

**GREEN,** Charles A., librarian of the Brooklyn (N. Y.) Polytechnic Institute, has arranged to give his vacation time, while the library of the Polytechnic Institute is closed,

\* Notes regarding library appointments are also given elsewhere under the heading Library schools and training classes.

to the service of the Brooklyn Library, where he will have charge of the ordering department and other divisions needing special attention, pending the election of a librarian, as to which no decision has been made.

**HILDEBURN,** Charles Swift Riché, well known for his historical and bibliographical work, died suddenly of heart disease in Bologna, Italy, on May 12. Mr. Hildeburn was born in Philadelphia, Aug. 14, 1855, and was in 1876 appointed librarian of the Philadelphia Athenæum, from which position he retired about five years ago. Recently he had lived in Italy. He was editor of "The Provincial laws of Pennsylvania" and "The Statutes at large of Pennsylvania," and among his best-known works were "Issues of the press in Pennsylvania," and "Sketches of printers and printing in Colonial New York."

**MACLEAN,** Dr. J. P., has resigned his position as librarian of Western Reserve Historical Society, Cleveland, O.

**MCCNEIL,** Miss Annie, librarian of the Milwaukee Normal School, has resigned her position to become librarian of the Wisconsin State Department of Education. She has been succeeded by Miss Delia Ovitiz.

**MATSON,** Rev. Henry, librarian of Oberlin College from 1874 to 1877, died at his home in Oberlin on May 22. Dr. Matson was born in Ellsworth, O., on June 23, 1829, and was a graduate of Oberlin, class of 1861. He received the degree of A.M. in 1879. He was author of "Knowledge and culture," "Helps for literary workers," and other books.

**POST,** Martin M., has been appointed librarian of Hamilton College, Clinton, N. Y., succeeding Melvin G. Dodge, resigned.

**PUTNAM,** Miss Beatrice, was on May 11 elected librarian of the Uxbridge (Mass.) Public Library.

**SAXE,** Miss Mary S., daughter of John Godfrey Saxe, who has been assistant at the Forbes Library, Northampton, since last September, has been chosen librarian of the pretty Westmount Library, in the Westmount park, Westmount, Montreal.

**TRIPP,** George H., principal of one of the public schools of New Bedford, Mass., was on May 31 elected librarian of the New Bedford (Mass.) Public Library, succeeding the late Robert C. Ingraham, at a salary of \$2250 per year.

**TYACKE,** Miss Margaret, a graduate of Boston University, an apprentice during the past year at the Medford Public Library, and who has given special study to the Cutter Expansive classification under Miss Abby L. Sargent, has accepted the position to classify and catalog the new Carnegie Library at Fort Worth, Texas.

**WATSON-BARNES.** Miss Elizabeth L. Barnes, assistant in the Carnegie Library, Pittsburgh, Pa., was on June 1 married to William Richard Watson, assistant librarian of that library.

## Cataloging and Classification.

The ASOCIACION DE LA LIBRERIA, a Spanish booksellers' association, established at Madrid in March, has undertaken the publication of a bibliographical record, *Bibliografía Español*, which appears on the first and 16th of every month. It is in a measure modelled upon the bulletin of the French Cercle Français de la Librairie, and contains three divisions—a bibliography of new publications, with full titles and data as to size, paging, publisher, date and price; a "cronica" of news and notes; and an advertising section, making in all 40 octavo pages. The subscription price for the United States is \$3. Lemcke & Buechner, New York, announce their readiness to receive American subscriptions for this new bibliographical publication.

BIBLIOTHEQUE NATIONALE. Catalogue général des livres imprimés de la Bibliothèque Nationale. Auteurs. Tome v: Aubry-Azzoni. Paris, Imprimerie nationale, 1900 [1901.] 2 l. 1040 col. 8°.

Dates of sheet printing: Octobre-décembre, 1900. The record of St. Augustin fills cols. 374-468, with an index of five columns.

BROOKLINE (*Mass.*) P. L. A list of photographs of paintings. Brookline, May, 1901. 32 p. D.

The collection cataloged numbers about 1000 photographs, purchased and mounted from funds subscribed for the purpose by interested citizens. The list is arranged alphabetically by artists, under broad divisions of national schools.

CINCINNATI (*O.*) P. L. Annual list of books added, 1900: being quarterly bulletins, nos. 143-146. Cincinnati, 1901. 8+88 p. l. O.

An amalgamation of the several quarterly bulletins into one classed list, prefaced by a full table of contents.

COTGREAVE, A. Contents subject-index to general and periodical literature. London, Elliott Stock, 1901. 8°. 13s. 6d.

CUTTER, C: A. Arts of communication by language. n. p., [1900.] 143 p. and 6 inserted p. O. \$1.25.

This is part of the Expansive classification, but can be obtained separately of C: A. Cutter, Forbes Library, Northampton, Mass. It includes Language (with a new notation for languages of which a full list is given), Literature (with a new list of the branches or forms of literature), and the Book arts, that is, all the arts that go to the making, distribution, storage, and description of the book.

LIBRARY OF CONGRESS, *Division of Bibliography*. A list of books (with references to periodicals) on Porto Rico; by A. P. C. Griffin, Chief of Division of Bibliography. Washington, Gov. Print. Office, 1901. 56 p. O.

—A list of books (with references to periodicals) on the Danish West Indies; by A. P. C. Griffin, Chief of Division of Bibliography. Washington, Gov. Print. Office, 1901. 18 p. O.

The LOWELL (*Mass.*) CITY L. *Bulletin* for April is devoted to Reference list 16, on Decoration and design, well selected and annotated.

MICHIGAN, STATE BOARD OF LIBRARY COMMISSIONERS. Catalogue of books suitable for a popular library. Lansing, 1901. 4+206 p. O.

A D. C. classed list, giving publisher price, date, etc. It is annotated throughout, but much of the annotation work is extremely inadequate and superficial—an example being the note on McCook's "Old farm fairies," which, instead of indicating that the book tells of spiders and other insects in fairy-story fashion, says only: "The book is full of bright conceits and is capitally written." The annotations in fiction are especially unsatisfactory.

The N. Y. PUBLIC LIBRARY *Bulletin* for May continues its bibliographical record of material relating to New York City by lists of "Almanacks of New York City," "Directories of New York City," and "Works on the churches of New York City."

NOTTINGHAM (*Eng.*) F. L. Ls. Reference library class list, no. 11: Works in foreign languages, with a list of foreign periodicals. May, 1901. 40 p. O.

PRINCETON UNIVERSITY L. Location of books in the Library of Princeton University. Princeton, N. Y., 1901. 32 p. D.

A well made little pamphlet, extremely interesting in its exposition of the general characteristics of the Princeton library classification. It is intended as a "condensed guide to the shelves for professors and students, answering the few questions which are oftenest raised." A summary of the general and special collections of the library precedes the abstract of the classification, and there follow a series of concise and lucid "explanations" of its special points. Of the classification the 10 main classes (General works, Historical sciences, Language and literature, Modern languages and literature, Arts, Theology, Philosophy and education, Sociology, Natural sciences, Technology) are given, with

the leading sub-classes in each. Dr. Richardson states that the complete classification, "which contains some 10,000 subdivisions, will possibly be published in full later."

SALEM (*Mass.*) P. L. Bulletin, vol. 5: May, 1899, to April, 1901; with an index to the first five volumes. Salem, 1901. 4+166 p. O.

The SALEM (*Mass.*) P. L. Bulletin for May devotes its special reading list to Boston, covering 5½ pages.

U. S. DEPARTMENT OF AGRICULTURE LIBRARY.

Accessions to the department library, January-March, 1901. 30 p. [printed on one side] O.

WISCONSIN F. L. COMMISSION, *Madison*.

Bulletin, no. 4: new book list and library notes. April 20, 1901. 32 p. O.

Contains excellent miscellany, purchase lists of new books, reports from Wisconsin libraries, A. L. A. announcements, etc.

WISCONSIN. List of books for township libraries of the state; issued by the state superintendent. May, 1901. Madison, Wis. 162 p. O.

Like its predecessors, this list will be useful and suggestive in small libraries and in the selection of schoolroom collections. It is classed by grade and by subjects, and annotated.

### Bibliography.

ALCAEUS. Easby-Smith, James S. The songs of Alcaeus: memoir and text with literal and verse translations and notes. Washington, D. C., W. H. Lowdermilk & Co., 1901. 15+147 p. 12°, net, \$2.

Contains a three-page bibliography.

BIBLE, *New Testament*. Votaw, Clyde Weber, and Bradley, Charles F., *comps.* Books for New Testament study: popular and professional; recommended by the council of seventy. Chicago, University of Chicago Press, 1900. 79 p. 8°, 75 c.

Printed on one side of leaf only. The list is classified.

CHINA. University of the State of New York. N. Y., State Library, Bulletin 59, March, 1901. Bibliography 25: China and the Far East, 1889-99; contribution toward a bibliography, submitted for graduation by Margaret Windeyer, N. Y. State Library School, class of 1899. 563-679 p. O.

A classed list, with the useful feature—generally adopted in these bibliographies—

of call numbers for books in the state library or indication of other libraries containing the works noted. Annotations are sparingly given. There is a selection of "illustrative fiction." The full index covers 29 pages.

CHRISTIAN EVIDENCES. Ballard, Frank. The miracles of unbelief. Edinburgh, T. & T. Clark, 1900. 13+362 p. 8°.

There is an appendix of six pages giving a classified list of useful books from the Christian standpoint.

CODICES GRAECI ET LATINE photographice depicti. vol. 6: Homeri Ilias, Codex Venetus A. Leyden, A. W. Sijthoff, 1900. £15.5.0.

The present volume is perhaps the most valuable and desirable of the entire series. The Latin preface is by Prof. Comparetti, and worthy of the renown of that distinguished statesman and scholar. The plates are fine specimens of photo-lithography, while the cost is moderate considering the expense of publication. The codex is so famous and so beautiful that libraries will do well to purchase this volume, if they must make a selection from the series. The work should be of assistance to students of palaeography and to college classes in the Epic dialect.

W. W. B.

FERGUSON, J. Some aspects of bibliography.

Edinburgh, G. P. Johnston, 1901. 8°, 5s.

The presidential address to the Edinburgh Bibliographical Society. Mainly an exhortation to bibliographers in general and to Scottish bibliographers in particular, based on the quantity of bibliographical work waiting to be done and the need for enthusiasts to take it up. The rapid survey of the field of bibliography, showing how wide it is, how various its soil, and how much of it is uncultivated, especially as to Scottish booklore, is apposite and instructive. Some lists of bibliographical works in an appendix are avowedly only hastily compiled in order to show the variety of work which has been done in some directions and may be imitated in others.—*Athenaeum*, May 11.

The *Index and Review* is a new monthly devoted to the bibliographical record of government publications, of which the first number has appeared, dated March, listing all public documents printed during that month. The list is modelled somewhat upon the similar monthly catalog issued by the late J. H. Hickcox, and is intended to supply the demand for a register of government documents that cannot be fully met by the limited edition of the official "Monthly catalogue" issued by the Superintendent of Documents. The list is classed under government departments and sub-arranged alphabetically. It is published by W. J. Young and Cullom H. Ferrell, Washington Loan and Trust Building, Washington, D. C., at \$1 per year.

**LATIN MONETARY UNION.** Willis, Henry Parker. A history of the Latin monetary union: a study of international monetary action. (Economic studies of the University of Chicago, no. 5.) Chicago, University of Chicago Press, 1901. 9+332 p. 8°, \$2. Contains a 6-page bibliography.

**MAZZELLI, Virginio.** Il libro, la biblioteca, il bibliotecario: conferenza. Reggio Emilia, S. Bondavalli, 1901. 40 p. 8°.

**MINERALS.** The Report of the U. S. National Museum for the year ending June 30, 1899. (in Rpt. Smithsonian Institution, Washington, Gov. Print. Office, 1901) contains a score of short bibliographies upon various minerals. The list is as follows: Apatite, p. 380; asbestos, p. 306; bauxite, p. 238; chromite, p. 251; clays, p. 352; coal, p. 428; cobalt, p. 189; corundum, p. 227; cryolite, p. 238; diamond, p. 167; emery, p. 227; graphite, p. 173; limestone, p. 269; monazite, p. 387; nitrates, p. 396; ocher, p. 245; orpiment, p. 184; pyrites, p. 193; realgar, p. 184; scheelite, p. 356; sulphur, p. 181.

**MUHLBRECHT, Otto.** Wegweiser durch die neuere litteratur des rechts- und staatswissenschaften. Band 2: Enthaltend die litteratur der jahre 1893-1900, nebst nachträgen und erganzenzen zu band 1 (die litteratur bis 1892). Berlin, Puttkammer & Mulbrecht, 1901. 16+651 p. O. 28 m.

The first volume went on record in the February issue of the L. J., 1893. This second volume covers to the end of the century, including some supplementary matter for the first volume. Its method of arrangement is the same, by subject and locality, the latter very important. The volume begins with a general classification of the law literature of Germany, Austria, Switzerland, France, Belgium, England, North America, Italy, Spain, the Netherlands, Denmark, Sweden and Norway, dividing the material under 36 headings. The alphabetical index fills 123 pages and gives about 26,000 entries. The volumes are made with a view to the needs of scholars, but also are fitted to the wants of libraries and booksellers. The titles are priced wherever possible, but no important book has been omitted because the price could not be obtained.

**NIETZSCHE, Friedrich.** Dolson, Grace Neal. The philosophy of Friedrich Nietzsche. (Cornell studies in philosophy, no. 3.) New York, The Macmillan Co., 1901. 7+110 p. 8°, net, 75 c.

Contains a 7-page bibliography—2 pages for Nietzsche's works and 5 for commentaries.

**STAR CHAMBER.** Scofield, Cora L. A study of the court of Star chamber: largely

based on manuscripts in the British Museum and the Public Record Office. Chicago: University of Chicago Press, 1900. 30+82 p. 8°.

Contains an interesting bibliography of 20 pages.

#### INDEXES.

*The Engineering Magazine* for April announces the publication, in commemoration of its 10th anniversary (1901), of "a complete descriptive index to the world-wide range of current engineering literature during the five closing years of the 19th century." It is hoped that this index may be published before the close of the summer. The index work upon which this general index volume is based is a useful monthly feature of the *Engineering Magazine*. It includes references to about 150 engineering and technical periodicals, regularly received and reviewed. The publishers announce that they will be prepared "to supply—usually by return of post—the full text of every article indexed, in the original language"; the cost, which is regulated by the cost of a single copy of the journal in question, being indicated by a code of letters affixed to the index entry. The monthly index entries are also issued separately, printed on one side of the page, and in form and type are suitable for clipping and pasting for card index purposes.

#### Anonyms and Pseudonyms.

Margaret Allston, pseud. of Anna Farquhar (Mrs. Ralph Bergengren), "Her Boston experiences," pub. by L. C. Page & Co.

"A subaltern's letters to his wife" (Longmans, Green & Co.) is announced by W. L. Alden in the *N. Y. Times Saturday Review* as by Reginald Rankin.

The following are supplied by Catalogue Division, Library of Congress.

Birdseye, Clarence F., is compiler of "Supplementary index to the session laws of the state of New York."

Dau, William Henry Theodore, is the editor of "I am the resurrection and the life; a book of funeral sermons."

Forsslund, M. Louise, is a pseud. for Foster, Mary Louise. "The story of Sarah."

Hawser, A. B., master, is a pseud. for Muller, Julius W. "Starboard lights: salt water tales."

Law, Hiram S., pseud. of Walsh, Mary Catherine Frances. "While hopes were kindling."

McHugh, Hugh, pseud. for Hobart, George V. "John Henry."

Vars, Michon de, pseud. for Brown, Arthur Wellington. "In re Molineux versus a current Cagliostro."

William Tucker Washburn is the author of "The deuce of hearts."

Webb, Virginia, is a pseud. for Rhodes, Hattie H. "One American girl."

# THE AMERICAN NEWS COMPANY

## BOOK DEPARTMENT

ON account of a large increase in the volume of business which we are now doing with the libraries of the country we have decided to establish a special LIBRARY DEPARTMENT in order to make our services more efficient. We invite you to take advantage of our facilities.

We have the largest miscellaneous book stock in the United States, embracing the publications of the various publishers, and assure you that our facilities for the proper handling of our correspondent's orders are of the best. We promise you the most careful attention and prompt dispatch on all business entrusted to us.

Would be pleased to receive from you a list of books on which you desire quotations, and, when possible, will be pleased to have you visit us and make use of the facilities of our store and library department in making a selection of books.

Very truly,

THE AMERICAN NEWS COMPANY,  
39-41 CHAMBERS STREET, NEW YORK.

BENJAMIN FRANKLIN STEVENS.

HENRY JOHN BROWN.

**B. F. STEVENS & BROWN,**  
 American Library and Literary Agents,  
 4 TRAFALGAR SQUARE, CHARING CROSS, LONDON.

**T**HIS Agency was established in 1864 for supplying American Public Libraries, Institutions, and Book Collectors, with English and Continental Books, Manuscripts, Drawings, Philosophical Apparatus, etc., at the lowest London prices.

Special attention is paid to the selection and purchase of rare old books and manuscripts. Auction sales are carefully watched and good knowledge kept of the stocks of the old Booksellers of Europe.

Lists of Desiderata have the best attention and Librarians are respectfully requested to test the value of the Agency by sending trial orders on by submitting lists for Estimates for goods to be delivered, either free in London or New York, as desired.

Auction Catalogues when printed in advance and Catalogues issued by Publishers and Second-hand Booksellers are mailed to Customers when desired.

Large shipments are sent by cheapest and quickest route, or as ordered. Small shipments are made weekly through our New York Agency, at a minimum of expense and trouble to purchasers, or single books are sent by mail on receipt of order.

Special attention is given to Bindings in all styles.

Periodicals are supplied either direct by mail from London or by mail from New York Agency at lowest rates for prompt and efficient service. Send for Lists.

Payments may be made either direct to London or in U. S. Currency through our New York Agency.

*Just Ready. 100 Copies Printed for Subscribers Only.*

**B. F. STEVENS'S**

**Facsimile of the Unpublished British Headquarters Coloured  
 Manuscript Map of New York and Environs  
 (1782)**

Reproduced from the Original Drawing in the War Office, London.  
 24 sheets. Scale, 6½ inches to a mile. 10 feet by 4 feet. . . . .

The successive British Commanders-in-Chief in America, Generals Sir William Howe, Sir Henry Clinton, and Sir Guy Carleton, during their respective occupations of New York and Environs in the Revolution, caused this manuscript plan from time to time to be kept up.

The plan extends from below Guanas Bay to the Heights of Spikendevil, a distance of about eighteen or nineteen miles. It shows the Fortifications, Defences, Topography, Streets, Roads, etc., of the whole of the Island of New York with the Harbor, Islands, Water Ways, and River Frontages on the Hudson and East Rivers, the Military Works on Long Island including Brooklyn, the Works in Paulus Hook and parts of the Jersey Shore. It has a copious Table of References to various works (British and American), some of them with notes as to the time of their construction or destruction.

The Original Drawing, ten feet by four feet, is on a scale of about six and a half inches to a mile. It is handsomely reproduced for subscribers only, in careful facsimile on 24 sheets which can be joined up and mounted like the original as a Wall Map or mounted on linen if desired. It will be issued either mounted on linen to fold in book form with leather (slip) case, 13 x 10 inches, or the 24 sheets (22 x 15 inches each), will be supplied in a portfolio.

No more than 100 copies have been printed and the engravings were erased as each sheet was printed off.

A few extra copies of sheet 8 have been printed so that it can be sent as a specimen on application from intending subscribers.

**Prices to Subscribers**

- Mounted on linen to fold in book form with leather (slip) case. . . \$30 net.
- Unmounted, on 24 sheets in portfolio. . . . . \$25 net.

The above prices include delivery to any Public Library or Institute in the United States or Canada, but private subscribers must also pay the duty.

**B. F. STEVENS & BROWN, 4 Trafalgar Square, Charing Cross, London, W. C.**

AND

BOOKBINDER { Duro-Flexile,  
Vellucent,  
Reliure de Luxe.

---

*“Buy Your Popular Books and Your Costly Books  
in Duro-Flexile Binding.”*

I OBTAIN books from the publishers in sheets and bind them “ONCE FOR ALL.” This binding lasts longer than the leaves of the book, and the leaves of the book are preserved and their life immeasurably lengthened by this binding. Librarians cannot persuade publishers to print special editions for them, but I supply books specially bound for them.

If the paper is bad I sew and forward the book so that the leaves are subject to no strain and are indeed strengthened in the folds. If the paper is very stout I sew the book and forward it in a special manner adapted to the thickness of the paper, in other words I adapt Duro-Flexile binding to both good and bad paper with the results that the utmost service and the longest possible life are obtained for both.

No binding in the world is adapted to the varied qualities of the paper as is Duro-Flexile.

The service obtained from a book of bad paper when supplied bound in this way will surprise you.

A papier maché box and a steel safe are not hinged in the same way. Thin tough paper and thick spongy paper also require very different treatment, and with Duro-Flexile they get it.

**TIGHT BACKS** are used for books of a thickness and quality of paper best suited for such treatment.

**LOOSE BACKS** are given where such are better suited.

My bookbinding is in short adapted in its every detail, both of material and method, to the requirements of a Public Library Book.

500 Public Librarians in all parts of the English speaking world buy these books.

## POPULAR BOOKS AND COSTLY BOOKS

bought of me, bound from the quires, give 50% more service.

# Prices and Promptness

are matters of vital importance in the relations between Librarian and Bookseller, but there is another thing which the Librarian wants, and that is a bookstore where he can be reasonably sure of getting *any book* that he is hunting for. We thoroughly satisfy our Library customers on the question of prices and promptness, and our stock is so large and our facilities for obtaining rare books so great, that there is no vexatious delay in filling *any order*. Some of our stock—by no means all—is listed in the following catalogues which we publish, and which we shall be very happy to send to Librarians.

1. Illustrated Catalogue of Standard and Holiday Books of more than 1000 pages, with index to authors and titles.
  2. Descriptive List of the Publications of A. C. McClurg & Co.
  3. Monthly Bulletin of New American and Foreign Publications received by us.
  4. Selected List of Books suitable for School Libraries.
  5. Catalogue of Imported second-hand Books, including fine copies of the best editions, also rare books.
- Of particular interest to Librarians is a catalogue which we are now preparing, viz.:
6. A Classified Catalogue of 3500 Volumes suitable for a Public Library.

## THE LIBRARY DEPARTMENT

A. C. McCLURG & CO., 215-221 Wabash Avenue  
CHICAGO

# LIBRARIES.

WE ask the attention of Librarians and Library Boards to the facilities possessed by our house for supplying libraries.

For more than half a century we have made a specialty of library business, and the experience of our Library Department has been wide and varied.

The business is under the immediate supervision of one of the principals of the house, who has had thirty years' experience.

Our extensive retail stock makes it practicable for persons selecting books for libraries to examine at their leisure in our retail store, the books themselves, instead of depending upon the very unsatisfactory method of picking out titles from catalogues.

We carry a considerable stock of the best second-hand books bought at favorable prices and are constantly receiving additions.

We have direct relation with all publishers, and buy at the lowest prices. Through our Branch House in London (where we conduct a general publishing and bookselling business) we supply promptly and import free of duty English books without the commission paid by other American dealers.

With many of our library customers we have arrangements by which at stated intervals we forward on approval consignments of new books. After examination and selection, those volumes not wanted are returned.

We are always ready to give our customers the full benefit of our advice and experience, in answering questions, literary and bibliographical. We are glad to assist them in making selections for purchase, and, when desired, will take entire charge of making up lists for the initial purchase of new libraries, or for additions to established institutions.

Correspondence solicited.

## G. P. PUTNAM'S SONS,

LIBRARY DEPARTMENT,

27 and 29 West 23d Street, New York,  
and 24 Bedford Street, Strand, London.

# HENRY MALKAN.

## Library Department.

We carry a stock that is probably the best assorted and most evenly divided of any in this country. While carrying the Popular Fiction of the day in Large Lots—as many as a Thousand Copies of One Title—we carry all the New Books of intrinsic worth. Buying in these large quantities enables us to sell lower than any of our competitors. Send in a List for Quotation and be convinced.

HENRY MALKAN,

No. 1 William and 67 Stone Streets, - New York.

# Now Ready

## THE

# American Catalogue

## 1895-1900

THE present volume of the American Catalogue covers books recorded from July 1, 1895, to January 1, 1900, including books with the imprint 1900 issued within 1899, and also books of 1899 recorded after January 1, 1900. The first alphabet contains 559 pages, as compared with 498 pages in the 1890-1895 volume, and the subject alphabet 301 pages as compared with 251 pages. The List of Publishers (with addresses) includes 1666 names. Appendixes for Government Publications, State Publications, and Publications of Societies, now otherwise provided for, are not given in this volume.

The edition, as before, is limited. The price is \$12.50 in sheets and \$15 in half morocco. The fact that most of the previous volumes are out of print and selling at extra price suggests the value of investment in this completing volume of the present series.

# EDW. G. ALLEN'S

## London Agency for American Libraries

28 HENRIETTA ST., COVENT GARDEN, LONDON.

### Special Notice to Librarians.

Mr. E. G. ALLEN desires to lay before you the advantages of using this Agency for procuring English and Foreign Books, Magazines, Periodicals, etc., and for General Library Work in Great Britain.

Long existing relations with the Booksellers and Publishers of the United Kingdom enable him to execute orders of any magnitude promptly and economically. All important books collated before delivery.

Specialty is made of the finding of Out of Print Books. His success in this department is unrivalled, possessing unique means of search, by which he is able to supply scarce books expeditiously and at moderate prices.

A good selection of Second-hand Dealers' Catalogues is sent to clients by every mail, and no commission charged on orders from them.

New Books supplied on the most advantageous terms, and the Full Trade Discount allowed off the published price.

Auction Catalogues Mailed, Sales Attended, and Commissions Executed with Care and Judgment.

Defects of Rare Books Reproduced in Facsimile.

Long Sets of Scientific and Other Periodicals Supplied. Imperfect Sets Completed.

Large consignments sent by fast steamers at through rates. Small orders can be sent by mail or by express system at low charges.

Special note is kept of all continuations of serials, which are forwarded immediately on publication.

Bookbinding in every style, Cheap and durable for library use. Dilapidated old binding skilfully repaired. Pamphlet binding at specially cheap rates.

Should you at present be without the services of a London Agency, MR. ALLEN would be pleased to answer any inquiries. All orders receive his personal attention, and with an experience of forty years in library business, and the thorough equipment of his agency, he believes himself capable of meeting every library requirement in a satisfactory manner.

**References permitted to first-class Libraries.**

**Special terms for large orders.**

**FOUNDED IN 1856.**

# THE LIBRARY JOURNAL

VOL. 26.

JULY, 1901.

No. 7

THE conference at Waukesha in numbers and in effective work was second only to the banner conference held under somewhat similar circumstances in 1898 at Lakewood, N. Y. In both places attention was happily centered on the meetings themselves by the absence of extraneous diversion and by the concentration of the entire membership in one large hotel. At Waukesha the social features were closely in line with library work, and the visiting librarians were greatly impressed with the spacious new building of the Milwaukee Public Library and with the noble monument erected by the state of Wisconsin as a home for the libraries of its state historical society and its university. Opportunity was also given for a close view of the work of the Wisconsin Library Commission which, especially by its travelling library system, has made Wisconsin the foremost state in library development. The plan by which a small community is encouraged to present a travelling library, thereafter identified with its name, to the people of the state, precedent to obtaining the benefit of other travelling libraries, is a capital one, and worthy of adoption elsewhere. Indeed, one of the most marked characteristics of the meeting was its evidence of an awakening enthusiasm for the distribution of books in the more remote sections of the country. From Idaho, Iowa, Minnesota and Nebraska — to name but a few of the states more recently in line — came reports of progress, small perhaps in present result but large in future possibilities, all bearing witness to the growing sentiment that the library is a central factor in the educational work of the community.

---

ALTHOUGH the conference was planned to last an unusual number of days, the crowded program, with its multiplicity of section and other meetings, caused frequent disappointment to those attracted in two or more direc-

tions by different interests, so that the meeting, despite its success, again brought home the advisability of reducing pressure on succeeding A. L. A. programs. Probably the most important result of the conference is the final arrangement for the printing of catalog cards, to be issued, under some modifications of the original plan, from the Library of Congress through the Publishing Board of the Association. The Librarian of Congress showed a hearty disposition to make the national library, as it should be, a central bureau, doing for libraries throughout the country what the Bureau of Education does for the schools — and the plans and aims indicated by Mr. Putnam marked a step in advance, which confirms the general satisfaction in the appointment made by the President for Librarian of Congress. Two new and important committees were appointed by the Council of the Library Association — a committee on Relations with the Book Trade, which is to take up the questions of prices and discounts, possibly in consultation with the American Publishers' Association; and a committee on Express and Postal rates, which is to negotiate with express companies for lower rates on travelling libraries and possibly other book parcels from libraries, and to consider and report upon a plan for lower postage which shall obviate the criticisms of the plans heretofore suggested. The new section for the consideration of library work with children made an excellent beginning, and it was wisely decided to merge into this body the membership and activities of the original Club of Children's Librarians, formed a year or so ago, to whose interest and enthusiasm the organization of the present section was largely due. Indeed the meetings of the various sections were almost uniformly practical and earnest, and resulted in the formulation of plans for various co-operative undertakings; while the favorable condition of the Association's finances and membership should give a

substantial basis for the development of the work outlined.

THE disclosures made by the committee which investigated the *personnel* of the library of the House of Representatives gives a chapter of *opera bouffe*, which would be amusing if it were not so mortifying. The Senate and House of Representatives, the document and folding rooms have been far too long places for sinecure holders, and the members of both houses are entitled to better service which will come one of these days from a better administration. If the recent disclosures shall have the result of obtaining for the Senators and Representatives adequate library service from the Library of Congress proper, and of ridding the capitol of the barnacles and accumulations in the present libraries, every member of Congress as well as every citizen will have reason to be gratified.

NEW YORK CITY has now officially accepted, by contract, Mr. Carnegie's remarkable gift, and the trustees of the New York Public Library are in position to go forward with the work of establishing new branch libraries as rapidly as is practicable to do so. Due consideration will be given to location of present libraries, and 15 years hence the reading public of New York will find themselves the rich possessors of a distributing system which will in all probability be without parallel in the world. The position of Brooklyn in regard to the Carnegie branch libraries is still somewhat uncertain, and, indeed, the whole question of coöperation and possibly of consolidation in Brooklyn will require most careful consideration from the authorities and citizens of that part of the greater city.

### Communications.

#### THE "UNIVERSAL CLASSIC MANUSCRIPTS."

I WISH to call the attention of librarians to the prospectus recently issued by M. Walter Dunne, 133 Fifth avenue, New York City, of a work entitled "Universal classic manuscripts. Facsimiles from originals in the Department of Manuscripts, British Museum, with descriptions, editorial notes, references, and translations by George F. Warner, M.A., assistant keeper of manuscripts, British Museum, and a special introduction by S. Murray Hamilton." A. P. C. Griffin, Library of Con-

gress, is named on the prospectus as editorial director, and Vincent Parke as general manager.

The publisher's announcement gives one to understand that these plates are reproduced in facsimile from originals in the British Museum, and that the publication, which is described as "perhaps the most important *inaugurated in the new century*," is an original one, due to the enterprise of Mr. Dunne and Mr. Griffin. As a matter of fact, precisely the same 150 facsimiles were published by the British Museum in 1895-1899, and may be obtained at the British Museum, or of the Museum's agent, The Oxford University Press, 93 Fifth avenue, New York City, for £1.17.6, about one-half the "special net price" of \$19.75, at which Mr. Dunne offers his reproduction to librarians "if ordered within the next ten days." Mr. Warner, of the British Museum, in reply to a letter of inquiry, writes me: "As you have rightly surmised, the American edition has been published without the permission or knowledge of the authorities of the Museum. The plates have undoubtedly been obtained by photographing our reproductions, and not directly from the originals, and the letter-press, from your description of it, appears to have been appropriated in an equally unscrupulous way.

"In the absence of an international copyright, I am afraid the Museum has no legal remedy, but it is at least satisfactory to have the assurance from your letter that such flagrant dishonesty will be regarded by all right-minded Americans in its proper light. . . . As you kindly offer to do what you can to make the true facts of the case known, we shall greatly appreciate any steps you may think fit to take with that object."

Mr. Griffin, whose name appears as the "editorial director," writes me that he has had nothing to do with this publication, though he has undertaken the editorial direction of a collection of reprints to be known as the "Universal classics library." The mechanical execution of the letter-press of the American reproduction is slightly better than the English original, but the table of contents is identical, both as to the arrangement and as to the field covered, and the only difference to be found in the American edition is the special introduction, which, considering the piratical nature of the publication, we cannot help regretting should come from an officer of the national Bureau of Rolls, the illuminated title-pages, and the portfolios in which the whole is enclosed.

I trust no librarians have been deceived by Mr. Dunne's misleading prospectus, and that the collection, which deserves a place in every library, will be bought from the British Museum, and not at double the price from the unauthorized American appropriator.

WM. C. LANE.

HARVARD COLLEGE LIBRARY,  
Cambridge, Mass.

## THE CARD CATALOGUE OF A GREAT PUBLIC LIBRARY.\*

BY JOHN S. BILLINGS, *Director New York Public Library.*

EVERY one admits that a large library must have an author catalogue, but there are some students, scholars, and librarians who are more or less doubtful about the relative importance of a subject catalogue, and as to whether it would not be wiser to use the money which such a catalogue costs in employing experts in the different departments of the library to guide and instruct readers, or in purchasing more books. In favor of this view it is urged that the great majority of readers do not want a subject catalogue, and will not use it if they can help it. They want to go directly to the shelves, or else that the attending librarian shall tell them whether a certain book is in the library, or what is the best edition of a certain book, or what are the best books on a certain subject, and become impatient when they are requested to examine the catalogue and fill out order slips for the books selected.

So far as the New York Public Library is concerned this statement is not correct for ninety per cent. of the readers, but it is true that a considerable number of the casual or occasional readers who come to a library for information on some specific point, do not know how to use a catalogue, are not acquainted with the rule on the title-page of the Washington Directory, *viz.*, "To find a name in this Directory you must know how to spell it," do not know that McCarty is classed with the "Macs" and St. Bridget with the Saints, never read the directions on the guide cards, and when they do find a card containing the title they want, cannot copy it legibly and fully on the order slip. This proves that it is necessary to have a special attendant to show such people how to use the catalogue, but it does not prove that the catalogue is useless.†

\* Read before New York Library Club, May 9, 1901.

† A reader in search of a book on "Factory legislation in Europe with special reference to the hours of labor for women and children," which was entered in our catalogue under the subjects of "Labor (Female) — Hours of" and "Labor (child) — Hours of," gave up his search in despair when he failed to find the title under "Labor — Hours of," though the guide card for this latter subject plainly referred him to the two other related subjects.

It is also said that the person who is making an original research upon the history of some particular place, period, theory, method, or invention, has little use for the ordinary subject catalogue, because the data he wants are for the most part contained in single chapters, or essays, or periodical or newspaper articles, to which the titles of the books or periodicals give him either no guidance or very little. His ideal library is one in which he can go to the shelves and search for himself, and can also go to one of the librarians and ask him "What are the latest statistics about the birth rate in different countries as compared with the birth rate in Georgia?" or, "What were the ceremonies at the coronation of Louis Napoleon?" or, "In what cities in the United States is acetylene used for illumination?" or, "What are the opinions of scholars as to the origin of the Russian alphabet?" or, "Have you a list of the marriages and deaths in Bury St. Edmunds in the first half of the 18th century?" or, "What are the text-books on analytical geometry now used in France and Germany?" or, "Where can I find the best criticism of the theories of Karl Marx?" or, "Have you a print giving the correct costume of a Sicilian peasant woman?" and in each case receive a prompt, definite answer. In other words he wants his bibliography peptonized, and given to him condensed.

It would be perfectly possible to organize a library staff which should contain persons capable of answering at least nine-tenths of all questions of this kind in general history, early American history, Oriental history, Chemistry, Physics, Engineering, Music, Maps, etc., etc., after they had made themselves familiar with the resources of the library, each in his own department. But would their employment do away with the need for a subject catalogue? I think not — in fact most of these experts, if in a large library, would desire a subject catalogue and would make one for their own use — but even if they did not, they will occasionally be absent, and will sometimes die, and the substitute, or new professor, will not be able to fill the place for a considerable period of time.

What does the subject catalogue cost? Let us say five cents per title, which would make the cost of the present subject catalogue of the New York Public Library to be about \$30,000. It has been five years in making—or has cost \$6000 per year. We might have employed two or three experts for the same money during that time. Would it have been wise to do so and omit the subject cataloguing? Probably some who read this paper will be surprised at the above figures for cost and it may be of some interest to give the data on which they are based so far as the Astor collection is concerned. When this card catalogue was commenced the books in the library were located by a number indicating a tier or case of shelves, and a letter indicating the shelf in that tier—thus 416 C meant that the book ought to be found on the third shelf of case 416. This had to be changed to a relative location mark under a new system of classification. Had there been no readers, the easiest and cheapest method would have been to commence at one end of the library and catalogue every book and pamphlet by author and subject, putting on each card the new classification mark which would show its location. But there were readers, and it was desirable to increase their number, hence the new books must be catalogued and made accessible as fast as possible. The number of purchases was increased—some large collections were presented—and the total accessions from these two sources and from exchanges have averaged over 30,000 pieces per year. The system of classification adopted was in many respects a new one, which required the actual seeing of the books and pamphlets in working out the details; for only a broad outline could be decided on at first.

Books and pamphlets, belonging to every department, were pouring in and these must be located—for which purpose the old system was used temporarily. The result was that when in the course of classification a section was reached which contained a number of these recent additions—the author and subject cards had to be picked out, the new marks substituted for the old ones, the books placed in the new location, and the cards returned to the catalogue. In January, 1896, the cataloguing staff of the library consisted of one cataloguer at the Lenox and two

at the Astor. This force was gradually increased until for the last three years the average force has included 20 cataloguers and 18 copyists, producing about 300,000 cards yearly, or an average of about 1000 cards for each working day. This provided for one set of author cards for the official catalogue in the catalogue room, and one set each of author and subject cards for the public catalogue. In addition about 17,000 index cards for current periodicals were placed in the public catalogue each year. To file these cards in the official and public catalogues has kept three of the cataloguing force busy. The searching in the official catalogue for titles of all purchases except the newest books, and of all gifts, requires the constant work of one person—and often of two. One skilled cataloguer is constantly employed on indexing current periodicals, another on indexing public documents, and another on the manuscripts at the Lenox building.

The chief cataloguer, Mr. Meissner, and his assistant, Mr. Moth, are engaged mainly in supervision and revision work. One cataloguer is kept busy with proof-reading. There remain then 14 cataloguers and 14 copyists actually engaged in preparing catalogue cards. Each of these has one month's vacation during the year, and the cataloguing force must supply the substitutes when places in the reading department are temporarily vacated by reason of vacations or sickness, for the readers department must be kept always efficient. The average production per person has been about 35 cards per day. Many of the readers of this paper will no doubt think that this is a very slow rate of work, and that 50 cards a day per person would be nearer the proper average. I can only say that in my opinion the rate of progress has been a fair one considering the large number of anonymous pamphlets to be looked up in various bibliographical authorities, the great variety of languages, and the requirement of fairly full titles with proper collation.

The preparation of author and subject cards, and the filing them in alphabetical order in the public catalogue, does not by any means complete the proper preparation of this catalogue, and if no more is done the result will often be very unsatisfactory. The pencil headings on the subject cards have been placed there by at least half a dozen differ-

ent persons acting under general instructions, such as, to use substantives instead of adjectives for the first or index word as a rule, making an exception in the case of adjectives indicating nations, races, etc., and for synonymy to follow in general the "A. L. A. list." No two of them ever would, or could, assign the same subject headings to a miscellaneous lot of 100 cards, and no one of them would give precisely the same headings this year to a lot of a thousand cards which he, or she, headed two years ago. As a rule, they give only the main index word, *e.g.*, "Banking," "Commerce," "Shakespeare"—or they will go a step farther and write "Education (History of)" "Chemistry, Organic," etc., knowing that these headings are to be revised, furnished with cross-references, and added to by the librarian in charge of the public catalogue. Miss Henderson. This final revision, with the preparation of guide cards and references, can properly only be done by one person, and up to the present that person has had little time to give to this part of her work. The result is that if the inquirer is looking for references to the history of education in Pennsylvania, he may find a thousand or more cards under the heading "Education (History of,)" but not classified further. There is also the possibility that half a dozen cards have gone in under "Pennsylvania, Education in." Many important sections have been arranged, and supplied with guide cards and cross-references—and the work is going on—but it will probably be about three years before it will be fairly complete. Absolutely complete it will never be, for such a catalogue in a large growing library will always have some cards wrongly headed, out of place, or obsolete. This last word "obsolete" applies mainly to cards containing references to journal articles. When a new subject of public interest comes up, such as the Spanish-American war, or liquid air, or the Boers, a considerable number of journal articles are indexed for the immediate information of readers. In a year or two, many of these have lost most of their interest, and when the new supplement to Poole's "Index" appears containing them, they are not worth the space they occupy in the card catalogue, and should be removed.

The question, "What shall be done in the way of analytical work?" is one that is al-

ways under discussion in the catalogue department. The numerous general and special encyclopædias, year-books, directories, almanacs, etc., which are essential in the reference department of a large library often contain special articles, statistical tables, etc., which are worth an index card, but the general rule is to rely on those in charge at the readers' desk to point out these sources of information. So long as there are a considerable number of books and pamphlets on hand uncatalogued the decision usually is to defer analytical card making until the separate works have been catalogued, if for no other reason than to prevent the addition of duplicates, yet there are exceptions to this rule, the chief being the indexing of periodicals. As an exception, take Schaff's "The creeds of Christendom," a valuable reference book to be found in most libraries. The subject is so distinct that it seems hardly worth while to make any analyticals for the card catalogue, and yet the reader who wants to see the text of the Heidelberg catechism, or the "original confession" of the Society of Friends, or the Savoy declaration of the Congregational churches may be very glad to find in the catalogue a card telling him that what he wants is in Schaff's "Creeds," and hence we have placed such cards there. The same argument, however, would apply to the list of "Churches in Manhattan and the Bronx," the "Strength of the militia in the several states," the "Population of the largest cities of the earth," the "Statistics of American college fraternities," and "The forty Immortals of the French Academy," all of which are given in the *World* almanac for 1901, but which we do not index. The question as to whether analytical or index cards shall be made is not usually "Are they worth making?" but "Are they more worth making for this than for something else?" Every number of a daily newspaper contains something that would be of interest to some reader of the next century, even if it be only an obituary notice, but it does not follow that every number of a newspaper should be indexed or even preserved.

Some of the questions which arise in preparing the subject catalogue may be indicated by the subdivisions which have been made for the subject "Commerce," and the cross-references in connection therewith. The first

question is, Should the main subject word be "Commerce" or "Trade"? "Trade" is the word used by Mr. Fortescue in his subject index for the British Museum, probably because he considers it a more comprehensive term than "Commerce," which is usually understood to refer to trade on a large scale, as between nations or communities, rather than to what is called retail trade. We use the word "Commerce" because 95 per cent. of our readers would search first under that heading, and we place under "Business" the references to retail trade. The second question is, Should works on the commerce of a country or state be indicated under the name of that country primarily, as is done by Cutter, Fortescue, and others, or under *Commerce, History of, regional, or under Commerce, regional*, by countries?

Another series of questions relates to cross-references, and especially as to when a cross-reference is to be used in place of duplicating a card for two subjects.

A hook on the condition of the agricultural and commercial interests of the United States might properly be referred to under both Agriculture and Commerce, and also, perhaps, still more properly, under Free Trade, but it will usually be sufficient to catalogue it under one subject only, relying on cross-references from the others.

In this library a book is catalogued as to both author and subject before it is accessioned and receives a class mark. The result is that the person who assigns the class mark has the benefit of the cataloguer's opinion as to what the book is about, but sometimes he differs from this opinion, and this may become a subject for discussion.

The following lists of headings used on the guide cards under "Ireland" and "Shakespeare" will give a general idea of the subdivisions and cross-references adopted:

The subdivision of labor which is necessary in a large library gives to some extent the usual unsatisfactory result of such subdivision in that most members of the staff become thoroughly familiar with only a part of the work. Those engaged at the readers' desk rely more on their knowledge of the

books than on the catalogue, to which they resort only in case of necessity, and require some time to become familiar with it. They see all the new books as they go through to the shelves, but not all the old ones. On the other hand those who assign subject headings to the cards are not always as familiar with the form in which readers' queries are put as they should be. We try to remedy this by having the classifiers take turns at the readers' desk, and by carefully noting the complaints of readers about the catalogue, and trying to do away with the causes for such complaints, and no doubt with time many of the difficulties will be minimized or entirely removed.

The space occupied by a large card catalogue is a matter that requires careful consideration and sufficient provision. In the new library building on Fifth avenue the public catalogue will be in a room 78 x 85, through which it is necessary to pass to enter the main reading rooms. In this room provision will be made at first for cases to contain two and one half millions of cards, and there will be space for cases for two and one half millions more. These cases have corresponding tables on which the single drawers of cards can be placed when in use. These will provide for a catalogue of about 1,500,000 books — and when this limit is reached an extension of the building will be urgently needed.

When the libraries are moved into the new building there will probably be 800,000 books and pamphlets to be stored in it, requiring a public catalogue of about two million cards. I do not venture to prophesy much about the details of arrangement of this catalogue, but these are some of my hopes:

1. That it will contain an author card for every book and pamphlet in the building, showing its location. This includes the books in the lending part of the library.

2. That it will contain one or more subject cards for every book in the reference library not catalogued by subject in the special catalogues connected with the special collections having separate rooms, such as of maps, music, manuscripts, incunabula, public documents, sociology, Jewish collection, Oriental collection, Bibles, genealogy, etc., and also for the most important books in these special libraries.

3. That it will also contain subject cards

giving references to important articles in periodicals and transactions for the last ten years so far as these are not obsolete or contained in special card catalogues in other parts of the building.

4. That in this room, or near it, will be a collection of catalogues of other libraries, including that of the British Museum and of the Bibliothèque Nationale of Paris (printed) and a card catalogue of authors of the books in the Library or Congress.

5. That near the center of this catalogue room there will be an information desk at which a librarian with assistant will be ready to assist readers, show them how to use the catalogue and see that their order slips are correct before they go to the delivery desk. The latest accessions to the library may be at this information desk.

6. There will also be in this room tables and seats for about 25 readers, and about 5000 volumes of reference books on open shelves.

7. That in the special reading rooms in the building, devoted to special subjects, there will be special card catalogues and bibliographical works relating to those subjects, that in most of these rooms the books will be on open shelves and freely accessible to the readers, and there will also be a person in charge of the room competent to assist students in that particular branch.

Supposing that all this is accomplished with not more than the average proportion of errors and shortcomings, how will the result compare — from the reader's point of view — with such a card catalogue as the "repertory" at the International Institute of Bibliography at Brussels (described by Mr. Bowker in the LIBRARY JOURNAL for June, 1900, p. 273), which already contains over 3,000,000 titles?

It is probable that about 99 per cent. of those who consult the New York Public Library would never use such a "repertory" so long as the library catalogue was available. The reason is that in the great majority of cases the library catalogue would indicate enough sources of information to satisfy the wants of the inquirer, and he would know that all these sources of information are in the library, and know by what marks to call for them. If he were to consult the "repertory" his work of search would only be begun after he had copied the titles he desired, for he would then have to find out whether they are in any accessible library.

If a bibliography is a critical or annotated one, showing for each title given whether the book has any special value, or contains anything not to be found in other books, the search might give results worth the trouble, but without such notes or indication of location a long list of titles of books, pamphlets, and journal articles is simply discouraging to the average reader. Fancy being confronted with six thousand titles about Aristotle, or ten thousand titles about ordination sermons, or two thousand titles on the duties of parents, or eleven thousand titles on labor and capital, from which to select more or less blindly those which may have some interest in connection with the question at issue, and then to be compelled to find out where they are! The bibliography of New York colonial history, recently published by the New York State Library, has its value greatly increased by the fact that it indicates where the books may be found.

The most important objection to an alphabetical index catalogue such as that described, is, that it often separates widely the lists pertaining to closely allied subjects, as for example, food, butter, cookery, milk, etc., and while the guide cards for the general subjects will give references to other subjects for details, the student who wishes to find all that the library contains on some rather general subject would prefer to have the catalogue arranged by classes as far as possible.

This objection will be obviated to some extent by the shelf lists which will be prepared in accordance with the new classification, and which will be available for the use of readers, but these shelf lists will not be made until we move into the new building, and the books now divided between the Astor and Lenox buildings can be arranged together. Moreover a shelf list can never take the place of a subject list, because for every subject there are important pamphlets and articles in transactions and periodicals to which the shelf list gives no clue.

One of the questions which arises in the arrangement of the subject cards in a large catalogue like this, is, as to whether in certain subjects, and especially in historical groups, the arrangement should be chronological or alphabetical. Some readers prefer the first, others the second. The alphabetical arrangement is more convenient for the librarian in checking off lists of books on a certain sub-

ject in order to see what the library has, or has not, and it is also usually preferred by the casual reader, who is more accustomed to it, while the chronological order is preferred by the systematic student, and by the reader who wishes to refer to the latest work, or to the oldest work, with the least possible delay. At present we are arranging the cards of titles relating to the history of countries in chronological order, and the same plan has been followed in some of the sciences, such as mathematics, but as yet in many subjects the cards are in alphabetical order, which is easiest for the filers. The general tendency

is to use the chronological arrangement for those subjects which are most likely to be studied historically, either as regards their own origin and development, or as throwing side lights on general history as, for example, Banking, Commerce, Finance, Taxation, Poor laws, etc., but for nearly all such subjects the chronological arrangement is subordinate to that by country.

In conclusion I would say that twenty-five years ago I held much more definite and positive opinions as to how an index catalogue like that of the New York Public Library should be arranged than I do at present.

#### THE REVISION OF THE LIBRARY OF THE UNIVERSITY OF PENNSYLVANIA.\*

BY SUSAN W. RANDALL, *University of Pennsylvania Library.*

WHEN we say that the University of Pennsylvania Library has been thoroughly revised it is well in the beginning to explain what was its condition before the work was undertaken. The library was classified according to the decimal classification with numerous modifications. The Cutter book number was used in Literature up to 890 and in Biography, while other classes were arranged chronologically, numbered in order of their accession. This, of course, prevented any semblance of an alphabetical arrangement on the shelves. There were two catalogues, author and subject. This was the only record kept of the books. So that when one stops to think of the numerous records which according to modern methods are made of a book between the time of its arrival in the library and the time when it is put on the shelves for circulation, one will at once see that it would have been a less difficult task to have catalogued an entirely new library.

As soon as Dr. Jastrow was appointed librarian he at once agitated the question of a revision. As he had for many years filled the position of assistant librarian, and had also at the same time been a member of the university faculty, he knew the great need of the work, not only from the librarian's standpoint but also from the requirements of a professor. The trustees looked with favor upon any plan which would further the useful-

ness of the library, but as it was a vast piece of work the question of funds to defray the expense was most vital. It was decided to start the work in a small way, and in June, 1898, extra workers were engaged and the revision had its beginning. The first classes to be started were Literature, American History and Bibliography. Every book was reclassified and marked thoroughly for the cataloguers. The books were then accessioned, catalogued, self-listed, labelled and book cards written. By the fall there had been finished 10,551 volumes. The cards for these had been kept separate, forming a third catalogue. When the time drew near for college to open, it was decided to throw the three catalogues together in one alphabet, which was in itself a great undertaking and called forth much adverse criticism. But looking back upon the work it is plain to me that it was the proper thing to do and saved time, as will be shown later.

If the extent of the work was not understood before, it became most apparent now. At the rate the work had been done it was evident that if continued in the same way it would cover many years, keeping the library in a constant state of chaos and a large number of books from circulation. At this point a friend of the university, who fully realized the value of the library and how much its usefulness would be enhanced by an entire revision, offered to pay the entire cost if the work could be finished in two years. The

\* Read at Joint Library Meeting, Atlantic City, N. J., March 22, 1901.

offer was at once accepted and Dr. Jastrow immediately sought all the available library workers, and in January, 1899, I was appointed in charge of the revision work.

The first and most difficult question with which we were confronted in doing the work on so large a scale with so many workers, and not all trained at the same school, was the great care which had to be taken in order that the work might be systematically and uniformly done throughout. The regular Library School rules had been adopted, but as there were numerous cases which were not covered by these a list of supplementary rules was printed. As it was quite out of the question for one person to classify and assign subject headings, or in fact oversee both these branches of the work, it was decided to have one person in charge of the classification and another of the subject heading. Under them were employed ten workers, each one having entire charge of one subject, and any changes which they considered necessary were referred to the classifier and subject header in charge. Thus we considered the entire work would be kept uniform throughout. From time to time a meeting of these employees was held to talk over together what they were doing and have a general discussion of the work, and to consult as to any changes which might be considered of advantage. Even with all these precautions many inconsistencies have been discovered, but it is hoped in time the errors will be corrected.

The classification of the library is a modification of the Dewey system, the modifications being so numerous that I fear Mr. Dewey would have difficulty in even recognizing it as an offspring. The 100, 200, 300 and 400 classes were entirely changed by the advice and assistance of the professors who used these classes. Throughout the other classes changes were made which were found to be necessary, making more minute subdivisions. The Cutter book numbers were also used with modifications. In preparing the books for the cataloguers the classifiers assigned the subjects, made indications on title-page for all cards and filled in proper author entry, so that the cataloguers' work was reduced almost to card writing. After the books had been properly marked a permanent record was made of them in the accession book. This had

never been done before. The cataloguer was expected to remove from the catalogue all the old cards which the book had originally had; but after the work increased this was found impracticable, and in place of this the old book number was written on the back of the card, and thus when the new card was alphabetized into the catalogue the old card, which would, of course, be alphabetized in the same place, was removed. It was only possible to do this after the catalogue had been thrown together. It was a great saving of time, and thus the old author cards were gradually withdrawn. Those which remained at the end of the work were taken out and a search made for the books; in many cases the new author card was found with a slight variation in the form of the author entry. In the case of the subject card, the work was more difficult, as it had never been the custom to write the subjects on the back of the author or main card. The subject cards were removed at one time and the book looked up by the author entry. After the catalogue cards were written the book was shelf-listed. The shelf-list is kept on 8 x 10 in. blank sheets, and for the benefit of those who may contemplate using them it is well to give a little timely warning. Do not be drawn into using them. In doing as large a work as this was, the advantages of a card shelf-list would have been much greater. A perfect alphabetical arrangement could have been maintained, which was most difficult on the sheets without constant rewriting, and the risk from losing cards is much less than from misplacing sheets. As it was impossible to fasten the sheets into the binder each night, for this constant using would have worn out the paper, large rubber bands were used to hold the sheets in binders.

The shelf-lister assigned the book number, filling in the book plate and catalogue card. The books and cards were then carefully examined; in case of error were returned to the cataloguer for correction. If no mistakes were found the cards were removed from the book and sent to the alphabetizer, while the books were sent to the paster to have label put on, marking done, and book cards written. The alphabetizing was in charge of one person, who gave her entire time to it, and under her were four others who worked about half the day. It was there that it was possible to detect the mistakes, in which case if author

entry and subject heading did not agree with those already in the catalogue the cards were returned to the classifiers to indicate necessary corrections to be made by cataloguers. In dividing up the work each classifier was given from four to six cataloguers to supply with work, the number depending on the class; an accessioner was supposed to keep, at least, eight people employed.

One shelf-lister was able to shelf-list books catalogued by six cataloguers. These figures would of course vary.

During the summer of 1899 the museum, which had occupied the upper floors of the library building, was moved into the new building which was nearing completion. The library then having more available space, it was decided to take on as many more cataloguers as it was possible to secure. A large number from the classes which were about to be graduated from the library schools were secured, and until the opening of the university in the fall we had, including the regular work-

ers, a force of 100. For two months the library was closed to the public, owing to repairs on the building which necessitated scaffolding being erected. This was the only time during all the work in which the books were not in constant circulation.

From Sept. 13, 1898, to Jan. 1, 1901, there were cataloged 84,499 works, 140,558 volumes, and 238,721 cards were put into the catalogue. The largest number done in any one month of four weeks was 9121 works, 17,238 volumes, 26,115 cards. The highest number for any one cataloguer during four weeks was 507 works, 1154 volumes, 1436 cards. But few came near this high standard. The average person writes about 35 cards a day. As a large number of people have but little faith in statistics, when the work was started it was impossible to find any one who had any to show what had been done, so that in keeping the figures as accurately as we have done we hope that others may profit by our experience.

REPORT OF THE REVISION OF THE LIBRARY OF THE UNIVERSITY OF PENNSYLVANIA, 1893-1900.

	7,586	31,128	19,452		7,323				
TOTAL.....	84,499	140,558	238,731	99,137	113,772				

From this date it is impossible to give accurate statistics of employees.

The revision of the work was practically completed Jan. 1, 1901, but the catalogue is not as yet finished. We are employing one person to go over the entire catalogue, correcting all mistakes, of whatever kind they may be, and copying on cards all the subject headings. This will be used instead of a subject heading book. From these will be made the *See also* cards.

In the midst of the work it was decided to turn all the available rooms in the library into seminar libraries for the graduate department of the university. Before this time there had been departmental libraries for those departments in the university where the books formed a part of their working apparatus and were in constant demand. Rules had to be made for the seminar libraries so that the library could have control over the books. Eight seminar libraries are run under the supervision of one library employee, who also has charge of the departmental libraries, eight in number. Each of these has its own author catalogue, by which the inventories are taken, and it may be of interest to hear that in the year and a half that this has been in working order no books have been lost. A difficulty arose at this time, owing to the large number of books which were thus removed from the proper places in the stack.

Many of the books were permanently at the department. For these it was decided to adopt a letter different for each department, which is placed before the classification number.

When the cataloguing was finished there were 1035 volumes which had not been found in the recataloguing. This number has since been reduced to 908. Unrevised books are still making their appearance, so that the number may be further reduced. The shelves were gone over with the shelf-list, in order that any errors which might have occurred in marking the book could be discovered and corrected.

The most satisfactory proof which we have that the work has been a success is the comparison between circulation of the year before the revision was started and that of the past year. From Aug. 31, 1896, to Aug. 31, 1897, the books used in the reading room were 9491, those for home use 10,702, making a total of 20,193. From Aug. 28, 1899, to Aug. 25, 1900, the books used in the reading room were 14,511, home use 34,756, making a total of 49,267, being an increase of books in the reading room of 5020 volumes and of books for home use of 24,054, or making a total of 29,074.

## THE DURABILITY OF LEATHER IN BOOKBINDING.

BY WALTER PYLE, *Wilmington, Del.*

I HAVE read with great interest the article in the LIBRARY JOURNAL for July, 1900, entitled "Leather for bookbinding," by Mr. S. H. Ranck, in which he quotes copiously from a paper by Mr. Douglas Cockerell. Having been a manufacturer and dealer in bookbinding leather for the past twenty years, I am peculiarly interested in the question of the durability of that article.

In the quotations from Mr. Cockerell's article all the blame for the lack of strength and durability in present-day leather seems to be placed on the use of sulphuric acid in coloring, and Mr. Cockerell seems to think that excessive heat is only injurious on account of the acid in the leather. He says: "This heat theory would account for the damage were it

not that old bindings that have been exposed to the same conditions are often found comparatively uninjured side by side with those on which the leather is utterly rotten."

I know from my own experience that heat and dryness are very bad for all kinds of leather, and tend to weaken and harden them. It is true that all leathers except black are put through what is called a clearing bath of weak sulphuric acid before coloring, which whitens the leather and makes the color take evenly, but then this has always been done, with the old style of wood colors even more than with aniline dyes, so that this would hardly account for the present-day leathers being less durable and lasting.

Mr. Ranck, at the end of his article, says,

"Mr. Cockerell's article is a strong indictment of modern methods of tanning so far as durability is concerned," although he fails to quote anything from Mr. Cockerell's article in regard to the weakness of the present-day tanning.

The tanning methods of to-day are without doubt very different from the methods of past years, nor would it be possible, on account of the present consumption of bookbinders' leathers, to come back to old methods.

All sheepskin nowadays are pickled, and this pickling mixture has strong sulphuric acid in it. This might account for sulphuric acid being still left in sheepskins and skivers after the tanning process, and the writer believes that uncolored sheepskin bindings will be found to last no longer than colored ones.

The old method of tanning when skins were packed away in pits with layers of the tanning material between them, and were there kept moist for weeks and months while the tannic acid soaked into them, certainly made better leather than the present methods of forcing the tanning process. But, as said above, it is impossible to come back to this method, both on account of quantity and price.

It is my opinion that 75 per cent. of bookbinders' leathers manufactured to-day are used for ephemeral publications which are not expected to be used or kept more than a year or two years at the outside, so that economy in the cost of leathers for this kind of binding is quite a consideration, and has had the effect of reducing the price of all kinds of leathers, even when the book is of a lasting character. It has become important also to reduce the labor cost in binding, so that the binder to-day insists on thinner leathers that may be more easily and more cheaply worked than in old times.

The customer, too, expects much cheaper binding, even for the books which he intends to keep and use, and is only willing to pay from fifty cents to a dollar for rebinding a single book when in old times he would pay from \$2 to \$5, and the manufacturer in all lines has to meet the new wishes and ideas of his customers.

In regard to cloth and buckram bindings, I think if this subject is carefully looked into it will be found that if the book is used it

does not last as well as the better kinds of leather, such as morocco, cowhide, and perhaps even the despised roan. But if not used it will certainly stand time better than any leather tanned by either old or new methods.

Now, what remedies can be suggested for the present difficulty?

*First.* Libraries should be willing to pay fair prices for binding or rebinding their books, and not huckster them around to three or four different binders, using one price against the other till of necessity the binder is forced to put cheap and poor leather in his binding to be able to make any suitable profit out of the work. Pay a good price for the binding, and insist on having good heavy leather of either morocco or cow in the binding of the books that will be constantly used. See especially that the leather used is heavy, as it is the desire of every workman to use thin leather, for it makes his work much easier. Skiving and working heavy leather over the bands and around the ends of the books is a difficult job for the ordinary bookbinder of to-day.

*Second.* Insist that the bookbinder also shall be willing to pay a fair price for his leather and buy it of responsible houses, and he will be less likely to get undertanned, or what is technically called *stirved* leather.

Undertanned leather is always brittle and weak, and every day adds to this till at last it almost literally falls apart, while a really dead tanned leather will stand the action of both time and heat.

When it can be managed, a little addition of oil to the back of the leather adds greatly to its strength and durability, and this can be done with heavy leathers; but on thin skins oil cannot be used, because any oil coming through to the surface of the leather stops the gold from taking.

Finally, I wish to make a little suggestion in regard to black or very dark blue or green leathers. Use them as little as possible. All leathers of this description are made with acid, generally vinegar and iron, and of course this tends to rot the leather, especially as no, or at least very little, oil can be put in bookbinders' leathers. If we could fill our leather with oil as the leather of shoes is filled, the strength and lasting qualities would be much improved; but this is impossible.

## PARK LIBRARIES IN NORWAY.

HAARON NYHUUS, librarian of Det Deichmanske Bibliothek, Kristiania, Norway, sends an account of the libraries recently established through his efforts in the public parks of that city. He says:

In this city I have organized a park library system which may interest my colleagues in America. Notwithstanding the short duration of the Norwegian summer, we have some rather pretty parks, especially St. Hanshaugen, owned and maintained by the city, and the Queen's park, forming a part of the Castle park surrounding the royal castle. Passing through the Queen's park on my way to the library I noticed how many of the visitors there had the dull and weary aspect which we know so well from observing the travellers by railroads, street cars, etc.

The idea struck me that we ought to establish park libraries, in spite of our short summer. A series of difficulties was overcome. I gained permission from the city authorities to establish my libraries in the city parks, St. Hanshaugen and Kampen, but I have not yet received permission from the King to use the Queen's park for my purpose.

The two park libraries already started consist of from 300 to 400 volumes each, selected from the main library; short stories, poetry, essays, monographs on history and natural science (especially botany, entomology) and books bearing upon out-of-door life, fresh air and scenery. The experiment has been followed with great interest by teachers and the public in general. To cover the expenses we have had to charge 5 ore (1.3 cent) for every book issued. We do not demand any deposit, but the borrowers have to sign their names and residences on blanks, which are compared with the city directory. So far we have had no unpleasant experiences.

Both parks in which we have our park libraries have their drawbacks. In the park of St. Hanshaugen there is a public restaurant and café, and concerts are given in the evening, besides other entertaining features. The library, located in a former music pavilion, is next door neighbor to the music pavilion now in use. The Kampen park is very small and not very much sought. The library is put on the veranda of the park officer's cottage.

If I obtain the King's permission to make use of the Queen's park, I shall try to carry the work further on. I cannot see any reason why we should not extend the park libraries to contain new English, French and German periodicals and books.

The city of Kristiania may next year be able to welcome American and other foreign visitors with their favorite magazines in that most delightful reading room, the Queen's park. The bright summer nights of Norway are specially fascinating with a pleasant book in your hand.

## FRENCH PRIZES FOR MONOGRAPHS ON BOOKWORMS.

ANNOUNCEMENT has been made, on behalf of the French International Congress of Librarians, of 1900, of the conditions governing the prize competition for essays upon insect enemies of books, to be held under the auspices of the congress. At the time of the International Congress of Librarians, held in Paris, Aug. 20-23, 1900, Mlle. Marie Pellechet, honorary librarian of the Bibliothèque Nationale and a member of the congress, established two prizes of 1000 and 500 francs respectively, to be awarded for the best essays upon insects which destroy books. These will be now known as the Marie Pellechet prizes. At the time of the same congress a second giver, who desires to remain incognito, established a prize of 1000 francs, to be awarded to the best monographs on the same subject, but in which the author should treat specially of insects destructive to book bindings. This prize is known as the Librarians' Congress prize.

The executive committee of the congress announces the conditions of the competition, as follows:

*Marie Pellechet prizes.* A first prize of 1000 francs and a second prize of 500 francs shall be awarded in 1902 to the two best essays presented on the following subject: the scientific study of insects or worms which attack books; determination of their nature and species; description of their methods of propagation, characteristics, and ravages; note of parasites developed by them; specification of the materials upon which they thrive, those which attract them, and those which dispel or exterminate them; indication of the best means for their destruction or dispersion after they have gained foothold in a library, and prevention of their invasion of libraries exempt from their ravages.

*Librarians' Congress prize.* A single prize of 1000 francs will be awarded, at the same time and under the same conditions, to another essay on the same subject, but with the difference that this essay shall be devoted to the study of insects or worms which particularly attack the bindings of books.

The jury which shall consider the essays and award the prizes is formed largely of officers of the Congress of Librarians, and consists of D. Blanchet, Bibliothèque Nationale; E. L. Bouvier, professor of entomology, Museum of Natural History; J. Couraye du Parc, Bibliothèque Nationale; L. Delisle, Bibliothèque Nationale; J. Deniker, librarian Museum of Natural History; P. Dorveaux, librarian Paris School of Pharmacy; A. Dureau, librarian Academy of Medicine; A. Giard, former president Entomological Society of France; Jules Künckel d'Herculeis, Museum of Natural History; Paul Marais, Bibliothèque Mazarine; Paul Marchal, professor of zoology, National Agronomical In-

stitute; Henry Martin, Bibliothèque de l' Arsenal; Charles Mortet, Bibliothèque Ste. Geneviève; E. Perrier, Museum of Natural History; E. Picot, member of the Institute. The jury reserves the right to consult such specialists as may seem desirable. Essays may be submitted in French, Latin, German, English, Spanish or Italian. They must be designated by a special device or pseudonym, with the name of competitor inscribed in a sealed note attached to the manuscript. All essays should be received before May 31, 1902; they should be sent, with inscription of the prize for which they are submitted, to M. Henry Martin, secretary, Librarians' Congress, Bibliothèque de l' Arsenal, Rue de Sully 1, Paris. If the essays received by the date announced do not seem to the jury of sufficient merit to justify awards, the competition will be postponed until May 31, 1903, or, if at that time similar conditions prevail, to May 31, 1904.

#### SECOND ANNUAL CONVENTION OF THE GERMAN LIBRARY AS- SOCIATION.

THE second annual convention of the German Library Association was held May 30 and 31 at Gotha, in the *aula* of the Gymnasium Ernestinum, Director Schwenke, of Berlin, presiding. After the reading of the report of the treasurer, Assistant Director Loubier, of Berlin, presented a paper on the preservation of book bindings and pamphlets. In the afternoon Professor Ehwald delivered an interesting address on the Ducal Library at Gotha, which is famed for its wealth of unique manuscripts, as well as incunabula. The session of the convention was resumed at the *aula*, at five o'clock in the afternoon, when Dr. Berghöffer, of Frankfurt-on-the-Main, read a paper on the desirability of preparing a bibliography of the German periodical literature of the 19th century.

The second day's session was opened by Professor Schulz, of Leipzig, who delivered an address on the relations of libraries to the book trade, in which he laid especial emphasis on the necessity of better made books. During the discussion of this subject the question of deposit copies (*pflichtexemplare*) was raised and the association adopted a resolution to the effect that the German Library Association considers the re-enforcement of the law concerning deposit copies necessary to the preservation of the literary product of Germany. Dr. Geiger, of Tübingen, read a paper on the purchase of entire collections of books and libraries; and Dr. Molitor, of Münster, delivered an interesting address on the evidence of the work of the German itinerant printers, (*wanderdrucker*), of which he found traces in libraries and archives on a journey through Italy.

#### THE HOUSE OF REPRESENTATIVES LIBRARY.

THE report of the committee of the National Civil Service Reform League, appointed to inquire into the condition of the federal civil service, has been recently submitted and gives food for reflection in the disclosures made of the spoils system, especially concerning the House of Representatives library at Washington. This library consists of a motley collection of 300,000 volumes, scattered from the dome to the basement of the capitol, books being piled in unused rooms like wood or coal, and requiring years of intelligent labor to put them in usable shape. And yet, notwithstanding this deplorable disorder, the librarian and his assistants are shown by the report to have been absent for long periods during the sessions of Congress, though continuing to draw full salaries. Mr. Boobar, the present librarian, when questioned by the committee, made the following admissions:

"Q.—In the condition of the library your force ought to be on duty the whole year; should they not?"

"A.—Why, no, sir.

"Q.—With 300,000 books scattered all over the capitol, you say your force ought not to be here all the year?"

"A.—You see, there is very little call for books during the recess.

"Q.—It is not a question of call for books, but a question of putting the library in such shape that books can be found when called for.

"A.—The library (up to the appointment of the so-called Roberts Committee) that is contained in the basement was in such a condition that the week after I went on as librarian I went to the clerk and told him the terrible condition of affairs down there. He seemed to think that there was no way of getting those books straightened up, and indeed the work has required the labor of six or eight men for a year now.

"Q.—And in the meantime those men who are drawing their pay are away performing no duty. Is not that utterly inexcusable?"

"A.—Well, I hardly think, Mr. Chairman, in all due fairness to the library force, they should have been asked to have taken that accumulation of books and endeavored to straighten them out."

An assistant who is on the rolls as a day laborer at \$720 a year, but is detailed to the House library and paid \$1800 a year by a deficiency bill, replied to the charge of long absences that "he had been in the city and ready to do service probably as much as any member of the force, because during the summer he had been willing to be at the library a part of the time each day because he had some business matters, and could write letters there, and it would not be in conflict with any service he could render the library."

His statement seems to express the conception of library duties held by the staff.

fact is noted on a brown card of regulation size, which we term a "gap card." It is then sent to the periodical department for verification. The dealer is then notified of the gap, and the date when this is done is stamped on the gap card. This is then attached by means of a clip to the large card, and remains until the missing number has been received. Imperfect numbers, title-pages and indexes are claimed in the same way. The fact that a number is received late is shown by a horizontal line drawn under it.

The record of about 3500 periodicals is kept in this way. The United States is represented by 1300. We also receive publications from about 30 foreign countries, including Mexico, Central America, South America, Europe, Egypt, South Africa, India, China, Korea, Japan, and Australasia. The Hebrew Department receives about 70 periodicals, the Slavic Department about 50, and the Oriental Department about 50.

GERTRUDE P. HILL,  
N. Y. Public Library.

#### THE NEW YORK LIBRARY CIVIL SERVICE EXAMINATIONS.

THE "Library training number" of the JOURNAL is so complete that it seems to me unfortunate that you should have omitted to mention the library examinations held in recent years by the Municipal Civil Service Commission of New York City. So far as I know, these are the only such examinations held directly by the authorities of a city, and their methods and subject-matter hence become matter of interest.

The Civil Service Commission has come into contact with library work in New York City in three ways: (1) In connection with school library positions under the board of education; (2) in connection with the two public libraries (those of Brooklyn and Queens borough) owned and controlled by the municipality; and (3) in connection with the circulating libraries and reading-rooms just opened in some of the public buildings under the joint auspices of the board of education and the New York Public Library.

The above items are given in chronological order. The library positions under the board of education are few, but the first was created several years ago, and in order that an eligible list should be prepared for appointment it then became necessary for the commission to hold an examination in library economy. No similar examination was necessary until the year 1900, when a decision of the corporation counsel placing the force of the Brooklyn Public Library under the civil service rules made it necessary for the authorities to take up the questions of admission to that force and of promotion therein. In order to retain the apprentice system which had been introduced into the library it was finally decided to

place on the eligible list for appointment, without examination, the names of all persons who should be certified by the library authorities as having served a six-months' apprenticeship without pay, and as being competent to fill positions on the library staff. This rule prescribes no method of ascertaining competency, but it has been done partly by examination and partly by taking into account the quality of the work performed during apprenticeship. This rule was extended to the Queens borough library. Promotions were not affected by it, and must still be made from an eligible list furnished, on requisition, by the Civil Service Commission. Such list, of course, must be made up from the results of an examination, and in such cases it again becomes necessary for the commission to set a list of questions in library economy.

A special rule was also adopted to govern the selection of the staff of the new school reading-rooms. Here the situation was somewhat anomalous, as the librarians were to be appointed and paid by the board of education, but were to be under the direction, in a measure, of the Public Library, and it was thought best to limit the competition to such persons as had already had practical experience in the work of the library. If the positions had been purely Public Library positions this would have been simple, as the city authorities have no control whatever over its staff. But they were board of education positions, and hence a special rule had to be adopted by the commission. This rule provides that only such persons as have worked in the library for one year shall take the examination for librarian of a public school reading-room, and that only such as have worked there six months shall be eligible for assistant. Here again the commission was obliged to act as examiner in library economy.

As the rules of the commission forbid it to furnish copies of examination papers, I can give none here. But the questions have been marked in general by two characteristics: they have been pretty closely confined to practical library work, and they have been general rather than specific. No exception whatever can be taken to the way in which the examinations have been conducted, and probably the libraries concerned have really benefited by having these examinations in the hands of an outside board.

On the other hand, if this addition to the functions of the commissioners is to be a permanent one they will probably find it to their advantage to appoint as special library examiner some well-known expert who shall make a study of the conditions of each case and adapt his questions more closely to them. This, it is fair to assume, will be done as soon as circumstances make it possible, and then there will certainly be much in the method to commend it to library administrators.

ARTHUR E. BOSTWICK,  
N. Y. Public Library.

## LIBRARY NOTES IN THE NORTH-WEST.

W. P. Kimball, in *Popular Educator*, June.

THE Oregon of to-day has 413,000 souls. Opulent as the state is in natural resources, it would be a pleasure to say that the advance along educational lines has kept pace with its material progress. Unfortunately, this is not the case. Aside from the promising condition of the schools of Portland and a few other cities, the state has suffered, is suffering, from its indifference to high ideals and consequent unwillingness to pay for the best instruction and the adoption of improved methods. Perhaps in no more striking manner is this apathy manifested than in the neglect and refusal of the legislature to enact any law for the support of free public libraries or for district school libraries. Recent intelligence is received that a free library law has lately been passed in Oregon, though it allows only one-fifth mill tax on the dollar. Valuations in Oregon are remarkably low, hence yearly appropriations for library support will be very small.

Washington had a free library law, but, regretfully, it was founded on a mistake, for it applied only to cities exceeding 5000 population. It construed the public library as a luxury to be enjoyed only by large towns and cities—a grave fallacy. Better times are at hand, however, for the state has just enacted an excellent general and school library law.

Though owning but twelve years of statehood, Montana has a good public library law and also a school library law which is closely modelled on the California law of 1866, though as yet it is but partially enforced.

Helena and Butte have each about 30,000 volumes in their libraries, which are housed in fine buildings erected by the city; Anaconda has a noble structure, erected and maintained by Mrs. Phœbe A. Hearst, while those of Great Falls, Missoula and Bozeman are doing excellent work in these smaller cities.

## COUNTY LIBRARIES IN INDIANA.

THE recent discussions of county library work, in connection with the Brumbach Library, of Van Wert, O., the Washington County Free Library, of Maryland, and the Cincinnati Public Library, give timely interest to a description of the county libraries of Indiana, included in the report of the Indiana State Library for 1898. Here it is stated that "one of the institutions now almost extinct in Indiana is the county library; in fact, few people who have not consulted the older records even know that such institutions were once provided for in nearly all the counties of the state." The establishment of such libraries was provided for by the constitution of 1816, which authorized the General Assembly, when laying off a new county, to reserve 10 per cent. of the proceeds from

the sale of town lots, "for the use of a public library for such county," and to "incorporate a library company under such rules and regulations as will best secure its permanence and extend its benefits." Special library legislation for individual counties occurred as early as January, 1818, and the first general legislation on the subject was enacted Jan. 28, 1824. It provided for the organization of a county library board, upon due notice to voters, and included regulations for election of officers, management, etc. This act was amended by later legislation, in 1825, 1831, and 1847, and in 1852 an enactment was passed in the interest of better organization and more modern management, which provided that "every inhabitant of the county giving satisfactory evidence or security for the safe keeping and return of books shall be entitled to take and use the same upon the proper application to the librarian. But no one person shall at the same time have more than two volumes of books, nor for a longer period than 40 days, without returning such books to the library." The state librarian of Indiana adds: "With this the legislation upon the subject of county libraries came to an end, and so the matter remains, and most of the libraries provided for have ceased to exist, yet there still remain a few in the state."

## APPOINTMENTS IN THE LIBRARY OF CONGRESS.

THE appointments and promotions in the service of the Library of Congress, taking effect July 1, 1901, make an interesting record. There are 24 appointments, and 41 promotions, the number of promotions being evidence of the desire of the library authorities to advance from within the service and thus to give opportunities to the trained people willing to enter at low salaries. The list of appointments and promotions is as follows:

## APPOINTMENTS, JULY 1, 1901.

- Brown, Charles H., New York. \$900.  
Wesleyan University (B.A.) and (M.A.); N. Y. State Library School; Wesleyan Univ. Library; Y. M. C. A. Library. Languages: French, German.
- Brown, William L., Iowa. \$360, Messenger.  
Public schools; Messenger, Washington Public Library; Press page at Capitol, 56th Congress, 2d Session.
- Conger, Franklin P., New York. \$360, Messenger.  
Ogdensburgh (N. Y.) Academy; Washington Public Schools.
- Cooke, Jane E., Michigan. \$720.  
University of Michigan (B.L.); University of Illinois Library School; University of Illinois Library; Public Library of Urbana; Library of University of Pennsylvania. Languages: German, Latin.
- Cooley, Genevieve S., Colorado. \$720.  
Wellesley; Leipsic. Amherst Public Library; Forbes Library, Northampton, Mass.; Denver Public Library. Languages: French, German, Spanish; Italian (slightly); Latin.

Corbin, John, Jr., Indiana. \$800, Copyright. University of Michigan (Ph.B.) Lawyer.

Fishback, Lucy O., Illinois. \$540. Presbyterian Academy of Jacksonville, Ill.; High and Normal Schools, Washington; Amherst Library School. Teacher. Languages: German.

Franklin, Julia, Maryland. \$600. Special experience: translator. Languages: French, German.

Hall, Ethelwyn B., Iowa. \$540. Central High School, Washington; Copyist Census, '90-'92; Manager and Bibliographer of the National Bureau of Medical Bibliography, '93-'99. Languages: French, German.

Hall, Anna W., Kansas. \$540. Kansas Agricultural College; Pratt Institute Library School. Languages: French, German, Latin.

Hammond, Laura, Georgia. \$540. Pratt Institute Library School; Pratt Library, Brooklyn. Languages: French, German.

Hopkins, Lilian V., Maryland. \$720. Western Maryland College; Amherst Library School; Librarian Western Md. College. Languages: French, German. Stenography and typewriting.

Hopper, Franklin F., New Jersey. \$720. Princeton (A.B.); Pratt Institute Library School. Languages: French, German, Italian, Latin, Greek.

Jahr, Thorstein, Minnesota. \$800. Luther College (B.A.); University of Illinois Library School; Luther College Library; Luther Sem. Library. Languages: French, German, Scandinavian and classical languages.

Laws, Anna C., Pennsylvania. \$720. Drexel Institute Library School; University of Pennsylvania Library. Languages: French, German, Latin.

McKnight, Herbert, New York. \$900. Cornell (B.L.); New York State Library School; New York State Library. Languages: French, German, Spanish, Italian, Latin.

Neal, Margaret E., Maine. \$540. Drexel Institute Library School. Languages: French, German, Latin.

O'Connor, Adeline Watts, Texas. \$540. Mt. de Sales Convent, Macon, Ga.; St. Mary's Episcopal Institute, Dallas, Texas; Baylor College, Texas; University of Texas Library; Summer School, Madison, Wis.; Librarian Houston Carnegie Library, two years. Languages: French, Spanish (slightly.)

Prentiss, May L., Nebraska. \$900. University of Nebraska (A.B.); New York State Library School; Bryn Mawr College Library, '99-date. Languages: French, German, Latin.

Pritchett, Sadie B., Missouri. \$540. Mt. Holyoke; Washington University, St. Louis; New York State Library School. Languages: French, German.

Shepley, Lilla A., New York. \$600, Copyright. Normal College, New York City; Assistant bookkeeper, cashier and expert copyist, New York City. Languages: German, French (slightly.) Temporary service, Library of Congress.

Wright, Helen, Ohio. \$540. Ohio State University Library School; Ohio State Library.

Thompson, James David, West Virginia. \$1800. Owens College, Victoria University, Manchester, Eng., three years: B.Sc., M.Sc., 1st in 1st class in Honors School of Mathematics with Derby Scholarship for special merit; London University, B.Sc.; University Exhibitioner: honors in Mathematics and Physics; Trinity College, Cambridge Univer-

sity; B.A., M.A. 16th wrangler Math. Major Foundation Scholar of Trinity College; Lecturer, University College, Sheffield; University of Chicago; West Virginia University; Library of West Virginia University. Languages: French, German, Latin, Greek; also, slightly, Italian, Russian, and Danish.

Welti, Oswald, District of Columbia. \$360. College Cantonal, Lausanne; studied in Weimar and Berlin. Languages: French, German.

LIST OF PERSONS UNABLE TO ACCEPT POSITIONS OFFERED THEM, 1901.

Allen, Lucy, Ohio. \$900. Ohio State University (B.A.) (M.A.); Ohio State University Library. Languages: French, German, Greek, Latin.

Jones, Ada A., Kentucky. \$1500. Head-Cataloguer, New York State Library.

McDaniel, Arthur S., Massachusetts. \$720. Harvard (A.B.) magna cum laude; Harvard College Library. Languages: French, German.

Whitmore, Frank H., Maine. \$720. Harvard (A.B.); New York State Library School.

PROMOTIONS, JULY 1, 1901.

Gilkey, Malina A., Massachusetts. \$1200 to \$1400. Wellesley, '76-'82; Boston Public Library (volunteer), '89-'90; Boston Athenæum, '91-'93; St. Louis Mercantile Library, '93-'95; Washington City Free Library (in charge, '95-'98.) Languages: French, German, Latin, Greek. Entered service: August 1, '98 — \$1200.

Chase, Henry C., Maryland. \$1200 to \$1400, Copyright. 12 years Deputy Clerk, Circuit Court, Charles-town, Md. Entered service: June, '92, at \$540; salary increased from time to time, '92-'96; July, '96 — \$1200.

Downs, J. L., Indiana. \$1200 to \$1400, Copyright. Assistant postmaster, Boonville, Ind., '88-'92; bookkeeper and accountant, '92-'97. Entered service: Sept. 1, '97 — \$1200.

Hastings, C. H., Illinois. \$900 to \$1200. Bowdoin (A.B.); Johns Hopkins, two years; Chicago University, two years; University of Chicago (department libraries of social sciences), five years. Languages: French, German, Latin, Greek. Entered service: December 17, '00 — \$900.

Hicks, Frederick C., New York. \$900 to \$1200. Colgate University (Ph.B.). Languages: French, German, Spanish, Latin. Entered service: November 15, '98 — \$900.

Roberts, D. E., Maryland. \$900 to \$1200. Pennsylvania State College, two years; Johns Hopkins University, grad., '88; Post-graduate Johns Hopkins; Library of Johns Hopkins University. Languages: French, German, Latin. Entered service: October 1, '97 — \$900.

Bourgeat, Bella K., District of Columbia. \$1000 to \$1200, Copyright. Lectures at Sorbonne and College de France; professors in Rome. Languages: French, Italian. Entered service: Sept. 21, '97 — \$900; April 19, '00 — \$1000.

Goddard, William D., Massachusetts. \$1000 to \$1200, Copyright. Brown University, one year; Colgate University, three years (A.B.); Harvard Graduate and Law Schools; Amherst Library School. Languages: French, German, Spanish, Latin, Greek. Entered service: Nov. 11, '99 — \$900; April 19, '00 — \$1000.

- Griswold, Alice S., Iowa. \$900 to \$1000.  
Drexel Institute Library School, graduate '96;  
Free Library of Philadelphia, '97. Languages:  
French, German, Latin. Entered service: Oct. 1,  
'97—\$900.
- Lawton, Eva J., District of Columbia. \$900  
to \$1000.  
Library of Weather Bureau. Languages:  
French, German. Entered service: October 1, '97  
—\$900.
- Stevens, Alice F., Vermont. \$900 to \$1000.  
Amherst Library School; Washington City Free  
Library, '98. Languages: French, German, Latin.  
Entered service: February 1, '98—\$900.
- Dickson, Caspar C., Minnesota. \$900 to  
\$1000, Copyright.  
Macalester College (A.B.); Drexel Institute Li-  
brary School; Library of Macalester College (in  
charge.) Languages: French, German. Entered  
service: January 29, '00—\$720; April 19, '00—  
\$990.
- Foster, Carolyn R., Vermont. \$900 to \$1000,  
Copyright.  
Entered service: March 2, '97—\$900.
- Elliott, Annie L., New York. \$720 to \$900.  
New York Public Library, '98-'00. Languages:  
French, German, Spanish. Entered service: May  
14, '00—\$720.
- Hellman, Florence S., Wyoming. \$720 to  
\$900.  
University of Wyoming (B.D.) Languages:  
French. Typewriting. Entered service: October  
1, '98—\$720.
- Melcher, Mary H., New Hampshire. \$720 to  
\$900.  
Smith College (B.L.); Pratt Institute Library  
School; Little Falls School Library. Languages:  
French, German, Latin. Entered service: May 1,  
'00—\$720.
- Waring, Lucretia C., California. \$720 to \$900.  
Clarke Institute, San Francisco; Columbian Uni-  
versity Library School; Columbia University Li-  
brary; Washington Public Library. Languages:  
French, German. Entered service: May 1, '00—  
\$720.
- Davis, Mary Wright, District of Columbia.  
\$720 to \$900, Copyright.  
Bishop Whipple College, Minn.; Cashier, Provid-  
ent Life Assurance Co.; Copyist 11th Census;  
Treasury Department. Languages: German. Type-  
writer. Entered service: September 1, '99—\$720.
- Mohun, Maude, District of Columbia. \$720  
to \$900, Copyright.  
Washington High School; Tanner's Business  
College. Languages: French. Typewriting, sten-  
ography. Entered service: October 11, '99—\$720.
- Voelckner, K. E. F., District of Columbia.  
\$720 to \$800.  
Universities of Halle and Marburg, three years.  
Languages: French, German, Latin, Greek. En-  
tered service: December 7, '00—\$720.
- Tichener, Mary C., Pennsylvania. \$720 to  
\$800, Copyright.  
Pittsburgh Female College; State Normal School.  
Entered service: March 15, '98—\$720.
- Boggs, Lucien H., Georgia. \$360 to \$720.  
University of Georgia (A.B.) Languages:  
French, German, Latin, Greek. Entered service:  
June 29, '00—\$360.
- Blandy, Julia W., New Jersey. \$600 to \$720.  
Putnam Female Seminary, Ohio, '97-9; Drexel  
Institute Library School; Astor Library. Lan-  
guages: French. Entered service: May 1, '00—  
\$600.
- DeWolfe, Madeleine B., New York. \$540 to  
\$720.  
Columbian University Library School. Lan-  
guages: French, German. Entered service: April  
20, '00—\$360; October 1, '00—\$540.
- Gregory, Julia, Illinois. \$540 to \$720.  
Cornell, '83-'84; Armour Institute Library  
School, '96-'97; Kansas City Public Library (head-  
cataloger), '97-'99. Languages: French, German,  
Latin. Entered service: October 4, '00—\$540.
- Moore, Laura, Michigan. \$600 to \$720.  
University of Michigan (A.B.) Languages:  
French, German, Latin, Greek. Entered service:  
April 20, '00—\$540; November 28, '00—\$600.
- Neel, Elizabeth G., Georgia. \$600 to \$720,  
Order div.  
La Grange College (Wesleyan), Georgia (A.B.)  
Languages: Latin. Entered service: April 19,  
'00—\$600.
- Vass, George O., Idaho. \$600 to \$720.  
Languages: French, German, Latin, Greek. En-  
tered service: July 7, '98—\$360; April 19, '00—  
\$600.
- Goodman, Pearl, West Virginia. \$540 to  
\$720, Copyright.  
McDonald-Ellis School; Robinson Female Sem-  
inary, Exeter, N. H. Languages: French. En-  
tered service: April 27, '00—\$360; December 7,  
'00—\$540.
- Brown, Mary G., Maine. \$540 to \$720.  
Mt. Vernon Seminary. Languages: French.  
Entered service: May 2, '00—\$540.
- Bland, Frances A., Maine. \$540 to \$600,  
Reading room.  
Holy Cross Academy, Washington, D. C. Lan-  
guages: French. Entered service: June 2, '00—  
\$360; June 1, '01—\$540.
- Dorsey, Katherine C., District of Columbia.  
\$540 to \$600, Genealogist.  
Academy of Mt. De Sales. Languages: French,  
Italian, Spanish. Entered service: April 19, '00  
—\$540.
- Solyom, Mary J., Maryland. \$520 to \$600.  
Washington High School, graduate '93; post-  
graduate, '94. Languages: French, German, Latin.  
Entered service: April 20, '00—\$520.
- Wight, F. C., Maine. \$540 to \$600.  
Languages: French, German, Latin. Entered  
service: July 1, '98—\$360; April 19, '00—\$540.
- Hayt, Rosina E., Pennsylvania. \$360 to \$540,  
Columbian University, '98-'99; Columbian Uni-  
versity Library School. Languages: French, Ger-  
man, Latin. Entered service: August 21, '00—  
special; April 1, '01—\$360.
- Jackson, H. C., Maryland. \$360 to \$540.  
Washington Public Schools; Columbian Uni-  
versity; Bureau of American Republics. Type-  
writer. Entered service: August 1, '00—\$360.
- Phelps, Mary W., District of Columbia. \$360  
to \$520.  
Washington High School; Columbian Universi-  
ty. Languages: French, German, Latin. Entered  
service: June 1, '00—\$360.
- Hirth, J. P., District of Columbia. \$360 to  
\$480.  
Washington Public Schools. Languages: French,  
German. Typewriting. Entered service: Novem-  
ber 1, '98—\$360.
- Perry, W. B., South Carolina. \$360 to \$480.  
Public Schools of South Carolina. Typewrit-  
ing. Entered service: July 1, '98—\$360.
- Richard, Vernon I., Pennsylvania. \$360 to  
\$480.  
Public Schools of Washington. Entered ser-  
vice: June 22, '00—\$360.
- Washington, R. B., Virginia. \$360 to \$480.  
Potomac Academy. Entered service: April 21,  
'00—\$360.

## LIBRARY DEPARTMENT, NATIONAL EDUCATIONAL ASSOCIATION.\*

THE fifth annual meeting of the Library Department of the National Educational Association was held in Detroit at the 40th annual convention of the National Educational Association, July 11 and 12.

This meeting was the most satisfactory held in the history of the department. The meetings were more largely attended than ever before. The interest was genuine and helpful, and the papers presented throughout were of a uniformly high character. R. C. Metcalf, district supervisor of public schools in Boston, presided, and opened the meeting on Thursday afternoon with an address on "The library movement and what it means." President Metcalf said in part:

"The general demand for library privileges which has come, is coming, and will continue to come from all classes of our people and from all grades of our schools, plus the response which has come from the libraries themselves, has caused, and may be called, the library movement. Those of us who have seen 50 years or more can easily trace this movement from small beginnings to the present remarkable proportions. The change in public sentiment towards libraries has not been confined to one state or to one section of our country—it has spread throughout the Union, and is now one of the great educational forces of the land.

"Twenty-five years ago I was invited to give an address before the American Library Association, which, at that time, met in Boston. The question assigned was, 'How can the library best serve the schools?' The fact that such a body of men should have invited a schoolmaster to help them formulate a plan by which the public library could serve the schools shows the spirit which even then inspired the work of the librarians of the country. This has always been the spirit of the representatives of our public libraries, and any seeming failures to accomplish all that in reason could be expected must be ascribed to other causes than a lack of inclination on the library side. In fact, I may say here that the greatest obstacle in the way of leading children to read and enjoy the reading of good books, has been those teachers who have little if any real love for good books themselves. The only classes of pupils that I have found in my long experience to be enthusiastic lovers of the best books have been classes in charge of highly cultivated men and women of unquestionable library taste. The libraries have been ready to help; too many of the schools have not been ready to be helped.

"Assuming that a great public library is a great public blessing, we, as representatives of the whole country, ought to be familiar

with the library facilities of the whole country, to the end (1) that the influence of this department may be felt in aid of the establishment of libraries where none are now to be found, and (2) that the character of those now established, but sustaining a precarious and unprofitable existence, may be improved.

"I would again call your attention (1) to the need of information concerning the libraries of the country, and to the work which they are trying to do; (2) to the need of trained assistants in large public libraries and in large public schools, to give help to children and adults in the selection of books, and in marking out courses of reading; (3) to the need of training in library methods in the normal schools of the country; (4) to the need of judicious training of pupils, in public schools, in the reading of books, in order that our children, at an early period of their lives, may become lovers of good literature; and (5) to the criticism, now going the rounds of the public press, that we read too much and think too little."

"The public libraries and the public schools" was the subject of a ringing address from Dr. J. H. Canfield, of Columbia University Library, in which he outlined the rights, privileges and advantages of the public schools, and showed to what extent these same elements belonged to the public libraries. He said in part:

"Individual responsibility is the keynote of American life—political and social; and individual responsibility calls for individual intelligence. The state maintains the public school system through necessity, as an act of self-protection. As the structure of government gives force to public opinion—public opinion must be enlightened.

"Those in charge of public libraries ought to make large and generous provision for:

1. Teachers, as expert workmen on special lines;
2. The immediate work of the child;
3. The work of the child after leaving school—projected along the same lines.

"School authorities and teachers should give special attention to the library work of children: 1. Create reference libraries in the school houses; 2. Direct the children to the public library for supplemental reading; 3. Urge those children who must drop out of school to continue reading on definite lines, the teacher continuing personal and helpful relations as long as possible.

"Do *not* create special or branch libraries in the school buildings. These are only convenient while the pupil is attending school; they tend to withdraw the pupil from the 'library atmosphere,' and they give the pupil little if any acquaintance with the public library as such.

"Do *not* overload the pupil with supplementary reading. Regular work is about all a pupil ought to do. Given: a generation of children who understand the place and value of a public library, and there will be no ques-

\* For this report we are indebted to the courtesy of Miss M. E. Ahern, of *Public Libraries*, Secretary of the Library Department, N. E. A.

tion as to an intelligent and effective citizenship."

Dr. Canfield was followed by C. F. Boyd, president of the State Teachers' Association of Mississippi, who spoke on the condition of educational institutions in the extreme south, and outlined the disadvantages under which the systems are at work. He showed how that section of the country is still laboring under material stress and how the efforts of the people cannot yet be turned aside from the advancing material prosperity to attend to the progress of any considerable amount of intellectual work. The schools of the last decade are measurably in advance of the olden times and the prospect for the future along educational lines, including libraries, museums and art centers, is vastly encouraging, notwithstanding the seemingly slow progress being made.

Miss Irene Warren, librarian of School of Education, University of Chicago, gave an outline of "What the normal schools can do for teachers" from the library side. Miss Warren pointed out the necessity of knowing the full uses of books, various kinds and use of dictionaries, encyclopedias and works of reference with which the teacher should be familiar. She dwelt upon the necessity of knowing something of the mechanical processes of making books, the history of printing, binderies, etc., and also the advantages of knowing the sources of library information and bibliographical aids within the reach of the teacher, geographically and otherwise.

W. I. Fletcher, librarian of Amherst College, as representative of the American Library Association, brought greetings to the Library Department of the National Educational Association, and gave a short talk on "The A B C of reference work." He said: "Only after I had arranged the three heads indicated by these letters in the order of what I regard as their relative importance, did I perceive that it was this suggestive order. (A) stands for Attendant. For it is one of the accepted ideas of the modern library that there must be an attendant ready and competent to meet the readers' questions, and that the reader should go directly to such an attendant rather than be sent to the catalog. (B) refers to the apparatus which we call Bibliography. It may seem strange that I should put this before the catalog if I had in mind anything but mere alphabetical order. But it is my conviction that bibliography belongs first. By this I mean that nothing can be so helpful in looking up reading on a subject as a well-made list of books and papers relating to it. (C) is a double-header—it stands for two things: Classification and Catalog. And here I put classification first, although alphabetical order would be the reverse. I do this because as libraries are being more thoroughly classified, and readers are more often given free access to the shelves, the

classification comes in as a better guide than the catalog.

"As to the catalog, which I have thus pushed into the background, I have but a few words to say. My experience gives me an increasing disrespect for the library catalog as a means of doing the kind of work of which we are speaking. The author-catalog, from which we can learn whether a given book is in the library and where it may be found, is certainly the one essential piece of apparatus. But I have long felt, and often publicly so expressed myself, that our subject-catalogs, do the best we may with them, are of little value compared with bibliographies (using this term in the broad sense in which I have interpreted it), and I think we shall do wisely if we slight them and bend our energies to the development of the bibliographical apparatus and to its intelligent use by readers with the help and guidance of the well-equipped and conscientious and devoted Attendant, whom I thus make the Omega, as I made him (or her) the Alpha of this little talk."

On Thursday afternoon the meeting opened with an address by Miss Isabel Lawrence, training teacher, State Normal School, St. Cloud, Minn., on "How shall children be led to love good books?" Miss Lawrence showed the development of the different attributes of character and pointed out how a child's mind at different stages craves a certain kind of influence. Beginning with the imaginative, trustful period of early childhood, there soon comes the period of wonder stories. She referred to the various signs of development of the different phases of imagination, adventure, history and romance, also pointing out the character of books which will carefully train these faculties in the different periods of development.

Melvil Dewey followed with an interesting talk on "The place of the library in education." Mr. Dewey made a plea for the library to be placed abreast of the school as a co-operative power to carry on the work in the public schools. He classed education in two groups: education of the school and education of the home. Education as a system of schools may be divided into five groups: kindergarten, elementary schools, high schools, colleges and universities where study is the main business in life.

Home education comes in with other matters of living, and is supplemented by means of museums, art galleries, study clubs, libraries, etc. Mr. Dewey insisted that it was better that students come from the school with an appetite for reading—the reading habit—than that any numbers of credits be awarded. Reading is the most important influence in the formation of character. Reflection and judgment grow out of it, and reflection forms the chief difference between the lower animals and man. Instincts, or the habits of animals, are not much in advance of those of earlier stages. Man, however, by the use of his power of reflection progresses forward from the

highest point reached by his predecessor, beginning where others leave off and advancing always beyond the farthest point obtained.

The next paper was presented by Livingstone McCartney, superintendent of schools, Hopkinsville, Ky., on "The library and the school as co-ordinate forces in education." Mr. McCartney pointed out the place of the library and the school by considering the twofold question, How can the library be made more serviceable to the child in the daily performance of his work in the school? and How can the school life of the child be so ordered as to give him the greatest possible command of the contents of good books in his subsequent career?

At the close of Mr. McCartney's paper, the officers for the ensuing year were reported as follows: President, J. H. Canfield, Columbia University, New York City; vice-president, Reuben Post Jallett, Boys' School, Louisville, Ky.; secretary, M. E. Ahern, editor *Public Libraries*, Chicago, Ill.

#### NATIONAL ASSOCIATION OF STATE LIBRARIANS.

THE National Association of State Librarians held its fourth annual meeting at Waukesha, Wis., July 5, 1901, in connection with the conference of the American Library Association. Two sessions were held, and there was a good representative attendance.

The first session was called to order by the president, L. D. Carver, state librarian of Maine, on the afternoon of July 5. The first matter taken up was the adoption of a resolution admitting to active membership in the association state librarians and persons engaged in state library work, state law librarians, and persons engaged in state law library work, librarians of historical societies, and persons engaged in historical society work.

C. B. Galbreath, state librarian of Ohio, read a paper on "Early newspaper literature in Ohio," giving a general view of the early newspaper history of the state, and describing in detail *The Sentinel of the Northwest Territory*, established by Joseph Maxwell in the first years of the last century. He spoke of the difficulty of securing or tracing early newspaper files, and of their very great value as materials of history and social record, basing his remarks upon the experience gained in compiling the record of Ohio newspaper material for the Ohio State Library.

"The Decimal classification in cataloging public documents" was the subject of a paper by Miss Artna Chapin, of the Indiana State Library. Its aim was to show "not only that the Decimal classification may be successfully used with public documents, but that it is in many respects much more satisfactory than the check list"; and it noted in detail the methods, exceptions and adaptations that had been found valuable in applying the D. C. to

a document collection. A paper on "The free distribution of state documents and the limits thereof," by L. D. Carver, was then read by Mrs. Carver, and the two papers were considered in a short general discussion. The great variety of practice now prevailing and the need of more uniform methods in the handling of documents were emphasized. It was suggested that a committee be appointed to investigate the general subject, and recommend measures that should ensure more uniform practice, and such a committee was later named, consisting of W. E. Henry, L. D. Carver, and Mrs. L. E. Howey, of the Montana Historical Library. In regard to difficulties in distribution Mrs. Howey stated that the Montana Historical Library had been unable to secure a set of the house journal of the Montana legislature, the edition of 200 printed being assigned to the members of the incoming and outgoing legislatures, who numbered 96 in each. The work desired of the committee was touched upon by Mr. Henry, who suggested that the committee should review the documents of the different states, select suitable names for the various publications and recommend that this nomenclature be uniformly adopted, so that all persons handling documents may understand what a certain name means, and that it means the same thing in all the states. The measures suggested by this committee might then be recommended to the various state legislatures, and little by little a needed reform might be brought about.

R. G. Thwaites spoke on "The gathering of local history material," setting forth the importance to the historian of the ephemeral literature of the period he desires to present, and urging that the state library should be the natural center for the preservation of local history material. In the discussion which followed, the collection of photographs was touched upon, and Mr. Thwaites said that the Wisconsin Historical Society possessed a large collection of photographs of persons and places associated with western history, classified and cataloged and constantly augmented. The question was asked how these ideals as to local collections could be pursued in the case of institutions hampered by insufficient quarters and lack of funds. In reply Mr. Henry said: "In Indiana, we have comparatively limited quarters and positively limited means; but I imagine that if the state librarian of Indiana, since 1865, had been collecting everything in sight and trying to get in sight of everything he ought to collect, we should have had a sentiment in the state that would have given us a half million dollars, as has been given in Wisconsin."

The second session was opened in the evening, with a paper on "State librarians, their duties and powers relative to library commissions and free libraries," by Dr. G. E. Reed, state librarian of Pennsylvania, which in Dr. Reed's absence was read by H. R. Hartwick.

of the Pennsylvania State Library. Johnson Brigham, state librarian of Iowa, followed with a short address on the question "Should the state loan books from its reference library; and if so on what conditions and under what limitations?" Mr. Brigham began by rallying his friend and brother state librarian of Indiana on his conservatism, declaring that, as Mr. Henry views it, the state librarian is little more than the custodian of the law library and document clerk for the legislative and executive departments, whereas he should be a state librarian in fact as in name, ministering to the intellectual wants and necessities of citizens everywhere throughout the state. He then gave in detail his own experience in organizing a special loan branch of his library and showed how much might be done without an extra appropriation, using duplicates and earlier and less satisfactory editions as a basis, and by simple and easy methods swelling the duplicate list of the more desirable working books and periodicals. The cheapness of second-hand periodicals—as for example a set of *Harper's*, mostly bound, but worn, at 16 cents a volume—enables the librarian, with a very little money, to meet a large number of the calls for help. But the special loan branch of the Iowa State Library has already passed on beyond the day of small things. Besides the duplicates, the less desirable editions, and the thousands of books on the shelves of the state library which he is permitted to loan at his discretion, he has already acquired by purchase about 2000 volumes which are set apart and directly subject to the call of colleges, schools, clubs and individuals. "Iowa's answer to the question under consideration is therefore: The state should go just as far in the loaning of books from its reference library as the field of thought and research can practically be extended without crippling its own reference library."

Mr. Henry opened the discussion by stating that he and Mr. Brigham were evidently at one in the opinion that the state library should not loan books from its permanent reference collection. He said: "I would be perfectly willing, if I had the money and room to do it, to have a lending collection. But it would not do to disintegrate a reference library by sending out its books on loan to the people. In Indiana we have neither money nor room nor force to sustain a separate library for the purpose of lending." He added that the law regulating the Indiana State Library provided for a fine of \$25 to be levied on the librarian for permitting a book to be removed from the library. An effort was recently made to amend this law, and permit the lending of books not in demand for reference or other use, but the measure was defeated. Hon. C. H. Luce spoke upon the work of the Michigan State Library Commission, of which he is president, dwelling especially upon the great popularity and usefulness of the travelling libraries department; and Mr. Dewey followed

with a vigorous argument for the greatest possible freedom in the use of the state collection. He said in part: "I feel strongly on this question of lending books from the state library. We have had a large experience in this. It is growing all the while, and I have no doubt in my mind that we have got to revise our ideas very largely as to the functions of the state library. When Mr. Henry told us of his law in Indiana, it reminded me of the Middle Ages, when they were in the habit of making a fetish of books, but the modern book does not deserve anything of that kind. It is made for use. The fear that a book that may be called for shall be out of the building should be nothing to the librarian. Of course certain rare books should be preserved and passed on to posterity. That is an interesting function, but ought to be kept entirely distinct. I would not send out a first folio Shakespeare, but books that can be replaced for a trifling sum ought to be loaned freely. The state is coming at the beginning of this century to understand that the library is just as essential to its safety and its welfare and its material prosperity as its school system. We have got to readjust our point of view until it is not a question of paying five or ten thousand dollars a year to support a state library, but the states have got to face enormous expenditure for libraries, because it will pay." Mr. Galbreath spoke of the travelling library work of the Ohio State Library, and referred to the similar work done in Indiana through the state library commission, of which the state librarian is *ex officio* secretary. Mr. Carver said that in Maine books were freely loaned from the state library, on request, with no requirement of deposit, and that no losses resulted.

The last subject presented was the need of a uniform law regarding the publication of the session laws of the different states, which was set forth in a paper by R. H. Whitten, of the New York State Library. In accordance with his suggestions, a committee, consisting of Mr. Whitten, Mr. Galbreath, and Mr. Brigham, was appointed by the chair to consider and report upon the general subject. It was also voted to amend the resolution defining qualifications for membership in the association, to admit persons engaged in national and state documentary work. The resolution, as finally adopted, provides that "any person officially connected with state library work in any of its phases is eligible to membership." It was also voted that *Public Libraries* should be adopted as the official organ of the association, and that the executive committee be authorized to settle place and date of the next meeting of the association. Officers for the ensuing year were elected as follows: President, W. E. Henry, Indiana State Library; vice-presidents, George S. Godard, Connecticut State Library, Johnson Brigham, Iowa State Library; secretary, Miss Maude Thayer, Illinois State Library.

## American Library Association.

*President:* Dr. John S. Billings, Public Library, New York City.

*Secretary:* F. W. Faxon, 108 Glenway St., Dorchester, Mass.

*Treasurer:* Gardner M. Jones, Public Library, Salem, Mass.

*TWENTY-THIRD GENERAL MEETING, WAUKESHA, WIS., JULY 3-10, 1901.*

The 23d conference of the American Library Association was held at Waukesha, Wisconsin, during the week July 3-10. In attendance and activity it ranks among the largest of these annual meetings, standing only second to the Chautauqua conference of 1898, and slightly exceeding in numbers the Montreal meeting of 1900. Heat and distance it had been feared would somewhat reduce representation, but an attendance of 454 was registered, while among the states represented were Tennessee and Georgia, Maine, Vermont, New Hampshire, Idaho, Iowa, Nebraska and California. Wisconsin, of course, furnished a large delegation, and gave an object lesson in library aims and methods that must long be an inspiration to many. The program followed the tendency of recent years in combining with a few general sessions a variety of special sections and separate meetings or "round table" conferences. Many of the state library associations held short business or social meetings. There were reunions of library schools and library school alumni, meetings of the Council, of the Publishing Board and of special sections and committees, while the National Association of State Librarians held its annual meeting jointly with that of the Library Association, and the National Educational Association, in convention at Detroit, closed the library program with the annual session of its Library Department. If the activity and variety of these varied interests proved bewildering to the ordinary mortal, unable to resolve himself into "three gentlemen at once," they nevertheless went to show the remarkable degree in which library work to-day has developed and specialized into diverse yet related fields.

The meeting place was the large Fountain Spring Hotel, which possessed the advantage of housing all members as nearly as possible under one roof. Most of the delegates arrived in the afternoon or evening of July 3, and Thursday, "the Fourth," was kept free from general sessions, although meetings of the A. L. A. Council and special committees were held in the morning, and in the afternoon the Wisconsin State Library Association, the Illinois Library Association, and the Bibliographical Society of Chicago held special meetings.

The first general session was the public meeting, held on Thursday evening in the Methodist Church, where the Association was formally welcomed to Waukesha, the president's annual address was delivered, and the

question "What may be done for libraries" was presented by three speakers. President Carr had chosen as the theme of his address "Being a librarian." He claimed for librarianship not only that it was a profession, but that it was really the profession of professions, since almost every other calling depended upon it for the safe and wise custodianship of its literature; and he made an earnest presentation of the ideals and enthusiasm that inspire library endeavor and that are among the best rewards of the library worker.

The topic "What may be done for libraries" enlisted three speakers, Thomas L. Montgomery responding for the city, Dr. E. A. Birge for the state, and Herbert Putnam for the nation. As part of the duty of the city Mr. Montgomery held that an adequate and substantial building should be provided, and that care and discrimination should be used in the appointment of library boards. He believed also that the city should insist upon the library's remaining an educational institution, and criticised the tendency to supply the current extraordinary demand for light fiction, by large quantities of duplicates, referring to the commercial "Book Lovers' Library" as a means by which in time public libraries will be relieved of the necessity of supplying the public with popular fiction, leaving them free to use the money for the collection of more stable works.

Dr. Birge, acting president of the University of Wisconsin, in speaking of the work the state may do in the support of libraries, divided the field into three parts, treating first what the state may do directly in the establishment and maintenance of libraries; second, what may be done in making laws supporting and governing city and village libraries; and third, what may be done through state library commissions, their value as directing powers and in assisting by various means the smaller libraries throughout the state. Under the work of the commission came the travelling libraries, which he thought above all other means work to bring peace and content, as well as intellectual light, to the rural population.

Herbert Putnam spoke for the work and plans of the Library of Congress, as evidence of what the nation may do to aid libraries. He touched upon the functions of the library as a center of American bibliography and research, in furnishing a collection of books universal in scope, in cataloging its accessions on printed cards which should be available in other libraries, and lending desired books to other libraries. "The Library of Congress," he said, "is now primarily a reference library. But if there be any citizen who thinks that it should never lend a book to another library, when the book can be spared from Washington and is not a book within the proper duty of the local library to supply; if there be any citizen who thinks that for the national library to lend under these circumstances would

be a misuse of its resources and, therefore, an abuse of trust, he had better speak quickly or he may be too late."

The first business session of the conference opened on Friday morning, July 5, in the Fountain House assembly room. It was devoted to the usual presentation of standing and special reports. F. W. Faxon, secretary, reported 225 new members, "the largest year's increase in the history of the A. L. A." Mr. Jones, in his treasurer's report, showed for Jan.-Dec., 1900, receipts of \$209.39; expenses \$1721.79; balance \$307.60; and for the six months following, receipts \$1650; expenses \$781.32; balance \$1176.28. The necrology included seven names. Other reports presented were for the trustees of the endowment fund, by C. C. Soule; the Co-operation Committee, Committee on Foreign Documents, Committee on Title-pages to Periodicals, by W. I. Fletcher, and the Committee on International Catalogue of Scientific Literature. A brief tribute to the memory of the late John Fiske, whose sudden death came as a shock to the Association, was paid by Dr. J. K. Hosmer, and a committee of Dr. Hosmer, R. G. Thwaites and George Iles, was appointed to draft suitable memorial resolutions.

In the afternoon the National Association of State Librarians and the Children's Librarians Section of the A. L. A. held simultaneous meetings. In the Children's Section Miss Stearns, in the absence of Miss Annie Carroll Moore, acted as chairman, and the general subject, presented in various papers, was books for young people and the standards to be adopted in their selection and critical judgment. The program comprised papers on "Book reviews, lists and articles on children's reading," by Miss C. M. Hewins, and on "The books themselves," Miss Winifred Taylor speaking for fiction, Miss Abby Sargent for fairy tales, Miss Ella Holmes for books of science. In the absence of the writers each paper was read by proxy. Each paper was briefly discussed by an assigned speaker, but time was too short to allow as full consideration of the various points as had been desired. The feeling of all the speakers seemed to be that current children's literature at present was likely to be crude, artificial or unreliable, and that the children's librarian needed to develop knowledge of books and critical appreciation of literary form. The entire program arranged for the first session of this section could not be covered in the time allotted, but was carried over to the second session of Saturday afternoon. In this second session the subjects presented included methods of reference work, especially with school children, general arrangements in opening a children's room, bulletin work, and means of vitalizing the connection between the library and the school. Papers were practical and the discussions as a rule helpful and to the point, and the section seems to have entered upon a needed and useful work. As a result of its establishment, it was decided

to merge into the section the former Club of Children's Librarians, originally organized for the consideration of the work now handled through the section; and it was also decided to carry through the preparation of an annotated list of children's books, to be edited by Miss Linda A. Eastman, of the Cleveland Public Library.

Friday evening was largely given over to reunion dinners, notable among them being those of the New York State, Illinois, and Pratt Institute Library schools, and the Wisconsin Summer School. Later the National Association of State Librarians held their second session.

For the general session on Saturday morning the presentation of reports was continued, including those on public documents; on handbook of American libraries, said to be well advanced toward completion; on co-operation with the National Educational Association; on international co-operation, including a scheme for uniform book statistics; and on library training. Two papers were read: by William Beer, on "Collection and cataloging of early newspapers," and by Dr. G. E. Wire, on "Some principles of book and picture selection." In the afternoon, in addition to the second session of the Children's Librarians' Section, there were meetings of the Trustees' Section, where library architecture was the main subject, and of the College and Reference Section, which was marked by the animated and practical discussion of departmental library methods and experiences. In the Trustees' Section Deloraine P. Corey, of Malden, Mass., was elected chairman for the ensuing year, and Thomas L. Montgomery was re-elected secretary; in the College and Reference Section A. S. Root, of Oberlin, was elected chairman, and Walter W. Smith, of the University of Wisconsin, secretary.

Sunday broke the rush of business with a welcome day of rest. Most of the delegates visited Milwaukee, where they were hospitably received at the fine library building, and examined with interest its facilities and arrangements, while in the evening a concert was tendered to the delegates at Bethesda Spring Park, in Waukesha, through the courtesy of Senator A. M. Jones.

Monday was "Madison day," being devoted to a visit to the university city and an inspection of the beautiful library building of the State Historical Society. Here a charming welcome was extended; carriages were in readiness, in which the three hundred and more guests were driven about the city; and later luncheon was served in the great university gymnasium. The exercises for the day followed, in library hall, where Miss Mary W. Plummer gave a short comparative survey of "European and American libraries," and Dr. J. K. Hosmer read an amusing fable, entitled "From the readers' point of view—and the era of the placard," in which he touched with caustic satire upon the present-day "booming" of books. The visit to the

beautiful structure of the Historical Society was next in order; visits were also made by many to the rooms of the State Library Commission in the capitol, where an informal reception was held; a group photograph was taken on the steps of the Historical Society building; and return to Waukesha was made before dark, where the evening closed with a reception tendered by the Waukesha federation of women's clubs.

Tuesday morning's session proved perhaps the most interesting occasion of the conference. The report on gifts and bequests, prepared by George Watson Cole, was distributed in printed form and read by title. It showed total gifts to libraries during the past year of \$16,000,000, of which \$11,000,000 were given by Andrew Carnegie. The report of the Publishing Board was read by W. I. Fletcher, and the subject of co-operative printed catalog cards was brought up by several members of the board. It was announced that the issue of such cards for general library use would be undertaken by the Library of Congress, and Mr. Putnam briefly outlined the plan under consideration. The by-laws adopted by the council, in conformity with the constitution, were read, and the committee on memorial to John Fiske presented a minute, expressing on behalf of the American Library Association its "profound grief at the departure of a writer who was a dominant force in American literature," and its sense "that in this passing of a great thinker, historian and spiritual leader our land and our time have sustained irreparable loss." "Book copyright" was the first paper on the program, and in the absence of Thorvald Solberg, Register of Copyrights, Mr. Solberg's careful and thorough presentation of copyright conditions was read by J. C. Hanson, chief of the Catalogue Division, Library of Congress.

"The trusteeship of literature" was the title under which George Iles presented an extension of his favorite plan for the "appraisal" of literature. His paper was a plea for the establishment of a central bureau of appraisal of literature. Such work, he felt, required a home, a central bureau, with a permanent and adequately-paid staff of editors and assistants. The training of such a staff is begun in the instruction now being given in advanced bibliography at the New York State Library school at Albany. Much more should be done than to bring books to these critical balances. Within the functions of such a bureau were co-operative cataloging, the issue of elementary and special "library tracts," an exhibition of material to inform the founder of a public library, and information for legislators. To found and endow such a bureau would be costly, but it was thought that funds might be expected from the same sources of generosity and appreciation which have given us so many of our libraries.

A strong note of dissent to the principles set forth by Mr. Iles was sounded, in a sec-

ond paper on the subject, by Dr. Richard T. Ely, director of the School of Economics of the University of Wisconsin, who considered the theories involved extremely dangerous and a menace to the progress of science. Granting the general need, by librarians, of assistance in the selection of books, and admitting the harm which comes from the reading of "crank" literature in economics and science, Dr. Ely believed that the magnitude of the interests involved required conservative action. "Have we," he asked, "a judicial body of men who could render these estimates?" So far as contemporary literature is concerned, he answered emphatically "No." He called attention to the frequent narrowness and prejudice of book reviewers. The personal element in the matter of reviews should be considered, and the absence of an objective standard was a further objection. For years we had been struggling for freedom of thought, learning and science. This proposal was an attack on liberty, a proposal to establish an *index librorum prohibitorum* and an *index expurgatorius*. Above all things, effort should be to keep a free way for new truth.

There was short but animated discussion, Mr. Putnam, in particular, setting forth concisely the distinction between "selection" and "exclusion" which librarians especially are called upon to observe, and pointing out the great practical benefits in this direction of such a scheme as that advocated by Mr. Iles.

"The relationship of publishers, booksellers and libraries" was presented by Millard W. Palmer, of Grand Rapids, Mich., in a paper, and by R. R. Bowker, in a short talk. It was practically an outline of the plans adopted for the regulation of trade discounts by the American Publishers' Association, referring to their effects upon library purchases. Both speakers were in sympathy with the movement for reform in the book trade, and urged libraries to support it so far as lay in their power. As a result of the discussion, it was recommended that a committee be appointed to consider and report further on the subject.

Simultaneous meetings, committee sessions, and "round table" discussions made up the further conference record. The work of travelling libraries, especially in Wisconsin, was earnestly presented by Mr. Hutchins, and the short session given to this subject was remarkable in its elicitation of touching and interesting experiences. Under direction of Melvil Dewey, a round table meeting was held to consider the work of state library commissions, including travelling libraries; the Catalog Section in animated informal discussion considered technical details regarding rules for printed catalog cards; the A. L. A. council held sessions; an exhibit of lantern slides of library buildings was shown by W. R. Eastman on Tuesday evening; there was an "Elementary institute," in which short talks were given by Mr. Dewey, Mr. Brett, Miss

Countryman and others; a round table meeting for considering the work of state library associations and women's clubs in advancing library interests was held under the direction of Miss Marilla Freeman, and proved most stimulating to a large audience; and there was an interesting meeting dealing with the question of professional instruction in bibliography, conducted by A. G. S. Josephson, of the John Crerar Library.

The polls were open for the election of officers on Tuesday evening, and on Wednesday morning a short final general session was held, when the result of the election was announced as follows: *President*: Dr. John S. Billings; *1st vice-president*: Dr. J. K. Hosmer; *2d vice-president*: Miss Electra Doren; *Secretary*: F. W. Faxon; *Treasurer*: Gardner M. Jones; *Recorder*: Miss Helen E. Haines; *Trustee of endowment fund*: C. C. Soule; *Members of Council*: Mary E. Ahern, E. H. Anderson, Johnson Brigham, John Thomson, H. M. Utley. At this session the committee on resolutions presented its report, acknowledging the many courtesies extended to the Association, and after its adoption by a rising vote, the president in a few appropriate words declared adjournment. Sessions of sections and special meetings, as noted, filled the remainder of the day, but by evening the delegates had scattered, some to attend the educational convention in Detroit, others to return directly east or west, and others to share in a homeward trip through the lakes to Buffalo, with a day or two at the Pan-American Exposition. The lake trip was taken by about 50, and it came as a restful and delightful change after a meeting that will be remembered as one of the busiest and most varied in the records of the Library Association.

#### CONFERENCE NOTES.

ONE of the most interesting of the smaller meetings of the conference was that held by the Wisconsin Library Association on July 4. Its keynote was a desire to secure better library facilities for the rural population, and as a special means to this end a vigorous campaign has been begun to permit the delivery of library books by rural mail carriers. A bill amending the postal regulations to permit such library delivery will be introduced in the next Congress by Congressman Jenkins, of Wisconsin. The improvement of existing postal regulations, as relating to library books, received, indeed, considerable attention at several of the meetings, and a committee was appointed by the A. L. A. Council to consider express and postal rates on library books, with a view to securing lower rates and better facilities for the transportation of travelling libraries and other book parcels from libraries.

THE conditions of the conference gave unusual opportunities for small special meetings of a few persons interested in some certain phase of library work. As an example, six or eight librarians from smaller cities which

have recently received Carnegie gifts met for luncheon together, armed with plans and outlines of their proposed buildings, and, between courses, talked over individual problems and experiences. Similar meetings were held by four or five interested in a special branch of cataloging; bibliographical workers met informally to compare methods, and these group conferences were felt by many to be among the most directly useful features of the convention.

As usual, a special conference badge was distributed. It was a medal, about the size of a silver dollar, bearing the arms of Wisconsin on the reverse, and the device of an Indian at a spring on the obverse, and suspended by a red ribbon from a clasp in the form of a badger. Among other souvenirs of the meeting was an artistic booklet describing the beautiful Wisconsin State Historical Society building, with numerous illustrations, which was prepared by the Art Metal Construction Co. and distributed in honor of "Madison day"; and an attractive special edition of Walter Bagehot's essay on "Shakespeare the man," privately published for distribution at the meeting by McClure, Phillips & Co., New York. Of the latter a few extra copies remain, which the publishers will be glad to send, on request, to librarians who were unable to attend the convention.

"EXHIBIT" features of the meeting were interesting, though no special efforts had been made in this direction. The travelling library systems of several states were represented by specimen cases, the Wisconsin display being naturally the strongest, and including many striking photographs of the "backwoods" regions into which the little libraries have brought their inspiration. Bulletin work was shown from various libraries, for adults and children, noteworthy in this direction being the several bulletins from Drexel Institute; there were sets of blanks, forms and reports; and numerous trade exhibits. The Cincinnati Public Library had engaged a room for its display, which included many handsome photographs, with catalogs, reports and records.

#### State Library Commissions.

IDAHO LIBRARY COMMISSION: Mrs. E. J. Dockery, secretary, Boise City.

The new commission has begun its work by buying 500 books to be divided into 10 sections or travelling libraries. They are now being prepared by Mrs. Dockery, secretary of the commission. The libraries selected have been in the proportion of one-third fiction, one-third juvenile, and the balance biographical, historical and miscellaneous, including works on irrigation, dairy farming, home work, zoölogy, and related subjects. In addition to these travelling libraries the commission intends to assist the people of the state in their general reading in other ways.

Most important of these is the privilege granted to private individuals to take books direct from the commission in Boisé City without the intervention of any local library. This will throw open the reference collection in the Boisé City Public Library, the best in the state, permitting borrowers, upon nominal conditions, to call for books and retain them for a week at a time, paying transportation charges amounting to about 25 cents.

NEW YORK: PUBLIC LIBRARIES DIVISION.  
Melvil Dewey, director, Albany, N. Y.

The annual report of the Public Libraries Division for the year ending Sept. 30, 1900, has appeared, bearing date of May, 1901, as Bulletin 38 of the Home Education Department, University of the State of New York. There are 175 libraries reported as under university inspection, containing 606,332 v. and having a circulation of 2,182,154; 86 libraries are registered as "maintaining a proper standard"; and 141 libraries in 43 counties were visited by the state inspector, W. R. Eastman, and his assistants during the year. The total number of libraries reported is 1035, an increase of 50 over the preceding year. "The increase in the class of public libraries is 58. Libraries supported wholly or in part by local taxation are 641, or 61 more than in 1899. Those receiving state aid in some form are 778, or 71 more than last year. The free lending libraries are 460, a gain of 29. These free lending libraries added 207,806 volumes and increased their circulation 1,056,918, an average daily advance of 2895. The total free circulation in the state was 8,452,445, an average of 23,157 daily, 387 for each 100 volumes in those libraries and 1163 for each 1000 of the population."

Summarized reports from various libraries as to new buildings, administrative changes, etc., are given; and there is the usual full tabulated record of library statistics. Other subjects reported upon are the A. L. A. exhibit prepared by the New York State Library for the Paris Exposition; the various library association and club meetings, and meetings of N. E. A. Library Section and National Association of State Librarians; travelling libraries, rural library extension and library insurance.

NEW HAMPSHIRE LIBRARY COMMISSION: A.  
H. Chase, secretary, State Library, Concord.

The *Bulletin* of the commission for June contains several excellent practical papers, chief among them being Henry J. Carr's "Office suggestions for small libraries," which gives hints for filing correspondence, keeping pamphlets, clippings and notes. "Rural house-to-house delivery of books" is outlined by Sam Walter Foss, and under the title "Books for New Hampshire ministers" Rev. G. A. Jackson describes the work of sending theological books to isolated clergymen, as carried on from the General Theological Library of Boston.

## State Library Associations.

### MASSACHUSETTS LIBRARY CLUB.

*President:* H. C. Wellman, Public Library, Brookline.

*Secretary:* G. E. Nutting, Public Library, Fitchburg.

*Treasurer:* Miss Theodosia Macurdy, Public Library, Boston.

The annual meeting of the Massachusetts Library Club was held on Wednesday, June 12, at Methuen in the Nevins Memorial Library.

After the word of welcome from Hon. Joseph S. Howe, trustee of the library, the subject of the morning, "The library and the child," was opened by Miss Mabel Temple, of North Adams. She treated of general work with children, describing the work done through a summer club in directing the children's reading. She told of the select library of children's books, which has already been mentioned in the *LIBRARY JOURNAL*, and of the nature talks given in the children's room on birds and flowers.

Mrs. M. A. Sanders, of Pawtucket, spoke of children as the link between the library and the home, and the librarian as the "Mother of the multitude."

Mrs. M. E. Root, children's librarian at Providence, told of the work done with schools as carried out in Providence. To induce teachers to come to the library, 2000 school duplicates are placed on open shelves in the children's room, and each teacher may take 10 books at a time for supplementary class readers or to recharge to the pupils. One of the special features of the Providence library is the class room adjoining the children's room, which is at the disposal of a class for any grade whatever. For such classes books, pictures, maps, applicable to the subject to be treated, are placed on the shelves. The result is that children learn to use the library who have never before been cardholders. The class room is also used for exhibiting pictures. Interest in nature study is also increased by the duplicate books on birds and flowers kept in the room.

Mr. H. C. Wellman, of Brookline, dealt with the reference work with schools; that is, the work done which deals with books as sources of information. He considered it the duty of the librarian to teach that the library is the source of self-education and to teach how to acquire knowledge. In Brookline the children's reference room consists of a collection of about 2000 volumes of collateral material to be used with the topical method of teaching and to train the sense of discrimination. He called attention to the importance of knowing the sequence of the alphabet. Class instruction has been given to the 8th and 9th grades in the library, the lectures treating of (1) the make-up of the book; (2) the bibliographical side, *i.e.*, the title-page, author's name, publisher, copyright, contents, index, and preface; (3) the general reference books; (4) with the 9th grade, introduction to the

card catalog, the A. L. A. index, "Poole's index," etc., with quizzes at the end of the lesson. Subjects were assigned to the child, who was required to find all he could in the reference collection.

Following the reports of the secretary and treasurer the following officers were elected for the coming year: president, H. C. Wellman, Brookline Public Library; vice-presidents, Clarence W. Ayer, Brockton Public Library; Miss Nellie L. Fox, Morse Institute, Natick, secretary, G. E. Nutting, Fitchburg Public Library; treasurer, Miss Theodosia E. Macurdy; recorder, Miss Nina E. Browne.

Mr. G. M. Jones told of the plans for the A. L. A. meeting. Upon motion of Mr. W. H. Tillinghast it was voted that the Massachusetts Library Club should extend to the A. L. A. an invitation to hold the 1902 meeting of the A. L. A. on the New England coast in the vicinity of Boston, and Mr. Fletcher was chosen delegate to present the invitation of the club to the council.

After luncheon, which was served in the house of Mrs. Nevins, the afternoon was devoted to seeing the points of interest in Methuen and visiting the Lawrence Public Library.

#### MISSOURI LIBRARY ASSOCIATION.

*President:* F. M. Crunden, Public Library, St. Louis.

*Secretary-Treasurer:* J. T. Gerould, University of Missouri, Columbia.

An informal meeting of the Missouri Library Association was held at the Fountain Spring House at Waukesha on the afternoon of July 4. About 15 members were present, including all but one of the executive committee.

The matter of the proposed state library commission was discussed and a program of education agreed upon in preparation for the next General Assembly.

Mr. Gerould, of the state university, announced that one of the forthcoming bulletins of the university would probably be devoted to the extension of library interests in the state. After some discussion, it was agreed, tentatively, that the next annual meeting of the association should be held in Kansas City, Mo., on the 24th and 25th of October, and that an effort should be made to secure the co-operation of the neighboring states in the program of the meeting.

J. T. GEROULD, *Secretary.*

#### NEW HAMPSHIRE LIBRARY ASSOCIATION.

*President:* Miss Grace Blanchard, Public Library, Concord.

*Secretary:* H. W. Denio, State Library, Concord.

*Treasurer:* Miss Bessie I. Parker, Public Library, Dover.

The semi-annual meeting of the New Hampshire Library Association was held in Peterborough, N. H., June 27. It had been the de-

sire of the librarians of the state for some time to meet in the home of the earliest free public library, and this year the desire has been gratified. Two sessions were held, one in the afternoon and one in the evening, and a goodly number were in attendance at each session. Mr. Ezra M. Smith, one of the selectmen, and Mr. John M. Brennan, a member of the local library committee and also of the state library commission, gave the words of welcome. The point was made, incidentally, by Mr. Brennan that in determining which was the earliest free public library it is necessary that a library should be supported by the public as well as to be used by it freely in order that it could claim to be a free public library.

The program was taken up by Mr. C. Edward Wright, of Whitefield, by introducing the topic of "The passing of the age limit." He called attention to the fact that where an age limit existed it was frequently avoided by the child getting his desired books from the library by using his parents' cards, so that the intent of the rule was annulled. The age limit in New Hampshire was very plainly being lowered. He advocated abolishing the rule entirely on the ground that so many children, perhaps the majority according to one authority, left school at the age of 12 and that unless they acquired the reading habit before leaving school they never would.

Under the topic of "What up-to-date features can a small, poor library have," one and another mentioned the following: Gather local matter concerning the library, the local institutions, the town. Make bulletins or placards of authors' pictures, adding lists of their books in the library. Use the illustrated paper covers of new books in the same way. Have a vase of flowers on the desk or reading table. Display the books relating to the holidays of the year in their season. Use the two-card system, so that every one can have two books at the same time. Give access to shelves as much as practicable. Have book lists printed by local papers. Display new books. Put up a conspicuous sign on the outside of the building. Have an open shelf for boys' books and another for girls' books near by.

Next was the discussion as to whether the library's rules should be elastic, or as the program put it, "Should the borrower's point of view—I do not ask that the rules be broken for me, but it is a poor rule that is not a little elastic—be the librarian's point of view." It was the evident opinion of the meeting that the rules generally should be elastic, with the exception of the one relating to fines. That one should be carried out impartially.

Miss Mary Morison read a paper on the "Selection of books for libraries," which was most interesting and suggestive.

The remainder of the evening was largely given to discussing the "Standard library" as maintained by Mr. Foster, of the Providence Public Library. The list of authors which he has selected for this library was written on a

blackboard and displayed in a convenient place. Selections from a series of articles which had appeared in a New York paper on this library were read and discussed. Miss Macurdy, of the Boston Public Library, gave a brief description of the work in the Order Department of that library, and Miss Chandler, librarian of the Lancaster (Mass.) Public Library, spoke of the work of the Woman's Education Association of Boston.

After the afternoon session the visitors were given a delightful drive of two miles out to the home of Mr. George S. and Miss Mary Morison. They were entertained here most hospitably in a spacious house. A sprinkling of the town's people added to the pleasure of all. The party returned to town by a different route, and thus the beautiful valleys and hills of the surrounding country were shown to good advantage.

---

### Library Clubs.

---

#### BIBLIOGRAPHICAL SOCIETY OF CHICAGO.

*President:* Camillo von Klenze, University of Chicago.

*Secretary:* A. G. S. Josephson, John Crerar Library.

*Treasurer:* C. B. Roden, Public Library.

A meeting of such resident and non-resident members of the Bibliographical Society of Chicago as were in attendance on the A. L. A. convention met at the Fountain House, Waukesha, on the afternoon of July 4. Mr. C. W. Andrews presided.

Mr. John Thomson, of Philadelphia, who was unable to be present, had sent a paper on "A Bibliographical Society of America," which was read by Mr. C. B. Roden. Mr. Thomson's paper was a plea for the development of the Bibliographical Society into a body of more national scope. He recommended engaging the services "at some (to be agreed upon) headquarters of a certain number of *ex officio* and one or two paid officers, whose duty it should be to collect copies of all current and, as circumstances permit, past bibliographical works.

"Though the society when established could not hope to have the general reputation of such societies as the Rowfant, Caxton, Grolier and Philobiblon, it would need but a few years' steady work to make the 'Bibliographical Society of America' an important and highly valued institution. The best way to start would be to extend the borders and widen the scope of the Bibliographical Society of Chicago, and undertake some scheme which will secure the interest of persons widely scattered. Each great city should have its local center or committee, and all these local centers should concentrate their work in the national society. Whilst it might be undesirable to try to concentrate a national interest in a Chicago, Boston, New York or San Francisco institution, the centralization

of the work might be begun by making the Library of Congress the hub of the scheme. A first annual meeting could be held at Washington, and afterwards in various convenient places, but at whatever place the national center is to be fixed, thitherwards it should be the duty and interest of every local center to collect and bring together every book on bibliography that could be procured, and there should be deposited every item of bibliographical work executed by the different centers. I cannot but think that there are many university libraries, many public libraries, and even some private library owners who would be glad to assist in the development of so important an undertaking. When books are published, whether it is considered a hardship or not, copies are deposited in certain national collections, and though such a bibliographical society as is now being considered could not compel the deposit of publications within the lines of its interest, it is impossible to doubt that it would be a pleasure and a pride to editors and compilers of bibliographical lists to have their works deposited in some such center as I am pleading for. It would probably be no difficult matter to procure suitable headquarters by purchasing a house on bonds issued to the members, the house to be maintained at a moderate cost, as are the headquarters of the Rowfant, Grolier and Philobiblon Clubs. The importance of the matter is such that it should be thoroughly considered before it is put on one side as impracticable. I believe it can be done, and I respectfully submit the suggestion for the consideration of the Bibliographical Society of Chicago, with the full assurance that it will receive careful consideration."

An informal discussion followed. Mr. Beer recommended a union list of bibliographies in American libraries, supplemented by a collection of such bibliographies as are nowhere to be found.

Mr. Fletcher pointed out that the fine collection of bibliographical works now being made at the Library of Congress would before long be accessible for loans to all parts of the country.

Mr. Josephson suggested that local societies be formed, and that the non-resident members be charged with forming such societies in their home cities, to be united through a national council.

It was pointed out, however, that a great many people who might be interested in joining a national society live scattered in places where local societies could not be formed.

Mr. Andrews thought the better plan would be for the Chicago society to go on a year or so longer and issue a couple of creditable publications, thereby proving its reason for existence, and drawing more non-resident members to its ranks. At the moment when these outnumber the resident members it would be in order to change the name and organization of the society, and enlarge plans and field of work.

On motion of Mr. Fletcher, it was voted that the chair appoint a committee of three resident members to consider Mr. Thomson's suggestions, and to report at a similar meeting to be held in connection with the next meeting of the A. L. A.

Mr. Beer moved, and it was voted, that the council be asked to consider the advisability of and to take steps towards the compilation of a union list of bibliographies in leading American libraries.

AKSEL G. S. JOSEPHSON, *Secretary*.

*EASTERN MAINE LIBRARY CLUB.*

*President:* Ralph K. Jones, University of Maine, Orono.

*Secretary-Treasurer:* J. H. Winchester, Stewart Free Library, Corinna.

The Eastern Maine Library Club held its second meeting on Friday, June 21, in the Y. M. C. A. building, Bangor. There was a good attendance and much interest shown in the papers and the discussions following each one.

The meeting was opened by an address of welcome by Mr. Samuel L. Boardman, president of the De Burians Book Club, response being made by Mr. J. H. Winchester, of the Stewart Free Library, Corinna.

Mrs. Kate C. Estabrook, representing the Maine Library Commission, read a paper on "Woman's clubs as an aid to a library." The second paper on "Aids to librarians," was by Mr. Ralph K. Jones, librarian of the University of Maine. Beginning with the definition that "a librarian is a man or a woman who is supposed to know everything in books and everything about books," Mr. Jones suggested various books and library devices which would help the librarian, and would prevent the public from discovering that librarians are not infallible. At the afternoon session charging systems were described by Mrs. Lizzie S. Springhal, librarian of the Dexter Library, followed by Mrs. L. D. Carver, who spoke of the ideal village library and what it should contain. The last paper, by Mr. Ernest W. Emery, assistant librarian of the Maine State Library, on "The public libraries of Maine," was of general as well as local interest in giving the history and progress of the public library movement in Maine.

*WESTERN MASSACHUSETTS LIBRARY CLUB.*

*President:* W. I. Fletcher, College Library, Amherst.

*Secretary:* Miss Ida F. Farrar, City Library, Springfield.

*Treasurer:* Mrs. A. J. Hawks, Meekins Memorial Library, Williamsburg.

Northfield gave the Western Massachusetts Library Club a very warm reception (mercury 85° in the shade) on the occasion of the annual meeting, June 6. The visitors were met at the station by one of the trustees and escorted to the beautiful Dickinson Library.

They were cordially welcomed by the librarian, Mrs. F. J. Stockbridge, and after a short inspection of the building, repaired to the hall upstairs for the meeting, which was called to order by the president, Mr. W. I. Fletcher. Rev. George F. Piper gave the address of welcome and read a short historical sketch of the town.

Mr. Fletcher, at the close of the paper, called attention to the diffusion of the club's work, its effort to interest the whole town, the teachers as well as the librarian and trustees, especially by means of the library institutes, which have just been started, two already having been held. He then gave a talk on "The public library in the 20th century."

This was followed by a discussion of the best days and hours for a small library to be open, introduced by Miss Julia Kavana, of Wendell. She rehearsed the experiences of a very small town and a very small library in its efforts to suit men, women, and children. Saturday seemed the best day for all, and, after several experiments, 1.30 to 5 were found to be the best hours. Miss Montague, of Sunderland, gave her experiences, which showed that for them Saturday was not a good day, since it was not a school day and all the children would not come to the village, as they did the first five days. A number of facts showing great variety in days and hours of opening brought out the conclusion that it was largely a matter of adaptation to conditions.

Dinner was served at the Loveland House, and was followed by a drive, to which all were invited by the trustees of the library.

The afternoon session opened with business and the election of officers for the ensuing year: These officers were elected: President, George Stockwell, of Westfield; vice-presidents, F. G. Willcox, of Holyoke, Miss A. J. Montague, of Sunderland; secretary, Miss I. F. Farrar, of Springfield; treasurer, Mrs. A. J. Hawks, of Williamsburg.

The first paper was read by Miss Mary Medlicott on "The A. L. A., what is it? the Waukesha meeting," in which she described the national association of librarians, and emphasized the need of keeping in line with the forward movements of the day by joining in methods of work and getting the spirit of congenial intercourse.

Mr. F. G. Willcox, of the Holyoke Library, spoke on "How far should the librarian advise the public as to reading?" He said: "From the question we infer two conditions. The public is in need of advice, the library should supply it. Advice is needed by readers to guard them against various tricks of the publishers' trade, and their own false notions as to the values of books. This advisory function properly belongs to the librarian as a corollary of his position."

Miss Lucy C. Richmond, of Adams, who opened the discussion on "What proportion of the appropriation should be spent for books,

for periodicals, for running expenses," recalled by way of illustration an amusing attempt to learn to cook when she thought she could rely upon the experience of an old housekeeper, but every question met with the reply, "That depends." So, she said, the proportions depend upon the character of the town and of the readers. In mill towns the money spent upon the reading rooms gives better returns than that spent in any other way. The people have very little time, but time enough to glance through a paper or a magazine. In closing she said: "The only proportion which I should attempt to make in the investment of the appropriation would be this one: as the use is to the sum expended so let the sum expended be to the appropriation."

A very suggestive paper for small libraries on "What periodicals should be purchased," written by Mr. George Stockwell, of Westfield, was read by Mr. Kingsbury.

An abrupt adjournment had to be made at the close of this paper, as nearly half the company were obliged to take an early train, and the meeting broke up with the usual feeling that a day is a very short time for a library meeting.

## Reviews.

LANGLOIS, Ch. V. Manuel de bibliographie historique. 1er fasc. [Nouvelle éd. entièrement refondue.] Paris, Hachette & Cie., 1901. 12+258 p. D.

On the first appearance in 1896 of the present portion of this work it was welcomed by historical students as an original and effective addition to their tools. It has since been universally recognized as one of the most useful bibliographical contributions of recent years, and is such indispensable to every library.

Perhaps the most important result of the book is that it will promote the systematic study of bibliography in connection with university instruction, and it is greatly to the credit of M. Langlois that he has clearly pointed out the lines upon which this study should be conducted. Considering the importance attached by scholars to the bibliographical addenda of scientific works, the general ignorance of educated people concerning the most commonplace sources of bibliographical information is little short of astonishing. While in our universities the most painstaking care is exercised to inculcate methods in this or that science, in compiling the bibliography of his subject the student is left to plunder the catalog for titles and encouraged by special privilege to rummage the shelves. In this branch of his work system is unknown, because it has not as yet been accorded a definite place in the college curriculum.

Although M. Langlois has departed from the conventional form in which such literature is cast, as a bibliography his work is worthy of almost unqualified praise. Under the general heading "Instruments bibliographiques" he treats (bk. 1) of "Eléments de bibliographie générale" (73 p.) and (bk. 2) of "Instruments de bibliographie historique" (127 p.).

The subheadings of these two parts give a clear idea of the scope of the work:

- I. Chap. 1. Bibliographies universelles.
2. Bibliographies nationales.
3. Bibliographies de bibliographies.
- II. Chap. 1. Bibliographie des sources originales.
2. Bibliographies nationales de bibliographie historique.
3. Répertoires de bibliographie historique.
- Bibliographie retrospective
4. *Same.* Bibliographie courante.

As each of these sections has numerous subdivisions, the whole work presents a carefully classed catalog, with annotations, of general and historical bibliography. But as the space devoted to these large subjects, including the literary framework, is limited to 200 pages, it will be seen at once that the

plan is designedly selective rather than complete. Under such circumstances it would be easy to compile a large list of omissions of a minor character, but considering the manifest thoroughness of the author's bibliographical knowledge it must be accepted that the omissions are the result of elimination and not of oversight.

It must, however, be pointed out that M. Langlois has not embraced the opportunity afforded by this new edition to remove some blemishes which appeared in the earlier form of his work. As an example, the section entitled "Répertoires généraux de publications périodiques" presents a jumble of indexes to periodicals, lists of periodicals, and indexes to individual sets; moreover, while it mentions the "Cumulative index" and the A. L. A. printed catalog cards, it omits any reference to Poole, Cotgreave, and the "Annual literary index." This is probably the worst part of the book.

Apart from the slight addition in references to the literature which has appeared since 1896, the result of the revision which the work has undergone is apparent mainly in the presence of some criticisms which would have benefited the author's reputation by consignment to the waste-basket. No doubt there is much truth in the contention of M. Langlois that universal bibliographies are now impossible of execution, but this opinion scarcely justifies the derogatory tone shown in such phrases as "Les imaginations des rêveurs d' 'Index' ou de 'Catalogues' universels sont extrêmement monotones." However imperfect the compilations of the Institut International de Bibliographie may be, they are of some utility, and merit a defence quite as much as the miscalled "Manuel de bibliographie générale" of the author's friend, M. Stein.

There is, in fact, evident throughout the book an intolerance which does not tend to disarm criticism towards such slips as the designation of the British Museum Catalogue as an example of the "dictionary system." But on the whole one can but smile at the contempt shown for such publications as "reader's lists" and "reader's guides," of which M. Langlois says:

"Les sentiments qui animent les auteurs de Reader's guides sont l'instinct de propagande (si répandu, sous toutes les formes, dans les pays anglo-saxons) et une compassion fraternelle pour cette immense fraction du public qui lit absolument au hasard." Later, the "Manual of historical literature" of Prof. Adams, and "toutes les compilations analogues" are branded as "médiocres ou ridicules."

On the whole, so far as the bibliographical portion of the work is concerned the 1896 edition is even preferable to this revised version, especially as the table of contents and index have been omitted. Two volumes on "Histoire et organisation des études historiques" are to follow. FREDERICK J. TEGGART.

## Library Economy and History.

### GENERAL.

ADKINS, R. F. School libraries: efforts of a county superintendent. (*In Journal of Education* (New England), June 20, 1901. 53:402.)

The letters which Mr. Adkins sent to all the teachers and all the members of school boards in his county in Nebraska are given.

APPLETONS' ANNUAL CYCLOPAEDIA for 1900 contains two articles of special interest to librarians, one on American fiction and the other on Public libraries. The former is by A. Schade van Westrum, and the latter by Frank Weitenkampf.

BALLARD, Harlan H. Boys and girls in the public library. (*In St. Nicholas*, July, 1901. 28:837-839.)

Every one interested in methods of work with children in libraries should read this article. "In bringing this paper to a close I must say that I think very little of courses of reading, unless they are made exceedingly flexible. It is not natural for children, when taking a walk, to march like soldiers on duty, looking neither to the right hand nor to the left; and while they must be kept headed in the right direction, they must be allowed to make all kinds of little side excursions, now in pursuit of a butterfly or a flower, and again from sheer love of transient waywardness and wandering."

HARSHAW, W. R. A public library in a small town. (*In The Outlook*, June 29, 1901. 68:492-494.)

Tells how a few persons started a free public library in a small town in eastern Pennsylvania.

The *Revue des Bibliothèques* now includes American correspondence on library affairs from Miss Mary W. Plummer. The first instalment appeared in the January-March number of the *Revue*, and touched mainly upon the Publishing Board's plans for printed catalog cards.

SPIVAK, C. D. Medical departments in public libraries. (*In Journal of the American Medical Association*, June 15, 1901. 36:1704-1705.)

In answer to the recent articles on this subject by Dr. G. E. Wire in *Public Libraries*.

WEISSE, H. V. Reading for the young. (*In Contemporary Review*, June, 1901. 79:829-838.)

This article seeks to answer the question: "What is the real state of things in the matter of reading on the part of young people to-day, as compared with those of a previous generation?" The author takes a pessimistic

view of the present state of affairs, but offers no definite solution of the problem how "to repel the pestilence that walketh in the magazine."

#### LOCAL.

*Adams (N. Y.) F. L. Assoc.* On June 22, the association held its first annual meeting. The secretary's report covering the first eight months of the library's history shows the following figures: Added 15,000; circulation 7005, an average of 66 a day. Cards issued, 403. While the library has thus far been supported by the association aided by the state appropriation, contributions of books or money from those interested would greatly increase its power for good.

*Alton, Mo. Jennie D. Hayner L.* On July 1 the Jennie D. Hayner Library became a free public library, its support being guaranteed by friends of the institution. It will be open three days a week.

*Belchertown, Mass. Clapp Memorial L.* The 14th annual report as given in the local press, may be summarized as follows: Added 163; total 6891. Increase in registration 56. Circulation 9168, which shows a slight increase over that of the last year. Suggestions for enlargement and for enforcing the rules and regulations are made.

*Burlington (Ia.) F. P. L.* The annual meeting on June 12, of the board of trustees was devoted to the election of officers, consideration of the resignations of Mrs. Clara M. Wilson, the librarian, and of Miss Schmidt, first assistant, and appointment of their successors. Miss Miriam E. Carey was elected librarian, with Miss Lucretia E. Clapp and Miss Meta Buettner as assistants.

*Catskill, N. Y.* At a local election on June 18 the taxpayers accepted Mr. Carnegie's gift of \$20,000 for a free library and pledged the village to expend \$2000 a year for its maintenance.

*Cedar Rapids (Ia.) F. P. L.* Following Mr. Carnegie's offer of \$50,000 has come a discussion as to the best possible site for the new building. The land now under consideration is May's Island, regarding the drainage and utilization of which expert opinion has been asked.

*Charleston (S. C.) L. Soc.* As given in the local press, the report of the Library Society at its 153d annual meeting is briefly as follows: Added 805, not including 322 vols. of government publications, 100 maps and 270 pamphlets. Circulation 33,183, an increase of 2279 over the previous year. Receipts from the Jockey Club endowment, City of Charleston, rebinding fund, and general account, \$4338.35. This total, however, includes balances of cash on hand at beginning of year, etc. Expenses \$3286.40.

Although no specialized reports of the work

of the departments are given, the president sums up the results by saying that "the general condition of the library is thoroughly satisfactory." Book-buying, aside from current fiction, has been with the end in view of completing the English literature collection. Most of the books have been imported from London, saving 40 to 50 cents a volume in the remission of duties and the purchase of books first hand.

*Chelsea (Mass.) P. L.* (31st rpt. — year ending Dec. 31, 1900.) Added 607; total 16,597. Issued, home use 78,510 (fict. 60.35%; juv. 22.66%); called for in reading room 5991. Sunday attendance 419. New registration 632; total 5931.

"Our history for the year is briefly written, consisting as it does merely of the most careful adjustment of the small funds placed in our hands. We believe, however, that the library has been of broad usefulness during the past year, both to individuals and to our public schools, the latter use being especially encouraged."

*Chicago. Newberry L.* One of the most notable acquisitions made in many years by an American library has been that of the Bonaparte philological collection by the Newberry Library. The collection, numbering 1500 volumes, written in every language or dialect in Europe, was formed by Prince Lucien Bonaparte, a son of the great Napoleon's eldest brother. A renowned philologist and with almost unlimited funds at his command, he devoted 40 years to bringing together this unrivalled collection. Before his death in 1891, he had himself begun to catalog his treasures, but the work has since been completed by other hands. Ten years ago Mr. Edward E. Ayer, one of the directors of the Newberry Library, began negotiations for the collection, but the Bonaparte family were enabled to keep the books for a little longer. On June 27 last Mr. Ayer received word that the offer was at last accepted.

The library has been valued at \$200,000, but it is said that the Newberry directors have paid a much smaller price. As soon as the collection can be checked up and packed, it will start for its new home.

*Clinton, Mass.* At a special town meeting held July 10 it was voted to amend the by-laws for the purpose of guaranteeing an annual appropriation of \$2500 for library support. This action is the outcome of the conditions imposed by Mr. Carnegie in offering \$25,000 for a new building, *viz.*, that the city should provide a permanent fund that would yield a yearly income of \$2500. This the city found impossible to accomplish without increasing its indebtedness to an unwise amount, so the matter was laid before Mr. Carnegie, and the plan was proposed for providing support by appropriation from the tax roll in perpetuity. Mr. Carnegie declared himself

satisfied with the arrangement, and it now remains for the superior court to determine whether such amendment to the by-laws is constitutional.

*Columbus (O.) P. School L.* Mr. Hensel, the librarian, has prepared a history of the library for the volume on libraries in Ohio, to be issued by the state library commission. The library was originally the Ohio School Library, created through the provisions of the act of 1846, and containing in 1853 1830 v, located in three grammar schools. In 1864 a law was passed providing for the consolidation of the several libraries into one central library, and in 1873 the collection was transferred from the high school to the public library, organized in that year, about 1000 v. being maintained as a separate high school collection. Finally in 1891 it was reorganized as the Public School Library, and entered upon its independent career under the charge of Mr. J. H. Spielman, who died in 1896, and was succeeded in that year by Mr. Hensel. "To-day the Public School Library is a public library and a school library in every sense of the two terms. It still lacks a good large reading and reference room, and a children's reading room. Its school work consists, first, in having a reference library in each of the 33 elementary buildings, the four high schools and one normal school, to which additions suitable to the grades therein are made annually. Second, in furnishing the normal and high schools such books as teachers and pupils can use to the best advantage in supplementing text-books and studies. These books are selected by the teachers and retained in the buildings, during the entire session if necessary. Nearly 1500 volumes were thus sent to the three high schools last year. Third, in having a supplementary reading department of nearly 15,000 volumes for the elementary schools. Four weeks' use in the schools constitute an issue of the books in this department. They are issued generally in lots of 25 copies at one time. Fourth, in operating a series of branch libraries for the children in 19 of the outlying elementary buildings, and three special branch libraries in the departments of literature in the high schools. The number of volumes in the elementary school varies from 100 to 125, and the books can be changed at any time to suit the requirements."

*CConnellsville, Pa.* Plans for the Carnegie library having been considered and the site chosen, the project now seems likely to have a set-back. The land selected was the site of an old burial ground deeded to the town by Zachariah Connell for that purpose, but, it seems, to revert to his heirs in case its use as a burial place were abandoned. The heirs have, therefore, decided to take the matter into court, hoping to recover their title to the land.

*Conway. N. H. Jenks Memorial L.* On

June 13, the Jenks Memorial Library was dedicated with appropriate exercises. The library was built at a cost of about \$50,000 by Mrs. Jenks as a memorial to her husband Dr. Thomas L. Jenks of Boston, who was born in Conway. The townspeople gave the site and are now determined to provide the books as well as the necessary income.

*Derby Neck (Ct.) L.* The fourth annual meeting was held on June 26, for the election of officers and reading of reports. The library now numbers between 4000 and 5000 books.

*Dublin, N. H. H. P. Farnham Memorial L.* On June 30 the artistic and well-arranged library given by Mrs. H. P. Farnham of New York as a memorial to her husband, was formally presented to the town with most interesting exercises. The building has cost over \$20,000, and it is understood that Mrs. Farnham has added an endowment of \$3000 a year for heat, light and repairs. As the town of Dublin has a collection of almost 4000 volumes, resulting from the merging of several small libraries dating from 1818, this new building will not only give ample present accommodations, but will also be an incentive for future expansion.

The dedication exercises consisted of words of welcome from Mr. H. D. Larned, of Dublin, and his formal acceptance for the town of the deeds of bequest from Mrs. Farnham, followed by an address by the Rev. Dr. Collyer, of Brooklyn, who spoke of the influence of books and gave helpful suggestions for discriminating between the good and the bad in literature. Dr. William S. Leonard, of Hinsdale, next sketched the growth of the library in Dublin, comparing it with the library history of adjacent towns and giving reminiscences of the Juvenile and Union libraries of 60 years ago, of which this public library is the outgrowth. The exercises were completed by a poem by Mrs. Derby.

*Ellwood (Ind.) P. L.* The building is to be equipped with new furniture and fittings. Books have already been purchased to the amount of \$11,000, and Miss Nellie B. Fatout has been appointed as librarian.

*Grand Rapids (Mich.) P. L.* The site for the new building given by Mr. Ryerson has been selected after much discussion, and a committee appointed to make the purchase.

*Grossdale, Ill.* It was announced on June 28 that sufficient money had been subscribed to make possible the acceptance of Mr. Carnegie's offer of \$3500 for a library.

*Hampton (Va.) Normal and Agricultural Institute.* Architects have been commissioned to prepare plans for the library to be given to Hampton Institute as a memorial to Collis P. Huntington, the railroad magnate. The plans will provide for an outlay of \$100,000.

*Hartford (Ct.) P. L.* The library, in con-

nection with the park commissioners and Civic Club, has opened a branch in Elizabeth park, the estate given to the city by the late Charles M. Pond in memory of his wife. The lower floor of Mr. Pond's large house is open to the public, and the room at the right of the entrance, which was his library, has four large bookcases. The Hartford Public Library provides books, the park commissioners furnish transportation, and the Civic Club has raised money to pay for a custodian. The library is open from four to six every day in the week from June 1 to Oct. 1, and is in charge of Miss Hetty G. Baker on week-days and Mr. William T. Lynch on Sundays. Both are extra assistants in the Hartford Public Library. Books may be read in the house or grounds, but must be returned at or before six o'clock p.m. The suggestion of opening the branch came from Mrs. Henry Ferguson, chairman of the park section of the Civic Club, through Mr. Willis I. Twitchell, president of the Board of Park Commissioners.

*Indianapolis (Ind.) P. L.* The sixth branch library has been opened in Brightwood in a building put up for the purpose and leased to the city. Each branch library contains from 1800 to 3000 volumes, aside from magazines, and is also used as a delivery station for the main library. These suburban branches are gladly welcomed by the people, and are doing a good work.

*Jackson, Mich.* On June 17 the city council voted an appropriation of \$7000 a year for the support of a library. This action makes possible the acceptance of Mr. Carnegie's offer of \$70,000.

*Lincoln (Neb.) City L.* The annual report as given in the local press may be summarized as follows: Added 3280; total 9103. Issued, home use, adults 56,382, juvenile 17,853 (fict. 83%); reference 4804; total 79,039. New borrowers 2685, an average of 223 a month; total 4473. Receipts, not given; expenses \$6306.97. The fact is noted that at the February inventory only 14 books were missing. The children's department has grown steadily under the charge of Miss Sarah T. Dakin.

This has been a transition year in the history of the library, all efforts having been concentrated on preparations for the removal to the new Carnegie building, which will probably be ready by January next. The financial prospects are occasioning much thought as well as discussion. Installed in the new library, the running expenses will be higher and the present income of \$5500 under the new library charter will be insufficient. But, as there are funds on hand for the completion of and installation in the new building, the directors feel assured that when the need for more income arises the emergency will be met in some way.

*Mansfield, Mass. Soldiers' Memorial L.* The new Memorial Library, erected in honor of the soldiers and sailors of Mansfield, was dedicated on June 17, with appropriate ceremonies. The ritual of dedication was performed by Dept. Com. Barton and staff assisted by the local post. Gen. W. W. Blackmar of Hingham delivered the oration. The library is the result of private gifts and a town appropriation.

*Medford (Mass.) P. L.* (45th rpt. — year ending Jan. 31, 1901.) Added 2452; total 23,245. Issued, home use 77,546, of which 32,445 were juvenile (fict., adult, 67%; juv., 55%). Registration 7803. Receipts \$8990.71; expenses \$899.36.

An interesting report. During the year several pupil assistants were engaged from promising candidates who were anxious to learn library work in this way; "all are showing unusual aptitude for the work, and will be acquisitions to any library." Especial efforts have been made for the collection of local material, church programs, circulars, etc. The children's room is still a delight to its users, and the circulation statistics show how largely the books in this department are used. Referring to fines incurred by children, Miss Sargent says: "I noticed in a report of one of the western libraries that the fine was remitted to a little girl because she wanted to use part of the money given her for the fine to buy candy. Very different is the policy of the attendant in charge of our own children's room. I chanced to be in the room one day and overheard the following conversation between a small boy and the attendant. The young lady asked, 'Did you bring any money for the fine to-day?' Small boy, 'No, I can't bring any more until after Christmas.' Attendant, very quietly and gently, 'But do you not think a *debt* should be paid first?' Boy, quite emphatically, 'Well, I can't bring any more money until after Christmas.' I understand he afterwards repented and paid a part of his indebtedness. To some this policy may seem hard and cruel, but is not this a false sentiment, and is it not vastly better for the child to be made to feel some responsibility with regard to the books and fines?"

*Meredith, N. H. B. M. Smith Memorial L.* On June 17 the new library, which is the gift of Mr. B. M. Smith, of Beverly, Mass., to his native town, was dedicated and formally transferred to the board of trustees. It has cost between \$12,000 and \$15,000, the town having provided the land, and now assuming its support.

*Michigan City (Ind.) P. L.* (4th rpt. — year ending April 30, 1901.) Added 451; total 5886. Issued, home use 31,924. New registration 627; cards in force 1654.

For special use at home or in school there were issued 82 reference books, 410 magazines, and 149 pictures. In work with the

schools the list of "things children should know," issued by the Springfield (Mass.) City Library, has been used for suggestions for vacation reading, copies, with references to specific books added, being placed in each school room. At the opening of school in September the children will be asked to report on their summer's reading. A special exhibit of amateur photography and electrical apparatus was held during several days beginning Nov. 17, and proved most successful. The first day there were 2000 visitors. "Many new applicants for the use of books were registered, and, judging from the demand for books on electricity and photography, a good many young people have been given a new impetus toward reading and thinking and 'making things' along these lines." Miss Freeman says: "During the last two months we have completed the classification of our collection of 759 volumes of government documents, and now have them conveniently arranged for reference in the stack room." Miss Freeman suggests that a travelling library plan be adopted to bring books to residents of the outlying districts, and she also recommends the use of home libraries to a similar end.

*New Britain (Ct.) Institute L.* (47th rpt. — year ending March, 1900.) This report is printed in a pamphlet devoted to the dedication exercises of the new building, for full description and illustrations of which see LIBRARY JOURNAL, Feb., p. 96-97, May, p. 255, 276. Added 952; total 20,359, deduction not being made for lost or withdrawn books. Issued, home use 37,435. Receipts \$6377.86; expenses \$6377.86.

The important event of the year has been the removal into new quarters and the consequent readjustment of work. A town appropriation has made it possible to make the library free to all, instead of its former limited institute membership. Under these new and favorable conditions it is hoped that the history of the library will be a record of ends attained as well as efforts made.

*New York P. L.* Arrangements are now progressing for the free libraries in public schools for which the board of education pays all expenses and the New York Public Library furnishes reading matter. Six librarians have been appointed and libraries have been selected for four schools. Three more schools have been chosen as library centers and librarians appointed, but the books are not as yet supplied. The choice of books in each case is made with reference to the needs of the communities. "For instance at schools nos. 30 and 160, each of which is surrounded by a large Hebrew population, works on Jewish history and literature are provided, and Hebrew periodicals, which are not sent to the other schools. Many Russians live in the neighborhood of Suffolk and Rivington streets, and therefore a Russian periodical will be supplied to school no. 160 only. Each

of the reading-rooms will receive regularly a large variety of good periodicals, American and English, including a number which are technical and scientific. Some German periodicals will be sent to each, as Germans are scattered all over the city.

"The books include selections from standard literature and works on history, travel, biography, natural history, science, and the industrial arts. Practically no fiction is provided, as that is supplied by the circulation branches of the Public Library. Some special lines of books are sent to certain schools in reference to school lectures to be given there, comprising works on physics, natural history, astronomy, music, and (because of a single lecture) Irish poetry. In general, there is a good supply of poetry, works on history, statesmen, and men of letters. No books in foreign languages are included."

A somewhat unusual collection has been arranged by the print department of the library for the summer months. It is a collection of portraits, which are selected not to illustrate any special nationality or walk of life, but primarily for their artistic value. As a result, there is a show of twofold interest. The number of artists, etchers, lithographers and engravers represented in these black-and-white portraits offers an exceedingly good opportunity for a comparison of methods and styles of artists of different nationalities and periods. On the other hand, in the portraits as such, we find a number of very original character-studies, each of which stands out by itself, because, as already indicated, there was no intention of offering any representative showing for particular nationalities, ranks, or professions. Comfortable study of the exhibits is further facilitated by the judgment which limited these prints in number.

*New York State L., Albany.* The Duncan Campbell collection of valuable manuscripts, autographs, and books, bequeathed to the state library by Miss Ellen Campbell, has recently been received. It contains, among other treasures, a vellum missal, dated 1439; a Louis xiv. manuscript; autographs of Cromwell, Louis xiv., Louis xvi., and Sir Walter Scott. There is a first edition of Froissart; a Latin Bible, with notes by Melancthon; Calvin's books, with manuscript notes; a second folio Shakespeare; Epistle of St. Paul, dated 1030; and many more, forming in all a rare addition to the library.

*Newark (N. J.) F. P. L.* On April 26 the Newark *Daily Advertiser* printed a leading editorial article on the Public Library, citing statistics in support of criticism of its work, which it was said had not been effective in due proportion to administration and maintenance expenses.

The general subject of the work of the library during its 12 years' existence was presented by librarian F. P. Hill in his report to

the board of trustees on May 2, this being his final report before entering upon his new duties in charge of the Brooklyn Public Library. Mr. Hill, who has been in charge of the library since its organization, said in part:

"The library has been economically managed, as evidenced by the fact that the cost has not increased to any appreciable degree during the 12 years. It has recently erected a new library building, at a cost, including ground and fittings, of \$425,000, and purchased a collection of books worth at least \$100,000.

"The library has been a leader in the liberal treatment of readers, by not requiring applicants to obtain indorsers in order to obtain cards; granting two cards to each reader; providing several copies of fiction, and historical and mechanical books; placing new books as soon as added to the library on exhibition table; reserving books for any one who makes application for same; renewing books by mail without requiring borrower to return book, and free and unrestricted access to all books, including the expensive art collection.

"Since its establishment the library has been in close touch with the schools, co-operating with the superintendent, the principals and teachers. This has been done by special invitations to teachers to visit the library in groups and with classes; issuing teaching cards allowing six books to each teacher; giving the same privileges as teachers to senior normal school students; establishing a high school branch; sending travelling libraries to the schools; sending books on any subject to schools when requested by teacher; giving talks to pupils at the library and at schools, and allowing pupils to sign applications at school, without the necessity for coming to the main building.

"The library has taken every means possible to bring its treasures to the notice of the people: by having the staff ready at all times to serve readers; issuing printed catalogs and *The Library News* appearing monthly; distributing these monthly lists to the employees of various manufacturing companies; establishing delivery stations; sending libraries of 50 volumes each to every firehouse in the city; giving free use of the lecture hall for university extension work; distributing free lists of all books in the library on subjects discussed by lecturers; preparing lists of books on topics of the day, and publishing same in the newspapers; holding exhibitions of art books; sending finding lists to police stations; granting home use of books to every inhabitant, regardless of age; allowing non-resident taxpayers to take books without cost; sending lists of medical magazines to all physicians; according to all literary clubs the same privileges given to teachers; having on shelves the directories of sixty different cities; adding French, German, Italian, Polish and Lithuanian books to our collection."

Recommendations for extending the influence of the library were the establishment of branch libraries and reading rooms, school travelling libraries, increased book funds, art exhibitions, etc.

While no public reply was made to the criticisms of the *Daily Advertiser*, this report, which was fully given in the local press, seems to have served that purpose.

*Newcastle, Pa.* The offer of \$40,000 for a library made by Mr. Carnegie has been rejected by the City Council, because of the obligation incurred by the city to contribute \$4000 annually for its support. To this appropriation the union men were so strongly opposed that the City Council have deferred final action until the offer now goes by default.

*Norfolk, Va.* The Common Council on June 4 accepted Mr. Carnegie's offer of \$50,000 for a new library building. The Norfolk Public Library Committee have agreed to raise the money for a site, and the city has made the necessary maintenance appropriation of \$5000.

*Norristown, Pa.* The school board and citizens of Norristown seem not to be in accord as to the acceptance of Mr. Carnegie's offer of \$50,000. The school board having voted for its acceptance, certain citizens have now begun injunction proceedings to prevent the acceptance by the city of the library gift, because of the usual maintenance proviso.

*Northampton, Mass. Forbes L.* (6th rpt. — year ending Nov. 30, 1900.) Added 7951; total 77,305. Issued, home use, 83,450 (fict. 47.7%); lib. use 9018. New registration 1282; total cards in force 5376.

The circulation statistics show an increase of 25.6 per cent. in the number of books taken out, but a decrease in books used in the library of 12 per cent. "This means that the city is using the library much more, and the college is using it a little less." The library use of books in Northampton is remarkable, based, as it is, upon three public libraries. "The circulation of the City Library was 46,974 (58 per cent. fiction), of the Lilly Library 13,447 (.85 per cent. fiction), of the Forbes Library 92,468 (45 per cent. fiction). Average fiction issued for the city 51.5 per cent. The total issue for the three public libraries was therefore 152,880, an increase of 11,526, or 8 per cent. over last year. The population being 18,643 (by census of 1900), the issue was 8.2 per annum per inhabitant. (Home use 7.22)."

Attention is called to the fact that shelving space in the building is nearly exhausted, and that an additional stack will soon be required. Two suburban deliveries — one in Bay State and one in Leeds — have been successfully carried on, and have proved "the only way to bring the benefits of the library to the homes of the people in the outlying villages."

*Northwestern University L. Evanston, Ill.* (Rpt. — year ending April 30, 1901.) Added 2582; total 45,764; pamphlets 30,300. Issued 8913; reference use 5638; total 14,551, an increase of 1613 over the previous year, and of 876 per cent. in 13 years. Reading room use 208 a day. The hours of opening have been increased to 66 hours a week during the university year.

"The general work of the library has proceeded on the usual lines, and its interests have been cared for as fully as possible with the amount of help provided." It is further pointed out that one cataloger is not enough to keep up the current work and, at the same time, make headway with the accumulation of uncataloged books from previous years. Some relief, however, has been secured in subscribing for certain of the A. L. A. printed catalog cards. Lists of special accessions and of gifts are included in the report.

*Oklahoma City, Okla. Carnegie L.* At a meeting held on June 4 of the shareholders of the Oklahoma City Public Library, it was unanimously decided to "donate all monies, books, furniture and all other property belonging to the Oklahoma City Public Library to the use and control of the Carnegie Public Library." This decision will secure the future of the Carnegie Library, built at a cost of \$25,000. The city promised the usual maintenance fund, but the recent action of the Oklahoma City Public Library Association was required to consolidate the library resources of the city.

*Orange (N. J.) F. L.* On Saturday, June 22, the Stickler Memorial building was formally transferred to the Orange Free Library, the exercises being held in the main reading-room. Mr. Frank H. Scott, a member of the board of advice, first gave a sketch of the library and its struggles against adverse circumstances. He was followed by the Rev. Charles Townsend who in Mr. Stickler's name made formal presentation of the keys. Mr. Scott responded on behalf of the trustees expressing the gratitude not only of the trustees but also of the community. The principal address of the evening was made by Dr. Amory H. Bradford of Montclair. After paying a tribute to Dr. Joseph Stickler and to his father and mother who have reared this memorial, Dr. Bradford touched upon the stewardship of wealth, citing examples of colossal giving in this country. Notable among these are the gifts to libraries, "the world's true treasure houses," from the doors of which an influence incalculable and unceasing may radiate.

During the evening selections were played by the Metropolitan Orchestra of New York.

The library, built of Indiana limestone, is 120 feet front by 100 feet deep. The central portico is modelled on the Erechtheum at Athens.

*Paterson (N. J.) P. L.* The three-story

addition to the library given by Mrs. Mary E. Ryle at a cost of \$16,000 has been completed, and on June 5 was opened to the public. The new building contains an addition to the reading room, a large reference room and a children's room, besides space for storage and enlarged quarters for cataloging and other departments. The library had so outgrown its limits that this addition will mean greater comfort and increased facilities for work.

*Pennsylvania Library legislation.* On June 18 Governor Stone signed the bill recently passed by the legislature for the establishment and maintenance of public libraries of the second and third class, and in boroughs.

*Pennsylvania. Library legislation.* On June 18 Governor Stone signed the bill recently passed by the legislature for the establishment and maintenance of public libraries of the second and third class, and in boroughs. Statistics given in this report are almost wholly those of circulation, which now reaches close upon the 2,000,000 mark. During 1900 there were issued 1,826,637 v., showing a gain of 48,250 over 1899. The total stock of books in use on Dec. 31, 1900, was 234,221. Four new branches — Paschalville, Thomas Holme, H. Josephine Widener, and Frankford — were opened, bringing the total number now in operation to 15. There were 95 travelling libraries in constant use, and many applications for these libraries, for school deposits and for branches, have been necessarily refused owing to lack of funds.

The matter presented with most urgency is the great need of an adequate central building. Mr. Thomson again points out the obvious fact that the present building, originally a concert hall, "is wholly insufficient in floor space for the work that is being carried on. On a recent Saturday 4912 v. were distributed from this one building in the 12 hours during which the library was open, the distribution throughout the system reaching the total of 14,871 volumes issued for home use on that one day." It is impossible, owing to the crowded conditions, to make adequate provision for reference or reading room use, or to meet the needs of the children's department. The report includes a review of the plans of the state library commission in regard to the establishment of a travelling library system.

The department for the blind was open 305 days, and 2326 v. were issued on 111 readers' cards. "The co-operative work between the Home Teaching Society for the Blind and the Free Library has been continued with excellent results. Work which the Free Library could not undertake on behalf of persons desiring to use the library, who live outside the limits of the city, has been well attended to with the aid extended by the Home Teaching Society."

*Plainfield (N. J.) P. L.* (Rpt. — year ending May 31, 1901.) Added 2604; total 22,707; withdrawals 761. Amount expended from general fund for books \$1275.59, other

expenditures \$3205.81; from Babcock fund, for books \$2078.22, other expenses \$508.86. Of the approximate 15,000 v. to which the public has access but 11 books are unaccounted for. Circulation, 46,873 (fiction including juvenile fiction 62%); 5781 borrowers in the old, and 1101 in the new registration. Contagious diseases are reported by the board of health, and books are not received back at the library until they have been disinfected by the board of health officer. Periodicals regularly received 116.

In summing up the work of the year the librarian reports 410 more volumes added than in the previous year, 8921 more volumes circulated, the publication of a 100 page list of prose fiction, and increase of work in reference department. In calling attention to the smallness of the city appropriation, appendix 5 shows that out of the 17 public libraries in New Jersey which are supported by the city or town, Plainfield stands 13 in the amount it receives in proportion to the number of volumes in the library. Among the librarian's recommendations are the publication of a list of history and travel, the publication of the annual report, the withdrawal of books which are no longer of any value, and the adoption of a book plate for the general library.

*Port Jervis, N. Y.* Mr. Carnegie's offer of \$20,000 for a new library building has been increased to \$30,000. A site has been given by Mr. Peter F. Farnum of Port Jervis, and by unanimous vote \$3000 annually from the tax-list has been assured. The library now contains about 14,000 volumes.

*PROVIDENCE (R. I.) P. L.* The new building of the Providence Public Library: exercises at the opening of the new building, March 15, 1900; with description of building. Providence, 1901. 60 p. il. O.

This handsome pamphlet gives fitting historical and descriptive record of the beautiful new building of the Providence Public Library. The frontispiece is a fine exterior view of the edifice and there is inset an artistic portrait, with facsimile signature, of John Nicholas Brown, to whose generosity the library owes so much. Plans and characteristic views of interior and exterior are also given. The text includes the several addresses delivered at the formal opening, reports of the special committees, and a historical sketch and brief architectural description of the library.

*St. Paul's School, Concord, N. H.* The memorial library given by George R. and William C. Sheldon was dedicated during commencement week. The building, which has cost about \$150,000, stands on a terrace on the edge of the lake. It is of granite with red tile roofs and consists of one story and a basement.

The general plan is square, reading rooms and stack rooms being grouped around a large central hall, which is also used as a main reading room. Every effort has been made to make this building fill the requirements of a school library.

*St. Paul (Minn.) P. L.* (19th rpt. — year ending Dec. 31, 1900.) Added 2745; total 51,280. Issued, home use 161,910 (fict. 48.54%; juv. 26.19%). Registration 5433; total number of two-year cards 10,995. Receipts \$20,113.42; expenses \$16,562.61.

The library has been moved from its old cramped quarters in the city hall to the new building remodelled from the old market house. On June 16 the moving began, and for 36 days the staff were busy, rearranging the books and getting all departments in working order for reopening on July 23. While the new quarters are by no means ideal, still statistics for the second half of the year show how much has been gained by the larger and more convenient accommodations. Among the donations of the year has been the library of the St. Paul Teachers' Association, numbering 430 volumes. These have been placed on open shelves in the reference room, so that teachers may have free use of them at all times.

Later information records the fact that the debt of over \$66,000, incurred in remodelling the present building, has been almost paid, and it is thought probable that the balance of about \$3000 will be entirely cancelled during the next three months.

*San José (Cal.) P. L.* A brief report for the last year is recorded in the local press as follows: Added 1081; total 11,947; issued 92,077, an increase of 25,000 over that of the previous year. The sum of \$1150 has been spent for books.

The city has secured the title for a lot in the normal school grounds as a site for the Carnegie building, and it is hoped that work will soon begin.

There is a project now on foot to devote to buying works of art the money already raised for a building to contain the O'Connor art collection, which has since been given to Georgetown College. These proposed art purchases will form the nucleus of a collection to be placed in the new Carnegie building.

*Schenectady (N. Y.) F. L.* It is now announced that plans for the new building have been accepted at the estimated cost of \$45,000. Aside from stack room for 40,000 books, there will be rooms on the second floor for an historical exhibit and a reference library. As a site in Union College meadow has also been purchased with money contributed by the General Electric Company, matters seem to be in a fair way for starting on the actual construction.

It is an interesting fact that since Mr. Carnegie's offer of \$50,000, which was accepted by the city and the yearly mainte-

nance fund promised, interest in the library has greatly increased. In order to provide new books and more magazines for the new building, a library association has been formed with membership dues from \$1 to \$10 a year. If the library secures the \$10,000 recently bequeathed to it by Mr. John E. Ellis of New York, its future will be even brighter; but there is a probability that the will may be contested.

*Sheboygan, Wis.* Acceptance of Mr. Carnegie's gift of \$25,000 for a new building is now assured by the action of the Common Council who, on July 3, voted \$3500 for the purchase of a site. The city already appropriates \$2400 annually for library purposes.

*Shelby, O.* The building given by Mr. D. S. Marvin for a town library was dedicated on June 14. Mr. Marvin purchased the building, which is valued at \$6500, and the city has assumed the obligation of its support.

*Sioux Falls, S. D.* Plans for the new \$25,000 Carnegie library have been completed, and building will probably begin in the early fall.

*Springfield, O. Warder P. L.* (29th rpt. — year ending May 1, 1901.) Added 1203; total 18,872. Issued, home use 75,543 (fict. 39,829; juv. 17,511,) being a gain of 6114 over the previous year. Cardholders added 2408; total 5885, an increase of 245 over last year. Receipts \$6518.74; expenses \$5551.38.

No statistics of reference and reading room books are kept, but it is noted that there has been a decrease in the Sunday use of the reading room, for which, however, no reason is assigned.

The problem of providing for the demand for new fiction is here, as elsewhere, causing bewilderment.

The librarian is full of plans for the future, hoping to extend the library privileges to county members, emulating the example of the Brumback and Cincinnati libraries. The urgent need of increased shelf room is again mentioned, and an earnest appeal is made for books for the blind.

*Torrington (Ct.) L. Assoc.* (Rpt.) Added 574; total not stated. Issued, home use, 22,577 (fict. 62½%; juv. 26%). Membership 477. Receipts \$396.16; expenses \$376.77.

*Trinity College (N. C.) L.* Work has begun on the new library, the gift of Mr. J. B. Duke. Building and equipment will cost about \$70,000, and there will be shelving for over 100,000 volumes. It is hoped the library will be ready for use by next fall.

*Tulane University, New Orleans, La. Tilton Memorial L.* On June 8 was laid the corner-stone of the library given by Mrs. Tilton as a memorial to her husband.

*Warren County (O.) L. and Reading Room, Monmouth.* (Rpt. — year ending Jan. 1, 1901.) Added 684; total 19,985. Issued, home use, books 18,323, magazines 5123. Used in reading room, from stack 16,513; from open shelves (estimated) 28,000. Average daily attendance in reading room 200.

"During the past year the library has had a larger attendance and a larger income than ever before. Its usefulness has extended in many directions." The library is free to all residents of Warren county for reference use. For the privileges of home use a yearly subscription of \$3 or \$1.50 is charged, but the latter sum does not permit home use of fiction or new magazines. The library publishes a quarterly bulletin, devoted to news notes and lists of new books. Its present building was the gift of W. P. Pressly. Plans for the library's extension include the establishment of branches throughout the country.

*Washington, Ind.* The way has been made clear to accept Mr. Carnegie's offer of \$15,000 for a library building by the offer of Mr. Joseph Cabel of a block of land in the heart of the city. He stipulates, however, that the library shall be erected in the center of the space, so that the land on either side may be converted into a public park to be maintained by the city.

*Washington, D. C. U. S. National Museum L.* (Rpt. — year ending June 30, 1899.) "During the year the library acquired through purchase, under a special act of Congress, the very important scientific library of the late Dr. G. Brown Goode, consisting of about 2900 bound volumes, 18,000 pamphlets, and 1800 portraits, autographs, and engravings. This collection, brought together at the expense of much time and labor on the part of Dr. Goode, contains many rare and valuable publications, and is especially rich in literature of museums and of fishes. 640 books, 965 pamphlets, and 5196 parts of periodicals, including the regular museum accessions and a small part of the Goode library, have been cataloged, and progress has been made in the transfer of titles to the new catalog cards. From the accessions to the Smithsonian library 231 books, 649 pamphlets, and 8616 parts of periodicals have been temporarily installed in the museum. About 16,000 books and pamphlets were borrowed during the year, about one-third for the use of the sectional libraries. Among the purchases for the year have been a large number of works relating to the natural history of Cuba, Porto Rico, and the Philippine Islands."

*Windsor, Vt. Mary L. Blood L.* The library presented to the town by Mr. Benjamin F. Blood as a memorial to his daughter was dedicated on June 4. Mr. Blood has also given \$3000 for the purchase of books and for library repairs.

## FOREIGN.

*Battersea (Eng.) P. Ls.* (14th rpt.—year ending March 31, 1901.) Added 2627 volumes, of which 2173 were purchased; total 48,941. Total borrowers 13,952. Issued, home and reference use 376,363, a gain of 46,500 over the previous year.

The increasing demand for more space has made necessary certain additions which are now under construction or planned for the near future. A children's reading room to accommodate 100 readers will be built on the vacant lot in the rear of the Central Library. The Central Library will be enlarged by converting the present book store on the ground floor and the room above it into a large reading room. The Lurline Gardens branch is now being enlarged, and the gardens in the rear thrown open to the public. Telephone communication is arranged between the Central Library and branches.

During the year three courses of free lectures have been given by lecturers of the London Society for the Extension of University Teaching with most satisfactory results, as indicated by the large attendance and by the creditable examinations held at the end of each course.

The open-shelf system has been further extended in the Lurline Gardens branch; "the books are not only well used but well treated, and neither at this branch nor at the Central Library has a single volume been lost."

It is now under consideration to abolish book fines and to make "all lending library tickets interchangeable throughout London, thus enabling readers to borrow books from any library without reference to the locality in which they reside."

*Liverpool (Eng.) P. L.* (48th rpt.—year ending Dec. 31, 1900.) Total issues for the year were 1,485,524; in addition 728,128 magazines have been issued. Newspaper readers numbered 612,386, and persons who have attended the free lectures 58,929.

"These figures, compared with those of last year, show a total decrease under the foregoing headings of 81,628. The volumes issued for home reading use are less by 31,408, but as the Central Lending Library was closed for three weeks for structural alterations a material portion of this decrease is due to that cause. The balance of some 50,000 is in the reduced number of magazine and newspaper readers. A falling off in the number of workmen attending the various reading rooms has been observable during the whole of the year, due no doubt to the excellent state of trade. Our reading rooms form a reliable indicator of the condition of trade in the city, particularly at the docks." Although the figures for the whole library show a diminution, those for the Picton Reading Room indicate an increase of 12,619 in books issued. In this branch also a large increase of "lady student readers" is noted. The rapid growth of the city makes more lending

libraries necessary, so that plans for two new branches will be welcomed.

The library has been enriched this year by a fine collection of books, engravings, and autographs bequeathed by Mr. Hugh Frederick Hornby. A catalog of this collection, numbering 7200 volumes and 3000 engravings and etchings, is now in preparation. An exhibition of drawings of Liverpool past and present proved such a success that it is proposed to repeat it this year.

Of interest to those who consider a public library a fruitful means of spreading disease is the statement, that during the last 50 years, when over 20,000,000 books have been circulated from this library, no single case of infection has been traceable to this cause.

*Maranhao, Brazil. Bibliotheca Publica.* (Rpt.—year ending Jan. 10, 1901.) Señor Lobo's present report, like its predecessor, is prepared in accordance with Greenwood's advice to librarians to avoid accumulation of dry statistics, and to set forth rather matters that will interest the public in the work and development of the library. Statistics are given, in all necessary fulness, but the report is, first of all, a presentation of the modern—and especially the American—conception of the public library's scope and functions, and a plea for the fulfilment of that conception in the case of the Maranhao Library.

As a matter of prime importance it is recommended that the present law regulating the required deposit of books by publishers, and mainly affecting the national library at Rio Janeiro, be amended on the model of the English copyright act, so as to extend the deposit system to a leading library in each state of the republic. A general review is given of the history of the book deposit system, from the early days of censorship and prohibitory indexes to its establishment for bibliographical completeness and the preservation of national literature. The copyright deposit systems prevailing in the United States, Great Britain and continental countries are noted, and the provisions of the present Brazilian law are criticized as inadequate.

Utilization of duplicates by exchange and by inter-library loans is recommended, reference being made to the international system of exchanges conceived by Vattermare and carried to such high efficiency by the Smithsonian Institution, to the methods prevailing in Italy and Austria, and to the "clearing-house" plans of Mr. Dewey at Albany and Mr. Henry for Indiana. It is pointed out that by a law of April, 1899, the Maranhao Library is required to turn over all its duplicates to the library of the "Sociedade de Recreio e Instrucao Viannense," of the city of Vianna, and it is suggested that this regulation be amended, permitting the library to use its duplicates for purposes of exchange, especially in the case of works of local or national significance, forming part of small collections, which could be readily secured in this way.

It is also recommended that the library be granted, for the purposes of local and international exchange, a certain number of copies of all public documents issued by the state. This, it is said, would be a simple means not only of enriching the library's collection, but of giving to foreigners among the city's population information in their own language regarding their own country, and making the library a cosmopolitan institution of value to all.

Travelling libraries and library work with children, as carried on in the United States, are described at some length, with reference to and citation from Mr. Dewey, Mr. Hutchins, and the reports of the Wisconsin commission, Pratt Institute Free Library, etc., etc. The development of professional instruction for librarians is reviewed, with note of the requirements demanded in continental libraries and of the various American schools and courses. Señor Lobo emphasizes the higher grade of work that such instruction makes possible, pointing out that it is the opportunities given for constant practice and technical instruction that have produced "the numerous and brilliant legion of librarians of North America, true missionaries of the book, devoted and generous, enthusiastic and earnest"; he dwells briefly upon the events leading to the appointment of Mr. Putnam as librarian of Congress; and closes his remarks upon library training with a recommendation that in the library under his charge a simple system of training, or at least of examination, be authorized, whereby assistants better fitted for library service may be secured.

Additions for the year are given as 898 v., of which 732 were gifts. More shelf room is greatly needed, and the overcrowded condition of affairs is not only inconvenient but holds grave danger in case of fire. During the year the classification of the library, by the "adjustable" scheme of James Brown, was concluded, and the necessity of a card catalog, by authors and by subjects, is again urged. The library had 5370 visitors during the period covered, of whom 4477 were men; a special reading room for ladies is maintained. There were 6811 v. issued, of which 258 were prose fiction; 3673 of the books issued were in Portuguese, 2262 in French, and 668 in English.

### Gifts and Bequests.

*Akron, Ohio.* Col. George T. Goodrich, president of the Goodrich Rubber Co., has offered \$50,000 to erect a building which will serve the double purpose of library and club for boys and young men. An endowment fund of \$30,000 is required and the city must also furnish a site.

*Alameda, Cal.* The offer of \$10,000 towards a library fund made by Mr. Carnegie has now been increased by him to \$35,000. This will greatly relieve the citizens of Alameda, who

have been somewhat perplexed as to how the money should be raised for a building suitable to the needs of the city.

*Cedar Rapids (Ia.) F. P. L.* Later information records the fact that Mr. Carnegie has promised an increase of \$25,000, provided the site of May's Island can be made practicable.

*Charlottesville, W. Va.* Mr. Carnegie has offered to provide a library building which will cost \$20,000 if the city will furnish a site and assure a maintenance appropriation.

*Fargo, N. D.* It is announced that Mr. Carnegie has offered \$20,000 for a public library, the usual conditions being imposed.

*Goshen, Ind.* Mr. Carnegie's offer of \$15,000 for a library has been increased to \$25,000 at the request of the citizens.

*Leadville, Colo.* At a meeting of the Leadville Public Library Association, on July 11, announcement was made of an offer of \$20,000 from Mr. Carnegie for a new library building. It has since been decided to raise \$30,000 or \$50,000 additional among the citizens of Leadville, the whole amount to be used in erecting a handsome building, which will serve the double purpose of library and city hall.

*McKee's Rocks, Pa.* The town has received from Mr. Carnegie an offer of \$20,000 for a library, the customary proviso being attached.

*Macon, Ga.* It was announced on June 18 that Andrew Carnegie had offered \$20,000 for a library building, with the usual maintenance condition.

*New Haven (Ct.) Y. M. C. A. L.* Mrs. Hoadley B. Ives has given \$10,000 to the Y. M. C. A. for library purposes, and in addition the income of \$5000, which sum will come directly to the library at Mrs. Hoadley's death.

*St. Johns, N. F.* Word has been received that Mr. Carnegie has offered \$50,000 for a public library in St. Johns. If the offer is accepted, it is hoped that the Duke of Cornwall will lay the foundation stone when he visits Newfoundland in October.

*St. Olaf College, Northfield, Minn.* A new library building, to be erected next summer, has been offered to St. Olaf College by Consul Halle Steensland, of Madison, Wis.

*Stillwater, Minn.* On July 16 announcement was made in a letter received from Mr. Carnegie that he would contribute \$25,000 for a new building. As the city already appropriates \$3000 a year for library support, it remains only to provide a suitable site.

*University of the South, Sewanee, Tenn.* A gift of \$6000 has been received, which will be used in equipping Convocation Hall as a library. The donor's name is withheld.

*Watertown, N. Y.* Mrs. Emma Flower Taylor has added to her gift of \$200,000 for a public library by also buying a site for the building.

## Librarians.

FATOUT, Miss Nellie B., New York State Library School, 1898-99, has been appointed librarian of the Elwood (Ind.) Public Library.

KITE, William. A neatly printed little pamphlet devoted to "Personal recollections of William Kite" has been issued by Edwin C. Jellett, of Germantown, for many years a friend of the late Mr. Kite. It contains a portrait. The "recollections," originally presented as an address to the German Horticultural Society, show the broad sympathies, kindness, and interest in books and nature that characterized the venerable librarian of the Friends' Free Library, of Germantown.

MATHEWS, Miss Mary, of the N. Y. State Library School, 1899-1900, has been appointed librarian of the American Institute of Mining Engineers, New York City.

SPOFFORD, Ainsworth R. For the first time in many years Mr. Ainsworth R. Spofford, for so long librarian of Congress, and in recent years associated with it as chief and dean of its staff, goes to Europe as a representative of the library, and will make a tour through most of the book centers with the library's interests in view. Mr. Spofford's name is known to most library people abroad, and he will receive a cordial welcome from his associates in other library countries.

TURNER, Miss Emily, librarian of the Oshkosh (Wis.) Public Library, sailed for Europe on June 15, to be gone three months. During Miss Turner's absence her duties will be assumed by Miss Mary Williams, graduate of the Pratt Institute Library School, class of 1898.

WEBER, Miss Mary L., librarian of the Owatonna (Minn.) Public Library, has resigned that position and will spend a year in travel and study. She will be succeeded by Miss Rosabel Sperry, formerly assistant librarian.

WEBSTER, Miss Caroline, graduate of the Drexel Institute Library School, has been appointed librarian of the Wadsworth (N. Y.) Library, succeeding Mrs. Ruth C. Shepard.

WILSON, Mrs. Clara M., for fourteen years librarian of the Burlington (Ia.) Free Public Library, has resigned her position. She will be succeeded by Miss Miriam E. Carey, who has been cataloging the library during the past year.

WINDEYER, Miss Margaret, graduate of the New York State Library School, class of 1900, has resigned her position as librarian of Wells College, Aurora, N. Y., and has returned to Australia to engage in library work.

## Cataloging and Classification.

The BOSTON BOOK COMPANY'S *Bulletin of Bibliography* for July contains part 4 in the second series of George Watson Cole's bibliography of "Bermuda in periodical literature," and a list of "Best editions of Browning," by Elvira L. Bascom, in addition to its usual departments.

EARLY English printed books in Cambridge University Library, 1475-1640. vol. I: Caxton to F. Kingston. London, C. J. Clay & Sons, 1901. 8°. 15s.

The FITCHBURG (Mass.) P. L. *Bulletin* for July has a good reference list of "Books for teachers."

GROLIER CLUB, *New York City*. A tentative scheme of classification for the library of the Grolier Club. New York, 1901. 20 p. D.

An interesting detailed scheme of classification for bibliography, the book arts, and allied classes of literature. It is worked out on the D. C. system, the main divisions being: 00 Bibliography; 10 Bibliography—the book; 20 Writing, Palæography; 30 Typography; 40 Book illustration; 50 Bookbinding; 60 Ex-libris; 70 Fine arts (D. C.); 80 Literature (D. C.); 90 Biography, Portraits, Iconography, Miscellaneous.

JAMES BLACKSTONE MEMORIAL L., *Branford, Ct.* Bulletins nos. 1 and 3: additions to the library, May, 1897-April, 1899, May 1900-April, 1901. 64 p. O.

A classed title-a-line list, well printed.

The NEW YORK PUBLIC LIBRARY in the *Monthly list* of its Circulation Department for July includes a short "List of books relating to the 19th century."

The NEW YORK P. L. *Bulletin* for June continues its bibliographical record of New York by the following: "List of engraved views of New York City," "List of works on the libraries of New York City," "List of works on the schools, etc., of New York City," "List of works on clubs, charities, hospitals, etc., of New York City." The list on libraries covers 5½ pages, and refers to 51 institutions. It is curious to note that the general library of the Y. M. C. A. is not included, although its Railroad Branch library is, nor does the Y. W. C. A. Library find place in the list. The publication of these check-lists should be especially useful as a means of securing material to fill the gaps recorded.

The ORIS L. (*Norwich, Ct.*) *Bulletin* for May and June gives special reading lists on vacation and out-door topics, including summer resorts, hunting, yachting, sailing, etc.

The SALEM (Mass.) P. L. *Bulletin* for June

contains nearly half a dozen good short reading lists on King Alfred, Buffalo, Pan-American Exposition, Niagara, and Declaration of Independence.

WISCONSIN F. L. COMMISSION. Books on science and engineering suggested for small public libraries. Madison, 1901. 8 p. O.

#### CHANGED TITLES.

"God's puppets," by Imogen Clark, is published in England under the title "The dominie's garden."

R. F. Fenno & Co., New York, publish "A girl of the Commune" also under the title of "Two sieges of Paris; or, A girl of the Commune." The books are printed from the same plates.

#### FULL NAMES.

The following are supplied by Catalogue Division, Library of Congress.

- Abbott, Fred Hull (Practice in civil actions at law in the courts of record of Michigan);  
 Archibald, James Francis Jewell (Blue shirt and khaki);  
 Arnold, Emma Josephine (Stories of ancient peoples);  
 Atwood, George Edward (Complete graded arithmetic);  
 Axtell, Decatur Boynton (Constitution of the state of Texas . . . annotated by D. B. Axtell);  
 Babcock, Oliver Morell (Cosmonics of worlds and forces . . .);  
 Bayly, Robert Chapin (The legal status of doctors everywhere under the flag . . .);  
 Behrend, Bernhard Arthur (The induction motor . . .);  
 Boone, Charles Theodore (Law of real property);  
 Bouvet, Jeanne Marie (Exercises in French syntax and composition);  
 Broomfield, James Polwarth (Murmurings from rugged waters);  
 Bronson, Harrison Arthur (The law of recitals in municipal bonds);  
 Casson, Herbert Newton (The crime of credulity);  
 Chancellor, William Estabrook (Children's arithmetic by grades);  
 Chapin, Charles Value (Municipal sanitation in the U. S.);  
 Churchill, Lida Abbie (The magic seven);  
 Clarke, Albert Gallatin, jr. (The Arickaree treasure);  
 Clay, Josephine Russell, ["Mrs. John M. Clay,"] (Uncle Phil);  
 Clow, Frederick Redman (Introduction to the study of commerce);  
 Coburn, Foster Dwight (Alfalfa, Lucerne, Spanish trefoil, etc.);  
 Collins, Elijah Thomas (The soul);  
 Coup, William Cameron (Sawdust and spangles: stories and secrets of the circus);  
 Crabtree, Pleasant Elijah (The first Belgian hare course of instruction . . .);  
 Davenport, Flora Lufkin (Handbook of choice receipts . . .);  
 Delmas, Delphin Michael (Speeches and addresses);  
 Dickerson, Mary Cynthia (Moths and butterflies);  
 Doherty, David Jessup, tr. of Blumentritt, Ferdinand (The Philippines . . .);  
 Dowd, James Henry (A practical treatise on simple and chronic specific urethritis);  
 Edgren, August Hjalmar, and Burnet, Percy Bentley (A French and English dictionary . . .);  
 Elshemus, Louis Michael (Poetical works . . . 1st series);  
 English, Virgil Primrose (The mind and its machinery);  
 Field, Millard Lincoln (Outlines in book-keeping);  
 Flickinger, Junius Rudy (Civil government as developed in the states and in the United States);  
 Fradenburgh, Jason Nelson (Life's spring-time);  
 Fuller, William Oliver (What happened to Wigglesworth);  
 Girdner, John Harvey (Newyorkitis);  
 Goodrich, William Winton (The bench and bar as makers of the American republic);  
 Gagg, Isaac Paul (Homes of the Massachusetts ancestors of Major-General Joseph Hooker);  
 Greiner, Tuisco (The garden book for practical farmers);  
 Griffith, Benjamin Lease Crozer (Plays and monologues);  
 Hall, Mary Frances, and Gilman, Mary Louise (Story land: a second reader);  
 Halphide, Alvan Cavala (The psychic and psychism);  
 Harvey, Nathan Albert (Introduction to the study of zoology);  
 Hastings, Frank Warren (Wed to a lunatic . . .);  
 Hazlehurst, James Nisbet (Towers and tanks for water-works);  
 Henderson, Howard Andrew Millet (Diomedes the centurion . . .);  
 Hoch, Jacob Charles, and Bert, Otto Frederick Herman (A new beginner's Latin book);  
 Hostelley, Alfred Edward (Songs of the Susquehanna);  
 Howard, Arthur Platt (Grandmother's cook book . . .);  
 Hyde, Cornelius Willet Gillam, and Jaques, Harriet Francelia, ["Mrs. E. K. Jaques,"] (Minnesota state teachers' examinations. . . .);  
 Kilbourne, Katherine Rachel (Money-making occupations for women);

 Wilder, Grant Beardsley, *comp.* (Illinois conference sermons . . .).

### Bibliography.

ALCHEMY. Bolton, Henry Carrington. The literature of alchemy. (*In Chemical News*, May 31, June 7, 14, 1901. 83:261-262, 269-270, 280-281.)

These interesting articles by Dr. Bolton are reprinted from *The Pharmaceutical Review*, v. 19, nos. 4-5.

BIBLE. Hoare, H. W. The evolution of the English Bible: an historical sketch of the successive versions from 1382 to 1885. London, John Murray, 1901. 31+300 p. 8°.

BOLIVIA. Conway, Sir Martin. The Bolivian Andes: a record of climbing and exploration in the Cordillera Real in the years 1898 and 1900. New York, Harper & Bros., 1901. 9+403 p. il. 8°.  
 Contains a three-page bibliography.

JEWES. The Jewish encyclopedia: a descriptive record of the history, religion, literature, and customs of the Jewish people from the earliest times to the present day. Pre-

pared by more than 400 scholars and specialists. Isidore Singer, managing editor. Complete in 12 volumes. New York, Funk & Wagnalls Co., 1901. v. 1, A-Apocalyptic literature. 38+685+37 p. il. 4°.

This work for its biographical and bibliographical materials is indispensable to libraries having Jewish books or Jewish readers. Nearly all the articles are followed by a bibliography. In the biographical sketches, and there are thousands of them—ancient and modern—the writings of the person are given. An idea of the comprehensiveness of this work may be had from the fact that 40 pages are given to subjects beginning with the name Abraham and 20 to those of Aaron.

MARYLAND, *Geology*. Maryland Geological Survey: Eocene. Baltimore, The Johns Hopkins Press, 1901. 322 p. il. 4°.

Pages 31-43 contain an annotated bibliography of the Eocene deposits of Maryland, by W. B. Clark and G. C. Martin.

MESSIAH. Goodspeed, George Stephen. Israel's Messianic hope to the time of Jesus: a study of the historical development of the foreshadowings of the Christ in the Old Testament and beyond. New York, The Macmillan Co., 1900. 10+315 p. 12°.

Contains a selected bibliography of 11 pages, annotated.

MODERN HISTORY. Gooch, G. P. Annals of politics and culture (1492-1899). Cambridge, at the University Press, 1901. 10+530 p. 8°.

Pages 475-493 contain a classified bibliography.

MORTA, Em. Saggio bibliografico di cartografia milanese fino al 1796: pubblicato dalla società storica lombarda, in occasione del quarto congresso geografico italiano, 10-15 aprile 1901. Milano, P. Confalonieri, 1901. 63 p. 8°.

MUNICIPAL GOVERNMENT. Brooks, Robert C. A bibliography of municipal problems and city conditions. 2d edition, rev. and enlarged, complete to Jan. 1, 1901. (*In Municipal Affairs*, March, 1901. 5:1.)

This valuable bibliography forms the spring issue of the New York Reform Club quarterly, *Municipal Affairs*. It replaces Mr. Brooks' bibliography of the subject, published in 1897 (*see L. J.*, 22:269-270), and includes all the material given in that issue, and in the 15 quarterly supplements published later, as well as much material gathered by special independent investigators. In all there are entries for over 12,000 books, pamphlets, government documents, and magazine articles.

Like its predecessor, the bibliography consists of a subject index, followed by an author list, the latter containing nearly 4000 names. The subject arrangement is alphabetical, with subdivisions when required, and classification is also made by countries and cities. Each entry given in the subject index bears a number, to which reference is made in the author list, thus economizing space. In bibliographical details, improvement might be made in the list, as in the omission of quotation marks, and in typographical points; but the bibliography is a work of so much value and importance that it deserves only cordial appreciation.

PARIS. Tourneux, Maurice. *Bibliographie de l'histoire de Paris pendant la révolution française*. Tome 3: Monuments, moeurs et institutions. Paris, imp. Mangeot, 1901. à 2 col. 60+991 p. 8°, 10 fr.

— Tuetey, Alexandre. *Repertoire general des sources manuscrites de l'histoire de Paris pendant la révolution française*. Tome 5: Assemblée législative (2e partie). Paris, imp. Mangeot, 1901. à 2 col. 65+718 p. 8°, 10 fr.

SAVONAROLA. Mancini, Aug. *Codici savonaroliani a Lucca*. Lucca, tip. Baroni, 1901. 15 p. 8°.

SOCIALISM. Sombart, W. *Sozialismus und soziale bewegung im 19. jahrhundert*. Nebst 2 anhängen: 1. Chronik der sozialen bewegung von 1750-1900; 2. Führer durch die sozialistische litteratur. 4. Auflage. Jena, Gustav Fischer, 1901. 7+130 p. 8°.

SPAIN. Hume, Martin A. S. *The Spanish people: their origin, growth, and influence*. (The great peoples series.) New York, D. Appleton & Co., 1901. 19+535 p. 12°, \$1.50.

Pages 517-524 contain a classified bibliography, with some annotations. Few titles are in English.

#### INDEXES.

BIBLIOGRAPHIE der deutschen zeitschriften-litteratur mit einschluss von sammelwerken und zeitung. Band 7: Alphabetisches nach schlagworten sachlich geordnetes verzeichnis von aufsätzen, die während der monate Juli-Dezember 1900 in über 1300 zumeist wissenschaftlichen zeitschriften, sammelwerken und zeitung. deutscher zunge erschienen sind, mit autoren-register. Unter besonderer mitwirkung von E. Roth für den medizinisch-naturwissenschaftlichen teil und mit beiträgen von A. L. Jellinek,

herausgegeben von F. Dietrich. Leipzig, Felix Dietrich, 1901. 4°. 18.75 m.

HOWVILLE, Herbert W. *A private index, and how to make it*. (In *Chautauquan*, May, 1901. 33:137-139.)

"To the busy writer or speaker, an index is a kind of literary banking deposit, steadily accumulating interest as he works and sleeps, and beyond reach of the depredations made upon other kinds of capital."

### Anonymous and Pseudonyms.

"Ellis Meredith," pseud. of Mrs. L. M. Stansbury, "The master-knot of human fate."

"Great match and other matches" is by Professor John Trowbridge. Little, Brown & Co., the publishers, are authority for the statement. They say: "The book was originally published in the 'No name' series, and this probably accounts for the doubt in regard to the author."

"Autobiography of an old sport," published anonymously in 1885, is by Charles Reginald Sherlock, according to Mr. Sherlock's statement in the "author's note" to "Your Uncle Lew" (New York, Frederick A. Stokes Co., 1901).

*The following are supplied by Catalogue Division, Library of Congress:*

Bee, Polly, pseud. of Brent, Pauline, "Vagaries of men."

Cox, Maria McIntosh, ["Mrs. J. F. Cox,"] is the author of "Home thoughts, by C."

Kankakee, June, pseud. of Turner, Mrs. E. R., "Aunt Lucy's cabin."

Loundes, Charles Henry, is the author of "Prophecy unfolded . . ."

Myth, M. Y. T. H., pseud. of Nicholovius, Ludwig, "Unique tales."

Prune, Nat, pseud. of Weymouth, John, "Wedding bells."

### Humors and Blunders.

A PUBLICATION with the title "Land and sky," issued by one of our Southern railroads, and relating to Asheville, North Carolina, has just been discovered in one of the great libraries of this country to have been classified under theology.

HIS DREAD. — "Who's that nervous old chap over there, who looks as though black care had roosted permanently between his shoulder-blades?"

"Oh, he's the richest man in this town."

"What gives him that worried, hunted look, then?"

"Why, he's scared to death for fear Andrew Carnegie will give us a library, and the taxes will be increased to support it." — *Town Topics*.

# LIBRARY SHELVES

ART METAL CONSTRUCTION CO.,

General Office and Works, JAMESTOWN, N. Y.

STEEL LIBRARY STACKS FOR PUBLIC AND PRIVATE LIBRARIES.

# THE AMERICAN NEWS COMPANY,

## BOOK DEPARTMENT.

HAVING successfully conducted an extensive Library Department for the past several years, handling with complete satisfaction the entire library business of some of the largest libraries of the country, we call to your attention the elaborate facilities at our disposal ; not only as to the prompt and complete despatch of all such business, but the great saving to the library in the matter of receiving exceptional discount. A request for estimate on any miscellaneous list of publications will receive the same painstaking care and minute attention that an order involving thousands of dollars would receive. Books published abroad are secured within a very short time after order is placed—our own branch houses in London, Paris, Berlin, as well as two Canadian houses, enable us to accomplish this.

We solicit correspondence, and extend a most cordial invitation to all interested in the Free Public, School, Circulating, or Private Libraries to visit our mammoth establishment, where the thousand upon thousands of miscellaneous volumes are at your full access.

Yours very respectfully,

THE AMERICAN NEWS COMPANY,

39-41 CHAMBERS STREET, NEW YORK.

BENJAMIN FRANKLIN STEVENS.

HENRY JOHN BROWN.

# B. F. STEVENS & BROWN,

American Library and Literary Agents,  
4 TRAFALGAR SQUARE, CHARING CROSS, LONDON.

**T**HIS Agency was established in 1864 for supplying American Public Libraries, Institutions, and Book Collectors, with English and Continental Books, Manuscripts, Drawings, Philological Apparatus, etc., at the lowest London prices.

Special attention is paid to the selection and purchase of rare old books and manuscripts. Auction sales are carefully watched and good knowledge kept of the stocks of the old Booksellers of Europe.

Lists of Desiderata have the best attention and Librarians are respectfully requested to test the value of the Agency by sending trial orders on by submitting lists for Estimates for goods to be delivered, either free in London or New York, as desired.

Auction Catalogues when printed in advance and Catalogues issued by Publishers and Second-hand Booksellers are mailed to Customers when desired.

Large shipments are sent by cheapest and quickest route, or as ordered. Small shipments are made weekly through our New York Agency, at a minimum of expense and trouble to purchasers, or single books are sent by mail on receipt of order.

Special attention is given to Bindings in all styles.

Periodicals are supplied either direct by mail from London or by mail from New York Agency at lowest rates for prompt and efficient service. Send for Lists.

Payments may be made either direct to London or in U. S. Currency through our New York Agency.

*Just Ready. 100 Copies Printed for Subscribers Only.*

## B. F. STEVENS'S

# Facsimile of the Unpublished British Headquarters Coloured Manuscript Map of New York and Environs (1782)

Reproduced from the Original Drawing in the War Office, London.

24 sheets. Scale,  $6\frac{1}{2}$  inches to a mile. 10 feet by 4 feet. . . .

The successive British Commanders-in-Chief in America, Generals Sir William Howe, Sir Henry Clinton, and Sir Guy Carleton, during their respective occupations of New York and Environs in the Revolution, caused this manuscript plan from time to time to be kept up.

The plan extends from below Guanas Bay to the Heights of Spikendevil, a distance of about eighteen or nineteen miles. It shows the Fortifications, Defences, Topography, Streets, Roads, etc., of the whole of the Island of New York with the Harbor, Islands, Water Ways, and River Frontages on the Hudson and East Rivers, the Military Works on Long Island including Brooklyn, the Works in Paulus Hook and parts of the Jersey Shore. It has a copious Table of References to various works (British and American), some of them with notes as to the time of their construction or destruction.

The Original Drawing, ten feet by four feet, is on a scale of about six and a half inches to a mile. It is handsomely reproduced for subscribers only, in careful facsimile on 24 sheets which can be joined up and mounted like the original as a Wall Map or mounted on linen if desired. It will be issued either mounted on linen to fold in book form with leather (slip) case, 13 x 10 inches, or the 24 sheets (22 x 15 inches each), will be supplied in a portfolio.

No more than 100 copies have been printed and the engravings were erased as each sheet was printed off.

A few extra copies of sheet 8 have been printed so that it can be sent as a specimen on application from intending subscribers.

### Prices to Subscribers

Mounted on linen to fold in book form with leather (slip) case. . . . **\$30 net.**

Unmounted, on 24 sheets in portfolio. . . . . **\$25 net.**

The above prices include delivery to any Public Library or Institute in the United States or Canada, but private subscribers must also pay the duty.

Reliure de Luxe.

---

*“Buy Your Popular Books and Your Costly Books*  
**in Duro-Flexile Binding.”**

I OBTAIN books from the publishers in sheets and bind them “ONCE FOR ALL.” This binding lasts longer than the leaves of the book, and the leaves of the book are preserved and their life immeasurably lengthened by this binding. Librarians cannot persuade publishers to print special editions for them, but I supply books specially bound for them.

If the paper is bad I sew and forward the book so that the leaves are subject to no strain and are indeed strengthened in the folds. If the paper is very stout I sew the book and forward it in a special manner adapted to the thickness of the paper, in other words I adapt Duro-Flexile binding to both good and bad paper with the results that the utmost service and the longest possible life are obtained for both.

No binding in the world is adapted to the varied qualities of the paper as is Duro-Flexile.

The service obtained from a book of bad paper when supplied bound in this way will surprise you.

A papier maché box and a steel safe are not hinged in the same way. Thin tough paper and thick spongy paper also require very different treatment, and with Duro-Flexile they get it.

**TIGHT BACKS** are used for books of a thickness and quality of paper best suited for such treatment.

**LOOSE BACKS** are given where such are better suited.

My bookbinding is in short adapted in its every detail, both of material and method, to the requirements of a Public Library Book.

500 Public Librarians in all parts of the English speaking world buy these books.

## POPULAR BOOKS AND COSTLY BOOKS

*copy only of the 1884-90  
volume of the*

# American Catalogue

remain unsold. All other early volumes are out of print, and second-hand "pick-ups" cost more than the first-hand price. This shows the investment value. Price now of "Subject-Volume," \$12.50, sheets; \$15, half morocco; of 1884-1890 volume, \$25 net, half morocco.

Of the volume for 1890-1895 only 143 copies are unsold. Buy now, at \$12.50, sheets; \$15 net, half morocco, before the price is raised.

The present volume of the American Catalogue covers books recorded from July 1, 1895, to January 1, 1900, including books with the imprint 1900 issued within 1899, and also books of 1899 recorded after January 1, 1900. The first alphabet contains 559 pages, as compared with 498 pages in the 1890-1895 volume, and the subject alphabet 301 pages as compared with 251 pages. The List of Publishers (with addresses) includes 1666 names. Appendixes for Government Publications, State Publications, and Publications of Societies, now otherwise provided for, are not given in this volume.

The edition, as before, is limited. The price is \$12.50 in sheets and \$15 net, in half morocco.

**WANTED.**—Librarian (young man) of nine years' experience in a small library, now numbering 8000 volumes, using the Dewey Decimal Classification, desires a position in a larger library offering opportunities for advancement. Address F. W. H., care of LIBRARY JOURNAL.

**WANTED.**—A lady with nine years' experience in a small library, three years as librarian, desires position as librarian or assistant in a larger library. Can hold present position longer if she desires to, but is anxious to change. Good references. Address B. H., care of LIBRARY JOURNAL.

NEW YORK :  
27 and 29 West 23d St.

## G. P. Putnam's Sons, LIBRARY AGENTS.

LONDON :  
24 Bedford St., Strand.

**M**ESSRS. PUTNAM have peculiar facilities for handling all library business intelligently and to the best advantage of their customers.

Their Branch House in London (through which they receive English orders for American books) enables them to supply, promptly, English books, without the commission usually paid by American dealers.

Their extensive miscellaneous and retail business makes it practicable to buy all books at the lowest prices, to carry a large stock of standard books in every department of literature, and to keep in touch with the current publications of the day. Their business experience covers more than half a century.

### LIBRARY BOOKS.

**W**E have been selling books to libraries for fifty years and understand the special needs of libraries in editions, bindings, etc.

Our wholesale buying enables us to quote prices of interest to the business librarian, while our immense stock of books of all publishers is available for examination and comparison.

We issue a catalog of a model library of 2500 approved books arranged in classes, which is a great assistance to buyers for small libraries. Lists sent to be priced will be returned promptly with itemized prices for books suitable for library use. Our twice a year clearance sales offer genuine bargains. Catalogs, lists, etc., sent on request.

### **THE BAKER & TAYLOR COMPANY,**

Wholesale Booksellers, 33-37 East 17th St. (Union Square, North), New York.

## **CHARLES SCRIBNER'S SONS,** 153-157 Fifth Avenue, New York

Librarians and others will do well to communicate with us before placing their orders.

The latest publications of all the leading American and English publishers are kept in stock, thereby enabling us to fill orders with utmost despatch.

Special attention is asked to our facilities for importing books free of duty.

Correspondence solicited. Send for catalogues and specimen copy of **THE BOOK BUYER**, a monthly magazine devoted to books, authors, and literary affairs.

## **H. SOTHERAN & Co.,**

*Booksellers, Bookbinders, and Publishers, and General Agents in Europe for Private Bookbuyers and Public Institutions in America.*

# CONFERENCE OF LIBRARIANS.

WAUKESHA, WISCONSIN.

JULY 4-10, 1901.

BEING A LIBRARIAN: ADDRESS OF THE PRESIDENT.

BY HENRY J. CARR, *Librarian Scranton (Pa.) Public Library.*

**I**N your presence, and in addressing you to-night as presiding officer, I feel to a far greater extent than I can express in words the high honor that has been conferred in each instance upon all who from time to time have been chosen to serve as a president of this particular association.

There is in this present age, to be sure, no lack of those popular and peculiar entities termed associations—associations of many kinds, and for almost every conceivable purpose. Throughout the entire continent there exist few, perhaps none, whose history, objects, and work, have warranted a more justifiable pride in being a member thereof, than is found in being a member of the American Library Association.

It may here be said that conditions and circumstances have been favorable to the success of the A. L. A.; not the least of which has been the faithful loyalty of its individual members. We realize, too, that even time has dealt leniently with it, upon noting that of the 64 members who attended its first meeting, held at Philadelphia twenty-five years ago, but 18 have died, and that 20 persons are yet included in its membership list out of the 69 who joined the association in 1876, that initial year. Some of that original number, much to our gratification, are present with us at this 23d general meeting.

Considering its purely voluntary nature, the migratory holding of its successive meetings in different parts of the land, and the notable avoidance of fads, or any tendency towards selfish ends that might otherwise mark its united efforts, it becomes almost a matter of surprise that so many persons have unflatter-

ingly kept up their allegiance from year to year ever since the time of their joining the association. But, as a matter of fact, the A. L. A. has at no time fallen off in its total membership; and at this date it numbers nearly one thousand contributing members paying dues for the current year.

The American Library Association has now attained a period of twenty-five years in its history—a quarter of a century. During that time, in the addresses given at its general meetings, as well as in the multiplicity of noteworthy and valuable papers contributed to its Proceedings, and the sundry publications devoted to library interests, it would appear as if there must have been presented almost every conceivable phase of library thought and sentiment. Can anything new be said, or old ideas placed in a new light, so as to be worthy of hearing and attention at this time? I fear not, except as some lessons may be drawn from the experience of one's past work, perhaps, that shall serve to aid yet others who are to tread like paths in life.

I beg, therefore, that you will bear with me for a short space of time while I give expression to some thoughts drawn from the experience of myself and others while Being a Librarian.

Without now restricting their application to particular phases of librarianship, let us at the outset consider them as relating to any and all conditions of it as a vocation. "Why did you take up library work?" is a question not infrequently asked. To that query various answer may be given, according to the individual views of the persons replying. Perhaps one general reason, that in a certain way

has had its unconscious influence upon many of us, is best stated in the following characteristic passage from the "Book-hunter:":

"To every man of our Saxon race endowed with full health and strength, there is committed the custody of a restless demon, for which he is doomed to find ceaseless excitement, either in honest work, or some less profitable or more mischievous occupation. Countless have been the projects of man to open up for this fiend fields of exertion great enough for the absorption of its tireless energies, and none of them is more hopeful than the great world of books, if the demon is docile enough to be coaxed into it."

Since Burton's day the "great world of books" has taken on many phases of which he never dreamed. And we, as librarians, may reasonably believe that if not entirely a part and parcel of it, we are nevertheless called upon to deal with that "world" in almost every form, and are ourselves more or less important factors in it. We may not be called upon to adopt the "strenuous life," or seek to impart it to the conduct and activities of others. But necessarily we are and must be accustomed to "doing things"; and, by that very doing, will in some degree, each in our own field, inspire and influence others also.

Furthermore, do we not find *our* "restless demon of work" more agreeably inclined and contentedly occupied in the library field than in other lines of life which we may have previously entered into? I, for one, certainly think so, even though we may not have had that idea in mind at the outset, or when making the change. And, too, that we derive a certain feeling of encouragement akin to inspiration, that in itself renders *us* contented and happy, when responding to the varied demands on our time and energy that are entailed by our positions as librarians. That is half the battle, the rest being but a question of persistence in the application of means and ability.

Therefore, in the consoling words of one of Elbert Hubbard's salient sayings: "Blessed is that man who has found his work."

It is not the purpose of these present remarks to set forth particularly the compensations in a librarian's work; neither the advantages or disadvantages, the opportunities

or drawbacks therein. Those factors have all been frequently and well discussed in prior years, by some of our well-known associates and various contributors to library literature. I desire, rather, to suggest some features and relationships connected with our work as a profession, from which an occasional lesson may be taken, and possibly a word of encouragement, if such be needed.

First of all, is librarianship a profession? Does it possess the characteristics that make it such; and is that work more nearly professional than otherwise, which lies at its hands to be done? Some such queries were propounded to me by the president of a state library association one day last fall, as we were journeying together to an annual meeting. He, himself, had been a teacher and an educational administrator for a number of years before becoming a librarian; and of the recognized professional standing of his *former* occupation there could be no doubt.

My first, and off-hand, answer was to the effect that librarianship certainly has many professional features, even though its being a true and undoubted profession in every respect might be disputed now and then. Going further into this question of professional status, however, it will be found that the literature of views and discussions thereon, pro and con, is by no means small. For one of us to now express a doubt that librarianship, as a whole, is a profession, would be almost presumptuous; and I, for one, do not propose to do so. My thesis, so far as it relates to the present remarks, is in affirmation of the claim; not only that it is a profession—our profession—but really the profession of professions!

All other professions now depend to a considerable extent upon that of the librarian for the custodianship of their literature, without whose care much of it might be lost. We may not be able to transmit to future eras such enduring records of antiquity as has been done by the librarian of old in his collection of clay tablets (which now serve to tell us of the affairs of mankind as transacted thousands of years ago), but it is certain that we are doing our part towards making modern literature available in disseminating it, and in preserving it as far as lies in our power.

Cotemporaneous with the organization of this association Melvil Dewey made the following decided and well-supported assertion: "The time has at last come when a librarian, may, without assumption, speak of his occupation as a profession." I cite Mr. Dewey's words, not as necessarily conclusive, but because he has ever been an active and constant supporter of that doctrine in both his work as a librarian, as a noted stimulator of the library movement, and as an originator of professional instruction of other librarians. Similar enthusiastic and persistent efforts on the part of librarians generally may do much towards the furtherance of such features, and the consequent development of librarianship as a profession in all its aspects.

Let us now consider for a few moments some features of resemblance and diversity between the library profession and others quite as well or better known. It has been said that the library exists chiefly for the use of its patrons, and that the librarian is necessarily and essentially a servant. Therefore the librarian must, of equal necessity, earn a livelihood or receive compensation of some kind for his services. All of which, in the main, is true of the professions generally, as will be seen from a brief statement of circumstances.

Doctors, lawyers, accountants, engineers, artists, etc., are engaged by and receive pay from their respective clients. The clergy are supported by contributions of their church members or from denominational resources. Teachers in the public schools are paid from public taxes, while those of private schools, or endowed institutions, receive their compensation from various sources.

The clergy and teachers, as a rule, like most librarians, no matter how willing or how well qualified, are under the further necessity of obtaining a "call," or position, as a prerequisite to the exercise of their professional faculties. In that respect they are at a disadvantage in comparison with those practitioners in the other professions, already named, who can go to any locality, solicit clients and seek business opportunities, with reasonable assurance of obtaining both according to place and the circumstances of supply and demand.

In some of the professions, both the so-

called "learned" and the practical ones, there have been developed certain well recognized differentiations and specializations of professional work. Those lines have usually been taken up in response to what has seemed a reasonable demand for them; and in their exercise have not unfrequently brought both reputation and corresponding remuneration to the specialists.

Possibly the time has arrived for doing much more of that nature in the library profession than has yet been customary. And there are those among us, possessing a due amount of working experience coupled with knowledge of other and allied affairs, who might now do well to devote themselves to some special features of library enterprise as a matter of desirable business opportunity. Some from the library schools, and a few others, have gone out as "organizers," and found more or less of a field for the exercise of their limited special qualifications. The field ought to be a growing one, it would seem, if recourse to incompetent aid is carefully avoided.

But the offices of "consulting librarianship," while possessing many desirable and much needed features, do not appear to be practised as a specific function. Something of the kind has been urged in past years, to be sure, and several well-known librarians did undertake at different times to supply such services. Sooner or later, however, each one was persuaded into a more certain, or better compensated, and permanent, position of local librarianship, and thereupon abandoned that special line of work.

In this era of the establishment of so many new libraries, small and great, and of the gift of hundreds of buildings for such purposes, there is a decided need for the effective services which a consulting librarian might render; and this to a greater extent than is yet fully understood or appreciated. Lacking such, some librarians and more library trustees work too often at a disadvantage. Many more, too, are burdened with repeated calls for information which more properly ought to be obtained from an independent expert; one so situated as to take an unbiased view of circumstances and equally able to give advice best suited to the particular case in hand. Serious mistakes are sometimes made in the

preliminary details of new library enterprises that might be just as easily avoided by the employment of a competent and paid professional adviser.

Turning now to another side of our subject, and considering the relation of the individual librarians rather than of the profession as a class, a few words upon personal actions may not be out of place. A librarian's position is usually of a public or semi-public nature; ability for its duties is implied; and the compensation received is for present services as a rule, rather than as a reward of merit. In order that the library shall perform all that is expected of it, not only in being to some extent an ever-running machine but equally in respect to its recognized higher functions, there must be the application of watchful care, constant attention, foresight, and unremitting work. The direction of all of which, and perhaps much of its actual execution, must depend upon the person placed in charge of the institution as its librarian.

It is true that, having a well-trained body of assistants, a library may be able to run on for a time in the prolonged absence of, or when lacking, a chief; because impetus and the effects of past direction are not lost at once, provided that no demoralization has taken place. But it is not a safe policy to allow a library, or other working institution that depends largely upon the work of trained employees for its effectiveness, to go long at a time without the presence and oversight of an actual and capable head.

Yet it does not follow that the working hours of chief librarians should be absorbed in attending to innumerable and trivial items of detail which might be delegated to and done quite as well, or better, by their assistants. Not only is "genius a capacity for evading hard work," as has been said, but one of the proper duties of the executive of a library is to obtain the best results possible from the respective capacities of those through whom the library does its work. All of which should imply the exercise of a kindly and broad-minded disposition towards one's assistants, just as truly as of respect and obedience to one's superiors, or of courtesy and suavity in dealing with customers and the public. It may be only human for one to desire to be

that "king of his world," of whom Carlyle speaks; but any policy which reduces the assistants to mere machines is not a true professional one, since it tends to rob the library world of talent which is needed and, except for such repression, might be developed and brought forward.

On the other hand I might plead no less for corresponding loyalty and fidelity on the part of all library workers, both to their respective chiefs and the institutions that employ them. As a matter of fact, however, action of that kind is the prevailing practice in this country, with hardly an exception, and that phase needs no extended discussion. A chief is, of course, entitled to credit for acts done by subordinates at his direction and for which he is responsible. But chiefs, in turn, can well afford to give recognition to the ability and deeds of their assistants, and will seldom, if ever, lose by doing so.

There are one or two other features of librarianship which merit passing mention. Among them are what may be termed library succession, or the librarian's duty to his successor. Some few librarians "die in the harness"; while quite as many more change from one place to another at times. Occasionally they are succeeded by those who come new into the work; and, gaining experience, become a credit to the profession. Advancement of those trained in smaller libraries to places in larger ones, or from the position of assistant in a library to the head thereof, has also brought forward quite as many more of those whose progress we watch with cordial interest.

Although conscious of those facts, and of the inevitable changes and successions that must occur from year to year, do we recognize our duty to our successor? I have asked the question, but its consideration must be left to some future time and opportunity.

Impartiality in enforcing rules, and in dispensing the privileges of the library to all comers, should be deemed an important feature of librarianship, quite as essential to the welfare of the institution as to the professional success of the librarian. And this suggests a query, which has before now been raised, as to how far librarians should go in aiding persons who expect to use information

obtained at the library, solely for the furtherance of personal interests or for purposes of pecuniary profit. Impartial and confidential treatment of all readers and seekers, who come to the library after information, would appear to be the only safe practice and criterion, regardless of their particular motives. Care should be taken, of course, to assist them in gaining the desired information by means of their own study, and in their own way, rather than through the efforts of library employees applied to searching out the exact and final facts for them.

In conclusion, I would direct your attention very briefly to yet another side of librarianship which ought to have an occasional bearing so far as ethical principles may apply.

Since we regard librarianship as a profession it would seem that there must needs be some recognized principles of an ethical nature relating to it. Like many of our working methods, however, they must probably exist chiefly as "unwritten laws." It is always a difficult matter to put our ideals into words. They may be quite real to the sensibilities and yet hardly admit of being formulated. And, too, the evident contrast between the ideals aimed at, and the results attained, is often so great that one hesitates to say in so many words just what is his ideal.

Still there have been developed in the other

leading professions, those that are regarded as the most reputable and noteworthy, certain recognized principles which serve to guide their members in many ways. The full comprehension of such principles as an authoritative guide tends to a correct measurement of the real value of one's professional work. Likewise, while supplying certain ideals at the outset, they may aid in determining the lines of effort and action which will tend to elevate the profession itself and to the attainment of individual success in its pursuits.

Perhaps it is too soon in the history of so young a profession to expect very much in the nature of such formulations. To properly enumerate and determine the essential principles must call for the attention of many minds, working each in their own channel but aimed in the same general direction, until the final outcome shall be a fully developed and rounded code of library ethics which will thus be entitled to and gain well deserved recognition and observance.

If, in the views and various thoughts, which I have presumed to set forth at this time, such ideas as have a bearing on this last named topic shall serve as hints to spur on some abler and more philosophically versed person or persons to undertake the task, or serve as a ground upon which to build a foundation code, I shall be greatly pleased.

## WHAT MAY BE DONE FOR LIBRARIES BY THE CITY.

BY THOMAS L. MONTGOMERY, *Trustee Free Library of Philadelphia.*

WHEN, in the course of human events, it became necessary for our people to dissolve the political bonds which connected them with another, pretty much everything was declared a free and an inalienable right with the exception of the public library. Whether it would have escaped the attention of that founder of circulating libraries and everything else that is useful, had it not been a time of extraordinary pressure of business, or whether he purposely neglected it in the belief that a people that had expressed such lofty sentiments as to life, liberty and the pur-

suit of happiness might well be trusted to consider such matters in due time it is not our purpose to discuss. He does not hesitate to give credit to the libraries in his autobiography for making the common tradesmen and farmers as intelligent as most gentlemen in other countries, and for contributing in some degree to the stand so generally made throughout the colonies in defense of their privileges. It was not until about 1850 that the desirability of a city library was suggested to the City Council of Boston by Josiah Quincy, then mayor. The council cautiously Resolved,

"That it would accept any donation from citizens or others for the purpose of commencing a public city library and that whenever the library shall be of the value of \$30,000 it will be expedient for the city to provide a suitable place and arrangements to enable it to be used by the citizens with as great a degree of freedom as the security of the property will permit." In July, 1852, the trustees made a report "that in their opinion the finances of the city will not permit of the erecting of a building and the purchase of an ample library." They suggest "a moderate expenditure on the part of the city for the purchase of books and the compensation of a librarian." It was soon after this that Mr. Bates made his famous gift of \$50,000 worth of books "on condition that the city provide an adequate building which shall be an ornament to the city." A complete history of this institution would seem to be the best possible answer which could be made to the question before us. What can the city do for the free library. With a magnificent collection of 700,000 books, selected under the administration of some of the best men who have dignified our profession, and housed in the most expensive building ever erected by a city for such a purpose, it would appear that the citizen of Boston might rightly exclaim "*Si monumentum quaeris, circumspice.*"

The things that can be done by a city are innumerable; what it *ought* to do and what it *will* do are perhaps more easily dealt with. Thinking I might obtain some information on the subject I asked the question of the librarian of the Free Library of Philadelphia. He settled himself in his chair and assuming the tone of an oracle said that there were three things that the city should do for its library. 1. Provide an adequate appropriation for its maintenance; 2. Provide an extra appropriation for emergencies; and 3. Provide a special appropriation for some particular work which the librarian might be particularly interested in at the time. I asked several other prominent librarians the same question and their answers were to the same purport—namely, if the city could furnish sufficient money they felt themselves fully competent to build up an ideal institution.

We all know as a matter of fact that the

strong libraries of the country have been built up by other means than the mere appropriation of money by city councils, and it is not unreasonable to mention as the first of these the librarian. The city should see to it that this individual is a man (or woman) strong, intellectual and vigorous, without bumptiousness, which is often mistaken for vigor, and with those qualities which will procure for him respectful attention from even those who may be opposed to him. I have often heard addresses made before this Association bewailing the fact that the city librarian had to deal with certain political elements which very much hampered him. I should regard this state of affairs as belonging to the time when the college president was necessarily a professor of moral philosophy whose duties consisted of receiving the senior class for one hour a week to discuss Whewell's "Elements." Such an officer must now be an active administrative power as well as an intellectual entity to at all meet the modern requirements, and in like manner the public librarian should deem it a privilege to meet the representatives of the city government and to have the opportunity of impressing the needs of his institution upon them. There is no better test of the capacity of the man for the great work in which he is engaged.

Speaking practically I would state that in the building up of the Philadelphia Free Library in which I have taken an active interest, the political elements have always responded most generously to our requests, and that the library has been more inconvenienced by the writings and personal influence of certain well-to-do-citizens upon whom the word "paternalism" has acted as a nightmare than by any difficulty with the city government.

While the city should provide means and a proper official to conduct the institution it should take much more care in the selection of the board of trustees than is usually the case. They should be representative men, who not only should be able to assist the librarian in the formation of an educational institution, but also be able to devote a considerable amount of time to matters relating to its policy. If the librarian is not a systematic business man, one of the board or a committee should be delegated to attend to the financial

affairs, as it is absolutely necessary that the accounts shall be at all times in as good condition as in the most punctilious business house.

I would also suggest that a certain modesty be observed in the carrying out of such work by a municipality. It is hard to think of anything that could be said for this proposition when the magnificent buildings of Boston, Chicago and Pittsburgh are taken into consideration; but I would respectfully submit that the feeling of unrest among the great army of industrial workers throughout the civilized world is growing. With the tremendous progress in science and industry these people are claiming that they can see no gain in the position of the common people. This discontent has manifested itself lately in the opposition of the labor organizations of certain towns to the munificent proposition made by one of the most conscientious men who has ever been numbered among the multimillionaires of the world. While it is not always wise to consider too seriously the socialistic murmurings of a few negative people, I submit that it is our duty to consider the effect produced upon the poorest and most scantily clad patron of our libraries.

It is necessary that the library should be

housed in a fireproof building as soon as possible, and the owners of valuable books will always choose such an institution for such gifts as they may make. I believe that the Boston Library has received donations equal to half the cost of the building since it has been housed in Copley square.

Finally, the city should insist that the library be an educational institution and not receive its appropriation for recreation mainly. The extraordinary demand for light fiction in public libraries has led to a very unsatisfactory condition of affairs, and it is not uncommon to find 300 copies of a new novel necessary to at all meet the demand. There is every indication that the public library will be furnished with a happy release from this call upon their resources by the institution of the Book Lovers' Library which has now extended its branches to all the important cities. If this system can be extended on good business principles, the happiness of public libraries would be complete notwithstanding the slight falling off in circulation that might follow.

The motto of every such institution should be: *Libri libere liberis*, which being freely translated, means: "A free people should have open shelves if possible."

#### WHAT MAY BE DONE FOR LIBRARIES BY THE STATE.\*

By E. A. BIRGE, *President Board of Directors, Madison (Wis.) Public Library.*

THE relation of the state to libraries may be considered from three points of view. The first and oldest library function of the state has been the maintenance of a state library, usually begun for the convenience of the legislature and in many states enlarged into a general library. With this function has also gone the indirect support of libraries for historical and scientific societies, incorporated by the state and in some degree representing it. Much might be said on possible lines of work for the state in this direction, but as this function is the oldest and best understood, it may be named and passed without further discussion.

Second, the state holds a relation to the local libraries in communities which are supporting free libraries without aid from the state. The state aids these libraries by enacting proper laws for their organization. In general, the statutes should be such as will give the local library the best opportunity for organization, and will leave it when organized the largest amount of freedom in doing its work. The earlier library laws of the states have very generally contained the provision that, in order to establish a library in a community, the proposition must be accepted by a majority of the voters at an election. This provision has been found disadvantageous in Wisconsin, and was eliminated from our li-

\* Abstract.

brary law in 1897. Experience has shown that it is better to leave the establishment of a library, like other public works of necessity and utility, to the common council, or other representatives of the people in the larger towns and cities, rather than to commit the proposition to the chance of a general election.

The third function of the state with reference to libraries is that which may be called library extension. Here the state acts directly to aid in the establishment of libraries and the extension of library work in the communities which would otherwise lack libraries. The necessity for this work has become apparent to the more progressive states of the Union within recent years. The justification of this work lies in two main reasons. First, libraries continue for the older youth of the community and for adults the education which the state requires for children. It is neither fair nor right for the state to maintain a system of education which develops a love of knowledge and of reading, and then leave the community without the means for continuing in later youth the development begun in childhood. Second, it is known that the intellectual isolation of the rural communities is one of the main reasons for the much-lamented drift from the country into the cities, and it has been found that the establishment of libraries affords one of the most important means of bringing these small communities into intellectual touch with the world.

The states then which have undertaken this work of library extension have usually done so by means of the library commission. The first commission was established by Massachusetts in 1890. Seventeen states had established such commissions by the end of 1900—more than half of them in the two years preceding that date. I have no statistics regarding the establishment of such commissions in 1901. The work of these commissions may be either advisory or missionary, aiding in the establishment of libraries in the smaller communities which are able to establish and maintain them under the guidance and advice of the commission, and directly furnishing library facilities to the small-

est and weakest communities. In certain states direct state aid is given to the smaller libraries, notably in Massachusetts, where each town library established under the rules of the commission receives books to the amount of \$100. In some states aid is given in the purchase of books. The direct furnishing of libraries is done mainly by means of travelling libraries. So far as I can learn, these are now distributed by six states. The system has grown throughout the Union, in various manifestations, and its influence in bringing books to the communities that most lack and need them has been of the utmost value. This work is one of the greatest importance, and yet I believe it is one which will ultimately pass into the hands of the counties or smaller governmental bodies than the state.

Lastly, the commissions are aiding in the library work by the establishment of library schools. In Wisconsin a summer school for library training has been held for the past seven years, and represents a class of work which it seems important that each state should undertake, namely: the training of librarians for the smaller libraries in which the salaries paid are necessarily so small that the librarians cannot afford the expense of a complete course in library training. This instruction applies especially to persons already in charge of small libraries throughout the state, who have not had the opportunity to secure professional training for their work, and it is of great value in bringing them in touch with library effort and setting higher standards of purpose and efficiency. Experience has shown that in a two months' summer session instruction can be given of the greatest value to those who are to have charge of this class of libraries.

In this department of library extension which the states have been entering upon during the past decade lies the most important work which the state can undertake for libraries. The work of the library commissions means a systematic employment of the library as an educational and social factor in the progress of the people. This is the true mission of the library, and the most important function of the state lies in effectively aiding it to perform this work.

## WHAT MAY BE DONE FOR LIBRARIES BY THE NATION.

BY HERBERT PUTNAM, *Librarian of Congress.*

YOU have had suggestions as to what may be done for libraries by the city and what by the state. Whatever is left over — if there is anything left over — I am to treat as something that may be done by the nation — the nation not as an aggregate of its parts, but as a unit, acting through its central authority. There is a disposition to contend that *everything* which may be more effectively or more economically done by a central authority for the larger area should be undertaken by that authority. I am not prepared to go so far. There may be a value in local effort that will repay its greater cost. But in an educational work which involves the accumulation of material some of which is exceedingly costly, only part of which is constantly in use, and little of which perishes by use; a work whose processes are capable of organization on a large scale and the application of co-operative effort: there must be certain undertakings which, relatively speaking, are possible only if assumed by a central authority. It is such undertakings, for the largest area, that I am asked to discover and set forth.

To do so involves consequences which may be inconvenient. For a possible service means a correlative duty. And as I myself to a degree represent here the central authority in question, whatever I state as a service appropriate for that authority, I shall have to admit as a duty in which I must share. I shall try to be candid. But under the circumstances I cannot be expected to be more than candid.

In some respects the Federal Government of the United States has already influenced the constitution, resources and service of our public libraries. It has enacted laws which, having for their primary purpose the protection of authors and publishers, benefit libraries by encouraging the manufacture of books soundly, substantially and honestly made. It has favored public libraries by exempting from tariff duty books imported for their use. It has encouraged the study of the classics by laying a penalty upon the general

importation of books less than twenty years old. In its executive capacity it is itself investigator, author, publisher, manufacturer, distributor, statistician, bibliographer, and librarian. It maintains at Washington, with a generosity not paralleled by any other government, bureaus for scientific research; it compiles, publishes, and freely distributes the results of this research. It is the greatest publisher in the world, and the largest manufacturer of books. In a single publication, repeated each year, it consumes over a million pounds of paper stock; and it maintains a bureau whose purpose is to replenish the forests which as publisher it thus depletes. It distributes gratuitously to the libraries of the United States each year over 300,000 volumes, embodying the results of its research, its legislative proceedings, and an account of its administrative activities. It maintains a bureau for the investigation of problems in education, for the accumulation and dissemination of information concerning the work of educational institutions; and it has included the public libraries of this country among such educational institutions. This bureau has issued three reports tabulating statistics concerning them, one also (in 1876) summarizing their history and two (in 1876 and in 1893) containing essays which embody the best contemporary opinion as to library equipment and methods. It has published as a document the A. L. A. list of best books to form the basis of a public library.

Through its bureau of documents it is seeking to index and adequately to exhibit its own publications, to facilitate their distribution to libraries and to afford to libraries as to federal documents a clearing house for duplicates.

All such services are obviously appropriate for the national authority and may doubtless be continued and extended. If the interchange of books among libraries is to be facilitated by special postal regulations this can be accomplished by the national authority alone.

But in the case of a state a service has been described which is to be rendered to local libraries by the library which the state itself owns and maintains. Now the federal government also owns and maintains libraries. What may be demanded of these? Certain precedents have already been established. The library of the Surgeon General's office—the most comprehensive in the world within its special field—sends its books to members of the medical profession throughout the United States, relieving just so much the burden upon local libraries; and it has issued a catalog which is not merely in form and method efficient, but is so nearly an exhibit of the entire literature of the medical sciences that it renders unnecessary duplication of cataloging and analytical work within the field which it covers. This catalog has conferred a general benefit not equalled by any bibliographic work within any other department of literature. It is perhaps the most eminent bibliographic work yet accomplished by any government. The cost of its mere publication—which is the cost chargeable to the general benefit—has already exceeded \$250,000.

But this library is but one of several collections maintained by the Federal Government; the aggregate of which is already nearly two million volumes. In each federal department and bureau there is a library. And there is a central collection which in itself is already the largest on the western hemisphere. It was created as a legislative library—for the use of both Houses of Congress. It is still called the Library of Congress. But it is now being referred to as something more. The government has erected for it a building which is the largest, most elaborate, and most costly yet erected for library purposes. The seven million dollars which it cost has been paid not by the District of Columbia, but by the country at large. No such sum would have been requisite for a building to serve Congress alone. It seems to intend a library that shall serve the country at large, if there is any such thing possible. In fact the library is already being referred to as the National Library of the United States. What does this mean? or rather, what *may* this mean? One naturally looks abroad—to the foremost of national libraries.

The British Museum is a huge repository of material. In scope it is universal. Its purpose is accumulation, preservation, and the aid of research by accredited persons, upon its own premises. Its service is purely responsive. It has printed catalogs of its own collections, but does not undertake bibliographic work general in nature, nor engage in co-operative bibliographic undertakings. It lends no books.

But I fear you will hardly be satisfied with the analogy. The British Museum, you will say, is placed in a city which is not merely the capital of the British Empire, but the metropolis; the literary metropolis also of the Anglo-Saxon race. The Library of Congress is at the capital of the United States. But this capital is not itself a metropolis. No student in Great Britain has to travel over 500 miles to reach the British Museum. A student in the United States may have to travel as much as 3000 miles to reach the Library of Congress. The area which supports the national library of Great Britain is but 100,000 square miles; that which supports the National Library of the United States is over 3,000,000 square miles. The conditions differ, and therefore, you will say, the obligation. If there is any way in which our National Library may "reach out" from Washington it should reach out. Its first duty is no doubt as a legislative library—to Congress. Its next is as a federal library to aid the executive and judicial departments of the government and the scientific undertakings under governmental auspices. Its next is to that general research which may be carried on at Washington by resident and visiting students and scholars: which in American history, political and social science, public administration, jurisprudence and international law is likely to make Washington its center, and which, under the auspices of the Washington Memorial Institution—that new project for post graduate study involving the use of the scientific collections and scientific experts at Washington—is likely to be organized in various branches of the natural and physical sciences as well. But this should not be the limit. There should be possible also a service to the country at large: a service to be extended through the libraries which are

the local centers of research involving the use of books. That claim may be made. Now what at Washington might be useful to these libraries?

(A lively imagination is not requisite.) Suppose there could be a collection of books universal in scope, as no local library with limited funds and limited space can hope to be: a collection that shall contain also particularly (1) original sources, (2) works of high importance for occasional reference, but whose cost to procure and maintain precludes their acquisition by a local library pressed to secure the material of ordinary and constant need, and (3) the "useless" books; books not costly to acquire, but of so little general concern as not to justify cataloging, space and care in each local library if only they are known to be preserved and accessible somewhere.

Such a collection must include also the general mass of books sought and held by local libraries — the books for the ordinary reader; the daily tools of research. Its maintenance will involve processes — of classification and cataloging — highly costly. Suppose the results of these processes could be made generally available, so as to save duplication of such expenditure upon identical material held by local libraries?

A collection universal in scope will afford opportunity for bibliographic work not equalled elsewhere. Such work centered there might advance the general interest with the least aggregate effort. The adequate interpretation of such a collection will involve the maintenance of a corps of specialists. Suppose these specialists could be available to answer inquiries from all parts of the country as to what material exists on any particular subject, where it is, how it may be had, how most effectively it may be used?

There are special collections already existent in various localities in the United States and likely to come into being through special local advantage or incentive, or the interest of private collectors, or private endowment — which cannot be duplicated at Washington. Suppose there could be at Washington a bibliographic statement of that which is peculiar to each of these collections; in brief, a catalog of the books in the United States —

not of every library, not of every copy of every book, but of every *book* available for an investigator?

There are various bibliographic undertakings which may be co-operative. Suppose there could be at Washington a central bureau — with approved methods, standard forms, adequate editorial capacity, and liberal facilities for publication — which could organize and co-ordinate this work among the libraries of the United States and represent them in such of it as — like the new Royal Society index — is to be international?

There is the exchange of material duplicated in one library, needed by another. Suppose there could be at Washington a bureau which would serve as a clearing house for miscellaneous duplicates as the Bureau of Documents serves for documents? It might accomplish much without handling a single article; it might, like a clearing house proper as it were, set debit against credit, *i. e.*, compare the deficiencies in one library with the surplus in another and communicate the results to the institutions interested. It might do this upon slip lists sent in by each — of duplicates and of particular deficiencies — in sets, for instance. One of my associates has been guilty of this very suggestion. It is likely to bring something upon his head. He may have his choice between live coals and the ashes of repentance.

Now those are some of the things which might be asserted as the duty of Washington to the country at large. I have touched them as lightly as possible: but there they are. And we may not be able to avoid them. Nay, we seem to be drifting toward them. To some of them we are apparently already committed.

There is the building: that in itself seems to commit us. There is equipment. There are books. As regards any national service the federal libraries should be one library. They contain nearly two million volumes. The Library of Congress contains net some 700,000 books and a half million other items. It has for increase (1) deposits under the copyright law, (2) documents acquired through distribution of the federal documents placed at its disposal for exchange — formerly 50 copies of each, now 100, (3) books and

society publications acquired by the Smithsonian through its exchanges, (4) miscellaneous gifts and exchanges, and, (5) purchases from appropriations. These have increased from \$10,000 a year prior to 1897 to \$70,000 for the year 1901-2.

Such resources are by no means omnipotent. No resources can make absolutely comprehensive a library starting its deliberate accumulations at the end of the 19th century. Too much material has already been absorbed into collections from which it will never emerge.

But universality in scope does not mean absolute comprehensiveness in detail. With its purchasing funds and other resources the Library of Congress bids fair to become the strongest collection in the United States in bibliography, in Americana (omitting the earliest), in political and social science, public administration, jurisprudence. If any American library can secure the documents which will exhibit completely legislation proposed and legislation enacted it should be able to. As depository of the library of the Smithsonian it will have the most important collection — perhaps in the world — of the transactions and proceedings of learned societies; and, adding its own exchanges and subscriptions, of serials in general. With theology it may not especially concern itself nor with philology to the degree appropriate to a university library. Medicine it will leave as a specialty to the library of the Surgeon-General's office, already pre-eminent, Geology to the library of the Geological Survey. Two extremes it may have to abstain from — so far as deliberate purchase is concerned: (1) the books merely popular, (2) the books merely curious. Of the first many will come to it through copyright; of the second many should come through gift. (Perhaps in time the public spirit of American collectors and donors may turn to it as the public spirit of the British turns to the National Library of Great Britain.) Original sources must come to it, if at all, chiefly by gift. Manuscript material relating to American history it has, however, bought, and will buy.

Otherwise, chiefly printed books. Of these, the useful books; of these again, the books useful rather for the establishment of the fact

than for the mere presentation of it — the books for the advancement of learning, rather than those for the mere diffusion of knowledge.

Lastly there is an organization. Instead of 42 persons, for all manner of service, there are now 261, irrespective of printers, binders, and the force attending to the care of the building itself.

The copyright work is set off and interferes no longer with the energies of the library proper. There is a separate division having to do with the acquisition of material, another — of 67 persons — to classify and catalog it. There are 42 persons attending to the ordinary service of the reading room as supplied from the stacks, and there are eight special divisions handling severally the current newspapers and periodicals, the documents, manuscripts, maps, music, prints, the scientific publications forming the Smithsonian deposit, and the books for the blind. There is a Division of Bibliography whose function is to assist in research too elaborate for the routine service of the reading room, to edit the library publications, and to represent the library in co-operative bibliographic undertakings. There is now within the building, besides a bindery, with a force of 45 employees, a printing office, with a force of 21. The allotment for printing and binding, in 1896 only \$15,000, is for the coming year \$90,000.

The immediate duty of this organization is near at hand. There is a huge arrear of work upon the existing collection — necessary for its effective use, and its intelligent growth. It must be newly classified throughout; and shelf listed. The old author slip catalog must be revised and reduced to print. There must be compiled a subject catalog, of which none now exists. Innumerable gaps — that which is crooked can be made straight, but that which is wanting cannot be numbered — innumerable gaps are to be ascertained and filled. A collection of reference books must be placed back at the Capitol, with suitable apparatus, to bring the library once more into touch with Congress and enable it to render the service to Congress which is its first duty. The other libraries of the District must be brought into association — not by gathering

their collections into the Library of Congress, but by co-ordinating processes and service. The Library of Congress as the center of the system can aid in this. It can strengthen each departmental library by relieving it of material not necessary to its special work. It can aid toward specialization in these departmental libraries by exhibiting present unnecessary duplication. (It is just issuing a union list of serials currently taken by the libraries of the District which has this very purpose.) It can very likely print the catalog cards for all the government libraries— incidentally securing uniformity, and a copy for its own use of each card— which in time will result in a complete statement within its own walls of the resources of every departmental library in Washington. It will supply to each such library a copy of every card which it prints of a book in its own collections relating to the work of the bureau which such library serves.

To reduce to order the present collection, incorporating the current accessions, to fill the most inconvenient gaps, to supply the most necessary apparatus in catalogs and to bring about a relation among the libraries of Washington which shall form them into an organic *system*: this work will of itself be a huge one. I have spoken of the equipment of the Library of Congress as elaborate, the force as large, and the appropriations as generous. All are so in contrast to antecedent conditions. In proportion to the work to be done, however, they are not merely not excessive, but in some respects far short of the need. To proceed beyond those immediate undertakings to projects of general service will require certain equipment, service, and funds not yet secured, and which can be secured only by a general effort. But the question is not what can be done, but what *may* be done—in due time, eventually.

A general distribution of the printed cards: That has been suggested. It was suggested a half century ago by the Federal Government through the Smithsonian Institution. Professor Jewett's proposal then was a central bureau to compile, print and distribute cards which might serve to local libraries as a catalog of their own collections. Such a project is now before this Association. It may

not be feasible: that is, it might not result in the economy which it suggests. It assumes a large number of books to be acquired, in the same editions, by many libraries, at the same time. In fact, the enthusiasm for the proposal at the Montreal meeting last year has resulted in but sixty subscriptions to the actual project.

It may not be feasible. But if such a scheme can be operated at all it may perhaps be operated most effectively through the library which for its own uses is cataloging and printing a card for every book currently copyrighted in the United States, and for a larger number of others than any other single institution. Such must be confessed of the Library of Congress. It is printing a card for every book currently copyrighted, for every other book currently added— for every book reached in re-classification— and thus in the end for every book in its collection. It is now printing, at the rate of over 200 titles a day— 60,000 titles a year. The entry is an author entry, in form and type accepted by the committee on cataloging of the A. L. A. The cards are of the standard size— 3 x 5 inches— of the best linen ledger stock. From 15 to 100 copies of each are now printed. It would be uncandid to say that such a number is necessary for the use of the library itself, or of the combined libraries at Washington. The usefulness of copies of them to any other library for incorporation in its catalogs must depend upon local conditions: the style, form, and size of its own cards, the number of books which it adds yearly, the proportion of these which are current, and other related matters. On these points we have sought statistics from 254 libraries. We have them from 202. With them we have samples of the cards in use by each, with a complete author entry. Having them we are in a position really to estimate the chances. I will not enter into details. Summarily, it appears that our cards might effect a great saving to certain libraries and some saving to others, and would entail a mere expense without benefit to the remainder— all of which is as might have been guessed.

The distribution suggested by Professor Jewett and proposed by the A. L. A. had in view a saving to the recipient library of cataloging and printing on its own account. It

assumed a subscription by each recipient to cover the cost of the extra stock and presswork. There is conceivable a distribution more limited in range, having another purpose. The national library wishes to get into touch with the local libraries which are centers for important research. It wishes the fullest information as to their contents; it may justifiably supply them with the fullest information as to its own contents. Suppose it should supply them with a copy of every card which it prints, getting in return a copy of every card which they print? I am obliged to disclose this suggestion: for such an exchange has already been begun. A copy of every card printed by the Library of Congress goes out to the New York Public Library: a copy of every card printed by the New York Public Library comes to the Library of Congress. In the new building of the New York Public Library there will be a section of the public card catalog designated The Catalog of the Library of Congress. It will contain at least every title in the Library of Congress not to be found in any library of the metropolis. In the Library of Congress a section of the great card catalog of American libraries outside the District will be a catalog of the New York Public Library.

I have here a letter from the librarian of Cornell University forwarding a resolution of the Library Council (composed in part of faculty members) which requests for the university library a set of these cards. Mr. Harris states that the purpose would be to fit up cases of drawers in the catalog room, which is freely accessible to any one desiring to consult bibliographical aids, and arrange the cards in alphabetical order by authors, thus making an author catalog of the set. He adds "The whole question has been rather carefully considered and the unanimous sense of the council was that the usefulness of the catalog to us would be well worth the cost of the cases, the space they would occupy, and the time it would take to arrange and keep in order the cards."

There is a limit to such a distribution. But I suspect that it will not stop with New York and Ithaca.

There is some expense attendant on it. There is the extra stock, the presswork, the

labor of sorting and despatching. No postage, however, for the Library of Congress has the franking privilege, in and out. The results however: one cannot deny them to be attractive. At Washington a statement of at least the distinctive contents of every great local collection. At each local center of research a statement of the distinctive contents of the national collection. An inquirer in Wisconsin writes to Washington: is such a book to be had in the United States; must he come to Washington for it, or to New York? — No, he will find it in Chicago at the Newberry or the Crerar.

If there can be such a thing as a bibliographic bureau for the United States, the Library of Congress is in a way to become one; to a degree, in fact, a bureau of information for the United States. Besides routine workers efficient as a body, it has already some expert bibliographers and within certain lines specialists. It has not a complete corps of these. It cannot have until Congress can be made to understand the need of them. Besides its own employees, however, it has within reach by telephone a multitude of experts. They are maintained by the very government which maintains it. They are learned men, efficient men, specially trained, willing to give freely of their special knowledge. They enter the government employ and remain there, not for the pecuniary compensation, which is shamefully meagre, but for the love of the work itself and for the opportunity for public service which it affords. Of these men, in the scientific bureaus at Washington, the National Library can take counsel: it can secure their aid to develop its collections and to answer inquiries of moment. This will be within the field of the natural and physical sciences. Meantime within its walls it possesses already excellent capacity for miscellaneous research, and special capacity for meeting inquiries in history and topography, in general literature, and in the special literature of economics, mathematics and physics. It has still Ainsworth Spofford and the other men, who with him, under extraordinary disadvantages, for thirty-five years made the library useful at the Capitol.

The library is already issuing publications in book form. In part these are catalogs of its

own contents; in part an exhibit of the more important material in existence on some subject of current interest, particularly, of course, in connection with national affairs. Even during the period of organization fifteen such lists have already been issued. They are distributed freely to libraries and even to individual inquirers.

But there may be something further. The distribution of cards which exhibit its own contents or save duplication of expense elsewhere, the publication of bibliographies which aid to research, expert service which in answer to inquiry points out the best sources and the most effective methods of research: all these may have their use. But how about the books themselves? Must the use of this great collection be limited to Washington? How many of the students who need some book in the Library of Congress—perhaps there alone—can come to Washington to consult it at the moment of need? A case is conceivable: a university professor at Madison or Berkeley or San Antonio, in connection with research important to scholarship, requires some volume in an unusual set. The set is not in the university library. It is too costly for that library to acquire for the infrequent need. The volume is in the National Library. It is not at the moment in use at Washington. The university library requests the loan of it. If the National Library is to be the national library—?

There might result some inconvenience. There would be also the peril of transit. Some volumes might be lost to posterity. But after all we are ourselves a posterity. Some respect is due to the ancestors who have saved for *our* use. And if one copy of a book possessed by the federal government and within reasonable limits subject to call by different institutions, might suffice for the entire United States—what does logic seem to require—and expediency—and the good of the greater number?

The Library of Congress is now primarily a reference library. But if there be any citizen who thinks that it should never lend a book—to another library—in aid of the higher research—when the book can be spared from Washington and is not a book within the proper duty of the local library to

supply—if there be any citizen who thinks that for the National Library to lend under these circumstances would be a misuse of its resources and, therefore, an abuse of trust—he had better speak quickly, or he may be too late. Precedents may be created which it would be awkward to ignore.

Really I have been speaking of the Library of Congress as if it were the only activity of the federal government of interest to libraries. That, however, is the fault of the topic. It was not what might be done for science, for literature, for the advance of learning, for the diffusion of knowledge. It was merely what might be done for *libraries*; as it were, not for the glory of God, but for the advancement of the church. We have confidence in the mission of libraries and consider anything in aid of it as good in itself.

Their most stimulating, most fruitful service must be the direct service. The service of the national authority must in large part be merely indirect. It can meet the reader at large only through the local authority. It can serve the great body of readers chiefly through the local libraries which meet them face to face, know their needs, supply their most ordinary needs. Its natural agent—its librarians at least must think this—is its own library—the library which if there is to be a national library not merely of, but *for* the United States—must be that library.

*Must become* such, I should have said. For we are not yet arrived. We cannot arrive until much preliminary work has been done, and much additional resource secured from Congress. We shall arrive the sooner in proportion as you who have in charge the municipal and collegiate libraries of the United States will urge upon Congress the advantage to the interests you represent, of undertakings such as I have described. To this point we have not asked your aid. In the equipment of the library, in the reconstruction of its service, in the addition of more expert service, in the improvement of immediate facilities, our appeal to Congress has been based on the work to be done near at hand. I have admitted to you the possibility of these other undertakings of more general concern. If they commend themselves to you as proper and useful—the appeal for them must be primarily your appeal.

## THE TRUSTEESHIP OF LITERATURE—I.

BY GEORGE ILES, *New York City.*

SIX months ago the curtain descended upon what is likely to be accounted the most memorable century in the annals of mankind. So salient are three of its characteristics that they challenge the eye of the most casual retrospection. First of all, we see that knowledge was increased at a pace beyond precedent, to be diffused throughout the world with a new thoroughness and fidelity. Next we must observe how republican government passed from the slender ties spun in the times of Washington, Jefferson and Adams, to the intimate and pervasive cords of to-day, when, as never before, the good of the bee is bound up with the welfare of the hive. Parallel with this political union of each and all there was a growth of free organization which, in every phase of life, has secured uncounted benefits which only joined hands may receive. Fresh torches of light fraternally borne from the centers of civilization to its circumference have tended to bring the arts and ideals of life everywhere to the level of the best. These distinctive features of the nineteenth century were in little evidence at its dawn, but they became more and more manifest with each succeeding decade. In American librarianship, as in many another sphere of labor, more was accomplished in the last quarter of the century than in the seventy-five preceding years.

It is as recently as 1852 that Boston opened the doors of the first free public library established in an American city. Its founders were convinced that what was good for the students at Harvard, the subscribers to the Athenæum, was good for everybody else. Literature, they felt, was a trust to be administered not for a few, but for the many, to be, indeed, hospitably proffered to all. To this hour, by a wise and generous responsiveness to its ever-growing duties, the Boston foundation remains a model of what a metropolitan library should be. As with the capital, so with the state; to-day Massachusetts is better provided with free public libraries than any
